DLM 4000.25, Volume 2, December 7, 2012
Change 1

DEFENSE LOGISTICS MANAGEMENT SYSTEM VOLUME 2, SUPPLY STANDARDS AND PROCEDURES CHANGE 1

I. This change to DLM 4000.25, Defense Logistics Management System (DLMS), Volume 2, June 2012, is published by direction of the Deputy Assistant Secretary of Defense for Supply Chain Integration under the authority of DoD Instruction (DoDI) 4140.01, "DoD Supply Chain Materiel Management Policy," December 14, 2011. Unless otherwise noted, revised text in the manual is identified by ***bold, italicized*** print. The exception would be when the entire chapter or appendix is replaced, or a new one added. Change 1 also includes administrative updates in Chapter 16, not marked by bold italics, to change "shall" to "will" per a style change for DoD issuances.

II. This change includes Approved Defense Logistics Management System (DLMS) Changes (ADC) published by DLA Logistics Management Standards Office memorandum:

A. Addendum 93A dated August 29, 2012. Addendum 93A to include Status Code BP in Cancellation Procedures. Revises Chapter 4.

B. ADC 1006 dated July 12, 2012. Exception Processing for DLA Contractor Furnished Material Requisitions. Revises Chapter 4.

C. ADC 1011 dated August 13, 2012. Routing Identifier Code Format Rule for Defense Contract Management Agency Activities. Revises Appendices AP7.2 and AP7.3.

D. ADC 1012 dated July 6, 2012. Accommodation of Disposition Services Local Stock Number in Generator Communication. Establishes Appendix 9.

E. ADC 1013 dated June 16, 2012. Intra-DLA Change: Disposal Turn-In Document Number Suffixing for DLMS 846C and DLMS 846R for use by DLA Disposition Services under Reutilization Business Integration. Revises DLMS Supplements 846C and 846R, without revision to the manual.

F. ADC 1014 dated August 17, 2012. Revised Procedures for Inclusion of Contract Data in Transactions Associated with Government Furnished Property and Management Control Activity Validation of Contractor Furnished Materiel Requisitions. Revises Chapters 4 and 5, Appendices AP6.1, AP8.2, AP8.23, AP8.24 and AP8.48. Revises the following DLMS Supplements, 511R, 511M, 517G, 856S, 856R, 867I, 869C, 869F, 870S, and 940R.

G. ADC 1016 dated June 16, 2012. Adds a new Disposition Services Indicator for Controlled Property Branch Verified, for DLA Disposition Services use with DLMS 527R Receipt Transactions under Reutilization Business Integration. Revises Chapter 16 and DLMS Supplement 527R.

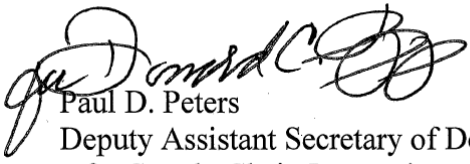

H. ADC 1021 dated July 17, 2012. Revises intra-DLA Procedures and DLMS 527D Pre-Positioned Materiel Receipt to Add Container Detail Supporting Relocation of Materiel between DLA Disposition Services Field Offices under RBI. Revises Chapter 16, and Administrative Update to DLMS Supplements, 511R, 527R, and 940R.

III. The list below identifies the chapters, appendices or other files from the manual that are replaced by this change:

DEFENSE LOGISTICS MANAGEMENT
SYSTEM
VOLUME 2 – SUPPLY STANDARDS AND
PROCEDURES
FOREWORD

I. The Defense Logistics Management System (DLMS) manual is reissued as Defense Logistics Manual (DLM) 4000.25, Defense Logistics Management System (DLMS), under the authority of DoD Instruction (DoDI), 4140.01, DoD Supply Chain Materiel Management Policy. DLM 4000.25 is composed of multiple volumes, each supporting functionally related business processes. Volume 2 prescribes uniform procedures, data elements and codes, formats, forms, and time standards for the interchange of logistics information relating to requisitioning, supply advice, supply status, materiel issue/receipt, lateral redistribution, materiel return, and inventory control processes.

