SUMMARY OF FINDINGS

IR 50282/2003-006(DRS); 50306/2003-006(DRS); Nuclear Management Company, LLC; on 06/23/03 - 06/27/03, Prairie Island Nuclear Generating Plant; TI 2515/148, Verification of Compliance with Interim Compensatory Measures Order.

The inspection was conducted by two regional physical security inspectors, one regional emergency preparedness inspector, and the Resident Inspector.

Cornerstone: Physical Security and Emergency Preparedness

- On February 25, 2002, the NRC imposed by Order, Interim Compensatory Measures to enhance physical security. The inspectors determined that the licensee appropriately incorporated the Interim Compensatory Measures into the site protective strategy and access authorization program; developed and implemented relevant procedures; ensured that the emergency plan could be implemented; and established and effectively coordinated interface agreements with offsite organizations.
- The inspectors identified two unresolved items related to the implementation of compensatory measures. These items remain open pending review of the Office of Nuclear Security and Incident Response (Sections V.A.2 and V.E.2).
- A Green finding and Non-Cited Violation was identified related to Contingency Equipment (Section V.F.2).
