Have gathered the need (courts), interested assessment with FIA, assessment data & county stakeholders for SCAO & ODCP on which the development of analyzed where to target communities have a family drug treatment TA. higher "at risk" population courts. 6. Have developed state level expertise to provide to target. 6. Develop & disseminate local TA. information about MI 7. Developed a list of who resources to key to disseminate completed stakeholders in family MI specific resources to. drug treatment court development. Assumptions Indicators

- 1. Substance use by families involved in the child welfare system is a serious issue in Michigan.
- 2. Vulnerable children and families will be better served through collaboration between the Courts, the Family Independence Agency, the Office of Drug Control Policy and substance abuse providers.

Short term: Materials gathered & draft of resource guide developed for review by judges & attorneys. Contacted SCAO, ODCP & MADCP for help in compiling the list for dissemination.

Medium term: Disseminate resource guide and 1 – 2 jurisdictions identified for TA. **Long Term**: Cross-systems collaboration is established and the structure is in place on a state level to provide TA to any jurisdiction requesting support. Family Drug Treatment Courts are being established in MI.

Logic Model of <u>Child Welfare/Substance Abuse Collaborative project - Communication</u>

Outcome Objective:

Develop and disseminate a communication protocol between substance abuse, child welfare, and judicial system partners that addresses families and children from levels 1 to 3, at different points on the continuum from substance abuse screening and assessment to treatment monitoring.
