

HOW CAN WE HELP?

Attend our FREE Integration Services Center Forum

Register at <http://training.cit.nih.gov>. To find the correct course, do a search for "CIT Services Seminar." If you can't make it in person, join our session via VideoCast at: <http://www.videocast.nih.gov/>.

CIT Services Seminar Series

The CIT Services Seminar Series showcases CIT's diverse technology service offerings available to the NIH community, and provides an opportunity to introduce future services. These events are open to current and potential CIT customers at the NIH and sponsored by the Relationship Managers. For more information, go to: <http://cit.nih.gov/Support/RelationshipManagers>.

Would you like more information on any of the services included in this brochure?

Integration Services Center Forum

Updated 5/24/11

“NIH iTrust has seamlessly enabled our communication with citizens and researchers”

INTEGRATION SERVICES CENTER: *How Service Oriented Architecture (SOA) will help solve your IT challenges*

The Integration Services Center (ISC) provides the NIH Community with trusted integration strategies, reliable resources, and cutting-edge technology. It serves as a centralized resource that maintains multi-layered NIH proprietary technologies adhering to NIH policies. The ISC is able to assist you with current Enterprise Architecture (EA) tools, ensuring seamless transition during application integration, as well as being key in the implementation of the Service Oriented Architecture (SOA) based applications being adopted by the Federal government as industry standard.

Benefits of SOA:

- ✓ supports flexible IT architectures
- ✓ integrates existing applications
- ✓ improves overall data integration across the enterprise
- ✓ supports business process management
- ✓ facilitates enterprise portal initiatives
- ✓ speeds custom application development
- ✓ supports effective integration with business partners
- ✓ assists customer service initiatives
- ✓ enables employee self-service
- ✓ facilitates the use of external service providers

Did You Know?

- ISC iTrust has federated with 49 universities and research institutions using 73 federated applications
- ISC iTrust is currently protecting 309 applications
- Single sign-on technologies are adopted by government and private industry more than any other security measure
- Using this service not only saves time, but also increases efficiencies and reduces costs

ENTERPRISE AUTHENTICATION SERVICES

NIH iTrust allows users (both within and outside NIH) to access multiple applications with a single user credential. It also provides application owners with an easy and secure way to authenticate users and control access to sensitive data. This service is available to all NIH customers.

Features:

- multiple fail-over capabilities
- high availability 24 x 7
- firewalls
- active directory user groups
