DEPARTMENT OF THE NAVY

OFFICE OF THE CHIEF INFORMATION OFFICER 1000 NAVY PENTAGON WASHINGTON, DC 20350-1000

03 July 2012

FOREWORD

This manual implements the policy set forth in Secretary of the Navy Instruction (SECNAVINST) 5210.8D, *Department of the Navy Records Management Program*, dated 31 December 2005, regarding Standard Subject Identification Codes (SSICs). It is issued under the authority of SECNAVINST 5430.7Q, *Assignment of Responsibilities and Authorities in the Office of the Secretary of the Navy*.

SECNAV Manual M-5210.2, *Department of the Navy Standard Subject Identification Code* (SSIC) Manual, dated 25 July 2008, is hereby cancelled.

This manual specifies filing and record maintenance procedures and provides SSICs for the Department of the Navy (DON). The SSICs are the standard system of numbers and letters used throughout the DON for categorizing departmental documentary material by subject.

This manual, which is effective immediately, is mandatory and applicable to the offices of the Secretary of the Navy, the Chief of Naval Operations, the Commandant of the Marine Corps and all Navy and Marine Corps activities, installations, commands, ships and stations.

This manual may be accessed through the DON Issuances website: http://doni.daps.dla.mil/. Contact information is provided below for assistance or to offer comments.

Introduction

1. This manual delineates the process for segregating and filing Navy and Marine Corps records and provides the standard system of numbers and letter symbols used throughout the Department of the Navy (DON) to categorize and classify Navy and Marine Corps records. A standard subject identification code (SSIC) is required on all DON records including, but not limited to, letters, messages, directives, forms and reports. Only approved SSICs will be assigned; however, expansion of the system for filing purposes is authorized following the procedures contained in Part 3 of this manual.

A significant and ever increasing portion of the Department's records are created, used and/or stored electronically. The requirement to assign an SSIC applies to any record regardless of its format and medium.

This manual is to be used in conjunction with SECNAV Manual M-5210.1 (1st Revision), *Department of the Navy Records Management Manual*, dated January 2012; hereafter cited as SECNAV M-5210.1. The records management manual describes specific DON records and provides disposition schedules for them.

2. <u>Definition of a Navy Record</u>. In order to determine which items should receive an SSIC, DON personnel must be able to determine which materials are records. The use of Standard Subject Identification Codes is the only approved means to number, segregate, symbolize and file Departmental records.

As defined in statute, records include all books, papers, maps, photographs, machine readable materials or other documentary materials, regardless of physical form or characteristics, made or received by an agency of the United States Government under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations or other activities of the Government or because of the informational value of data in them. Library and museum material made or acquired and preserved solely for reference or exhibition purposes, extra copies of documents preserved only for convenience of reference and stocks of publications and of processed documents are not included (44 USC §3301).

Several key terms, phrases and concepts in the statutory definition of records are defined in National Archives and Records Administration (NARA) Regulation (36 CFR 1220.18 and 1222.10) as follows:

"Documentary materials" is a collective term that refers to recorded information, regardless of the medium or the method or circumstances of recordings.

"Regardless of physical form or characteristics" means that the medium may be paper, film, disk, or other physical type or form; and that the method of recording may be manual, mechanical, photographic, electronic or any other combination of these other technologies.

"Made" means the act of creating and recording information by agency personnel in the course of their official duties, regardless of the method(s) or the medium involved. The act of recording is generally identifiable by the circulation of the information to others or by placing it in files accessible to others.

"Received" means the acceptance or collection of documentary materials by or on behalf of an agency or agency personnel in the course of their official duties regardless of their origin (for example, other units of their agency, private citizens, public officials, other agencies, contractors, Government grantees) and regardless of how transmitted (in person or by messenger, mail, electronic means, or by any other method). In this context, the term does not refer to misdirected materials. It may or may not refer to loaned or seized materials depending on the conditions under which such materials came into agency custody or were used by the agency. Advice of legal counsel should be sought regarding the ``record" status of loaned or seized materials.

"Preserved" means the filing, storing or any other method of systematically maintaining documentary materials by the agency. This term covers materials not only actually filed or otherwise systematically maintained but also those temporarily removed from existing filing systems.

"Appropriate for preservation" means documentary materials made or received which, in the judgment of the agency, should be filed, stored or otherwise systematically maintained by an agency because of the evidence of agency activities or information they contain, even if the materials may not be covered by its current filing or maintenance procedures.