II. The provisions of this manual apply to the Office of the Secretary of Defense, the Military Departments, the Joint Staff, the Combatant Commands, and Defense Agencies. The manual applies, by agreement, to external organizations conducting logistics business operations with DoD including (a) non-Government organizations, both commercial and nonprofit; (b) Federal agencies of the U.S. Government other than DoD; (c) foreign national governments; and (d) international government organizations.

III. This manual incorporates the Approved DLMS Changes (ADC) listed in the Process Change History immediately following this Foreword. ADCs are published electronically at www.dla.mil/j-6/dlmso/elibrary/changes/approved2.asp. Recommended revisions to this manual shall be proposed and incorporated under the Process Review Committee (PRC) forum for logistics functional areas. Submit all proposed change requests through your designated DoD Component PRC representatives. The procedures are in Volume 1 Chapter 3 of this manual and at www.dla.mil/j-6/dlmso/eLibrary/Changes/processchanges.asp

IV. This manual is approved for public release and is available electronically at http://www.dla.mil/j-6/dlmso/eLibrary/Manuals/dlm/dlm_pubs.asp. Use the comment form at www.dla.mil/j-6/dlmso/About/Comment/comment_form.php to contact DLA Logistics Management Standards.

Volume 2 – SUPPLY STANDARDS AND PROCEDURES

PROCESS CHANGE HISTORY

ADC Number	Date	Change Description	Change Number
93A	08/29/12	Addendum 93A to include Status Code BP in Cancellation Procedures. This change corrects an administrative oversight in documented procedures for source of supply processing of single line requisition cancellation requests to check for Status Code BP. Revises Chapter 4, Requisitioning.	1
221A	8/3/2011	Revised Procedures associated with the DLMS Enhancement for Communication of Unit Price. This change supplements ADC 221 with enhanced business rules for conversion mapping from DLMS to legacy 80 record position formats to block the perpetuation of any price exceeding seven positions (five digits dollars and two digits cents), and block the perpetuation of any price consisting of all "9"s. Revises DLMS 511R, 511M, 527D, 527R, 536L, 810L, 812L, 812R, 846D, 856S, and 869F.	0
242B	7/8/2009	Inclusion of Additional Customers under Material Processing Center (MPC) Shipment Status Distribution Rules. This change allows for the inclusion of additional customers, regardless of Service/Agency, to receive a copy of the DLMS 856S to support MPC processing. Revises Chapter 5, Status Reporting.	0
245C	7/21/2011	Notification for Distribution Depot Product Quality Deficiency Report (PQDR) Exhibit Receipt - Product Data Reporting and Evaluation Program-Automated Information System (PDREP-AIS) Interface. This change expands DoD WebSDR business rules associated with ADC 245. Under the updated procedures, WebSDR routes action and information copies of the DLMS 842A/W SDR containing a Discrepancy Code Q11 (Returned PQDR Exhibit Deficiency) from the distribution depot to the PDREP-AIS to update the related PQDR's exhibit information. Revises Chapter 17, Supply Discrepancy Reporting, and DLMS 842A/W.	0

ADC Number	Date	Change Description	Change Number
256	12/19/2007	WebSDR/SDR Transaction Edits: Forwarding and Follow-up Timeframes. This change approves two new edit processes for DoD WebSDR that improve data quality and enforce existing business rules. Under this change follow-up transactions are edited to ensure that an appropriate time has elapsed before follow-ups are submitted. A new edit is established in DoD WebSDR to block forwarding of SDRs where the historical record does not contain sufficient data to establish a basic SDR. Revises Chapter 17, Supply Discrepancy Reporting.	0
264	1/30/2008	DLMS Enhancement for Part-Numbered Requisition Format and USAF Unique Rules for Descriptive Information including Technical Order (T.O.) Number. This change adds capability to provide technical/descriptive data for part-numbered requisitions. This change includes administrative updates to MILSTRIP-identified descriptive information data associated with part-numbered requisitions, during the transition to DLMS from the MILS-based procedures and removes screening code Z from DAAS maps. Revises DLMS 511R, 511M, and 869F.	0
278	9/22/2008	Establish New DLMS 830D, Version 4030, for Demand Data Exchange (DDE) Projected Supply Plan. Establishes DLMS 830D Demand Data Exchange (DDE) Projected Supply Plan.	0
282	5/8/2008	Consolidation and Containerization Points (CCP)-Originated SDRs including Noncompliant Wood Packaging Material (WPM) Procedures and Shipment Hold Code. This change supports generation of SDRs at the CCP for shipments using noncompliant WPM to OCONUS sites. Revises Chapter 17, Supply Discrepancy Reporting.	0

