The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

International Aero Engines AG: Docket No. FAA–2012–1217; Directorate Identifier 2012–NE–39–AD.

(a) Comments Due Date

We must receive comments by March 11, 2013.

(b) Affected ADs

None.

(c) Applicability

This AD applies to International Aero Engines AG (IAE), V2525–D5 and V2528–D5 turbofan engines, serial numbers V20001 through V20285, with number (No.) 4 bearing internal scavenge tube, part number (P/N) 2A2074–01 and No. 4 bearing external scavenge tube, P/N 6A5254 installed.

(d) Unsafe Condition

This AD was prompted by a report of an engine under-cowl fire, commanded in-flight shutdown, and damage to the airplane. We are issuing this AD to prevent engine fire and damage to the airplane.

SUPPLEMENTARY INFORMATION:

I. Background

The Commission issued the Appliance Labeling Rule (“Rule”) in 1979,¹ in response to a directive in the Energy Policy and Conservation Act of 1975 (EPCA).² The Rule requires energy labeling for major home appliances and other consumer products, to help consumers compare competing models. When first published, the Rule applied to eight categories: refrigerators, refrigerator-freezers, freezers, dishwashers, water heaters, clothes washers, room air conditioners, and furnaces. The Commission subsequently expanded the Rule’s coverage to include central air conditioners, heat pumps,

¹ 44 FR 66466 (Nov. 19, 1979) (Rule’s initial promulgation).

² 42 U.S.C. 6294. EPCA also requires the Department of Energy (“DOE”) to develop test procedures that measure how much energy appliances use, and to determine the representative average cost a consumer pays for different types of energy.

plumbing products, lighting products, ceiling fans, and televisions. The Commission is currently conducting a regulatory review of the Rule.³

The Rule requires manufacturers to attach yellow EnergyGuide labels on many of these products, and prohibits retailers from removing the labels or rendering them illegible. In addition, the Rule directs sellers, including retailers, to post label information on Web sites and in paper catalogs from which consumers can order products. EnergyGuide labels for covered appliances must contain three key disclosures: estimated annual energy cost (for most products); a product’s energy consumption or energy efficiency rating as determined from Department of Energy (DOE) test procedures; and a comparability range displaying the highest and lowest energy costs or efficiency ratings for all similar models. For energy cost calculations, the Rule specifies national average costs for applicable energy sources (e.g., electricity, natural gas, oil) as calculated by DOE. The Rule sets a five-year schedule for updating range of comparability and annual energy cost information.⁴ The Commission updates the range information based on manufacturer data submitted pursuant to the Rule’s reporting requirements.

II. Proposed Amendments

As discussed below, the Commission proposes to update the comparability ranges (Appendices A–J to Part 305) and national average energy cost figures (Appendix K to Part 305) for many EnergyGuide labels consistent with its five-year schedule. This Notice also contains several minor, proposed revisions and updates to the label’s content, some of which were suggested by commenters as part of the Commission’s ongoing regulatory review. To avoid requiring multiple label revisions within a short time period, the Commission proposes to require these label content changes concurrently with the range updates. Finally, the Commission proposes to grant a request from the Association of Home Appliance Manufacturers (AHAM) seeking an exemption related to labeling requirements for refrigerators, refrigerator-freezers, and freezers (hereinafter referred to as “refrigerators”), and clothes washers to

³ 77 FR 15298 (Mar. 15, 2012) (regulatory review). The Commission currently has two other open proceedings related to other proposed amendments for the Rule. See 77 FR 33337 (June 6, 2012) (proposed changes to furnace and central air conditioner labels); 76 FR 45715 (Aug. 1, 2011) (proposed expanded light bulb coverage).
