## 1. EXECUTIVE SUMMARY

The Help America Vote Act of 2002 (HAVA), 42 U.S.C. § 15301 et seq, mandates that for each regularly scheduled general election for Federal office, the Election Assistance Commission (EAC) shall collect comprehensive data from the States on all of the ballots sent and received by voters covered by the Uniformed and Overseas Citizens Absentee Voting Act of 1986 (UOCAVA), 42 U.S.C. § 1973 ff .

This is the third report from the EAC to Congress regarding UOCAVA voting. It is based on information gathered from a survey of 55 States and territories, asking for data at the county (or equivalent) level regarding the November 4, 2008, election and the 2 -year period leading up to it.

Response rates to the 2008 EAC survey were markedly better than in 2006, continuing a trend that allows better monitoring of compliance with the mandated requirements of UOCAVA. ${ }^{1}$ Some States do not track all the data items and some States are unable to provide data at the county (or equivalent) level. Consistency across the States in the way terms are defined and data collected remains uneven. Readers should be aware of these limitations as they review this report and use the data presented here and in the complete dataset available on the EAC Website at www.eac.gov.

The EAC's 2008 Election Administration and Voting Survey remains the primary tool by which Congress, Federal agencies, and the public can monitor compliance with UOCAVA. Among the highlights of the 2008 survey:

1. States transmitted nearly 1 million ballots to UOCAVA-covered voters for the 2008 election, with nearly half (48.6\%) going to uniformed services members. Another 37.9 percent went to civilian citizens living overseas.
2. Of the ballots transmitted, 69 percent $(682,341)$ were returned and submitted for counting.
3. States reported transmitting 231,324 ballots automatically to voters who had cast UOCAVA ballots in previous elections. Voters returned 64.9 percent of these ballots.
4. States reported counting 637,216 UOCAVA ballots, or $93.6 \%$ of the total submitted for counting.

[^0]5. States reported rejecting 39,533 ballots. The most common reason given for rejecting a UOCAVA ballot was that the ballot missed a deadline; States reported that 43.7 percent of ballots rejected were rejected for this reason.
6. States reported that 28,131 voters submitted a Federal Write-in Absentee Ballot (FWAB). Challenges in tracking FWABs as a separate ballot category means actual usage may have been higher.

## 2. INTRODUCTION

The United States Election Assistance Commission (EAC) is an independent, bipartisan commission created by the Help America Vote Act of 2002 (HAVA). Its mission is to assist State and local election officials with the administration of Federal elections. The EAC provides assistance by disbursing, administering, and auditing Federal funds for States to implement HAVA requirements; conducting studies and other activities to promote the effective administration of Federal elections; and serving as a source of information regarding election administration.

Since 2004, the EAC has collected data on voting, elections, and election administration in the United States. Much of these data support two biennial reports, on voter registration and on voting by uniformed and overseas citizens.

In 1986, Congress passed the Uniformed and Overseas Citizens Absentee Voting Act, (UOCAVA), 42 U.S.C. § 1973ff. UOCAVA covers voting by members of the seven uniformed services and their eligible dependents; members of the U.S. Merchant Marine and their eligible dependents; Commissioned Corps of the U.S. Public Health Service and the National Oceanic and Atmospheric Administration; and U.S. citizens residing outside the United States. Under UOCAVA, State and territories are to provide a means for these citizens to register and to vote in elections for Federal office using absentee procedures.

UOCAVA also provides for the use of a Federal Write-in Absentee Ballot, which can be cast under certain conditions by voters who have applied for but who have not yet received their absentee ballot. The FWAB is intended as a fail-safe for voters who might encounter problems receiving their ballot from local election offices in time to cast their vote.

Section 703(a) of the Help America Vote Act of 2002 (HAVA), amended section 102 of UOCAVA by adding the following requirement:

Not later than 90 days after the date of each regularly scheduled general election for Federal office,
each State and unit of local government which administered the election shall (through the State, in the case of a unit of local government) submit a report to the Election Assistance Commission (established under the Help America Vote Act of 2002) on the combined number of absentee ballots transmitted to absent uniformed services voters and overseas voters for the election and the combined number of such ballots which were returned by such voters and cast in the election, and shall make such a report available to the general public.

Section 703(b) of HAVA further required that the EAC work with two of its statutory Federal Advisory Committees, the Board of Advisors and the Standards Board, to develop a standardized format for reports submitted by States and units of local government and provide the standardized format to these jurisdictions. ${ }^{2}$

This report contains the EAC's third collection of UOCAVA data. The first report was based on data collected for the 2004 Federal Election. During this first data collection effort, it was determined that many States and local jurisdictions did not track the specific data required by HAVA, and that significant variation occurred across the States in the way the data were tracked. Similar variations affected data collection in 2006. ${ }^{3}$ In addition, there currently is not a consistent means to accurately assess the number of overseas and uniformed services voters who may be covered by the Act. Unlike the data from the U.S. Census, there is no similar mechanism for measuring the number of civilian Americans living abroad. Further, it is difficult to gauge the number of domestic uniformed services voters who do not use UOCAVA's provisions for voting and instead vote at polling places on Election Day. Consequently, readers should use caution when analyzing and presenting the data contained in this report.

## 3. SURVEY METHODOLOGY

The 2008 edition of the Election Administration and Voting Survey was the result of discussions with State and local election officials, political scientists, researchers, members of election administration and advocacy groups, and the general public. Revisions to a draft survey were made following review by the EAC's Standards Board and Board of

Advisors. ${ }^{4}$ Notice of the 2008 survey was published in the Federal Register on March 20, 2008, and public comments solicited (73 FR 14974 (2000-03-20)). Final revisions were then made based on these comments, and the revised draft of the questionnaire was distributed to State officials in August and September 2008 for planning purposes.

The 2008 Election Administration and Voting Survey was approved by the U.S. Office of Management and Budget (OMB) on September 25, 2008 (OMB Control No. 3265-0006, exp. 3/31/2009). The final, approved version of the survey contained 51 questions in the quantitative section, 20 of which related to implementation of UOCAVA. In addition, in 2008, for the first time, States were asked to report on their State laws, definitions, and procedures in the Statutory Overview. Responses to this portion of the survey are the basis of a separate report available from the EAC, and help to provide a better understanding of the data analyzed in this report.

Section B of the quantitative section of the 2008 survey (see Appendix A) covered questions relating to UOCAVA voters and ballots, and was significantly revised from the 2006 survey:

- Questions B1 and B2 asked for information about the number and type of UOCAVA absentee ballots transmitted;
- Question B3 asked for the number and type of all UOCAVA ballots returned and submitted for counting;
- Questions B4 through B7 asked for the information on the type of UOCAVA ballot returned by type of UOCAVA voter;
- Question B8 asked for the number and type of all UOCAVA ballots counted;
- Questions B9 through B12 asked for information on the type of UOCAVA ballot counted by type of UOCAVA voter;
- Question B13 asked for the number and type of all UOCAVA ballots rejected;
- Question B14 asked for information on the reasons UOCAVA ballots were rejected;

[^1][^2]- Questions B15 through B18 asked for information on the type of UOCAVA ballot rejected by type of UOCAVA voter;
- Question B19 asked for information on how ballots were transmitted to UOCAVA voters; and
- Question B20 asked for information on the status of ballots automatically transmitted to UOCAVA voters.

## Changes From 2006

The 2008 Election Administration and Voting Survey was substantially different from the 2006 version. New questions in 2008 included requests for information on automatically transmitted UOCAVA ballots, including the disposition of those ballots. The EAC also asked for more detailed breakdowns of both the type of ballots used by UOCAVA voters and the type of UOCAVA voter.

## Guide to Terms

For the purposes of the survey, the EAC provided the following definitions within the questionnaire and in supplemental instructions distributed to State election officials:

- Automatically transmitted ballots are those ballots that are transmitted to voters without a specific, one-time request; for example, ballots mailed to voters for the next two election cycles after a voters uses the Federal Post Card Application (FPCA).
- Spoiled ballots are ballots that, under the applicable State law, are incorrectly marked or impaired in some way by the voter and turned in by the voter at the polling place or mailed in absentee, with a replacement ballot issued so that the voter can correctly mark the ballot; also referred to in some States as a "voided" ballot.
- Ballots returned and submitted for counting include all ballots returned by voters that were submitted to the counting process regardless of whether the ballots were later counted or rejected. Spoiled ballots, replaced ballots, and absentee ballots returned as undeliverable are discounted before the counting process and by this definition are not considered to be submitted for counting. Previous surveys and reports have referred to these as "ballots cast."
- Counted ballots are ballots that have been processed and the votes included in the candidates' vote totals.
- Rejected ballots are ballots that States determine do not meet the requirements of eligibility.
- Federal Write-in Absentee Ballot (FWAB) is an emergency ballot available to uniformed services and overseas citizens (including those located at APO and FPO addresses) when they have properly requested but have not received a regular absentee ballot from their local jurisdiction in time to return it before the States' deadline.