ADC Number	Date	Change Description	Change Number
282A	7/16/2008	<p>CCP-Originated SDRs including Noncompliant WPM Procedures with Cost Breakdown and New Procedures for Closing WPM and Passive RFID SDRs. This change identifies two additional DLMS SDR transaction data elements to report material and labor costs for repackaging to be used optionally when reporting packaging discrepancies. This change also establishes procedures for closing SDRs with passive Radio Frequency Identification (pRFID) and WPM discrepancies thereby reducing manual workload. It establishes an option for forwarding CCP-originated transshipment SDRs to the action activity by email. Revises Chapter 17, Supply Discrepancy Reporting, as well as DLMS 842A/W.</p>	0
284A	5/13/2008	<p>Revisions to DLMS Supplements to Add Shop Service Center for BRAC Inventory Management and Stock Positioning (IMSP). This change adds a new DLMS data element for Shop Service Center, also known as Shop Store Identifier. Revises DLMS 511R, 511M, 869F, 869A, 940R, 945A, 870S, 856S, 830D, 830R, and 867D.</p>	0
285	6/10/2008	<p>Administrative Revision to MILSTRIP and DLMS Supplement 869C, Requisition Cancellation for Inclusion of Missing Passing Activity Identification. This change updates the MILSTRIP/DLMS procedures, the DLMS 869C, and Defense Automatic Addressing System (DAAS) conversion mapping for MILSTRIP DIC AC_/AK_ transactions to permit inclusion of the party passing the transaction in the cancellation and cancellation follow-up. Revises Chapter 4, Requisitioning, as well as DLMS 869C.</p>	0
286B (replaces 286)	6/2/2008	<p>Administrative Update for MILS/DLMS Conversion for MILSTRIP ACP/ACM Cancellation Formats. This change updates the DLMS 869C and DIC ACP/ACM maps at DLA Transaction Services to add a code for the party to receive the transaction. Revises DLMS 869C.</p>	0
287	6/24/2008	<p>Special Program Requirements (SPR) Status and Corresponding DLMS Manual Procedures; Administrative Update to DLMS 830R, SPR. This change revises SPR procedures in the DLMS manual to bring the DLMS procedures in line with corresponding Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP) procedural requirements and the existing SPR process.</p>	0

ADC Number	Date	Change Description	Change Number
288	6/23/2008	Local Delivery Manifesting Shipment Status. This change authorizes expanded use of the CCP shipment status format to include other consolidation processes performed subsequent to creation of shipment status, such as local delivery manifesting, for the purpose of providing pRFID and updated status. Revises Chapter 5, Status Reporting, as well as DLMS 856S.	0
289	10/21/2009	Revisions to Security Assistance Program Procedures, Modification of the Definition of the Security Assistance Type of Assistance and Financing Codes and Policy Change to Billing Procedures. This change revises procedures applicable to: the timeframe for shipments using a required availability date, the use of extended required delivery dates, storage charges for materiel awaiting notice of availability responses, and makes minor changes to program names and acronyms. Revises Chapter 4, Requisitioning.	0
292	7/23/2008	Administrative Update to Chapter 14, and DLMS 846F, Ammunition Freeze/Unfreeze Transaction. This change addresses the DLMS Accredited Standards Committee (ASC) X12 transactions beginning segment report type codes, and their correlation to MILSTRAP DIC functionality. Revises Chapter 14, Issue, Loan, Demand, and Ammunition Freeze/Unfreeze.	0
293	8/13/2008	Revised Time Standards, Codes, and Procedures for Reporting and Processing of Supply Discrepancies. This change identifies revisions to SDR procedures and time standards for customers (Security Assistance and U.S.), International Logistics Control Offices, and action activities. Additionally, this change updates SDR code lists, adds SDR transaction data elements for Controlled Inventory Item Code for the wrong item received and Demilitarization Code for the requisitioned item and the wrong item received, and consolidate guidance for SDRs submitted by Security Assistance customers. Revises Chapter 17, Supply Discrepancy Reporting, as well as DLMS 842A/W.	0