3. <u>Record Series</u>. A series is the basic unit for organizing and controlling files. It is a file unit or documents arranged according to a filing or classification system or kept together because they relate to a particular subject or function, result from the same activity, document a specific kind of transaction, take a particular physical form, or have some other relationship arising out of their creation, receipt, or use, such as restrictions on access and use.

Programs should organize documents in order to facilitate management of records throughout their life cycle. For example, record series kept in paper copies should be physically separated from other record series. Electronic records should be managed in ways that link records to their disposition authority, within the context of a record keeping system. (Electronic records management applications must be certified in accordance with DoD 5015.2-STD, "Electronic Records Management Software Application Design Criteria Standard.)

The DON uses the SSIC system to establish and identify record series. Each record series must be scheduled for appropriate disposition. The DON's disposition authority is found in the SECNAV Manual M-5210-1, *The Department of the Navy Records Management Manual*.

4. Records File Plan. A file plan is an organizational scheme for how records are organized. The plan specifies the identifying number, title or description and disposition authority of files held in an organization. A file plan allows users to select categories in which records are filed and assign records to these categories. A plan allows users to add, edit and delete file categories or file folders. Within the DON, the SSIC provides the basis for organizational file plans. To build an activity file plan, refer to OPNAV 5210/76, Naval Organizational Records File Plan. The Marine Corps electronic file plan is contained in MCO 5210.11.

Part I Filing Procedures

Chapter 1 Filing Maintenance

- 1-1. Maintaining information. Effective files maintenance is essential to document the Department of the Navy's (DON) official business. While more and more of the DON's information is maintained electronically, there is still a significant amount of paper records being created daily that must be effectively and efficiently managed. This chapter contains suggested procedures for maintaining Navy paper information. These procedures represent formal and detailed filing procedures. All parts may not be applicable to an offices needs. Users should use these procedures as a suggested way to manage their physical records. Other methods that comply with the basic requirement to manage records according to their records series and disposition may be implemented. This chapter does not apply to the Marine Corps. Marine Corps personnel should follow the guidance contained in MCO 5210.11, Marine Corps Records Management Program.
- **1-2. Inspecting records.** Prior to filing, inspect the document to ensure all actions are complete and eliminate unnecessary attached material, (such as used envelopes, routing slips which bear no essential information and extra copies.). Identify incomplete actions to ensure they are followed up and that the file will not be prematurely cut off. If action is complete, but essential documentation is missing, try to obtain the missing documentation. If unsuccessful, note the action taken to obtain the missing documentation and file it with the incomplete action.

1-3. Assembling and fastening records.

- a. Remove all cover sheets (such as SF 703 (TOP SECRET Cover Sheet), SF 704 (SECRET Cover Sheet), and SF 705 (CONFIDENTIAL Cover Sheet)) before filing unless records are in a suspense file or when cases are placed in file containers pending completion of the action.
- b. Staple documents if possible. Other fasteners may be used when there are too many papers for stapling or physical characteristics prohibit stapling.
- **1-4. Marking the file number.** As specified in SECNAV M-5210.1 and SECNAV M-5216.5, Department of the Navy Correspondence Manual, the action officer adds the file number (i.e., SSIC and paragraph numbers (e.g., 5000.8a)) when writing a document, or places the file number along the right-hand edge of documents not identified with a file number at the time of creation. When the physical characteristics of a document make it self-identifying for filing purposes, posting the file number to the document is unnecessary. Examples of documents not requiring the posting of a file number are reference copies of publications, mail control forms, and bills of lading.

1-5. Use of guides and folders.

