## Introduction

One of the priorities of the NIH Enhancing Peer Review initiative is to *Improve the Quality and Transparency of Review*. One of the goals associated with this priority is to shorten the Research Plan and align it with review criteria.

Restructured paper PHS 398 and electronic SF 424 (R&R) application packages and instructions will be required for all applications submitted for due dates on or after January 25, 2010. Changes were announced in [NOT-OD-09-149](#) and [NOT-OD-10-002](#).

This document provides details of applications changes to **Research Grants and Cooperative Agreements**. Details of application changes to other types of applications are provided via the [Restructured Applications page](#) of the [Enhancing Peer Review Web site](#).

## Shortened Page Limits

Shortened page limits are provided at the [Table of Page Limits](#).

## Alignment of the Application with Review Criteria

Many of the changes to the application were made to coordinate with review criteria used by reviewers in their assessment of scientific and technical merit. Table 1 shows the scored Enhanced Review Criteria for research grants and cooperative agreements, as announced in [NOT-OD-09-025](#), and the location in the application where a particular criterion is addressed.

**Table 1: Enhanced Review Criteria for Research Grants and Cooperative Agreements**

Enhanced Peer Review Criteria	Complementary Section of Restructured Application Forms and Instructions
<b>Overall Impact.</b> Reviewers will provide an overall impact/priority score to reflect their assessment of the	Entire application

Enhanced Peer Review Criteria	Complementary Section of Restructured Application Forms and Instructions
likelihood for the project to exert a sustained, powerful influence on the research field(s) involved, in consideration of the following five core review criteria, and additional review criteria (as applicable for the project proposed).	
<b>Significance.</b> Does the project address an important problem or a critical barrier to progress in the field? If the aims of the project are achieved, how will scientific knowledge, technical capability, and/or clinical practice be improved? How will successful completion of the aims change the concepts, methods, technologies, treatments, services, or preventative interventions that drive this field?	5.5 Research Plan [PHS 398 and SF 424 (R&R)] 3. Research Strategy (a) Significance
<b>Investigator(s).</b> Are the PD/PIs, collaborators, and other researchers well suited to the project? If Early Stage Investigators or New Investigators, do they have appropriate experience and training? If established, have they demonstrated an ongoing record of accomplishments that have advanced their field(s)? If the project is collaborative or multi-PD/PI, do the investigators have complementary and integrated expertise; are their leadership approach, governance and organizational structure appropriate for the project?	4.6 Biographical Sketch [PHS 398]  4.5 Senior/Key Person Profile [SF 424 (R&R)] Additional NIH & Other Agencies Instructions for a Biographical Sketch &  5.5 Research Plan [PHS 398 and SF 424 (R&R)] 12. Multiple PD/PI Leadership Plan
<b>Innovation.</b> Does the application challenge and seek to shift current research or clinical practice paradigms by utilizing novel theoretical concepts, approaches or methodologies, instrumentation, or interventions? Are the concepts, approaches or methodologies, instrumentation, or interventions novel to one field of research or novel in a broad sense? Is a refinement, improvement, or new application of theoretical concepts, approaches or methodologies, instrumentation, or interventions proposed?	5.5 Research Plan [PHS 398 and SF 424 (R&R)] 3. Research Strategy (b) Innovation
<b>Approach.</b> Are the overall strategy, methodology, and analyses well-reasoned and appropriate to accomplish the specific aims of the project? Are potential problems, alternative strategies, and benchmarks for success presented? If the project is in the early stages of development, will the strategy establish feasibility and will particularly risky aspects be managed? If the project involves clinical research, are the plans for 1) protection of human subjects from research risks, and 2) inclusion of minorities and members of both sexes/genders, as well as the inclusion of children, justified in terms of the scientific goals and research strategy proposed?	5.5 Research Plan [PHS 398 and SF 424 (R&R)] 3. Research Strategy (c) Approach
<b>Environment.</b> Will the scientific environment in which the work will be done contribute to the probability of success?	5.5 Content of Research Plan [PHS 398 and SF 424 (R&R)]

Enhanced Peer Review Criteria	Complementary Section of Restructured Application Forms and Instructions
Are the institutional support, equipment and other physical resources available to the investigators adequate for the project proposed? Will the project benefit from unique features of the scientific environment, subject populations, or collaborative arrangements?	<p>11. Select Agent Research &amp; 4.7 Resources [PHS 398] Resources Format Page</p> <p>4.4. Other Project Information Component [SF 424 (R&amp;R)] Item 9. Facilities &amp; Other Resources</p>

Tables 2 – 4 provide the text of the current application instructions in the right column, aligned with the corresponding restructured application instructions in the center column; revised text is indicated by **Emphasis**. The left column corresponds to the Enhanced Review Criteria from Table 1.