ADC Number	Date	Change Description	Change Number
295	8/6/2008	<p>Use of DLMS Qualifier for Local Stock Number/Management Control Numbers. This change is intended to insure that all systems operating in a DLMS environment must recognize and process materiel identification Qualifier ZZ in all applicable DLMS transactions. This unique qualifier accommodates an existing requirement for data covered under the Defense Logistics Standard System (DLSS) 'stock or part number field and supports interfaces in a mixed DLSS/DLMS environment. Revises DLMS 527D, 527R, 846P, 846R, 867D, 867I ,888I, and 947I.</p>	0
296	8/12/2008	<p>Passive Radio Frequency Identification (pRFID) Transactions. This change adds two new values, Delivered and Undelivered/Attempted Delivery, to the Reader Function Code data element in the XML Visibility transaction in support of local delivery processing. Revises Chapter 24, Passive Radio Frequency Identification. NOTE: This chapter was subsequently moved to DLMS Volume 3 per ADC 305.</p>	0
305	10/23/2008	<p>Revision to DoD 4000.25-M, DLMS Manual, Volume 3, Transportation. This administrative change moves Volume 2, Chapter 24, Passive Radio Frequency Identification to DLMS Volume 3, Chapter 3, Transportation to better align it with other related procedures associated with the interchange of information between the logistics and transportation domains.</p>	0
306	11/10/2008	<p>Administrative Change to Rail Transportation Mode/Method Codes and Definitions. This change updates the DoD codes, definitions, X12 conversion and appendix references to synchronize with the United States Transportation Command's Authorized Data Source for transportation mode/method codes. Revises AP8.14, AP8.15, AP8.19, AP8.30, and AP8.39.</p>	0

ADC Number	Date	Change Description	Change Number
307	11/10/2008	<p>Administrative Update to Chapter 6, Physical Inventory Control, and DLMS 846P, 846R, and 888I. This change correlates between the ASC X12 beginning segment Report Type Code for DLMS 846P and 846R, and Transaction Type Code for DLMS 888I, as well as the functionality of the corresponding MILSTRAP legacy DICs. Additionally, the chapter uses a generic name for the transactions so that the procedures are format neutral and lend themselves to both DLMS and MILSTRAP use. Revises Chapter 6, Physical Inventory Control, DLMS 846P Physical Inventory, DLMS 846R, Location Reconciliation, and DLMS 888I.</p>	0
308	1/12/2009	<p>Update to DLMS Chapter for Asset Status Reporting and Migration of Army Single Stock Fund (SSF) Asset Balance Reporting Transaction, DIC BSS, to DLMS 846I, Asset Status. This change established a separate chapter in DLMS for Asset Status Reporting, rather than have it included in the chapter addressing supply and shipment status. In addition, the change migrates Army DIC Code BSS data requirements into DLMS 846I to support Army's migration to DLMS, and updates the chapter to address intra-Army requirements for the DLMS 846I associated with DIC BSS. Adds Chapter 22, Asset Reporting Status.</p>	0
309	6/3/2009	<p>Notice of Availability (NOA) and NOA Reply Transaction Data Content/Mapping including Addition of Type Pack Code for 463L Pallets. This change updates the data content for the NOA and NOA Reply, resolves a DLMS/MILS conversion issue between the DIC AD5 and DLMS 870N, adds NOA submitter as a new data element, and modifies the location of the type pack code in the DLMS 856N. Revises the DLMS 856N, and 870N.</p>	0
311	5/13/2009	<p>SDR Attachment Interface. This change allows the Services and Agencies interfacing with the DoD WebSDR to transmit and receive attachments via a standard process. Revises Chapter 17, Supply Discrepancy Reporting, as well as DLMS 842A/W, and 842A/R.</p>	0