## States' Collection of UOCAVA Information

For 2008, the EAC continued its efforts to present the survey to State officials earlier in the election cycle, and to facilitate the task of responding by providing improved survey instruments and increased technical assistance. The primary survey instrument designed to assist the States in collecting and reporting their statistical data was a Microsoft Excel-based template, preloaded with each State's jurisdictions. Most States chose to submit their data using this instrument. States were also offered a Microsoft Word-based template that could be distributed to their local jurisdictions, and States with single jurisdictions could report their totals through this instrument. Data were collected through uploads via the project Web site; other data were obtained via e-mail or fax. States were asked to send their responses to the EAC by February 13, 2009. Data collection continued through March and early April 2009, as States reviewed and corrected the data they had submitted. In some cases, States updated their responses with further information. Upon completion of the tables which accompany this report, States were invited to review and correct the tables and the comments following each table.

Election data collection varied significantly in the 55 States and territories that responded to the 2008 survey. Most States relied at least to some degree on centralized voter registration databases (VRDs) and voter history databases, which allowed State election officials to respond to the survey at the local level for each question. Other States, conversely, collected relatively little election data at the State level, and instead relied on cooperation from county election offices to complete the survey. Some States did not collect data in all the categories requested in the survey, and others did not have data for all their local jurisdictions for all variables. Many respondents used the "other" categories provided in the survey instrument when their data coding did not match precisely with definitions offered by the survey. In these cases, readers are encouraged to reference the footnotes of the tables and the individual comments submitted by the States.

Table 1. Selected Response Rates on UOCAVA Questions, 2008 and 2006

| UOCAVA question | 2008 Response rate |  | 2006 Response rate | Increase in percentage points |
| :---: | :---: | :---: | :---: | :---: |
|  | Jurisdictions responding (out of 4,517) | Percent | Percent |  |
| Overseas citizen ballots transmitted | 4,131 | 91 | 64 | +27 |
| Overseas citizen ballots cast | 3,764 | 83 | 62 | +21 |
| Overseas citizen ballots counted | 3,717 | 82 | 62 | +20 |
|  |  |  |  |  |
| Uniformed services ballots transmitted | 4,217 | 93 | 56/65* | +37/+28 |
| Uniformed services ballots cast | 3,793 | 84 | 54/62* | +30/+22 |
| Uniformed services ballots counted | 3,806 | 84 | 54/62* | +30/+22 |
|  |  |  |  |  |
| Overseas citizen FWABs cast | 3,003 | 66 | 47 | +19 |
| Uniformed services FWABs cast | 3,077 | 68 | 41/49* | +27/+19 |

*In 2006, the survey asked States to separate domestic and overseas uniformed services ballots. Both figures are given in the table. Also, the 2006 response rate listed for ballots transmitted is the response rate for the questions that asked for the number of ballots requested.

The results of the UOCAVA questions in the 2008 Election Administration and Voting Survey are presented in the tables at the end of this report and are summarized in Section 4. Complete results at the local level are also available on the EAC's Web site at www.eac.gov.

Caution is necessary when interpreting the survey data, particularly when comparing the data from year to year or State to State, due to changes in State data collection practices across time and the varying levels of completeness in many States' responses. Even in States with centralized VRDs, some data may be kept only at the local level, and the level of integration of information between local and State election offices varies across the country. ${ }^{5}$

## Response Rates

The 2008 survey instrument instructed States to check " $\mathrm{N} / \mathrm{A}$ " if data were not available or if a question was not applicable to a State or county. If a State entered a " 0 ," that response was treated as a valid response equaling " 0 ." A "blank" response was treated as a nonresponse.

State data collection and reporting of UOCAVA data markedly improved from the 2006 survey, but are still incomplete. Table 1 summarizes how many of the 4,517 ju-

[^3]risdictions ${ }^{6}$ surveyed were able to provide data for selected questions. In most cases, response rates improved generally by more than 20 percentage points in absolute terms, and by as much as 50 percent in relative terms. ${ }^{7}$

## 4. SURVEY RESULTS

The process by which UOCAVA voters vote varies by State, and even within States. For the purposes of reporting the results of the 2008 survey, the process of voting under UOCAVA is presented as having 4 basic steps:

- the voter requests a ballot,
- the ballot is transmitted to the voter,
- the ballot is returned by the voter to the election office,
- the ballot is accepted and counted, or the ballot is rejected.
$6 \quad$ States were asked to provide data at the county, township or equivalent level. Some States reported statewide totals, either because of the lack of lower-scale jurisdictions or because of incomplete data reporting.

7 For example, while an improvement from a $60 \%$ response rate in 2006 to $90 \%$ in 2008 would represent a 30 percentage point increase in absolute terms, it would also mean that $50 \%$ more jurisdictions responded.

## I. Ballot Requests

UOCAVA voters may receive their ballots in several ways. UOCAVA provides for the automatic transmission of ballots for two election cycles to voters who register an overseas address using the Federal Post Card Application (FPCA) See 42 U.S.C. § 1973ff-3(a). Overseas voters may also request a ballot by applying to their local election office before a specific election and then they receive a ballot for each election over the next two Federal election cycles.

In 2008, just under 1 million ballots were reported as being transmitted to UOCAVA voters. Of this number, 345,772 (or $35.0 \%$ ) were transmitted as a result of a onetime request by the voter (see Table 7). Another 231,324 (or $23.4 \%$ ) were automatically transmitted under the FPCA requirements of UOCAVA. ${ }^{8}$

Tracking of the source of ballot requests remains incomplete across the country. Roughly one-third of States did not report breakdowns of the sources of their ballots requests, and 29.4 percent of ballots were not categorized with a source.

Seventeen States, 3 territories and the District of Columbia had a plurality or majority of ballot requests come from one-time requests from voters in 2008. Another 13 States reported that a majority of their ballot requests came from voters who were automatically sent their ballots as part of the two Federal election cycle provisions of UOCAVA. This was the first year that the EAC asked specifically about automatically requested ballots.

## II. Ballots Transmitted

States reported transmitting 989,208 ballots, spread unevenly over the 55 States, territories, and the District of Columbia, with five States reporting transmitting more than 60,000 ballots. Together, Florida, California, Texas, New York, and Washington accounted for nearly half of all UOCAVA ballots transmitted in the United States.

| Florida | 121,395 |
| :--- | ---: |
| California | 102,983 |
| Texas | 91,106 |
| New York | 83,422 |
| Washington | 61,934 |

About half of ballots transmitted (480,757, or 48.6\%) were sent to members of the uniformed services (see Table

[^4]8). Another 37.9 percent of the ballots were sent to civilians living overseas. At the State level, more than half of the States reported that uniformed services voters made up a majority of their UOCAVA ballots transmitted, although the proportions varied by State. In California, for example, UOCAVA ballots were split about evenly between uniformed services and civilian voters, while in Florida, members of the uniformed services were sent more than 70 percent of UOCAVA ballots. Of the 25 States that transmitted more than 10,000 UOCAVA ballots, 8 reported sending more to civilian voters than uniformed services voters: Colorado, Maryland, Massachusetts, Minnesota, New Jersey, New York, Oregon, and Virginia.

Ballots Transmitted

Uniform Services
Other Voter
Overseas Civilians
Not Categorized

The 2008 survey found that nearly all States were able to provide data concerning the UOCAVA ballots transmitted by type of voter. Three States did not report data on the type of voter, and two States had a majority of their transmitted ballots uncategorized as to the type of voter.

## III. Ballots Submitted for Counting

The disposition of ballots transmitted is detailed in Table 9. States reported that 682,341 ballots, or 69.0 percent, were returned and submitted for counting. Although four States
did not report any disposition of their transmitted ballots, UOCAVA voters are concentrated in large States and States with large uniformed services installations.

The rate of return was generally consistent across the States. In addition to the ballots returned and submitted for counting, another 14.1 percent of ballots were reported to have an unknown status, which may have included ballots not received or returned. 11.3 percent of the ballots transmitted were unable to be categorized as to their disposition. Smaller percentages of ballots were returned as undeliverable (1.9\%) or represented spoiled or replaced ballots (1.4\%); although fewer States were able to provide data for these last 2 categories.

Twenty-nine States provided data on the disposition of those UOCAVA ballots transmitted automatically (see Table 10). Of the 231,324 automatically transmitted ballots, 64.9 percent were returned for counting, and one fifth ( $20.8 \%$ ) were not returned or their status was unknown. The data suggest that automatically transmitted ballots appeared to have slightly higher rates of non-return than UOCAVA ballots generally.

The proportion of ballots submitted for counting between members of the uniformed services and civilian voters was roughly the same as for ballots transmitted (see Table 11). Members of the uniformed services comprised 47.2 percent ( 320,950 ballots) of the ballots submitted for counting, while civilians comprised 40.2 percent (273,408 ballots) of the 680,460 total ballots submitted. Among the States with the most UOCAVA voters, New York and California reported having more civilian than uniformed services ballots submitted, while the opposite was true for Texas and Florida. Overall, 30 States and 1 territory reported more uniformed services ballots submitted than civilian, while 12 States, the District of Columbia and 1 territory had more civilian ballots than uniformed services ballots submitted.

