- I. <u>Narrative Description:</u> The Naval War College provides professional Navy and Joint military education, research, analysis and gaming, and programs to:
 - Prepare U.S. and international military officers and civilians to meet national security challenges as senior leaders in naval, joint, interagency and multinational arenas.
 - Enable students to develop and execute national military strategy and conduct maritime and joint operations applying sound strategic and operational art.
 - Help the Chief of Naval Operations (CNO) define the future of the Navy through Research, Analysis and Gaming.
- II. <u>Description of Operations Financed</u>: The Naval War College provides professional military education to prepare military officers and selected civilians for positions of significant responsibility within the national security framework. The distance education programs, derived from the resident curriculum, involve a rigorous course of study intended to increase the intellectual flexibility of officers through a clear understanding of the fundamental principles of national security affairs during peace and war. Professional capabilities are enhanced through the study of naval, joint and multi-national operating domains.

To meet these goals the College has developed a set of distance learning programs based upon the College's three core courses. The National Security Decision Making course focuses on achieving appropriate force structure within national resource limitations, evaluation of the economic, political and organizational factors and international and domestic environments that influence major resource allocation decisions. The Strategy and Policy course teaches students to think critically and understand the fundamentals of military strategy and national policy. Joint Maritime Operations prepares officers to think operationally and understand the capabilities of joint forces, how to select, allocate, and task air, land, sea, space and special operations in joint and combined operations.

The College's Distance Education programs includes the Fleet Seminar Program, the web-enabled program, the CD-ROM based correspondence program, and Naval War College at Naval Postgraduate School. In providing this education, the College expends funds for civilian salaries, textbooks, copyright and printing, equipment, academic coordination and supporting functions.

PROFESSIONAL MILITARY EDUCATION SCHOOLS

Service: United States Navy School: Naval Postgraduate School

I. Narrative Description:

The Naval Postgraduate School supports a program of mid-career, professional, graduate education in order to meet the Navy and Marine Corps requirements for a technically qualified, intellectually equipped officer corps. The graduate education provided by the Naval Postgraduate School plays a critical role in fulfilling the Navy's need for career-long development of Naval officers, producing warriors who are highly advanced, scientifically and technologically, across systems and platforms and with well-developed problem solving skills.

The Naval Postgraduate School is an accredited academic research institution whose emphasis is on study and research programs relevant to the Navy's interests and other arms of the Department of Defense. The programs are designed to accommodate the unique requirements of the military, including time to acquire Joint Professional Military Education (JPME Phase I) while in residence. The Naval Postgraduate School transitions officers from one set of skills developed in their undergraduate education to another that meets the Navy's current needs. Selection of officers for graduate education is based upon outstanding professional performance as an officer, promotion potential, and a strong academic background.

Curricula are designed to meet the specific requirements of the military communities who sponsor each individual curriculum. Programs adapt rapidly to meet the sponsor's changing requirements, such as increased technical content in the Special Operations/Low Intensity Conflict (SO/LIC) curricula or the developing curriculum in information technology for the IT warrior community. Naval Postgraduate School curricula are designed for military relevance. Classified courses are taught throughout the various curricula. Many curricula are devoted entirely to specialized military topics not available elsewhere, which include Combat Systems, Information and Electronic Warfare, Joint Command, Control, Communications, Computers, and Intelligence (C4I) Systems, Meteorology and Oceanography (METOC), National Security and Intelligence, Military Operations Research, Space Systems Programs, Special Operations, and Undersea Warfare. The Naval Postgraduate School manages the civilian institution program for Naval officers attending courses in civilian institutions; Law Education program, and Officer Short Courses.

The Naval Postgraduate School additionally provides: graduate programs via video teleconferencing; defense resource management programs; Practical Comptrollership courses; and education programs tailored for international partnering countries on civilian control of the military. Most of these programs are externally funded but maximize the educational talent that resides at the School.

II. Description of Operations Financed:

Located in Monterey, California, the Naval Postgraduate School campus covers 627 acres of land. Approximately 1,500 students attend the resident graduate degree program. The student body promotes a joint and coalition environment, represented by officers from all of the five U.S. uniformed services (Navy, Marine Corps, Air Force, Army and Coast Guard), international officers from approximately 30 other countries, as well as a small number of federal civilian employees and defense contractors. Beyond the resident graduate education mission, there are on-going defense related research projects with faculty and student involvement; enrollments serviced by the School's defense related short courses, conferences, international mobile education teams and distributed learning programs. The programs that support Naval officer education are financed as part of the professional development education program.

The faculty is drawn from a broad diversity of educational institutions and represents a prestigious collection of scholars of whom over 99% have a Ph.D. The site houses state-of-the-art laboratories, numerous academic buildings, a library, government housing and recreational facilities. The Naval Postgraduate School offers classes leading to Master of Arts, Master of Science, Engineering, Doctor of Philosophy and Doctor of Engineering accredited degree granting in a variety of fields and provides defense related research, short courses, conferences and other educational programs.