ADC Number	Date	Change Description	Change Number
313	2/02/2012	Revisions to DLMS 527R to Add Code for MILSTRAP DRB Functionality and to Address Enhancement for Advice Codes Used with 527R Receipt and Response to Inquiry for Materiel Receipt. Provides a new DLMS 527R beginning segment action code to provide functionality of MILSTRAP DIC DRB-MRA Reply to Follow-up. Revises Chapter 13, Receipt; Chapter 10, Material Receipt Acknowledgement; and Correlation of MILSTRAP DIC Functionality to DLMS Tables.	0
314	12/22/2008	Administrative Update to Appendix 5, Instructions for Submission of DoD UIT Program Candidates. Updates AP5, Instructions for Submission of DoD UIT Program Candidates.	0
316	2/19/2009	Retail Transportation and Supply Receipt and Acknowledgement Transactions. This change approves a standardized interchange and set of business processes between retail transportation and supply activities through the use of the standard DLMS 940R and DLMS 945A. This standard exchange provides the ability to pre-position release order data in transportation, submit follow-up status messages to transportation requesting updated shipment status, submit cancellation requests to transportation for release orders already turned over to transportation for shipment planning and execution, provide supply status messages from transportation to supply, provide cancellation response messages from transportation to supply, and submit material release confirmation messages from transportation to supply when the material has shipped. Revises DLMS 940R and 945A.	0
316A	6/26/2009	USAF Requirements for Item Record Data and Unique Item Tracking (UIT) using the Materiel Release (DLMS 940R) under Transportation and Supply Receipt and Acknowledgement Interchange. This change added the UIT program code for Positive Inventory Control Nuclear Weapon Related Materiel UIT and identified the DLMS 940R as having UIT capability. Revises Chapter 19, Unique Item Tracking.	0

ADC Number	Date	Change Description	Change Number
316B	6/26/2009	New Distribution Code (111) for the Retail Transportation and Supply Receipt/Acknowledgement Interchange Transaction. This change revises the distribution code from 1 to 111 to clearly identify the transactions used for the Retail Transportation and Supply Receipt and Acknowledgement Interchange. Revises DLMS 940R and 945A.	0
316C	1/15/2010	Revise DLMS 940R Material Release and DLMS 945A Material Release Advice, to Support Unique Item Tracking for Air Force Positive Inventory Control (PIC) under the Retail Transportation and Supply Receipt and Acknowledgement Interchange. This addendum authorizes the generation of DLMS 940R and 945A information copies to the Air Force PIC Fusion. Revises Chapter 19, Unique Item Tracking.	0
316D	8/3/2010	Air Force-Unique Document Identifier Code Mappings to 940R under the Retail Transportation and Supply Receipt and Acknowledgement Transactions. This change adds DAAS mappings for the Air Force unique DICs XAA and XAR to the DLMS 940R. Revises DLMS 940R and DLMS 945A.	0
317	2/17/2009	Revised Business Rules for Transshipper-Prepared SDRs. This change establishes new procedures associated with reporting supply discrepancies discovered while the shipment is in-transit. It authorizes two new SDR action codes to distinguish between SDRs requiring expedited response to resolve frustrated freight problems and those requiring no response, but which may be used by the action activity to correct shipping/packaging errors, recoup money from noncompliant vendors, and identify trends. A time standard of 5 days is established for those SDRs requesting expedited response. Revises Chapter 17, Supply Discrepancy Reporting.	0