The rate of return of UOCAVA ballots in 2008 was significantly greater than in the midterm election in 2006. In 2006, the EAC survey results indicated that only one quarter of UOCAVA ballots requested were returned for counting. ${ }^{9}$ This may be a function of typically higher voter turnout in Presidential elections compared with voter turnout in non-Presidential Federal elections. In addition, lower voter turnout in 2006 likely resulted in fewer automatic requests. The data do not provide sufficient

[^5]information to determine the degree to which any improvements in the overseas balloting process may have contributed to higher return rates.

## Federal Write-in Absentee Ballots

Section 103 of UOCAVA generally provides a mechanism for overseas uniformed services and civilian voters to cast a Federal Write-in Absentee Ballot (FWAB) as a kind of "backup" ballot. See 42 U.S.C. § 1973ff-2. These ballots are available to uniformed services voters and voters living outside the United States who requested but did not receive the regular absentee ballots after having made a timely application for the ballot. The FWAB allows voters to cast a ballot for Federal offices only (President/Vice-President as applicable, U.S. Senator, U.S. Representative, Delegate or Resident Commissioner). Some States allow members of the uniformed services and overseas citizens to use the FWAB for other offices or for elections other than Federal elections.

The use of the FWAB is allowed only under certain conditions. The FWAB is available through Voting Assistance Officers (VAOs) at military installations or at U.S. embassies or consulates. The absentee uniformed services voter must:

- be absent from his or her voting residence;
- have applied for a regular ballot early enough so that the request is received by the appropriate local election officer not later than the State deadline; or the date that is 30 days before the general election; AND
- have not received the requested regular absentee ballot from the State.

The citizen outside the United States must:

- be located outside the United States (including those located at APO/FPO addresses);
- have applied for a regular ballot early enough so that the request is received by the appropriate local election officer not later than the State deadline; or the date that is 30 days before the general election; AND
- have not received the requested regular absentee ballot from the State (42 U.S.C. § 1973ff).

Most of the ballots submitted by UOCAVA voters were absentee ballots issued by the local election office (see Table 12), rather than through the use of the FWAB. States reported that 72.9 percent of the ballots submitted were regular absentee ballots issued by the jurisdiction. States

Note: Reports of 0\% or more than 100\% are the result of inconsistencies in data collection; for example, reporting UOCAVA ballots counted but not ballots submitted, or not reporting data for ballots counted. In these cases, reference to the States' county-level data will be necessary.
also reported that 28,131 FWABs were submitted, which accounted for 4.1 percent of the total number of UOCAVA ballots submitted for counting. Texas reported the highest use of the FWAB, with 5,013 such ballots, or 7.2 percent of the total UOCAVA ballots submitted for counting in all States. Five States and D.C. reported that more than 10 percent of their absentee ballots were FWAB ballots. Eleven States were unable to provide the type of ballot used by UOCAVA voters, and the detailed data from other States and territories tallied to more than their reported totals.

FWAB usage remains a relatively small proportion of UOCAVA voting for both uniformed services and civilian voters. FWABs were 4.1 percent of the total ballots submitted for counting by uniformed services voters, and 3.4 percent by civilian UOCAVA voters. Tables 13 and 14 break down the type of ballot submitted by members of the uniformed services and civilian UOCAVA voters, respectively.

## IV. Ballots Counted and Rejected

Of the 680,463 total ballots submitted by UOCAVA voters, 637,216 , or 93.6 percent, were counted by the States (see Table 19). ${ }^{10}$ Military voters made up a larger share of the votes counted than civilian voters, 48.6 to 41.2 percent (see Table 15). Use of the FWAB resulted in at least 25,538 ballots being counted in the 2008 election; this figure may be higher due to some States' lack of data on the breakdown of their UOCAVA ballots (see Table 16).

Forty-eight States or territories reported the total number of UOCAVA ballots counted, and the rates varied among States (see Table 19), with most States in the range of 90 to 100 percent. However, New Jersey and West Virginia reported that less than 60 percent of UOCAVA ballots were counted. Five States and 1 territory reported zeros for the number of UOCAVA ballots that were counted. Some States' UOCAVA data was insufficient or incomplete, indicating a continuing difficulty in collecting and reporting UOCAVA

10 The reported percentages of UOCAVA ballots that were counted does not take into account whether the same number of cases (generally, counties) were used in both the numerator and denominator. For example, nationwide, Table 19 reports 94.6 percent of UOCAVA ballots counted as a percentage of those cast. However, AL, IL, and KY did not report any data on UOCAVA ballots counted. If these three States are removed, then the percentage of ballots counted increases to 99.6 percent. However, sometimes these differences are not apparent--AR, CA, NM, NV, OH, SD, TX, WA, and WV report ballots counted from fewer jurisdictions than they do for ballots cast, while KS, RI, and TN do the opposite. Differences in the response rates within States for individual data items appear throughout the NVRA, UOCAVA, and Election Administration and Voting Survey. Data for all three studies are available on the EAC's Web site at www.eac.gov.
data. As an example, 3 States and the District of Columbia reported more ballots counted than cast.

In the 2008 Federal election, 44 States reported rejecting 39,533 UOCAVA ballots that had been submitted for counting. Data on these rejections are presented in Tables 21 through 25.

Uniformed services and civilian voters made up approximately the same percentage of rejected ballots as they did ballots cast and ballots counted ( $47.4 \%$ were uniformed services and $36.1 \%$ were civilian). Thirtynine States, the District of Columbia, and 3 territories reported breakdowns of their rejected ballots into these two categories.

Notably, and consistent with past survey data, FWABs faced a higher rejection rate than regular State absentee ballots. FWABs made up 15.8 percent of rejected UOCAVA ballots, although they were only 4.0 percent of the ballots submitted for counting. States reported receiving 28,131 FWABs and rejecting 6,227 , or $22.1 \%$, although the actual percentage rejected may be higher. The EAC received data from 36 States and the District of Columbia on the number of FWABs submitted for counting, but only 30 States provided data on the number of FWABs they rejected.

## UOCAVA Rejected Ballots - Reasons

| $\square$ Problem with Voter Signature | $\square$ Other Reason |
| :--- | :--- |
| $\square$ Ballot Lacked a Postmark | Not Catergorized |
| $\square$ Not Received on Time or Missed Deadline |  |

Of particular interest is the reason UOCAVA ballots were rejected. Data on this topic are presented in Table 25. The most common reason for the rejection of UOCAVA ballots was missed deadlines: 43.7 percent of the 39,530 rejected ballots were not counted for this reason.

Another 4,230 ballots (or $10.7 \%$ ) were rejected because of problems with a required voter signature; for example, the signature may not have matched the signature on file, or it may have been missing altogether. States reported a wide variety of other reasons for rejecting UOCAVA ballots; these are listed in the county-level data available from the EAC's Web site at www.eac.gov.

Several States rejected UOCAVA ballots at higher rates when compared to other States' data, as measured by the ratio of rejected to counted UOCAVA ballots (see Tables 26 through 28). The District of Columbia rejected 1,556 UOCAVA ballots while counting 2,740. Nearly all of the rejected ballots in the District of Columbia were not counted because of missed deadlines. Indiana rejected 3,980 UOCAVA ballots and counted 5,167. Idaho rejected 394 ballots while counting 2,665.

## 5. CONCLUSIONS

States reported transmitting nearly 1 million UOCAVA ballots to overseas civilian and uniformed services voters in 2008, and more than 680,000 of these ballots were returned and submitted for counting by voters. The fate of the other, more than 300,000 ballots is difficult to discern; unless ballots are returned as undeliverable or spoiled, States have few means to track them.

States' collecting and reporting UOCAVA data is improving. For the 2008 Federal election, in key categories, nearly all States were able to report totals, generally at the county level. For example, all 55 States and Territories and the District of Columbia were able to report the number of UOCAVA ballots transmitted, and 50 were able to report the number of UOCAVA ballots submitted for counting. At more detailed levels, however, the need for improvements in data collection remains. For example, nearly half the States and territories surveyed were not able to provide sufficient data on the number of FWABs rejected, and more complete data may provide a clearer picture of the reasons for the nearly four times higher rejection rate for FWABs than for other UOCAVA ballots.

The analysis presented here is a high level analysis of the results of the UOCAVA data provided by States for the 2008 Federal election. Valuable lessons can be learned from a careful examination not only of the State totals presented in the tables accompanying this report, but from an analysis of the county- (or equivalent) level data available on the EAC Web site at www.eac.gov.

