78. Clinician's signature:

532-533

Code

CLINICIAN'S JUDGMENT AND ENDPOINT REVIEW--To be completed by the clinician using information from the participant's history and from the physical examination. These are clinical data for study endpoint determination as well as analysis at the Coordinating Center and they should reflect the clinician's interpretation of the findings. The study endpoint questions are identified with . These questions must all be covered prior to termination of this visit. Pertinent items on the Medical History (SH44) are listed with the section headings. The "DK" option should be used only for home and telephone visits when pertinent information is not available.

Angina Pectoris - SH44 Items 3, 12

79. On the basis of your history and/or physical exam, do you believe that the participant has angina pectoris?

Note: The Rose Questionnaire for angina (from SH44) is positive if:

Either 12a or 12b is "Yes," and either 12c or 12d is "Yes," and 12e is "Stop or slow down," and 12f is "Yes,"

and 12g is "10 minutes or less,"

and either 12h(1) is "Yes," (X placed in sternum upper, middle or lower) or both 12h(2) and 12h(3) are "Yes"

(X in both left anterior chest and in left arm).

Myocardial Infarction (MI) - SH44 Items 2, 13, 14, 24, 25

On the basis of the ECG and/or your history and physical examination, do you believe the participant has had a myocardial infarction in the past year? 535

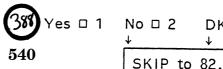

b. When was the most recent possible myocardial infarction 3%

31. a. Is there a history of coronary bypass in the past year?

b. Month and year of surgery:

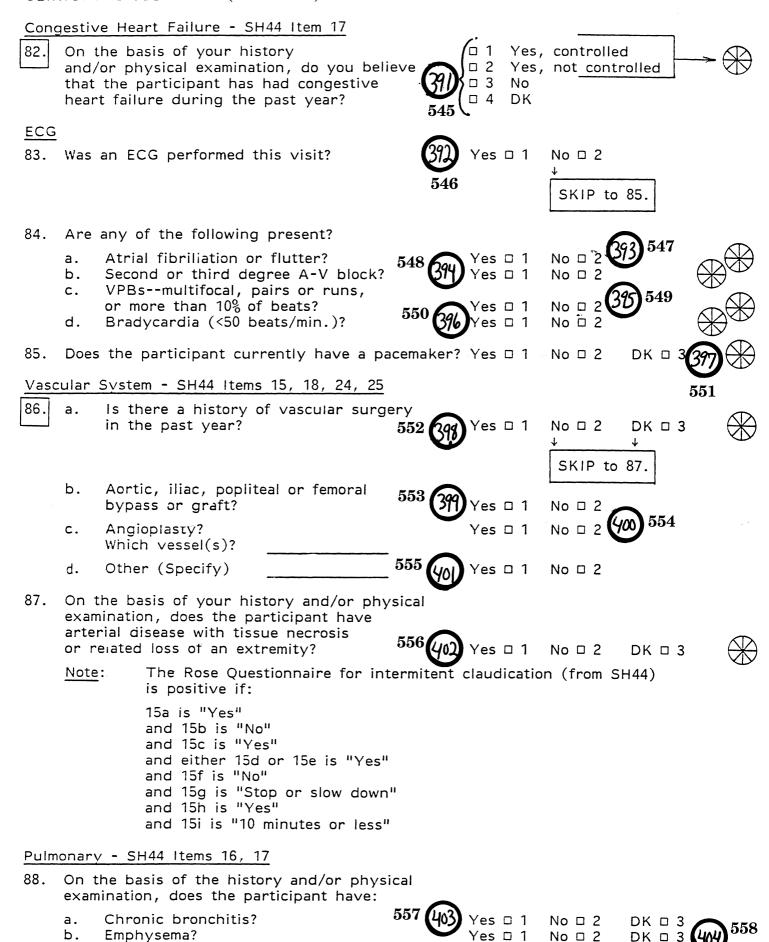

Month

ear 543-5

541-542

Stroke/TIA - SH44 Items 5, 18-25

89. On the basis of your history and/or physical examination, and keeping the 559 SHEP criteria in mind, do you believe Yes □ 1 No □ 2 DK 🗆 3 the participant has had a stroke in the past year? SKIP to 90. 560-561 When was the most recent episode b. 562-563 of probable stroke (not TIA)? Month Ÿear 564 Are any residual effects still present? Yes □ 1 No 🗆 2 DK □ 3 SHEP Neurological not alreadv accomplished, arrange for Evaluation for Stroke (SH27) as soon as possible. 90. On the basis of your history and/or physical **a** 1 Yes, based on history examination, do you believe that the participant and presence of carotid bruit has had transient cerebral ischemic attacks □ 2 Yes, based on history within the past year? 565 of two or more TIA in same location □ 3 Yes, based on other combinations of evidence 0 4 No □ 5 DK If "Yes, based on history and presence of carotid bruit" or "Yes, based on history of two or more TIA in same location," or "Yes, based on other combinations of evidence," arrange for SHEP Neurological Evaluation for TIA (SH28) as soon as possible if not already accomplished. 91. Is there a history of carotid endarterectomy Yes □ 1 No 🗆 2 DK 🗆 3 in the past year? 566 Contraindications and Allergies to Study Drugs On the basis of your history and/or physical examination, does this participant have any contraindication or allergy to chlorthalidone? Yes 🗆 1 No 🗆 2 DK 🗆 3 567 On the basis of your history and/or physical 93. examination, does this participant have any contraindication or allergy to atendlol? Yes 🗆 1 No □ 2 DK 🗆 3 568 94. On the basis of your history and/or physical examination, does this participant have any contraindication or allergy to reserpine? Yes □ 1 No □ 2 DK 🗆 3 569 Falls and Fractures 95. Do you believe that, in the past year, the participant has had a fracture of: 570 Yes 🗆 1 Hip? No □ 2 DK 🗆 3 a. Spine? Yes □ 1 No □ 2 DK □ 3 b. Forearm? Yes □ 1 No 🗆 2 DK □ 3 c.

^[1] Average of two seated corrected readings

DBP [1] at

If DBP >=90 mm Hg at this visit, treatment prescribed this visit should reflect the largest change in medication prescribed above for the appropriate blood pressure levels. For example, the choice between "No Chan" and "Step Up" should be "Step Up"; the choice between "Step Up" and "Ope Label" should be "Open Label". The next visit should be scheduled according to the shortest suggested interval.

For additional detail on specific blood pressure combinations, refer to the SHEP Manual of Operations, Chapter 3.

^[2] OL = open label, SU = step up, SD = step down at clinician discretion

^[3] W = weeks, M = month, Q = next quarterly, CD = clinician discretion

^[4] Any single visit