ADC Number	Date	Change Description	Change Number
317A	9/15/2009	Approved Addendum to Transshipper-Prepared SDRs for Documentation and Labeling Discrepancies. This change provides additional discrepancy codes to specifically target high volume discrepancies encountered by transshippers. In addition, this change modifies the text names associated with existing documentation discrepancy codes so that they may be used for various types of documentation, including vendor shipment documentation. Revises Chapter 17, Supply Discrepancy Reporting, as well as, Appendix 3.	0
317B	6/1/2011	Action Activity Replies to Transshipper-Prepared SDRs. This change further enhances the business process associated with transshipper SDRs by clarifying appropriate responses to be provided by action activities. Revises Chapter 17, Supply Discrepancy Reporting.	0
320	6/15/2009	Revised DLMS 846P to Add Transaction Creation Date; and for Intra-Navy Changes to Migrate Navy BZA/BZC Data Requirements to 846P End of Day Transaction Count Function. This change adds the 'transaction creation date to 846P, maps Navy DIC BZA and BZC data to DLMS 846P. Revises Chapter 6, Physical Inventory Control, and DLMS 846P.	0
322	5/7/2009	Addition of Local Catalog ID qualifier to Support Requirements for Theater Enterprise-Wide Logistics System (TEWLS) Requisitions. This change adds the capability to identify a local catalog ID in requisitions and supply status transactions enabling communication of this data between Army Medical Material Agreement sites and DLA. Revises DLMS 511R, 511M, 869F, 842A/W, and 842A/R.	0
324	6/24/2009	DLMS Procedures for Materiel Returns from National Inventory Management Strategy (NIMS) Sites and Industrial Sites under Base Realignment and Closure (BRAC). This change documents procedures for materiel returns to DLA under the NIMS and BRAC, along with establishing new procedures for authorizing and processing customer credits. Revises Chapter 11, Material Returns, and Redistribution of Assets, and Chapter 12, Due-In and Advance Receipt Information.	0

ADC Number	Date	Change Description	Change Number
326	8/31/2009	DLMS 869A, Requisition Inquiry/Supply Assistance Request, Correction and Clarification of Data Mapping, Administrative Updates, and Coordination of Procedures for Transaction-Based Supply Assistances Requests. This change standardizes the procedures for implementation of the DLMS enhancements associated with the supply assistance requests for planned implementation during modernization. Revises Chapter 4, Requisitioning, and DLMS 869A.	0
328	7/28/2009	“Off-Line” Requisition Processing: Internet Ordering Application Request for Component Verification of Funds Availability and Recording of the Financial Obligation. This change provides guidance for an interface to be established between the various internet ordering applications and the applicable Service/Agency financial application. The purpose of the interface is to ensure funds availability before allowing the requisition to be processed, and, as a separate, subsequent action, to establish the required obligation within the financial system. Revises Chapter 4, Requisitioning, and DLMS 511R.	0
333	8/5/2009	Revision to DLMS, Volume 2, Chapter for Logistics Asset Support Estimate (LASE). This change made administrative updates to the DLMS LASE chapter. ADC 333 is overcome by ADC 400 which eliminates the LASE process.	0
334	8/31/2009	SDR Process for AF Retail Storage Activity Denials. This change documents the process by which the Air Force will identify a supply discrepancy and request credit as the result of storage activity denials after DLA assumes support functions at the three Air Logistics Centers under BRAC. The Air Force will submit a DLMS 842A/W SDR to DLA in response to a storage activity denial. This change requires identification of the denial document number in the SDR using the customer-assigned SDR number field. Revises Chapter 17, Supply Discrepancy Reporting, as well as DLMS 842A/W and 842A/R.	0
338	9/28/2009	New Advice Code for Surge Requirements of Mission Support Material (MSM) under Navy Base Realignment and Closure (BRAC) IMSP. This change was replaced in its entirety by ADC 338A.	0

ADC Number	Date	Change Description	Change Number
338A	8/24/2010	New Advice Code for Surge Requirements of Mission Support Material (MSM) under Navy BRAC Inventory Management and Stock Positioning (IMSP). This change republishes ADC 338 to replace the previously assigned advice code with a new management code for use on DLMS transactions associated with requisitioning to identify surge requirements for Mission Support Material (MSM) under DLA-Navy BRAC IMSP. Revises the DLMS Data Dictionary.	0
347	10/27/2009	Revise DLMS 527R Receipt, 867I Issue, 945A Materiel Release Advice, and 947I Inventory Adjustment to Support Unique Item Tracking for Air Force Positive Inventory Control (PIC). This change adds a new action code to clearly identify the copy of the transaction as an “image” transaction that does not affect the accountable records when the balance-affecting accountable transaction bypassed the normal DLA Transaction Services transaction flow. Revises DLMS 527R, 867I, 945A, and 947I.	0
352	2/18/2010	Management Code for Product Quality Deficiency Report (PQDR) Replacement Requisitions. This change authorizes the assignment of a new management code for use on requisitions, requisition alerts, and selected follow-on transactions. The new code will indicate the materiel is being re-requisitioned upon determination that the originally requisitioned materiel was deficient and subsequent to submission of a PQDR. The management code alerts procurement personnel not to purchase the replacement material from the vendor identified in the PQDR. Revises Chapter 4, Requisitioning, and DLMS 511R, 511M, 869F, and 870S.	0