## 6. MOVING FORWARD

The quality of information regarding UOCAVA ballots is improving, and the 2008 survey yielded a more complete picture of UOCAVA balloting than past surveys. States in general are making significant strides in designing their data management systems to produce the necessary data on UOCAVA voters. Gaps in State tracking of UOCAVA voters remain, however, and continued attention to data collection on UOCAVA voters and ballots is needed. The EAC will continue to work with States to seek ways to distinguish UOCAVA ballots from domestic civilian absentee ballots; refine their categorizations, particularly for the reasons ballots are rejected; and improve tracking of FWABs.

Recent research, including this report, is beginning to provide a more complete picture of UOCAVA voting. Overseas eligible voters are harder to reach and study than those living in the United States. Consequently, very little is known about why the number of UOCAVA ballots cast is so much lower than the number of eligible voters overseas. The EAC is committed to facilitating State and local efforts to collect and report complete EAC survey data on overseas and military voting in an effort to increase compliance with statutory reporting requirements and provide an even better picture of UOCAVA voting over time. To this end, the EAC has discussed with the Federal Voting Assistance Program (FVAP) the possibility of working collaboratively to make the States' collection of data on UOCAVA voting more efficient in the future.

## Footnotes to Tables

## General Notes:

State: In the interest of consistency in these tables, the term State includes the District of Columbia and the four territories of American Samoa, Guam, Puerto Rico and the Virgin Islands.

Jurisdictions in the Survey. For the 2008 survey, information was requested for each local election administration jurisdiction. Generally this would be the county or county equivalent. The following exceptions may apply (exceptions are noted by an asterisk below the State name in Table 1a):
a) in some states the information was initially compiled by town/city or township;
b) in some states independent cities were treated as counties;
c) in some states the only response was one record for the state, and;
d) in some states the information collected from the towns/cities or townships but was summarized by county.

States in which the town/city or township is the initial unit of collection include the six states in New England and a handful of states in the Midwest. Independent cities were treated as county-level reporting units for the states of Maryland, Virginia, Missouri and Nevada. Selected Election Boards in Illinois and Missouri were also treated as county jurisdictions. State-level information was provided for Alaska which does not have counties. Coverage for the territories varied. See Table 6 for more detail.

Missing Data: Information for several items remains unavailable for several reasons. When information is missing this status may be reflected in various ways but generally by a blank data cell or a zero value. Note that a zero value may also indicate that the jurisdiction Does Not Know, or Does Not Collect, the information. The count of cases, included for most tables but not for all variables, generally reflects the presence of a response from the jurisdiction. For many questions, 0 is a valid response but there is also inconsistency in the entry for the Not Available option. Researchers should consult the jurisdiction-level dataset for more detail. If a calculation is impossible because of missing information, a separate symbol may be indicated, e.g., a series of periods (......).

Sum of Above: The information listed in the tables below the state detail is, for most columns, simply the addition of the information listed in the table. The number of states providing information is indicated as the count of states with information greater than, or in some cases, less than, 0 . The percentages indicated on this line are generally the result of a simple division based upon the appropriate numbers from this line. For the Not Categorized columns, the number and percentage in the Sum of Above line will generally reflect a calculation of the appropriate fields listed on this line.

Specific Notes for Tables: Notes specific to each table appear following each table or group of sub-tables.

## Cross Reference of Survey Questions to Tables

## Question B1 --- Number of UOCAVA ballots transmitted and type of voter

- Table 7. UOCAVA Ballots Transmitted: Source of Request
- Table 8. UOCAVA Ballots Transmitted: Type of Voter
- Table 9. UOCAVA Ballots Transmitted: Disposition of Ballots
- Table 26. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, All Voters
- Table 27. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, Uniformed Services Voters
- Table 28. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, Non-Military Voters

Question B2 --- Number of UOCAVA ballots transmitted and disposition of the ballot

- Table 9. UOCAVA Ballots Transmitted: Disposition of Ballots

Question B3 --- Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting

- Table 11. UOCAVA Ballots Submitted for Counting: Type of Voter
- Table 12. UOCAVA Ballots Submitted for Counting: Type of Ballot, All Voters
- Table 19. UOCAVA Ballots: Counted as \% of Cast, by Type of Voter
- Table 26. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, All Voters

Question B4 --- Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of voter, all ballots

- Table 11. UOCAVA Ballots Submitted for Counting: Type of Voter
- Table 13. UOCAVA Ballots Submitted for Counting: Type of Ballot, Uniformed Services Voters
- Table 14. UOCAVA Ballots Submitted for Counting: Type of Ballot, Non-military/Civilian Voters
- Table 19. UOCAVA Ballots: Counted as \% of Cast, by Type of Voter
- Table 27. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, Uniformed Services Voters
- Table 28. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, Non-military/Civilian Voters

Question B5 --- Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of voter, absentee ballots

- Table 12. UOCAVA Ballots Submitted for Counting: Type of Ballot, All Voters
- Table 13. UOCAVA Ballots Submitted for Counting: Type of Ballot, Uniformed Services Voters
- Table 14. UOCAVA Ballots Submitted for Counting: Type of Ballot, Non-military/Civilian Voters

Question B6 --- Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of voter, FWAB

- Table 12. UOCAVA Ballots Submitted for Counting: Type of Ballot, All Voters
- Table 13. UOCAVA Ballots Submitted for Counting: Type of Ballot, Uniformed Services Voters
- Table 14. UOCAVA Ballots Submitted for Counting: Type of Ballot, Non-military/Civilian Voters

Question B7 --- Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of voter, other ballots

- Table 12. UOCAVA Ballots Submitted for Counting: Type of Ballot, All Voters
- Table 13. UOCAVA Ballots Submitted for Counting: Type of Ballot, Uniformed Services Voters
- Table 14. UOCAVA Ballots Submitted for Counting: Type of Ballot, Non-military/Civilian Voters

## Cross Reference of Survey Questions to Tables (continued)

Question $B 8$--- Number of UOCAVA ballots (regular plus FWAB) counted

- Table 15. UOCAVA Ballots Counted: Type of Voter
- Table 16. UOCAVA Ballots Counted: Type of Ballot, All Voters
- Table 19. UOCAVA Ballots: Counted as \% of Cast, by Type of Voter
- Table 20. UOCAVA Ballots: Counted by Type of Ballot
- Table 26. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, All Voters

Question B9 --- Number of UOCAVA ballots (regular plus FWAB) counted by type of voter, all ballots

- Table 15. UOCAVA Ballots Counted: Type of Voter
- Table 17. UOCAVA Ballots Counted: Type of Ballot, Uniformed Services Voters
- Table 18. UOCAVA Ballots Counted: Type of Ballot, Non-military/Civilian Voters
- Table 19. UOCAVA Ballots: Counted as \% of Cast, by Type of Voter
- Table 27. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, Uniformed Services Voters
- Table 28. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, Non-military/Civilian Voters

Question B10 --- Number of UOCAVA ballots (regular plus FWAB) counted by type of voter, absentee ballots

- Table 16. UOCAVA Ballots Counted: Type of Ballot, All Voters
- Table 17. UOCAVA Ballots Counted: Type of Ballot, Uniformed Services Voters
- Table 18. UOCAVA Ballots Counted: Type of Ballot, Non-military/Civilian Voters
- Table 20. UOCAVA Ballots: Counted by Type of Ballot

Question $B 11$--- Number of UOCAVA ballots (regular plus FWAB) counted by type of voter, FWAB

- Table 16. UOCAVA Ballots Counted: Type of Ballot, All Voters
- Table 17. UOCAVA Ballots Counted: Type of Ballot, Uniformed Services Voters
- Table 18. UOCAVA Ballots Counted: Type of Ballot, Non-military/Civilian Voters
- Table 20. UOCAVA Ballots: Counted by Type of Ballot

Question B12 --- Number of UOCAVA ballots (regular plus FWAB) counted by type of voter, other ballots

- Table 16. UOCAVA Ballots Counted: Type of Ballot, All Voters
- Table 17. UOCAVA Ballots Counted: Type of Ballot, Uniformed Services Voters
- Table 18. UOCAVA Ballots Counted: Type of Ballot, Non-military/Civilian Voters
- Table 20. UOCAVA Ballots: Counted by Type of Ballot

Question B13 --- Number of UOCAVA ballots (regular plus FWAB) rejected

- Table 21. UOCAVA Ballots Rejected: Type of Voter
- Table 22. UOCAVA Ballots Rejected: Type of Ballot, All Voters
- Table 25. UOCAVA Ballots Rejected: Reason for Rejection
- Table 26. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, All Voters

## Question B14 --- Number of UOCAVA ballots (regular plus FWAB) rejected by reason for rejection

- Table 25. UOCAVA Ballots Rejected: Reason for Rejection

Question B15 --- Number of UOCAVA ballots (regular plus FWAB) rejected by type of voter, all ballots

- Table 21. UOCAVA Ballots Rejected: Type of Voter
- Table 23. UOCAVA Ballots Rejected: Type of Ballot, Uniformed Services Voters
- Table 24. UOCAVA Ballots Rejected: Type of Ballot, Non-military/Civilian Voters
- Table 27. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, Uniformed Services Voters
- Table 28. UOCAVA Ballots: Cast, Counted, or Rejected as \% of Transmitted, Non-military/Civilian Voters

