INTRODUCTION

The Other Sites rules cover rectosigmoid, rectum and all sites not included in the site-specific rules.

EQUIVALENT TERMS

Acinar adenocarcinoma, adenocarcinoma (For prostate primaries only) Adenocarcinoma, glandular carcinoma

DEFINITIONS

Acinar adenocarcinoma of the prostate: The prostate gland is sponge-like consisting primarily of acini or very tiny sacs that produce the fluids for ejaculation. Acinar adenocarcinoma is not a specific histologic type. The term acinar refers to the fact that the adenocarcinoma originates in the prostatic acini. 95% of all prostate cancers are (acinar) adenocarcinoma.

Adenoacanthoma: Adenocarcinoma with squamous metaplasia.

Parametrium: The connective tissue of the pelvic floor extending from the fibrous subserous coat of the supracervical portion of the uterus laterally between the layers of the broad ligament.

Uterine adnexa: The appendages of the uterus, namely the ovaries, fallopian tubes, and ligaments that hold the uterus in place.

Table 2 - Mixed and Combination Codes

This table is used to determine mixed and combination codes ONLY

Apply the multiple primary rules FIRST. Combination codes are most often used when multiple histologies are present in a single tumor; they are rarely used for multiple tumors. Use a combination code for multiple tumors ONLY when the tumors meet the rules for a single primary.

Use this **two-page** table to select combination histology codes. Compare the terms in the diagnosis to the terms in Columns 1 and 2. If the terms match, code the case using the ICD-O-3 histology code in column 4. Use the combination codes listed in this table only when the histologies in the tumor match the histologies listed below.

Column 1: Required Histology	Column 2: Combined with Histology	Column 3: Combination Term	Column 4: Code
Small cell carcinoma	Large cell carcinoma Adenocarcinoma	Combined small cell carcinoma	8045
	Squamous cell carcinoma		
Squamous carcinoma	Basal cell carcinoma	Basosquamous carcinoma	8094

Adenocarcinoma and two or more of the histologies from column 2 OR two or more of the histologies from column 2	Papillary Clear cell Mucinous (colloid) Signet ring Acinar	Adenocarcinoma with mixed subtypes Adenocarcinoma combined with other types of carcinoma	8255