- a. Use guides to divide files and to identify subdivisions for easier filing and retrieval.
- b. Use folders to consolidate, retrieve, and protect the records.
- c. When the folder contains classified information stamp the file folder with the classification per SECNAV M-5510.36, Department of the Navy Information Security Program.
- **1-6. Arrangement of files.** The filing arrangements described below are authorized for subdividing records under a file number and for the arrangement of records within the file folder. They may also be used for all classified records.
 - a. Date arrangement. Arrange records chronologically in the folder.
- b. *Simple number arrangement*. Arrange records in simple numerical sequence, such as unit designation or project number.
 - c. Alphabetical arrangement. Arrange records by subject and name.
 - (1) Subject. Use subject titles arranged alphabetically.
- (2) *Name*. Arrange by the names of persons, places, or organizations. This is mainly used in personnel records. The following are examples of arrangements by name.
- (a) *Personal names*. Filed by last name, first name and middle initial, for example, Smith, John R. This arrangement is subject to the Privacy Act.
- (b) *Organization names*. File first by major name (such as Acme, General Auto or International Electronics), then by specific subdivision, for example ACME, Filter Division; GENERAL AUTO, Body Plant; or INTERNATIONAL ELECTRONICS, Cable Division.
- d. *Arrangement restrictions*. Records not covered by a Privacy Act Systems of Records Notice (SORN) will not be arranged to permit retrieval by personal identifier until the applicable system notice is published in the *Federal Register*. Records covered by SORNs, listed at DoD website (http://dpclo.defense.gov/privacy/SORNS/component/DOD Component Notices.html), may be arranged for retrieval by personal identifier. This site provides SORNS for the Navy, Marine Corps, and those that are joint Navy and Marine Corps prepared according to the Privacy Act and published in the *Federal Register*.
- **1-7.** Classified documents. File classified documents and unclassified documents in separate containers. There are two exceptions to this guidance. First, documents may be stored together

in GSA approved security containers when the record of an action consists of both classified and unclassified documents and reference purposes require that both be filed together. Investigative, adjudicative and other types of case files are examples. Second, classified and unclassified documents may be stored in the same security container when a small volume of classified material is on hand and it is advantageous to use otherwise empty space for unclassified material. However, the classified material will be separated from the unclassified material by guide cards or by placement in separate drawers. See SECNAV M-5510.36 for security container requirements and information.

- **1-8.** Suspense files. Suspense files are used as reminders that an action is required by a given date. File numbers need not be used on file folders or containers in which suspense documents are kept. Some samples of suspense files are as follows:
- a. A note to submit a report or to take some other action. The note would be destroyed after the report is submitted or the action is taken.
- b. An outgoing communication filed by the date on which a reply is expected. When the reply is received, the communication is withdrawn and filed (if it is the record copy) or destroyed (if it is an extra copy).

1-9. List of file numbers.

- a. Office personnel prepare lists of file numbers for the convenience of files personnel and action officers. These lists are also used by Information Managers to ensure the records identify and document the business of the officer, and to identify permanent and long-term records for transfer. These lists will contain the SSIC number and sub-paragraph if applicable, title/sub-title and disposition instructions.
- b. Office personnel will keep the list current by making changes as file numbers are added, changed or deleted.

Chapter 2 **Labeling Procedures**

2-1. File numbers. The file numbers listed in SECNAV M-5210.1 identify documents for filing, reference, and legal disposition authority.

2-2. Labeling

- a. Label all folders and containers used to store official records. Labels may be either handwritten or typed.
- b. Labels will include the file number, file title, and the disposition instructions. Include the year of accumulation when a file is cut off after a time period. Do not include the year on a file with an event disposition or on the "ACTIVE" folder of a time-event file.
- c. Enter the file number and file title on the label as they appear in the appropriate chapter of SECNAV 5210.1, Part III. For the title of a file label, any abbreviation that will be understood by the custodian of the file may be used. For the disposition instructions, use abbreviations listed below. See figure 2-1 for sample labels.

COFF - cutoff, cut off Dest - destroy FRC - Federal Records Center PERM - permanent PIF - place in inactive file ROB - retain on board

Trf - transfer

WNRC - Washington National Records Center

	File#	File Title	Year of ac	cumulation
	12610.1	Time and Attendar	12	
	COFF 31	Dec 10, PIF, Dest	Jan 16 (or	
	After GA	O audit, whichever	is sooner)	
Dispositio	n instruct	ions		

Figure 2-1. Sample label showing the four elements of a file label.

d. If there are several folders under one number, only the label on the first folder of the series must show all of the required label information. Labels on the other folders under the same file number will show the file number, a brief identification of material in the folder and (if applicable) the year of the file. A "dummy" folder (secured shut) or guide card with a label

containing required label entries may also be used. Do not use a "dummy" folder or guide card with full label instructions when there is only one file folder for the file year.

e. When one or more file containers have records with the same file number, posting the file number and other information to each folder label or document is not necessary. The documents in files of this volume usually bear a distinctive identification (for example, the name on a personnel record jacket or financial data records folder, the number on a voucher, contract number, case files, and so forth). In these instances, only the label on the first folder of the series and the label on the first container must show the required label information. Remaining folders, drawers, or other containers need only be identified by the name, number, or other feature identifying the contents. If there are several folders under one file number, you may use a "dummy" folder or a guide card which contains the full label entries. Subsequent folder labels need only show the file number, contents of the individual folder, and, where appropriate, the year of accumulation. (See figure 2-2.)