## Cross Reference of Survey Questions to Tables (continued)

Question B16 --- Number of UOCAVA ballots (regular plus FWAB) rejected by type of voter, absentee ballots

- Table 22. UOCAVA Ballots Rejected: Type of Ballot, All Voters
- Table 23. UOCAVA Ballots Rejected: Type of Ballot, Uniformed Services Voters
- Table 24. UOCAVA Ballots Rejected: Type of Ballot, Non-military/Civilian Voters

Question B17--- Number of UOCAVA ballots (regular plus FWAB) rejected by type of voter, FWAB

- Table 22. UOCAVA Ballots Rejected: Type of Ballot, All Voters
- Table 23. UOCAVA Ballots Rejected: Type of Ballot, Uniformed Services Voters
- Table 24. UOCAVA Ballots Rejected: Type of Ballot, Non-military/Civilian Voters

Question B18 --- Number of UOCAVA ballots (regular plus FWAB) rejected by type of voter, other ballots

- Table 22. UOCAVA Ballots Rejected: Type of Ballot, All Voters
- Table 23. UOCAVA Ballots Rejected: Type of Ballot, Uniformed Services Voters
- Table 24. UOCAVA Ballots Rejected: Type of Ballot, Non-military/Civilian Voters

Question B19 --- Number of UOCAVA ballots transmitted and the source of the request

- Table 7. UOCAVA Ballots Transmitted: Source of Request
- Table 10. UOCAVA Ballots Transmitted Automatically: Disposition of Ballots

Question B20 --- Number of UOCAVA ballots transmitted automatically and disposition of the ballot

- Table 10. UOCAVA Ballots Transmitted Automatically: Disposition of Ballots

## Appendix A - Tables

## Table 7. UOCAVA Ballots Transmitted: Source of Request

## Questions B1, B19. Number of UOCAVA ballots transmitted and the source of the request.

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

California --- One county automatically categorizes all stateside military, overseas military, and civilian military as permanent absentee voters.

Colorado --- Due to migration of county data in 2007 as the state transitioned from independent county VR systems to a centralized state system, Colorado cannot produce consistent statistics on UOCAVA absentee request dates over a two year period.

Maryland --- Data in B19a includes: (1) requests for the 2008 election only; and (2) requests for 2008 election and automatic request for 2010 election.

Missouri --- Two counties reported that every UOCAVA absentee request is for two years. Another reported that most 1 time requests have been moved to automatic 2 year requests. One county could not separate 1 time requests and automatic.

Oklahoma --- Oklahoma treats all UOCAVA ballot transmissions as automatic.
Washington --- One county included replacement ballots sent in Bla.
Puerto Rico --- Puerto Rico only conducts federal elections every four years with the General Elections. Voters must request an absentee ballot every election. CEE sends a letter to the voters that requested an absentee ballot the prior election asking them to certify their status.

## Table 8. UOCAVA Ballots Transmitted: Type of Voter

## Question B1. Number of UOCAVA ballots transmitted and type of voter.

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

California --- One county only reported the total of UOCAVA ballots automatically transmitted, not those by request. Two counties included second ballots in their totals.

Illinois --- Some jurisdictions in Illinois did not segregate out between uniformed services and civilian overseas they were seemly lumped in a "UOCAVA" file that is now B1d.

Mississippi --- One county grouped both military and non-military under uniformed.
South Dakota --- One county transmitted 2 additional ballots that were not reported in the numbers.
Washington --- One county included replacement ballots sent in Bla.

## Table 9. UOCAVA Ballots Transmitted: Disposition of Ballots

## Question B2. Number of UOCAVA ballots transmitted and disposition of the ballot.

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Arizona --- One county reported the number counted as the number returned.
Arkansas --- 2 transmitted absentee ballots were not counted in the breakout of B2 because both voters submitted a FWAB.
California --- One county reported partial numbers for B2b, returned undeliverable. One county could only provide estimates for the total number of ballots returned undeliverable and spoiled or replaced ballots. One county reported 11 additional ballots were challenged, but status is not determined. Three counties included spoiled or replacement ballots as part of B1a and were broken out among the other B2 options.

Michigan --- 'Other' total are ballots returned by voter after election.
Missouri --- One county reported 10 transmitted FWABs being returned.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.
South Carolina --- South Carolina cannot breakout FWAB and UOCAVA absentee ballots transmissions. B2a also includes FWAB ballots.

South Dakota --- One county included 1 FWAB ballot received.

## Table 10. UOCAVA Ballots Transmitted Automatically: Disposition of Ballots

## Question B20. Number of UOCAVA ballots transmitted automatically and disposition of the ballot.

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

California --- One county provided only estimates for B20b and B20c, one county did not report on state-side military, and one county included replacement ballots in their totals.

Colorado --- Due to migration of county data in 2007 as the state transitioned from independent county VR systems to a centralized state system, Colorado cannot produce consistent statistics on UOCAVA absentee request dates over a two year period.

Iowa --- Iowa considered all of our UOCAVA's as transmitted automatically
Michigan --- 'Other' total are ballots returned by voter after election.
Missouri --- One county included 10 FWAB ballots that were transmitted.
Montana --- MT does not track these separately, but most if not all UOCAVA ballots are sent through automatic process
Puerto Rico --- Puerto Rico only conducts federal elections every four years with the General Elections. Voters must request an absentee ballot every election. CEE sends a letter to the voters that requested an absentee ballot the prior election asking them to certify their status.

| Question |  | B3 |  | B4a |  |  | B4b |  |  | B4c |  |  | calc |  |

## Table 11. UOCAVA Ballots Submitted for Counting: Type of Voter

## Questions B3, B4. Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of voter.

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

## Question B3:

Arizona --- Two counties did not include a total of 305 ballots that were later rejected for late delivery.
California --- One county did not include returns of stateside military ballots.
Florida --- Two counties reported a total of 52 FWABs being returned but were never requested.
Idaho --- B3 includes Spoiled Ballots but does not include Undeliverable Ballots.
Indiana --- a) Absentee ballots were counted as Cast in this survey if the county user placed the ballot in Received status within the Indiana SVRS prior to marking the ballot as "Accepted (Counted)" or "Rejected (Not Counted)." If the county marked the status of the ballot as "Accepted" or "Rejected" before marking it as "Received" those ballot statistics were not added to the total number of Cast ballot, so that Cast ballot counts were not inflated. b) Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Ohio --- One county did not include 3 FWAB ballots that were later rejected.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.
South Carolina --- B2a and B3 are the same because South Carolina cannot breakout FWAB and UOCAVA.
South Dakota --- B2 and B3 are the same number.

## Question B4:

California --- One county did not include returns of stateside military ballots.
Illinois --- Some jurisdictions did not segregate out between uniformed services and civilian overseas they were seemly lumped in a "UOCAVA" file, that is now B4c.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B4a and B4b are the breakdowns of UOCAVA absentee ballots, and B4c is the number of FWABs. B5a and B5b are the same as B4a and B4b.

Missouri --- One county only had data on absentee ballots, not FWAB.
Ohio --- One county did not include 4 uniformed FWAB ballots in the breakout.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.
South Carolina --- B4 and B5 are the same because South Carolina cannot breakout FWAB and UOCAVA.

# Tables 12, 13, 14. UOCAVA Ballots Submitted for Counting: Type of Ballot for All Voters; Uniformed; Civilian 

Questions B3, B4, B5, B6, B7. Number of UOCAVA ballots (regular plus FWAB) returned by the voter and submitted for counting by type of ballot by type of voter.
General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting. For Montana: The balance column indicates an over-count as Absentee ballots included the count of FWABs.

## Question B4:

California --- One county did not include returns of stateside military ballots.
Illinois --- Some jurisdictions did not segregate out between uniformed services and civilian overseas they were seemly lumped in a "UOCAVA" file, that is now B4c.

Indiana --- a) Absentee ballots were counted as Cast in this survey if the county user placed the ballot in Received status within the Indiana SVRS prior to marking the ballot as "Accepted (Counted)" or "Rejected (Not Counted)." If the county marked the status of the ballot as "Accepted" or "Rejected" before marking it as "Received" those ballot statistics were not added to the total number of Cast ballot, so that Cast ballot counts were not inflated. b) Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B4a and B4b are the breakdowns of UOCAVA absentee ballots, and B4c is the number of FWABs. B5a and B5b are the same as B4a and B4b.

Missouri --- One county only had data on absentee ballots, not FWAB.
Ohio --- One county did not include 4 uniformed FWAB ballots in the breakout.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.
South Carolina --- B4 and B5 are the same because South Carolina cannot breakout FWAB and UOCAVA.

## Question B5:

California --- One county did not include returns of stateside military ballots. One county included FWABs in their reporting of UOCAVA absentee.

