^b Rates are from the SEER 9 areas. They are based on data from population-based registries in Connecticut, New Mexico, Utah, Iowa, Hawaii, Atlanta, Detroit, Seattle-Puget Sound and San Francisco-Oakland. Rates are based on follow-up of patients into 1999.

[†] The standard error of the survival rate is between 5 and 10 percentage points.

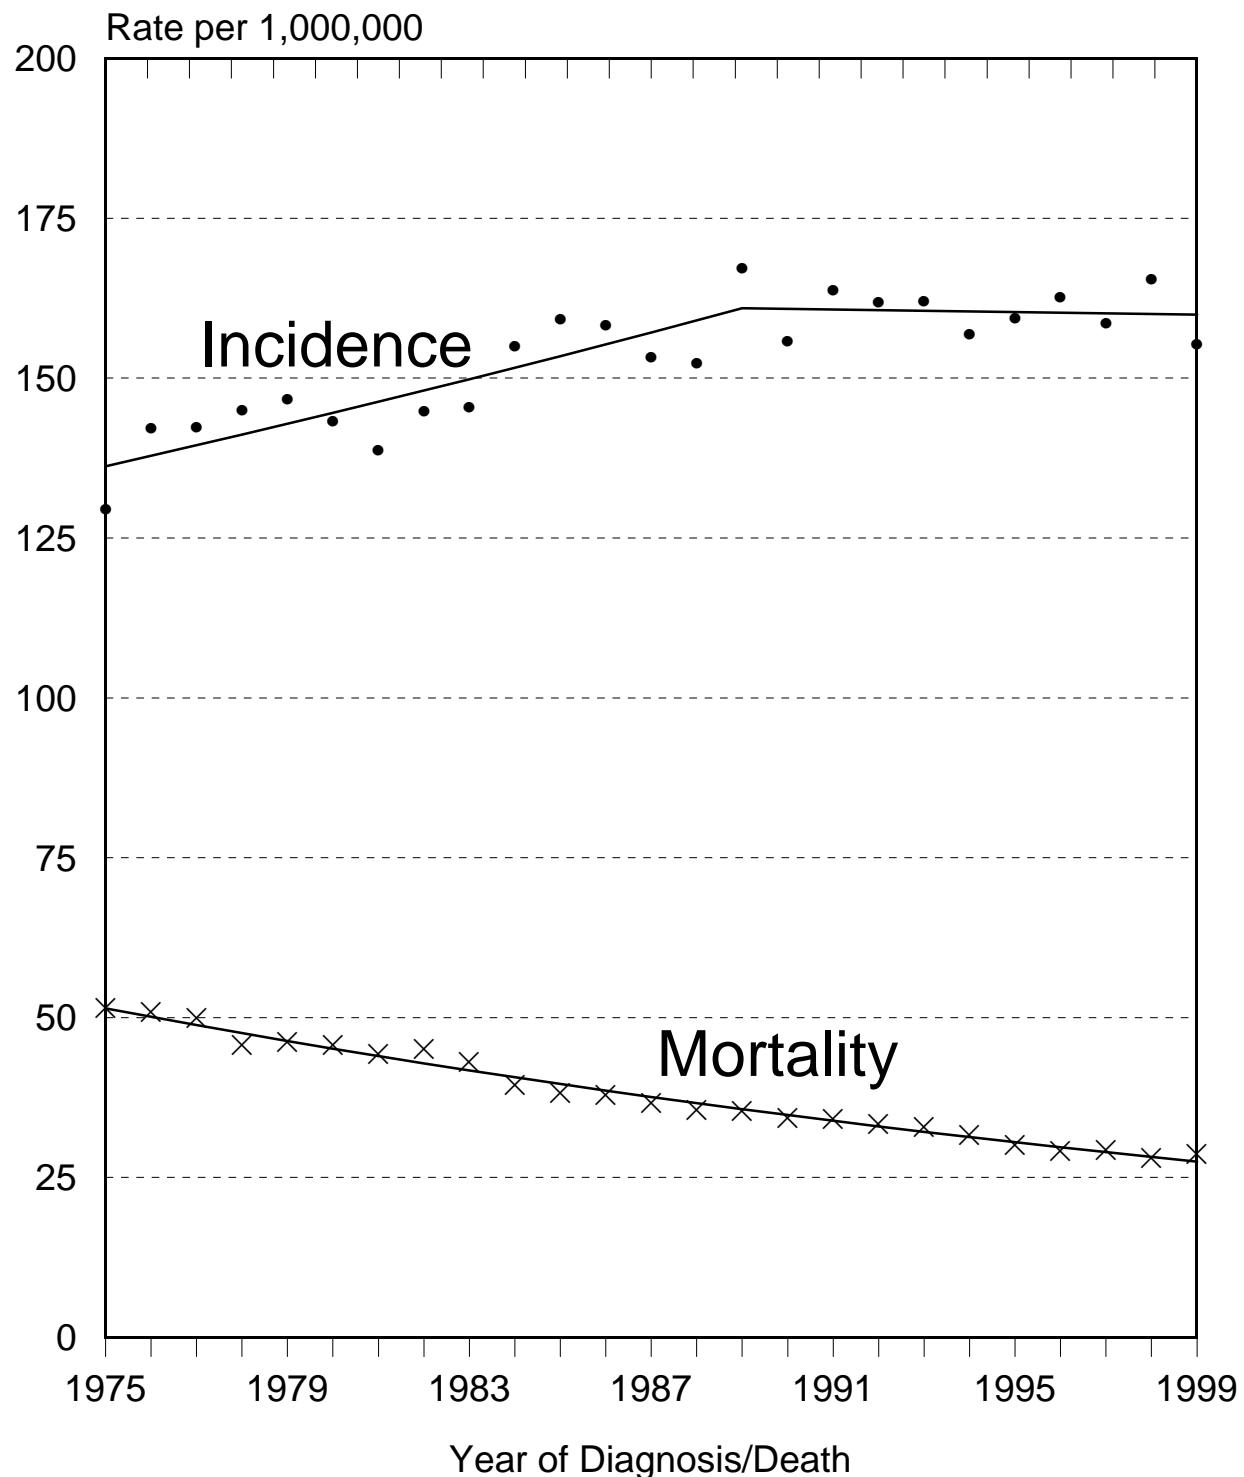

- Statistic could not be calculated.

Neoplasms are abbreviated as neo.

Survival rates are relative rates expressed as percents.