Explanation of Funding Changes (FY 2006 to FY 2009)

The decrease in Management & Professional Support Services between FY06 and FY07 can be associated with Supplemental funding being used for CAAS in FY06 for GWOT. The increase in Management & Support Services between FY07 and FY08 can be associated with an increase due to the implementation/deployment, Change Management, and training of Converged ERP, including technical and customer/user support. The decrease in Engineering and Technical Services between FY06 and FY07 can be associated with Supplemental funding being used for CAAS in FY06 for GWOT. The increase in Engineering and Technical Services between FY07 and FY08 can be attributed to a increase in AEGIS program support due to expansion and maturing of the program . The DoN is currently pursuing efficiencies in Contractor Support Services for FY08 and FY09.

Explanation of Funding Changes (FY 2006 to FY 2009)

The decrease in Management & Professional Support Services between FY06 and FY07 can be associated with Work Year reductions from workforce shaping initiatives. The increase in Management & Professional Support Services between FY08 and FY09 can be attributed to increases resulting from the USN assuming an increasing portion of the JPATS program management responsibilities from the USAF. The MPSS provide specialized knowledge/expertise with regards to site activation support, program management support, logistics support, and technical publication support which are unavailable through in-house sourses to support USN unique requirements. In prior years, efforts were funded jointly by USAF and USN in support of the joint program per direction of OSD and PBD funding transfer. The decrease in Engineering and Technical Services between FY07 and FY08 can be attributed to no CAAS funding in FY08 for the E-2C which reflects the end of the E-2C procurement program. The DoN is currently pursuing efficiencies in Contractor Support Services for FY08 and FY09.

1/ FY 2006 actuals include supplemental.

The Ship DLRs and Consumable changes FY 2008 are primarily a result of a net increase in the number and scope of overhauls and ship maintenance availabilities.

The Aviation DLRs and Consumable changes in FY 2008 are a result of additional naval flight hours to achieve acceptable readiness levels and ensure a T-Rating of T-2.5 surge readiness level. Additionally, the changes in force structure of various types/model series of aircraft can be attributable to portions of the increases experienced in FY 2008.

Naval Shipyards President's Budget 2008

Description

Activity Group Function:

Naval Shipyards provide logistics support for assigned ships and service craft; perform authorized work in connection with construction, overhaul, repair, alteration, dry-docking and outfitting of ships and craft as assigned; perform design, manufacturing, refit and restoration, research, development and test work, and provide services and material to other activities and units as directed by competent authority.

Activity Group Composition:

This budget reflects two naval shipyards operating under mission funding in FY 2006 through FY 2008 and two additional naval shipyards transitioning from the Navy Working Capital Fund (NWCF) to mission funding in FY 2007. These activities and their locations are:

FY 2006 to FY 2008

Pearl Harbor Naval Shipyard and Intermediate Maintenance Facility (PHNSY & IMF) Pearl Harbor, HI Puget Sound Naval Shipyard & Intermediate Maintenance Facility (PSNS & IMF) Bremerton, WA FY 2007 to FY 2008

Norfolk Naval Shipyard (NNSY) Portsmouth, VA Portsmouth Naval Shipyard (PNSY) Kittery, ME

Residual NWCF data for three naval shipyards, (Puget Sound, Norfolk, and Portsmouth) are reported as part of the NWCF justification of estimates Pearl Harbor Naval Shipyard and Intermediate Maintenance Facility located in Pearl Harbor Hawaii provides both depot level maintenance and fleet maintenance for submarines and surface ships assigned to the region.

Section 332 of the 2007 DoD Authorization Act requires a minimum capital investment for all depots, including the Naval Shipyards. Below is the summary for all four Naval Shipyards:

Workload

Workload changes are consistent with fleet requirements and also reflect shipyard process improvements. FY 2006 actual workload reflects a 3.9 percent increase above the FY 2005 estimate included in the FY 2007 President's Budget Estimate. The majority of the increase during FY 2006 execution is directly due to work associated with complex submarine availabilities.

4. Workforce

The majority of the Pearl Harbor workload is highly complex submarine work that requires a skilled workforce. In order to have a skilled workforce ready to accomplish this workload the activity is undertaking appropriate personnel and training initiatives. The Naval Shipyard Business plan, currently being finalized by Naval Sea Systems Command, is expected to add workload to Naval Shipyards increasing shipyard End Strength above the level shown in this exhibit.

PHNSY & IMF Apprentice Program

The shipyard apprentice program is a vital element of shipyard workforce revitalization. Focusing on blue-collar production trade skills it results in employees that are Department of Labor certified journeymen with technical certificates or associate degrees. Planned apprentice program enrollment is as follows:

| Item | <u>PY</u> | <u>CY</u> | <u>BY</u> |
|-------------------------|------------------|-----------|-----------|
| First year apprentices | 139 | 119 | 100 |
| Second year apprentices | 145 | 138 | 117 |

| Fourth year apprentices | 119 | 110 | 138 |
| Total Workforce | 516 | 508 | 491 |

Note: Second and subsequent year apprentice numbers for CY and BY are based on normal attrition from initial hires.