Ohio --- One county included FWABs in their reported breakout.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.
South Carolina --- B4 and B5 are the same because South Carolina cannot breakout FWAB and UOCAVA.

## Tables 12, 13, 14. UOCAVA Ballots Submitted for Counting: Type of Ballot for All Voters; Uniformed; Civilian (continued)

## Question B6:

California --- One county did not include returns of stateside military ballots.
Florida --- One county reported 10 day UOCAVA voters.
Missouri --- One county reported that they had 1 FWAB for uniformed service that was not included in their reported numbers.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.

## Question B7:

Colorado --- Several counties included "Special" Write-In Absentee Ballots (SWAB).
Missouri --- One county reported 2 e-mail ballots that were both for uniformed service.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.

## Table 15. UOCAVA Ballots Counted: Type of Voter

## Questions B8, B9. Number of UOCAVA ballots (regular plus FWAB) counted by type of voter.

General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

## Question B8:

Colorado --- One county included "Special" Write-In Absentee Ballots (SWAB).
Mississippi --- One county reported 1 ballot actually not being counted even though they reported it counting.
Ohio --- One county had 59 ballots counted but did not report it in the table.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.
South Carolina --- B8 is the best possible estimation available. It is possible that some of these ballots could have been challenged and not counted. Once challenged, these ballots are no longer tracked as a UOCAVA ballot; they would be tracked simply as provisional ballots. Also, when reporting results, UOCAVA results are reported in an absentee precinct with all the other absentee ballots.

## Question B9:

Arkansas --- One county only could provide percentages. B9a: 68\%. B9b: $32 \%$.
California --- Two counties did not include returns of stateside military ballots. Two counties had a total of 116 FWAB ballots counted but could not breakout.

Colorado --- One county double counted their 56 FWAB votes by counting them in B9a and B9b while also adding them as a third category of B9c.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B9a and B9b are the breakdowns of UOCAVA absentee ballots, and B9c is the number of FWABs counted. B9a and B9b are the same as B10a and B10b.

Ohio --- One county wrote, "The difference in our official count and the total number who participated in the November 2008 General Election is due to the situation where we credited the voters for voting in this election, although their vote was not included as counting in the official count."

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.
South Carolina --- This number represents the total returned before the deadline. It is possible that some of these ballots could have been challenged and not counted after receiving them.

## Tables 16, 17, 18. UOCAVA Ballots Counted: Type of Ballot for All Voters; Uniformed; Civilian

Questions B8, B9, B10, B11, B12. Number of UOCAVA ballots (regular plus FWAB) counted by type of ballot by type of voter.
General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting. For Montana: The balance column indicates an over-count as Absentee ballots included the count of FWABs.

## Question B9:

Arkansas --- One county only could provide percentages. B9a: 68\%. B9b: $32 \%$.
California --- One county did not include returns of stateside military ballots. Two counties had a total of 116 FWAB ballots counted but could not breakout.

Colorado --- One county double counted their 56 FWAB votes by counting them in B9a and B9b while also adding them as a third category of B9c.

Indiana --- a) Absentee ballots were counted as Cast in this survey if the county user placed the ballot in Received status within the Indiana SVRS prior to marking the ballot as "Accepted (Counted)" or "Rejected (Not Counted)." If the county marked the status of the ballot as "Accepted" or "Rejected" before marking it as "Received" those ballot statistics were not added to the total number of Cast ballot, so that Cast ballot counts were not inflated. b) Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B9a and B9b are the breakdowns of UOCAVA absentee ballots, and B9c is the number of FWABs counted. B9a and B9b are the same as B10a and B10b.

Ohio --- One county wrote, "The difference in our official count and the total number who participated in the November 2008 General Election is due to the situation where we credited the voters for voting in this election, although their vote was not included as counting in the official count."

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.
South Carolina --- B9 is the best possible estimation available. It is possible that some of these ballots could have been challenged and not counted.

## Question B10:

Arkansas --- One county only could provide percentages. B10a: 66\%. B10b: $29 \%$.
California --- One county did not include returns of stateside military ballots. One county included FWAB ballots in their answers.

Maryland --- Maryland included FWABS in their totals for B10, Absentee ballots counted breakout.
Ohio --- For one county, Federal write-ins were counted with Absentee not separately.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.

## Tables 16, 17, 18. UOCAVA Ballots Counted: Type of Ballot for All Voters; Uniformed; Civilian (continued)

## Question B11:

Arkansas --- One county only could provide percentages. B11a: $2 \%$. B11b: $3 \%$.
California --- One county did not include returns of stateside military ballots. One county had a total of 32 FWAB ballots counted but could not breakout.

Colorado --- One county counted all 5 FWABs in B11b, because they were unable to separate.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.
Question B12:
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.

## Table 19. UOCAVA Ballots: Counted as Percentage of Cast, by Type of Voter

Questions B3, B4, B8, B9. Number of UOCAVA ballots (regular plus FWAB) submitted for counting (cast) and counted by type of voter.
Question B3:
Arizona --- Two counties did not include a total of 305 ballots that were later rejected for late delivery.
California --- One county did not include returns of stateside military ballots.
Florida --- Two counties reported a total of 52 FWABs being returned but were never requested.
Idaho --- B3 includes Spoiled Ballots but does not include Undeliverable Ballots.
Indiana --- a) Absentee ballots were counted as Cast in this survey if the county user placed the ballot in Received status within the Indiana SVRS prior to marking the ballot as "Accepted (Counted)" or "Rejected (Not Counted)." If the county marked the status of the ballot as "Accepted" or "Rejected" before marking it as "Received" those ballot statistics were not added to the total number of Cast ballot, so that Cast ballot counts were not inflated. b) Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Ohio --- One county did not include 3 FWAB ballots that were later rejected.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.
South Carolina --- B2a and B3 are the same because South Carolina cannot breakout FWAB and UOCAVA.
South Dakota --- B2 and B3 are the same number.

## Question B4:

California --- One county did not include returns of stateside military ballots.
Illinois --- Some jurisdictions did not segregate out between uniformed services and civilian overseas; they were seemly lumped in a "UOCAVA" file, that is now B4c.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B4a and B4b are the breakdowns of UOCAVA absentee ballots, and B4c is the number of FWABs. B5a and B5b are the same as B4a and B4b.

Missouri --- One county only had data on absentee ballots, not FWAB.
Ohio --- One county did not include 4 uniformed FWAB ballots in the breakout.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.
South Carolina --- B4 and B5 are the same because South Carolina cannot breakout FWAB and UOCAVA.

## Table 19. UOCAVA Ballots: Counted as Percentage of Cast, by Type of Voter (continued)

## Question B8:

Colorado --- One county included "Special" Write-In Absentee Ballots (SWAB).
Mississippi --- One county reported 1 ballot actually not being counted even though they reported it counting.
Ohio --- One county had 59 ballots counted but did not report it in the table.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.
South Carolina --- B8 is the best possible estimation available. It is possible that some of these ballots could have been challenged and not counted. Once challenged, these ballots are no longer tracked as a UOCAVA ballot; they would be tracked simply as provisional ballots. Also, when reporting results, UOCAVA results are reported in an absentee precinct with all the other absentee ballots.

## Question B9:

Arkansas --- One county only could provide percentages. B9a: 68\%. B9b: 32\%.
California --- Two counties did not include returns of stateside military ballots. Two counties had a total of 116 FWAB ballots counted but could not breakout.

Colorado --- One county double counted their 56 FWAB votes by counting them in B9a and B9b while also adding them as a third category of B9c.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B9a and B9b are the breakdowns of UOCAVA absentee ballots, and B9c is the number of FWABs counted. B9a and B9b are the same as B10a and B10b.

Ohio --- One county wrote, "The difference in our official count and the total number who participated in the November 2008 General Election is due to the situation where we credited the voters for voting in this election, although their vote was not included as counting in the official count."

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.
South Carolina --- This number represents the total returned before the deadline. It is possible that some of these ballots could have been challenged and not counted after receiving them.

## Table 20. UOCAVA Ballots: Counted by Type of Ballot

Questions B8, B10, B11, B12. Number of UOCAVA ballots (regular plus FWAB) counted by type of ballot.
General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

## Question B8:

Colorado --- One county included "Special" Write-In Absentee Ballots (SWAB).
Mississippi --- One county reported 1 ballot actually not being counted even though they reported it counting.
Ohio --- One county had 59 ballots counted but did not report it in the table.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.
South Carolina --- B8 is the best possible estimation available. It is possible that some of these ballots could have been challenged and not counted. Once challenged, these ballots are no longer tracked as a UOCAVA ballot; they would be tracked simply as provisional ballots. Also, when reporting results, UOCAVA results are reported in an absentee precinct with all the other absentee ballots.

## Question B10:

Arkansas --- One county only could provide percentages. B10a: 66\%. B10b: $29 \%$.
California --- One county did not include returns of stateside military ballots. One county included FWAB ballots in their answers.