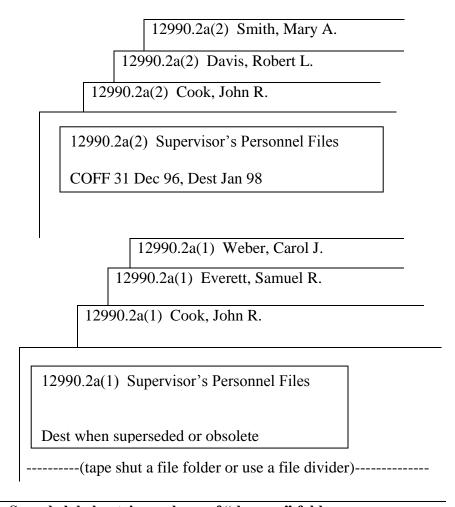

Figure 2-2. Sample label entries and use of "dummy" folder

f. No disposition is shown on labels for containers with two or more record series because it varies among the several record series stored in the container. The label entry for containers with only one record series, and holding all of that record series is identical to the folder label. The label entries for containers with only part of one record series show which part of the records are stored within the container. In figure 2-3, the "(A thru L)" and "(M thru Z)" represent an alphabetical file arrangement. If files are identified numerically use numbers instead of letters.

Chapter 3 Applying Disposition Instructions

3-1. Disposition standards

- a. For most records the file disposition gives only the generic retention period (that is, destroy after 2 years, destroy after 5 years, permanent, and so forth). In dispositions like these, use table 3-1 to determine and apply the exact cut off, transfer, and disposition dates.
- b. For some records, the file disposition also gives specific instructions for cut off, transfer, or establishment of inactive files, for example, "Permanent. Place in inactive folder (PIF) on completion of next inspection and cut off at the end of that year." In this example, the file remains among the currently used office files for however long it takes for the next inspection to occur. When the next inspection does occur, the file gains definite disposition instructions. At the end of the year in which the inspection occurred, the file is separated from the active files or "cutoff" and placed in a folder with the appropriate "permanent" disposition instructions on the label. This record will be transferred to the FRC after the proper period of time. See paragraph 3-3c for more information on "time-event" dispositions.
- **3-2. Files cut off.** Files with permanent retention or retention for a specific number of years are cut off at the end of the year in which action on the record has been completed. The retention period does not begin until the records have been cut off. Files with a continuing type of disposition, such as "Destroy when no longer needed for current operations," are not cut off. Review them annually, and remove and destroy individuals records within such files when no longer needed.
- **3-3. Disposition instructions.** There are three types of disposition instructions based on "time," "event," and "time-event."
- a. With a "time" disposition, a record is cut off at the end of the month for a 30-day disposition, at the end of the quarter for a 3-month disposition, semiannually for a 6-month disposition, or at the end of the year for a 1-year or more disposition, held for the specified period, and then destroyed. All such records which accumulate during the course of the year in which the files are developed are cut off at the end of the month, quarter, or year, and then the specified retention period begins. Examples of "time" dispositions and label entries are:

Destroy after 30 days. Cut off at the end of the month, hold 1 month in the current files area, and then destroy. Label entry examples are as follows:

COFF 31 Jan 12, Dest Mar 12.

COFF 28 Feb 12, Dest Apr 12.

COFF 31 Mar 12, Dest May 12.

COFF 30 Apr 12, Dest Jun 12.

```
COFF 31 May 12, Dest Jul 12.
COFF 30 Jun 12, Dest Aug 12.
COFF 31 Jul 12, Dest Sep 12.
COFF 31 Aug 12, Dest Oct 12.
COFF 30 Sep 12, Dest Nov 12.
COFF 31 Oct 12, Dest Dec 12.
COFF 30 Nov 12, Dest Jan 13.
COFF 31 Dec 12, Dest Feb 13.
```

Destroy after 3 months. Cut off at the end of the quarter, hold 3 months in the current files area, and then destroy. Label entry examples are as follows:

```
COFF 31 Mar 12, Dest Jul 12.
COFF 30 Jun 12, Dest Oct 12.
COFF 30 Sep 12, Dest Jan 13.
COFF 31 Dec 12, Dest Apr 13.
```

Destroy after 6 months. Cut off semiannually as of 30 June and 31 December, hold 6 months in the current files area, and then destroy. Label entries would be "COFF 30 Jun 12, Dest Jan 13" or "COFF 31 Dec 12, Dest Jul 13."

