This document contains information about preparing your computer to complete ASA24[™] if you are using Windows Internet Explorer to browse the internet.

Microsoft[®] Silverlight[™]

Microsoft Silverlight[™] is a free program called a plug-in. Plug-ins allow you to experience a website's full set of features, such as animation. You may already be familiar with a similar plug-in called Flash from Adobe. Flash has been around for much longer and most computers already have it installed. Silverlight is newer and growing in use but you may not have yet had a chance to install it on your computer.

Silverlight version 4.0 or higher is needed to complete ASA24[™]. If you do not already have it installed on your computer, you will need to install it before you will be able to log in to ASA24[™]. You will only need to install Silverlight once in the browser you will be using. But if you use a different browser (e.g., Firefox, Chrome, or Safari) next time you use ASA24[™] on your computer or use a different computer to complete ASA24[™], you may have to install it again. It takes less than 1 minute to install Silverlight.

Note regarding Apple computers, iPhones, and iPads: Because Silverlight is relatively new, it will run on Intel-based Macintosh computers (also known as Macs) but **not** on older Mac PowerPCs. Intel-based Macs have been around for over five years so if you have a Mac, chances are it is an Intel-based Mac. ASA24[™] cannot be completed on Apple's iPhones or iPads because they do not support Silverlight.

Please note: ASA24[™] displays a lot of information at once so it is best viewed on a monitor that supports a minimum resolution of 1024x768 or greater. While ASA24[™] will proportionally scale to lower resolutions, you may find it difficult to use.

How do I know if I have Silverlight installed?

There are a few ways you can check to find out if the plug-in is enabled in your browser. The easiest way is to let ASA24[™] check for you.

When you are notified to complete ASA24[™], log in to <u>http://asa24.westat.com</u> using the username and password assigned to you. Click Begin ASA24 (Figure 1) to get started.

If you have the Silverlight plug-in installed, ASA24[™] will launch.

If you do not have the Silverlight plug-in installed, you will see the message displayed below in Figure 2.

Step 1: To install Silverlight, click or select the **Install Now** button shown in Figure 2.

Step 2: The installation package will be downloaded.

If using Safari on MacOS, you will see a download window similar to the one shown in Figure 3.

0	0	Downloads	
*	Silverlight.pkg 12.9 MB		9
Clear		1 Download	11.