Maryland --- Maryland included FWABS in their totals for B10, Absentee ballots counted breakout.
Ohio --- For one county, Federal write-ins were counted with Absentee not separately.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.

## Question B11:

Arkansas --- One county only could provide percentages. B11a: $2 \%$. B11b: $3 \%$.
California --- One county did not include returns of stateside military ballots. One county had a total of 32 FWAB ballots counted but could not breakout.

Colorado --- One county counted all 5 FWABs in B11b, because they were unable to separate.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.

## Question B12:

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.

## Table 21. UOCAVA Ballots Rejected: Type of Voter

Questions B13, B15. Number of UOCAVA ballots (regular plus FWAB) rejected by type of voter.
General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

## Question B13:

Indiana --- Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Michigan --- Decisions on rejected absentee ballots \& FWABs are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4b.
South Dakota --- One ballot was rejected for missing the deadline but was not reported in the table.

## Question B15:

California --- One county reported an unexplained "discrepancy" that is showing one more rejected voter in the breakout than in the reported total.

Indiana --- Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B15a and B15b are the breakdowns of UOCAVA absentee ballots, and B15c is the number of FWABs rejected. B15a and B15b are the same as B16a and B16b.

Michigan --- Decisions on rejected absentee ballots \& FWABs are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4b.
South Carolina --- For South Carolina, all UOCAVA ballots are "absentee." FWAB ballots are not tracked separately. Therefore, B15 and B16 are the same.

## Tables 22, 23, 24. UOCAVA Ballots Rejected: Type of Ballot for All Voters; Uniformed; Civilian

Questions B13, B15, B16, B17, B18. Number of UOCAVA ballots (regular plus FWAB) rejected by type of ballot.
General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting. For Montana: The balance column indicates an over-count as Absentee ballots included the count of FWABs.

## Question B13:

Indiana --- Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Michigan --- Decisions on rejected absentee ballots \& FWABs are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4b.
South Dakota --- One ballot was rejected for missing the deadline but was not reported in the table.

## Question B15:

California --- One county reported an unexplained "discrepancy" that is showing one more rejected voter in the breakout than in the reported total.

Indiana --- Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B15a and B15b are the breakdowns of UOCAVA absentee ballots, and B15c is the number of FWABs rejected. B15a and B15b are the same as B16a and B16b.

Michigan --- Decisions on rejected absentee ballots \& FWABs are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4b.
South Carolina --- For South Carolina, all UOCAVA ballots are absentee. FWAB ballots are not tracked separately. Therefore, B15 and B16 are the same.

# Tables 22, 23, 24. UOCAVA Ballots Rejected: Type of Ballot for All Voters; Uniformed; Civilian (continued) 

## Question B16:

California --- One county included FWABs in their reporting of UOCAVA absentee.
Indiana --- Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Michigan --- Decisions on rejected absentee ballots \& FWABs are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4b.

## Question B17:

Indiana --- Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Michigan --- Decisions on rejected absentee ballots \& FWABs are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4b.

## Question B18:

Indiana --- Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Michigan --- Decisions on rejected absentee ballots \& FWABs are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4b.

| Question |  | B15b |  | B16b |  |  | B17b |  |  | B18b |  |  | calc |  |

## Table 25. UOCAVA Ballots Rejected: Reason for Rejection

Questions B13, B14. Number of UOCAVA ballots (regular plus FWAB) rejected by reason for rejection.
General note: The Balance/Not Categorized column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

## Question B13:

Michigan --- Decisions on rejected absentee ballots \& FWABs are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4b.
South Dakota --- One ballot was rejected for missing the deadline but was not reported in the table.

## Question B14:

Arkansas --- One county only could provide percentages. B14a: $23 \%$. B14c: $33 \%$. B14e: $44 \%$.
California --- One county reported an unexplained "discrepancy" that is showing more rejected voters in the breakout than in the reported total. One county reported that 1 ballot was rejected because no voter declaration with ballot. For B14b, no signature, one county included ballots rejected for not having a cover sheet, and one county included ballots rejected for signatures that do not match.

Iowa --- Several counties rejected a total of 32 additional FWABs because they submitted their UOCAVA ballot.
Michigan --- Decisions on rejected absentee ballots \& FWABs are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.

Ohio --- One county only reported on Absentee ballots, not FWAB rejections.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C5a:v.

## Tables 26, 27, 28. UOCAVA Ballots: Cast as a Percentage of Transmitted; Counted, or Rejected as a Percentage of Cast for All Voters; Uniformed; Civilian

Questions B1, B3, B4, B8, B9, B13, B15. Number of UOCAVA ballots submitted for counting as a percentage of transmitted ballots; counted, or rejected as a percentage of submitted ballots by type of voter.

General note: The Balance of Submitted-Counted or Rejected column on the table compares the sum of all the categorical responses with the total indicated. If the balance is a positive number the difference is treated as uncategorized responses. If the balance is a negative number (indicated by the parentheses) the difference indicates the sum of the responses is greater than the total indicated; this could occur by an error in data entry or by the inability to correctly categorize some responses, resulting in some over-counting.

Note: The "Ballots Transmitted" in this table includes the numbers from B1 and the numbers from B6, as appropriate, to include the FWABs.

## Question B1:

California --- One county only reported the total of UOCAVA ballots automatically transmitted, not those by request. Two counties included second ballots in their totals.

Illinois --- Some jurisdictions in Illinois did not segregate out between uniformed services and civilian overseas they were seemly lumped in a "UOCAVA" file that is now B1d.

Mississippi --- One county grouped both military and non-military under uniformed.
South Dakota --- One county transmitted 2 additional ballots that were not reported in the numbers.
Washington --- One county included replacement ballots sent in Bla.

## Question B3:

Arizona --- Two counties did not include a total of 305 ballots that were later rejected for late delivery.
California --- One county did not include returns of stateside military ballots.
Florida --- Two counties reported a total of 52 FWABs being returned but were never requested.
Idaho --- B3 includes Spoiled Ballots but does not include Undeliverable Ballots.
Indiana --- a) Absentee ballots were counted as Cast in this survey if the county user placed the ballot in Received status within the Indiana SVRS prior to marking the ballot as "Accepted (Counted)" or "Rejected (Not Counted)." If the county marked the status of the ballot as "Accepted" or "Rejected" before marking it as "Received" those ballot statistics were not added to the total number of Cast ballot, so that Cast ballot counts were not inflated. b) Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Ohio --- One county did not include 3 FWAB ballots that were later rejected.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.
South Carolina --- B2a and B3 are the same because South Carolina cannot breakout FWAB and UOCAVA.
South Dakota --- B2 and B3 are the same number.

# Tables 26, 27, 28. UOCAVA Ballots: Cast as a Percentage of Transmitted; Counted, or Rejected as a Percentage of Cast for All Voters; Uniformed; Civilian (continued) 

## Question B4:

California --- One county did not include returns of stateside military ballots.
Illinois --- Some jurisdictions did not segregate out between uniformed services and civilian overseas they were seemly lumped in a "UOCAVA" file, that is now B4c.

Indiana --- a) Absentee ballots were counted as Cast in this survey if the county user placed the ballot in Received status within the Indiana SVRS prior to marking the ballot as "Accepted (Counted)" or "Rejected (Not Counted)." If the county marked the status of the ballot as "Accepted" or "Rejected" before marking it as "Received" those ballot statistics were not added to the total number of Cast ballot, so that Cast ballot counts were not inflated. b) Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B4a and B4b are the breakdowns of UOCAVA absentee ballots, and B4c is the number of FWABs. B5a and B5b are the same as B4a and B4b.

Missouri --- One county only had data on absentee ballots, not FWAB.
Ohio --- One county did not include 4 uniformed FWAB ballots in the breakout.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C1b.
South Carolina --- B4 and B5 are the same because South Carolina can not breakout FWAB and UOCAVA.

## Question B8:

Colorado --- One county included "Special" Write-In Absentee Ballots (SWAB).
Mississippi --- One county reported 1 ballot actually not being counted even though they reported it counting.
Ohio --- One county had 59 ballots counted but did not report it in the table.
Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.
South Carolina --- B8 is the best possible estimation available. It is possible that some of these ballots could have been challenged and not counted. Once challenged, these ballots are no longer tracked as a UOCAVA ballot; they would be tracked simply as provisional ballots. Also, when reporting results, UOCAVA results are reported in an absentee precinct with all the other absentee ballots.

## Question B9:

Arkansas --- One county only could provide percents. B9a $68 \%$ B9b. $32 \%$
California --- One county did not include returns of stateside military ballots. Two counties had a total of 116 FWAB ballots counted but could not breakout.

Colorado --- One county double counted their 56 FWAB votes by counting them in B9a and B9b while also adding them as a third category of B9c.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B9a and B9b are the breakdowns of UOCAVA absentee ballots, and B9c is the number of FWABs counted. B9a and B9b are the same as B10a and B10b.

