

The President's National Security Telecommunications Advisory Committee

The President's National Security Telecommunications Advisory Committee (NSTAC) provides industry-based analyses and recommendations to the President and the Executive Branch regarding policy and enhancements to national security and emergency preparedness (NS/EP) telecommunications.

The NSTAC is composed of up to 30 Presidentially-appointed senior executives who represent various elements of the telecommunications industry. The committee advises the President on a wide range of policy and technical issues related to telecommunications, information systems, information assurance, infrastructure protection, and other NS/EP concerns. The NSTAC meets quarterly via conference calls and holds an annual meeting to report its activities while providing recommendations to the President.

BACKGROUND: President Ronald Reagan created the NSTAC by Executive Order (E.O.) 12382, *President's National Security Telecommunications Advisory Committee*, in September 1982 to advise the President on matters regarding NS/EP telecommunications. Four issues provided impetus for the establishment of the NSTAC: (1) the divestiture of AT&T; (2) increased Government reliance on commercial communications; (3) potential impact of new technologies on NS/EP telecommunications; and (4) growing importance of command, control, and communications to military and disaster response modernization.

NSTAC ACCOMPLISHMENTS: Many NSTAC activities are the genesis for technical reports, recommendations to the President, and NS/EP operational programs. The NSTAC has examined a wide range of issues, including network survivability; network convergence; commercial satellite survivability; cybersecurity and crime; intrusion detection; emergency communications and interoperability; and information system, network, and wireless services security issues. The National Coordinating Center (NCC), an industry-Government coordination center for day-to-day operational support to NS/EP telecommunications, began as an NSTAC recommendation. In January 2000, the NCC was officially recognized as the Communications Sector Information Sharing and Analysis Center. In order to enhance information sharing and collaborative efforts between communications and cybersecurity partners, in October 2009, the NCC was integrated into the National Cybersecurity and Communications Integration Center (NCCIC), a 24-hour, coordinated information sharing and incident response capability designed to protect and secure the Nation's cyber networks and infrastructure. DHS will coordinate national response efforts with Federal, State, and local, Tribal, Territorial governments and private sector partners during a significant cyber or physical communications threat through the NCCIC. Formerly an NSTAC issue, the Telecommunications Service Priority (TSP) system, is also now an operational program. TSP is the regulatory, administrative, and operational authority that enables priority provisioning and restoration of telecommunications services for Federal, State, and local government users, as well as nongovernmental users. Furthermore, NSTAC activities led to the creation of an industry-based Network Security Information Exchange (NSIE), which meets regularly with a Government NSIE to address the threat posed to the public network when system vulnerabilities are exploited.

NSTAC ACTIVITIES: When the Executive Office of the President (EOP) requests the NSTAC examine an issue, a subcommittee is formed to address it. Over the 2010-2011 cycle, the NSTAC supported several issue-specific subcommittees and task forces. Most recently, a subcommittee was formed to evaluate the NS/EP implications of the Federal Government's transition to cloud computing technologies. The subcommittee is working to review the operational and security impacts on NS/EP communications and the technologies' implications on policy and security requirements for the Federal Government. The Cybersecurity Collaboration Task Force reviewed issues involving the Nation's cyber infrastructure, specifically how industry and Government can improve cybersecurity information sharing to mitigate NS/EP communications risks. The Identity Issues Task Force reviewed and developed comments on the EOP's *National Strategy for Trusted Identities in Cyberspace* in an effort to help develop a national identity management architecture. Finally, the Communications Resiliency Task Force provided recommendations on options for investments or actions the Government could take to enhance the survivability or availability of communications for the general population, emergency response personnel, critical infrastructure owners and operators, and State and local authorities during a time of natural disaster or man-made attack.

LEADERSHIP: Industry executives hold the positions of NSTAC Chair and Vice Chair. At this time, Ms. Maggie Wilderotter, Chairman and CEO, Frontier Communications Corporation, holds the NSTAC Chair position and Mr. Mark McLaughlin, President and CEO, Palo Alto Networks, holds the NSTAC Vice Chair position. The NSTAC is supported by the Secretary of Homeland Security, who is the Executive Agent for the NSTAC. The Department of Homeland Security's Office of Cybersecurity and Communications also works closely with the EOP to coordinate the NSTAC's daily operations.

The President's National Security Telecommunications Advisory Committee

MEMBERSHIP:

NSTAC CHAIR

Ms. Maggie Wilderotter
Chairman and CEO
Frontier Communications Corp.

Ms. Linda Gooden
Executive Vice President,
Information Systems & Global
Solutions
Lockheed Martin Corp.

Mr. Marc P. Lefar
CEO
Vonage Holdings Corp.

NSTAC VICE CHAIR

Mr. Mark McLaughlin
President and CEO
Palo Alto Networks

Mr. Mark T. Greenquist
President and CEO
Telcordia Technologies, Inc.

Mr. Thomas J. Lynch
CEO
TE Connectivity, Ltd.

Mr. Scott Charney
Corporate Vice President for
Trustworthy Computing, Engineering
Excellence, and Environmental
Sustainability
Microsoft Corp.

Ms. Larissa L. Herda
Chairman, President, and CEO
tw telecom, inc.

Mr. Glen Post
President and CEO
CenturyLink, Inc.

Mr. James Q. Crowe
CEO
Level 3 Communications, Inc.

Mr. Dan Hesse
CEO
Sprint Nextel Corp.

Mr. Paul Sagan
CEO
Akamai Technologies, Inc.

Mr. Matthew J. Desch
Director and CEO
Iridium Communications, Inc.

Ms. Lisa A. Hook
President and CEO
Neustar, Inc.

Ms. Kay Sears
President
Intelsat General Corp.

Mr. David G. DeWalt
Board Member McAfee, Inc.

Mr. Kevin Johnson
CEO
Juniper Networks, Inc.

Mr. Gary Smith
CEO
Ciena Corp.

Ms. Jamie Dos Santos
Former President and CEO
Terremark Federal Group

Mr. Clayton M. Jones
Chairman, President, and CEO
Rockwell Collins, Inc.

Mr. John T. Stankey
Group President and Chief Strategy
Officer
AT&T, Inc.

Dr. Joseph E. Fergus
Founder and CEO
Communication Technologies, Inc.

Mr. Kevin Kennedy
President and CEO
Avaya, Inc.

Mr. John G. Stratton
President
Verizon Enterprise Solutions

Mr. Michael W. Laphen
Chairman, President, and CEO
CSC

Mr. William H. Swanson
Chairman and CEO
Raytheon Company
