General Description of Your Program	In Puerto Rico as in other countries there is a decline of health care professionals choosing to work in primary , dental and mental health care fields in communities where they are most needed.
Goals and Objectives	Provide for forty Health Professionals to serve in multidisciplinary health care teams in underserved areas.
Activities undertaken by Students/Residents in Program	Serve 160 hours or four weeks rotation in a community health centers that exposes them to multidisciplinary teamwork, under the direction of a preceptor in their health area. Help them identify mentor. Receive information on NHSC, Community Health Center (330), administer a pre and post test in cultural competence, and Multidisciplinary health care team and managed care. Students and Residents will also be exposed to Health Information Technology.
Coordination	Develop a SEARCH implementation plan including travel, logistics , communication and clinical rotation. Student/Residents will choose community health sites. A manual / community clinical experience guide will be given to student/residents as part of the orientation prior

	to rotation. Assign students to four weeks of rotation at training sites with an structured communication with program coordinator and preceptor . Obtain evaluation form each student site at the beginning of rotation at mid point and when finishing. Payment of stipend.
List of Sites Students can/will be rotating through	Nineteen 19 community based primary care sites and other nineteen extension centers.
Evaluation	A web page is available for application admpr.org/search.php Paperwork required by sites(eg; health certificate, criminal background.) will be mailed or delivered to the physical address An orientation will be provided where it,s explained what needs to be completed , Pre test and post test on cultural competency and multidisciplinary team work. General information questionnaire, student time sheet , filled by preceptor, exit interview forms, providing information on training experience and if expectations where fulfilled. Clinical or community experience evaluation.
Are you a former SEARCH Program	<Yes