Destroy after 1 year. Cut off at the end of the calendar year (CY) or fiscal year (FY), hold 1 year in the current files area, and then destroy. Label entry would be "COFF 31 Dec 12, Dest Jan 14" for a calendar year or "COFF 30 Sep 12, Destroy Oct 13" for a fiscal year.

- b. With an "event" disposition, the record is destroyed upon or immediately after the specified event occurs. There is no waiting period, as with the time disposition. As an example, consider the disposition instruction "Destroy after all corrections have been made and processed." When all corrections have been made and processed, remove the document from the file and destroy it. The disposition on the file label would read, "Dest when all corrections have been made and processed."
- c. With a combination "time-event" disposition, a record is disposed of a certain period of time after an event takes place.
- (1) This disposition requires the creation of two folders, ACTIVE and INACTIVE. The ACTIVE folder label does not show a year of accumulation, because it contains (in the example given above) all records of a case that has not yet been completed. It is in the "event" phase of the disposition, and it may be several years before the case is completed. Once a case is completed, the information is moved to the INACTIVE folder. This folder label does show a year of accumulation, because the information is now in the "time" phase of the disposition. The INACTIVE folder need not be created until the "event" phase of the disposition has occurred and the "time" phase is starting.

- (2) The event is the trigger that causes the record to become inactive. It is then cut off at the end of that year, held for the specified time period, then disposed of. For example, with the disposition instruction "Destroy 2 years after case closure," the record will remain in an ACTIVE file until the case is closed. At that time, move it from the ACTIVE to the INACTIVE file. The entire INACTIVE file will be cut off at the end of the year, held for 2 years, then destroyed. The ACTIVE file label would read, "ACTIVE. PIF on case closure." The disposition on the inactive label will read, "INACTIVE. COFF 31 Dec 12, Dest Jan 15."
- **3-4. Deviations from disposition instructions.** The Archivist of the United States must approve deviations from disposition instructions provided in SECNAV M-5210.1, Part III. Requests for deviations will be sent through records management channels to echelon 2 Records Manager. The echelon 2 Records Manager will evaluate the request to determine whether an exception is appropriate or whether the disposition instructions in the applicable file number should be changed. The echelon 2 Records Manager will forward requests, with their recommendation, to DON/AA DRMD. Requests will include the following:

The file number and a brief description of the records involved.

Justification, consisting of evidence of specific need for the records and information on their continuing administrative, legal, or fiscal value to the United States Government.

The physical location of the records, including information on whether the records have been (or will be) transferred to a Federal Records Center (FRC).

3-5. Changes to retention periods. Frequently, retention periods change because of statutory, legal, financial, or administrative requirements. If a change increases the retention period, use the new retention period for all records, both active and inactive, under that file number. This applies no matter when the records were created or where they are maintained. If retention period is decreased or changed from permanent to a temporary period, apply the new schedule to all current records. In applying decreased retention schedules to inactive records, consider cost effectiveness and efficiency. If a decreased schedule would take a major effort to apply and storage space is not an issue, you may keep the records for the longer retention period.

3-6. Records disposal.

- a. Unclassified records authorized for destruction will be:
 - (1) Destroyed in accordance with local policy.
- (2) For exposed photographs and certain microfilm that contains precious metals, dispose of under the DoD Precious Metals Recovery Program.

b. Destroy FOR OFFICIAL USE ONLY (FOUO) and classified records per SECNAV M- 5510.36.

