## **MATERIALS IN THE EISENHOWER LIBRARY HOLDINGS RELATING TO THE 1959 CRANBERRY SCARE**

### Introduction

On November 9, 1959, the Secretary of Health, Education and Welfare (HEW), Arthur S. Flemming, made the following announcement:

The Food and Drug Administration today urged that no further sales be made of cranberries and cranberry products produced in Washington and Oregon in 1958 and 1959 because of their possible contamination by a chemical weed killer, aminotriazole, which causes cancer in the thyroids of rats when it is contained in their diet, until the cranberry industry has submitted a workable plan to separate the contaminated berries from those that are not contaminated.

The announcement caused a great furor throughout the U. S. that resulted in the removal of cranberry products from the shelves of grocery stores, menus of restaurants and the Thanksgiving tables of American families.

The Dwight D. Eisenhower Library has a considerable amount of documentation on this one particular environmental issue that arose during the 1950s. This guide lists and briefly describes materials found in the Library's holdings pertaining to the cranberry crisis.

There are very few secondary sources on the cranberry crisis of 1959 located in the Eisenhower Library. The book collection does contain a copy of Silent Spring, by Rachel Carson (Cambridge, Mass.: The Riverside Press, 1962); A Scientist at the White House: The Private Diary of President Eisenhower's Special Assistant for Science and Technology, by George B. Kistiakowsky, (Harvard University Press, Cambridge, Mass. and London, England, 1976); issues of Life, The New Republic, Newsweek, Time, U. S. News and World Report magazines; and The New York Times and Washington Post newspapers on microfilm