Apprentice program costs include apprentice salaries while in a training status, tuition, books, and other instructional costs.

4. Workforce

The majority of the Norfolk workload is highly complex carrier and submarine work that requires a skilled workforce. In order to have a skilled workforce ready to accomplish this workload the activity is undertaking appropriate personnel and training initiatives. The Naval Shipyard Business plan, currently being finalized by Naval Sea Systems Command, is expected to add workload to Naval Shipyards increasing shipyard End Strength above the level shown in this exhibit.

| Military End Strength | 46 | 46 |
| Total Workforce | 7.480 | 6,976 |

NNSY Apprentice Program

The shipyard apprentice program is a vital element of shipyard workforce revitalization. Focusing on blue-collar production trade skills it results in employees that are Department of Labor certified journeymen with technical certificates or associate degrees. Planned apprentice program enrollment is as follows:

| Item | <u>CY</u> | <u>BY</u> |
|-------------------------|-----------|-----------|
| First year apprentices | 93 | 100 |
| Second year apprentices | 150 | 79 |
| Third year apprentices | 150 | 135 |
| Fourth year apprentices | 143 | 147 |
| Total Workforce | 536 | 461 |

Note: Second and subsequent year apprentice numbers for CY and BY are based on normal attrition from initial hires.

Apprentice program costs include apprentice salaries while in a training status, tuition, books, and other instructional costs.

Glossary

Performance Metrics:

<u>Schedule Adherence</u>: Two metrics, <u>Average Percentage Late</u> and <u>Maximum Percentage Late</u>. The percentage late is calculated by dividing the availability actual duration by the scheduled duration (as stated in the last Presidential Budget).

<u>Manday Budget Performance</u>: Two metrics, <u>Average Percentage Over Manday Budget</u> and <u>Maximum Percentage Over Manday Budget</u>. The percentage over manday budget is calculated by dividing the availability actual mandays by the budgeted mandays (as stated in the last Presidential Budget).

Quality of Work: This metric reports the number of post delivery discrepancies per 1,000 mandays of actual expenditures.

<u>Unit Cost</u>: This metric reports the total cost less direct material, direct contract, other direct, and MILCON per direct labor manday delivered. CY and BY reflect the budgeted values.

<u>Administrative Efficiency</u>: This metric reports the total cost less direct material and indirect costs divided by total cost less direct material. CY and BY reflect the budgeted values.

<u>CNO Availabilities Complete</u>: This metric reports the total number of CNO availabilities completed during the PY. This number will be a projection for CY and BY.

<u>CNO Availabilities in Progress at end of FY</u>: The metric reports the number of CNO availabilities in progress at the end of the PY. This number will be a projection for CY and BY.

<u>Homeported Aircraft Carriers Supported</u>: Number of homeported aircraft carriers supported by activity. Determines activities non-depot workload.

<u>Homeported Submarines Supported</u>: Number of homeported submarines supported by activity. Determines activities non-depot workload.

<u>Homeported Surface Ships Supported</u>: Number of homeported surface ships supported by activity. Determines activities non-depot workload.

<u>Shipyard Capacity Utilization</u>: This metric reports the total workload compared to the modified dry-dock capacity index. CY and BY reflect the budgeted values.

Performance Data:

<u>Direct Civilian Labor</u>: Includes actual direct civilian labor cost (accelerated by benefits) plus direct overtime cost.

<u>Direct Military Labor</u>: Total military salary cost times percentage of military mandays spent on direct work.

Direct Material: Actual material (piece-part) costs.

Direct Contracts: Includes all contract labor costs.

Other Direct Costs: Includes direct costs not included in direct material and direct contracts. Examples include travel costs and equipment rental costs.

Overhead Civilian Labor: Includes actual overhead civilian labor cost (accelerated by benefits), overhead overtime, differential costs, bonuses, lump sum leave costs, and transportation incentive program costs. .

Overhead Military Labor: Total military salary cost less that reported as direct military labor.

Overhead Non-Labor: Includes such non-labor costs as overhead travel, telecommunications, office, shop, and furniture purchases less than OPN \$250,000 threshold, crane maintenance, and Janitorial services. ...

<u>Infrastructure Accounts</u>: These accounts provide the funding for infrastructure operation, maintenance, and replacement as follows:

<u>Base Operating Support (OMN)</u>: Base Operating Support finances utilities, maintenance, security, transportation, and port operations costs required to support industrial operations.

<u>Capital Expenditures (OPN)</u>: The Capital Budget Authority reflects the financing of essential fleet support equipment and other capital improvements critical to sustaining shipyard operations, improving productivity, meeting health, safety and environmental requirements and lowering production costs.

<u>Facilities Sustainment, Restoration, & Modernization (OMN)</u>: The Sustainment, Restoration, and Modernization Budget Authority reflect the financing of essential infrastructure maintenance and modernization.

<u>Military Construction (MILCON)</u>: The Military Construction Budget Authority reflects the financing of essential infrastructure replacement critical to sustaining shipyard operations, improving productivity, meeting health, safety and environmental requirements and lowering production costs.