12		Destroy after more than 7 years (but not PERMANENT records).	Cut off at the end of the calendar or fiscal year; ROB for 2 years in the current files area; then transfer to the LSA; hold for 1 year; then transfer to the servicing FRC, where they will be destroyed when the retention period expires.	Example for a 10-year file: CY: COFF 31 Dec 12,Ret LSA Jan 15, Trf WNRC Jan 16, Dest Jan 20 FY: COFF 30 Sep 12, Ret LSA Oct 14, Trf WNRC Oct 15, Dest Oct 19
13		PERMANENT	Cut off at the end of the CY or FY; ROB for 2 years in the current files area; then transfer to the LSA; hold for 1 year; then transfer to the servicing FRC.	CY: COFF 31 Dec 12, Ret LSA Jan 15, Trf WNRC Jan 16, PERM FY: COFF 30 Sep 12, Ret LSA Oct 14, Trf WNRC Oct 15, PERM

Notes

1. For rules 1 through 7, apply appropriate standard in rules 8 through 13 if longer retention periods are specified.

^{2.} For rules 9 through 13, records so specifically designated in SECNAV M-5210.1 will be transferred to the nearest servicing Federal Record Center, which will manage the records throughout their remaining life and, at the designated period, destroy the record or permanently transfer them to the National Archives and Records Administration as prescribed in the record disposition schedule.

Chapter 4 Reference Procedures

- **4-1. Records retrieval.** The procedures in this section are designed to provide rapid and efficient files reference services.
- **4-2. Submission of requests**. Requests to charge out files may be in memorandum format or the form listed in paragraph 4-3, below. The following information is needed to locate and charge-out material:
 - a. SSIC and serial number Identification of material and file classification number, if known.
 - b. Name of writer (organization or individual).
 - c. Date of the document (specific or approximate).
 - d. Requester's name, organization, location, and telephone number.
- **4-3. Charge-out record.** A charge-out record will be made and substituted for documents removed from a file for reference purposes. Optional Form (OF) 23 (for letter or legal size filing cabinets) or OF 24 (for lateral filing cabinets) may be used for documents charged out.

Part II Construction of Standard Subject Identification Code (SSIC)

- 1. <u>SSICs Required</u>. A SSIC is a four or five digit number that stands for the subject of a document. SSICs are required on all Navy and Marine Corps letters, messages, directives, forms and reports regardless of medium. The use of SSICs provides a tested method for filing documents consistently and retrieving them quickly. SSIC is the system the DON uses to meet the requirements of 36 C.F.R. 1222.50.
- 2. <u>SSICs</u>. The Navy SSIC system is divided into 13 major subject groups.

1000-1999 Military Personnel

Includes subjects relating solely to the administration of military personnel. Civilian personnel subjects are included in the 12000 series. General personnel subjects relating to both civilian and military personnel are included in the 5000 series.

2000-2999 Information Technology and Communications

Includes subjects relating to general information technology matters and to communication systems and equipment.

3000-3999 Operations and Readiness

Includes subjects related to such matters as operational plans, fleet operations, operational training and readiness, warfare techniques, operational intelligence, research and development, and geophysical and hydrographic support.

4000-4999 Logistics

Includes subjects relating to the logistical support of the Navy and Marine Corps, including procurement, supply control, property redistribution and disposal, travel and transportation, maintenance, construction and conversion, production and mobilization planning, and foreign military assistance.

5000-5999 General Administration and Management

Includes subjects relating to the administration, organization and management of the Department of the Navy, including general personnel matters (concerning both civilian and military personnel), records management programs, security, external and internal relations, audiovisual management, law and legal matters, office services, office automation and publication and printing matters.

6000-6999 Medicine and Dentistry

Including subject relating to medical matters such as physical fitness, general medicine, special or preventive medicine, dentistry and medical equipment and supplies.

7000-7999 Financial Management

Includes subjects relating to the financial administration of the Department of the Navy, including budgeting, disbursing, accounting, auditing, contract auditing, industrial and other special financing matters, and statistical reporting.

8000-8999 Ordnance Material

Includes subjects relating to all types of ordnance material and weapons, including ammunition and explosives, guided missiles of all types, nuclear weapons, fire control and optics, combat vehicles, underwater ordnance materials and miscellaneous ordnance equipment.

9000-9999 Ships Design and Material

Includes subjects relating to such matters as the design and characteristics of ships, and to ships material and equipment.

10000-10999 General Material

Includes subjects relating to general categories of materials not included in the specialized material groups. It includes personnel material, general machinery and tools, audiovisual equipment and accessories, and miscellaneous categories including metals, fuels, building materials, electrical and electronic categories, and diving and hyperbaric systems equipment.

11000-11999 Facilities and Activities Ashore

Includes subjects relating to ashore structures and facilities, fleet facilities, transportation facilities, heavy equipment, utilities and services, and other similar subjects.