**Table 2a: Instructions for Selected Sections of the Research Plan (Introduction, Specific Aims, and Research Strategy)**

Paper applications: Section 5.5 of the PHS 398

Electronic applications: Section 5.5 of the SF 424 (R&R) PHS 398 Research Plan Component

	Restructured Application Instructions (New Language)	Current Application Instructions
	<p><b>5.5.1 Introduction (Resubmission or Revision Applications only)</b></p> <p>See specific instructions in 2.7 Resubmission Applications and 2.8 Revision Applications on the content of the Introduction. First time (new) applications should not include an Introduction unless specified in the FOA.</p> <p>The Introduction is limited to one page unless specified otherwise in the FOA.</p>	<p><b>5.5.1 Introduction (Resubmission or Revision Applications only)</b></p> <p>All Resubmission and Revision applications must include an Introduction. The Introduction may not exceed three pages for Resubmission applications, or one page for Revision applications. See specific instructions in 2.7 Resubmission Applications and 2.8 Revision Applications on the content of the Introduction. Place the Introduction at the very beginning of the Research Plan.</p>
	<p><b>5.5.2 Specific Aims</b></p> <p>State concisely the goals of the proposed research and summarize the expected outcome(s), including the impact that the results of the proposed research will exert on the research field(s) involved.</p> <p>List succinctly the specific objectives of the research proposed, e.g., to test a stated hypothesis, create a novel design, solve a specific problem, challenge an existing paradigm or clinical practice, address a critical barrier to progress in the field, or develop new technology.</p>	<p><b>5.5.2 Specific Aims</b></p> <p>List the broad, long-term objectives and the goal of the specific research proposed, e.g., to test a stated hypothesis, create a novel design, solve a specific problem, challenge an existing paradigm or clinical practice, address a critical barrier to progress in the field, or develop new technology.</p>

	<b>Restructured Application Instructions</b> (New Language)	<b>Current Application Instructions</b>
	Specific Aims are limited to one page.	One page is recommended.
	<p><b>5.5.3 Research Strategy</b></p> <p>Organize the Research Strategy in the specified order and using the instructions provided below. Start each section with the appropriate section heading—Significance, Innovation, Approach. Cite published experimental details in the Research Strategy section and provide the full reference in the Bibliography and References Cited section (Item 5.5.5).</p> <p>Follow the page limits for the Research Strategy in the Table of Page Limits, unless specified otherwise in the FOA.</p>	
<i>Significance</i>	<p><b>(a) Significance</b></p> <ul style="list-style-type: none"> <li>• Explain the importance of the problem or critical barrier to progress in the field that the proposed project addresses.</li> <li>• Explain how the proposed project will improve scientific knowledge, technical capability, and/or clinical practice in one or more broad fields.</li> <li>• Describe how the concepts, methods, technologies, treatments, services, or preventative interventions that drive this field will be changed if the proposed aims are achieved.</li> </ul>	<p><b>5.5.3. Background and Significance</b></p> <p>Briefly sketch the background leading to the present application, critically evaluate existing knowledge, and specifically identify the gaps that the project is intended to fill. State concisely the importance and health relevance of the research described in this application by relating the specific aims to the broad, long-term objectives. If the aims of the application are achieved, state how scientific knowledge or clinical practice will be advanced. Describe the effect of these studies on the concepts, methods, technologies, treatments, services or preventative interventions that drive this field. Two to three pages are recommended.</p>
<i>Innovation</i>	<p><b>(b) Innovation</b></p> <ul style="list-style-type: none"> <li>• Explain how the application challenges and seeks to shift current research or clinical practice paradigms.</li> <li>• Describe any novel theoretical concepts, approaches or methodologies, instrumentation or intervention(s) to be developed or used, and any advantage over existing methodologies, instrumentation or intervention(s).</li> <li>• Explain any refinements, improvements, or new applications of theoretical concepts, approaches or methodologies, instrumentation or interventions.</li> </ul>	