## Tables 26, 27, 28. UOCAVA Ballots: Cast as a Percentage of Transmitted; Counted, or Rejected as a Percentage of Cast for All Voters; Uniformed; Civilian (continued)

Ohio --- One county wrote, "The difference in our official count and the total number who participated in the November 2008 General Election is due to the situation where we credited the voters for voting in this election, although their vote was not included as counting in the official count."

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4a.
South Carolina --- B9 is the best possible estimation available. It is possible that some of these ballots could have been challenged and not counted.

## Question B13:

Michigan --- Decisions on rejected absentee ballots \& FWABs are made in the clerk's office before the ballots are submitted to the appropriate precinct board for counting.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4b.
South Dakota --- One ballot was rejected for missing the deadline but was not reported in the table.

## Question B15:

California --- One county reported an unexplained "discrepancy" that is showing one more rejected voter in the breakout than in the reported total.

Indiana --- a) Absentee ballots were counted as Cast in this survey if the county user placed the ballot in Received status within the Indiana SVRS prior to marking the ballot as "Accepted (Counted)" or "Rejected (Not Counted)." If the county marked the status of the ballot as "Accepted" or "Rejected" before marking it as "Received" those ballot statistics were not added to the total number of Cast ballot, so that Cast ballot counts were not inflated. b) Indiana was not able to collect rejected FWAB statistics from all counties, which makes the total number of Indiana UOCAVA ballots rejected incomplete. The total number of Indiana UOCAVA ballots rejected is missing some FWAB counts. Also note that a ballot is marked as Rejected in the Indiana SVRS for two reasons; (1) if the ballot was received and not counted or (2) if the ballot was not received back from the voter. Therefore, a ballot marked as "Rejected" in SVRS is not necessarily a "Cast" ballot.

Maryland --- Maryland was unable to break down FWABs into UOCAVA and non-military overseas. B15a and B15b are the breakdowns of UOCAVA absentee ballots, and B15c is the number of FWABs rejected. B15a and B15b are the same as B16a and B16b.

Oregon --- Unable to separate UOCAVA voters from all absentee voters. See C4b.
South Carolina --- For South Carolina, all UOCAVA ballots are "absentee." FWAB ballots are not tracked separately. Therefore, B15 and B16 are the same.

## Appendix B - Questionnaire (UOCAVA Questions Only)

## U.S. ELECTION ASSISTANCE COMMISSION

## 2008 Election Administration \& Voting Survey

The ongoing process of improving America's election systems relies in part on having accurate data about the way Americans cast their ballots. In 2002, Congress chartered the U.S. Election Assistance Commission to collect information on the state of American elections and make it widely available to policy makers, advocates, scholars, journalists and the general public. Since 2004, the Commission has sponsored an Election Day Survey as its primary tool for fulfilling that mission. We are pleased to present the 2008 Election Day Survey, and we ask for your help in making it the most complete and accurate survey in its history.

The questions below ask for information about ballots cast; voter registration; overseas and military voting; Election Day activities; voting technology; and other important issues. Many of these questions are mandated by the Help America Vote Act and other federal laws, while other questions were included at the request of the research community or policy makers. The EAC recognizes the burden that asking for this data places on state and local election officials, and we have worked to minimize that burden as much as possible.

In advance, we thank you for your cooperation and look forward to answering any questions you might have.
Information supplied by:

| Name | Title |  |
| :--- | :--- | :--- | :--- |
| Office/Agency name | State | Zip Code |
| Address 1 |  |  |
| Address 2 |  |  |
| City |  |  |
| E-mail address |  |  |
| Telephone (area code and number) | Extension |  |

## SECTION B UNIFORMED \& OVERSEAS CITIZENS ABSENTEE VOTING ACT (UOCAVA)

Roadmap to Section B:

- B1 and B2 ask for information about the number and type of UOCAVA absentee ballots transmitted.
- B3 asks for the number and type of all UOCAVA ballots returned and submitted for counting.
- B4, B5, B6, and B7 asks for information on the type of UOCAVA ballot returned by type of UOCAVA voter.
- B8 asks for the number and type of all UOCAVA ballots counted.
- B9, B10, B11, and B12 asks for information on the type of UOCAVA ballot counted by type of UOCAVA voter.
- B13 asks for the number and type of all UOCAVA ballots rejected.
- B14 asks for the information on reasons why UOCAVA ballots were rejected.
- B15, B16, B17, and B18 asks for information on the type of UOCAVA ballot rejected by type of UOCAVA voter.
- B19 asks for information on how ballots were transmitted to UOCAVA voters.
- B20 asks for information on the status of ballots automatically transmitted to UOCAVA voters.

B1. Enter the total number of absentee ballots transmitted to UOCAVA voters for the November 2008 general election.
B1a. Total $\qquad$
$\qquad$ .. $\qquad$Data not available

Next, divide the total number of absentee ballots transmitted to UOCAVA voters (as entered in B1a) into the following categories. The amounts should sum to the total provided in B1a.

B2. Of the UOCAVA absentee ballots transmitted (as entered in B1a) how many were:

B3. Enter the total number of all UOCAVA ballots (including regular UOCAVA absentee ballots and FWAB) returned by UOCAVA voters and submitted for counting for the November 2008 general election. Please include both those ballots that were later counted and those that were rejected. Do not include ballots that were returned undeliverable.

Total. $\qquad$
$\qquad$ ....................Data not available

## B3 Comments

$\square$

B4a thru B4c. Divide the total number of UOCAVA ballots returned by UOCAVA voters and submitted for counting (as entered in B3), into each category of UOCAVA voter below.

## Next, for each type of UOCAVA voter, enter the number of:

- B5a thru B5c: Regular UOCAVA absentee ballots returned and submitted for counting.
- B6a thru B6c: Federal Write-in Absentee Ballots (FWAB) returned and submitted for counting.
- B7a thru B7c: Other type of ballots returned and submitted for counting.

## B4 Comments

## B7 Comments

B8. Enter the total number of all UOCAVA ballots (including regular UOCAVA absentee ballots and FWAB) counted in the November 2008 general election.

Total. $\qquad$
$\qquad$ ................................Data not available

## B8 Comments

$\square$

B9a thru B9c. Divide the total number of UOCAVA ballots counted (as entered in B8) into each category of UOCAVA voter below.
Next, for each type of UOCAVA voter, enter the number of:

- B10a thru B10c: Regular UOCAVA absentee ballots counted.
- B11a thru B11c: Federal Write-in Absentee Ballots (FWAB) counted.
- B12a thru B12c: Other type of ballots counted.

B20. Of the UOCAVA ballots automatically transmitted (as entered in B19b), how many were:

* This information collection is required for the EAC to meet its statutory requirements under the Help America Vote Act (HAVA) of 2002 (42 U.S.C. 15301), the National Voter Registration Act (NVRA) ( 42 U.S.C. 1973gg-1 et seq.), and the Uniformed and Overseas Citizens Absentee Voters Act (UOCAVA) (42 U.S.C. 1973ff-1). Respondent's obligation to reply to this information collection is mandatory as required under NVRA (42 U.S.C. 1973gg-1 et seq.) and UOCAVA (42 U.S.C. 1973ff-1); respondents include the fifty states, the District of Columbia, and the U.S. Territories. This information will be made publicly available on the EAC website (www.eac.gov). According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is OMB Control No. 3265-0006 (expires 3/31/09). The time required to complete this information collection is estimated to average 88 hours per state response. This estimate includes the time for reviewing the instructions, gathering information, and completing the form. Comments regarding this burden estimate should be sent the U.S. Election Assistance Commission - 2008 Election Administration and Voting Survey, 1225 New York Avenue, Suite 1100, Washington, DC 20005.

[^0]:    1 Response rates improved in many areas of the survey in addition to UOCAVA. See "The Impact of the National Voter Registration Act on Federal Elections, 2007-2008" and "The 2008 Election Administration and Voting Survey" at the EAC Web site, http:// www.eac.gov.

[^1]:    2 See 42 U.S.C. $\$ \$$ 15341-46 for more information on the Board of Advisors and Standards Board.

    3 See U.S. EAC, Uniformed and Overseas Citizens Absentee Voting Act, Survey Report Findings, September 2007.

[^2]:    4 The Standards Board is comprised of 110 State and local election officials, and the Board of Advisors is comprised of 37 members who represent various national associations, government agencies, and congressional leadership.

[^3]:    5 Users should also note that there may be slight discrepancies between totals that would appear to be the same; this occurs when, for example, States reported totals for a data element but had non-responses when breaking down the data element into subcategories, or when States provided different responses to questions asked more than once in the questionnaire.

[^4]:    8 The number of automatically-transmitted ballots far exceeds usage of the FPCA, suggesting that States may extend automatic ballot transmission to UOCAVA voters regardless of whether they use the FPCA.

[^5]:    9 In 2006, the survey asked States to report how many ballots were requested, not transmitted. There is no indication that State and local offices do not act on requests; therefore, the numbers should be equivalent.