12000-12999 Civilian Personnel

Includes subjects relating solely to the administration of civilian personnel. (Military personnel subjects are including in the 1000 series. General personnel subjects relating to both civilian and military personnel are included in the 5000 series.)

13000-13999 Aeronautical and Astronautical Material

Includes subjects relating to aeronautical and astronautical material, including parts, accessories and instruments; special devices; armament; aerological equipment, weapons systems, types of aircraft; and astronautic vehicles.

3. These major subject groups are further divided into primary, secondary and tertiary subdivisions. The last three digits of an SSIC number designate subject levels. For example, here are three subdivisions under General Administration and Management, whose major subject group code is 5000 - 5999.

General Categories use zeros

5000 - General Administrations and Management

This is an example of a primary subject

5200 - General Management Programs and Techniques

The last two digits designate a secondary subject

5210 - Records Management

The last digit reflects a tertiary subject

521<u>1</u> - Filing, Maintenance, Protection, Retrieval and Privacy Act Systems

Some subject groups are not subdivided further than the primary level. However, other groups are divided into many secondary and tertiary subjects, depending on the complexity of the primary subject.

4. <u>Assigning the right SSIC to a document.</u> When you create a record, include the SSIC that most closely describes that record's subject. When assigning a code, consider the document's subject, its purpose or significance, and the code used for similar documents.

Part III Guidelines for Requesting Changes

1. Submit recommendations for SSIC changes (additions, deletions and modification) to:

Office of the Secretary of the Navy
DON/AA
Directive and Records Management Division (DRMD)
1000 Navy Pentagon, Room 4A514A
Washington DC, 20350-1000

Marine Corps activities submit via: Commandant of the Marine Corps Marine Corps Records Manager (HQMC ARDB) 3000 Marine Corps Pentagon, Room 2B253 Washington D. C. 20350-1775

- 2. Provide the following information
 - a. Current SSIC number (for deletions and modifications)
 - b. Recommended SSIC number (for additions and modifications)
 - c. Current Subject (for deletions and modifications)
 - d. Recommended Subject (for additions and modifications)
- 3. Use the following guidelines when considering a change to an existing number, a deletion or new number.
- a. Any subject that has relevance to a large segment of the DON may be recommended provided it does not duplicate or identify too closely with existing, related subjects.
- b. Review SECNAV Manual M-5210.1, *The Department of the Navy Records Management Manual*, for current SSICs and their dispositions before recommending a new SSIC.
- c. Accurately identify a proper placement of new subjects by ensuring that the functional major subject grouping, primary subject grouping, secondary subject grouping and tertiary number are all in logical function sequence.
- d. Narrative subject titles should be functionally descriptive, have broad definition and be stated concisely.

e. If a numerical code is deleted, the number cannot be used for a different narrative subject.

Part IV SSIC Sorted Numerically

MILITARY PERSONNEL 1000-1999

SSIC	Title
1000 - 1099	GENERAL
1000	General (include Marine Corps Standard Operating Procedures (SOPs))

1916	Release from Active Duty, Reserve*
1920	Officer*
1926	Release from Active Duty, Reserve*

NOTES:

^{*} There is no record series or if a record series exists, there is no disposition for the SSIC in SECNAV M-5210.1, Department of the Navy Records Management Program, Records Management Manual. In some cases and after examination, the primary or secondary subject SSIC may provide an acceptable records series and disposition for use. If not and records are created that should be appropriately filed under the SSIC, follow the guidance contained in SECNAV M-5210.1, Part II, paragraph 4, for obtaining approval for a new records disposition.

[#] SSIC exists, but either refers to another SSIC for disposition standard or it has been deleted, disestablished, canceled, or revoked. If it refers to another SSIC number, use that SSIC for correspondence SSIC number or disposition of the records.

NOTES:

^{*} There is no record series or if a record series exists, there is no dispositions for the SSIC in SECNAV M-5210.1, Department of the Navy Records Management Program, Records Management Manual. In some cases and after examination, the primary or secondary subject SSIC may provide an acceptable records series and disposition for use. If not and records are created that appropriately should be filed under the SSIC, follow the guidance contained in SECNAV M-5210.1, Part II, paragraph 4, for obtaining approval for a new records disposition.

[#] SSIC exists, but either refers to another SSIC for disposition standard or it has been deleted, disestablished, canceled, or revoked. If it refers to another SSIC number, use that SSIC for correspondence SSIC number or disposition of the records.