	<b>Restructured Application Instructions (New Language)</b>	<b>Current Application Instructions</b>
<i>Approach</i>	<p><b>(c) Approach</b></p> <ul style="list-style-type: none"> <li>Describe the overall strategy, methodology, and analyses to be used to accomplish the specific aims of the project. Unless addressed separately in Item 5.5.15, include how the data will be collected, analyzed, and interpreted as well as any resource sharing plans as appropriate.</li> <li>Discuss potential problems, alternative strategies, and benchmarks for success anticipated to achieve the aims.</li> <li>If the project is in the early stages of development, describe any strategy to establish feasibility, and address the management of any high risk aspects of the proposed work.</li> <li>Point out any procedures, situations, or materials that may be hazardous to personnel and precautions to be exercised. A full discussion on the use of Select Agents should appear in 5.5.11 below.</li> </ul> <p>If an applicant has multiple Specific Aims, then the applicant may address Significance, Innovation and Approach for each Specific Aim individually, or may address Significance, Innovation and Approach for all of the Specific Aims collectively.</p> <p>As applicable, also include the following information as part of the Research Strategy, keeping within the three sections listed above: Significance, Innovation, and Approach.</p> <p><b><u>Preliminary Studies for New Applications.</u></b> For new applications, include information on Preliminary Studies. Discuss the PD/PI’s preliminary studies, data, and/or experience pertinent to this application. Except for Exploratory/Development Grants (R21, R33), Small Research Grants (R03), Academic Research Enhancement Award (AREA) Grants (R15), and Phase I Small Business Research Grants (R41/R43), preliminary data can be an</p>	<p><b>5.5.5 Research Design and Methods</b></p> <p>Describe the research design conceptual or clinical framework, procedures, and analyses to be used to accomplish the specific aims of the project. Unless addressed separately in Item 17, include how the data will be collected, analyzed, and interpreted as well as the data-sharing plan as appropriate. Describe any new methodology and its advantage over existing methodologies. Describe any novel concepts, approaches, tools, or technologies for the proposed studies. Discuss the potential difficulties and limitations of the proposed procedures and alternative approaches to achieve the aims. As part of this section, provide a tentative sequence or timetable for the project. Point out any procedures, situations, or materials that may be hazardous to personnel and the precautions to be exercised.</p> <p>Although no specific number of pages is recommended for the Research Design and Methods section, be as succinct as possible. There is no requirement that all 25 total pages allotted for items 2-5 be used.</p> <p><b>5.5.4. Preliminary Studies/Progress Report</b></p> <p><b><i>(a) Preliminary Studies.</i></b> For new applications, use this section to provide an account of the PD/PI’s preliminary studies pertinent to this application, including preliminary experience with and outreach to the proposed racial/ethnic group members. This information will also help to establish the experience and competence of the investigator to pursue the proposed project.</p> <p>Peer review committees generally view preliminary data as an essential part of a research grant application.</p>

	<b>Restructured Application Instructions (New Language)</b>	<b>Current Application Instructions</b>
<b>Approach</b>	<p>essential part of a research grant application and help to establish the likelihood of success of the proposed project. Early Stage Investigators should include preliminary data. (However, for R01 applications, reviewers will be instructed to place less emphasis on the preliminary data in applications from Early Stage Investigators than on the preliminary data in applications from more established investigators.)</p> <p><b><u>Progress Report for Renewal and Revision Applications.</u></b> For renewal/revision applications, provide a Progress Report. Provide the beginning and ending dates for the period covered since the last competitive review. Summarize the specific aims of the previous project period and the importance of the findings, and emphasize the progress made toward their achievement. <b>Explain any significant changes to the specific aims and any new directions including changes resulting from significant budget reductions.</b> A list of publications, manuscripts accepted for publication, patents, and other printed materials should be included in 5.5.5; do not include that information here.</p>	<p>Preliminary data often aid the reviewers in assessing the likelihood of the success of the proposed project.</p> <p><b><u>(b) Progress Report for Renewal and Revision Applications.</u></b> A Progress Report must be provided for Renewal and Revision applications. Provide the beginning and ending dates for the period covered since the project was last reviewed competitively. Summarize the previous application’s specific aims and the importance of the findings. Provide a succinct account of published and unpublished results, indicating progress toward their achievement. Discuss any changes in the specific aims as a result of budget reductions.</p>

	<b>Restructured Application Instructions (New Language)</b>	<b>Current Application Instructions</b>
<i>Investigator(s)</i>	<p>C. NIH encourages applicants to limit the list of selected peer-reviewed publications or manuscripts in press to no more than 15. Do not include manuscripts submitted or in preparation. The individual may choose to include selected publications based on recency, importance to the field, and/or relevance to the proposed research. When citing articles that fall under the Public Access Policy, were authored or co-authored by the applicant and arose from NIH support, provide the NIH Manuscript Submission reference number (e.g., NIHMS97531) or the PubMed Central (PMC) reference number (e.g., PMCID234567) for each article. If the PMCID is not yet available because the Journal submits articles directly to PMC on behalf of their authors, indicate "PMC Journal - In Process." A list of these Journals is posted at: <a href="http://publicaccess.nih.gov/submit_process_journals.htm">http://publicaccess.nih.gov/submit_process_journals.htm</a>. Citations that are not covered by the Public Access Policy, but are publicly available in a free, online format may include URLs or PMCID numbers along with the full reference (note that copies of publicly available publications are not acceptable as appendix material.)</p> <p>D. Research Support. List both selected ongoing and completed research projects for the past three years (Federal or non-Federally-supported). Begin with the projects that are most relevant to the research proposed in the application. Briefly indicate the overall goals of the projects and responsibilities of the key person identified on the Biographical Sketch. Do not include number of person months or direct costs.</p>	<p>B.