ADC Number	Date	Change Description	Change Number
353A	8/25/2010	<p>Revised Procedures for Pre-positioned Materiel Receipt (PMR) and Shipment Status for Retrograde and Directed Discrepant/Deficient Materiel Returns Including Corrected Time Standard for Security Assistance/Foreign Military Sales. This change modifies business rules and associated transactions to discretely identify the type of materiel return (discrepant/deficient, retrograde), to provide a matching PMR and materiel returns shipment status, and to require assignment of a unique transportation control number to eliminate duplicate numbers. Revises Chapter 11, Materiel Returns, Redistribution of Assets, Directed Discrepant/Deficient Materiel Returns, and Retrograde Returns, Chapter 12, Due-In and Advance Receipt Information, and Chapter 17, Supply Discrepancy Reporting, as well as DLMS 527D, 856R, and 842A/R.</p>	0
356	2/5/2010	<p>Revise DLMS 846I, Asset Status Report to Address Intra-Navy Requirements for Navy DIC BA7, Cyclic Asset Status Report - Mobile Activities. Maps Navy legacy DIC BA7 to DLMS 846I. Revises Chapter 22, Asset Status Reporting, as well as DLMS 846I.</p>	0
358	4/28/2010	<p>SDR Transaction Content/Business Rule Revisions/Clarification and Administrative Updates. This change addresses multiple issues associated with the content of SDR transactions and associated guidance. Changes include: updated mapping and guidance for types of materiel identification, removal of obsolete data elements, inclusion of vendor shipment number on SDR reply, expanded field length for reply remarks, a new reply code value, revised meaning for Discrepancy Code T8, revised business rules for Action Code 3B, and clarification of "pseudo shipment numbers" identified on SDRs. Revises Chapter 17, Supply Discrepancy Reporting, as well as DLMS 842A/W and 842A/R.</p>	0

ADC Number	Date	Change Description	Change Number
359	2/23/2010	Perpetuation of the Denial Management Code to the DLMS Requisition, and Modification of USAF BRAC IMSP SDR Procedures. This change perpetuates existing management codes on a DLMS requisitioning transaction to indicate a denial has occurred on a prior requested release of materiel purchased by the Air Force from DLA; it also includes the original document number/suffix to enable DLA to support the new requirement from an alternate source in lieu of where the original denial occurred. Revises Chapter 17, Supply Discrepancy Reporting, as well as DLMS 511R, 511M, and 869F.	0
360	1/5/2010	Procedures and Content Requirements for Catalog Data Support under Navy and Marine Corps BRAC. This change establishes catalog data support procedures and transactional interface for Navy and Marine Corps BRAC usage. Revises Chapter 23, Catalog Data Support and establishes DLMS 832N.	0
360A	10/6/2011	Revised Catalog Data Support under Navy BRAC to Add Catalog Transaction Purpose Codes and Drawing CAGE. This change added two new values (response delayed and manual action required) to the catalog transaction purpose code data element in the DLMS 832N. It also added a new data element (drawing CAGE) to associate the CAGE with a part drawing number. Revises Chapter 23, as well as DLMS 832N.	0
361A	4/6/2010	Requirement for Exception Distribution of a Minimal Content SDR via Electronic Mail (E-mail). This change publishes updated procedures for SDR processing to ensure compliance with HQ DLA guidance for proper labeling and dissemination of "For Official Use Only (FOUO)" documents via e-mail. Revises Chapter 17, Supply Discrepancy Reporting.	0

ADC Number	Date	Change Description	Change Number
379	6/15/2010	New and Revised Supply Status Procedures to Support “Virtual Receipt” and Requisition Alert Processes under Navy BRAC SS&D/IMSP. This change establishes new supply status codes for materiel arrival at the local Industrial Activity worksite and delivery when materiel is processed on a local manifest. This change also establishes procedures to provide supply and shipment status on requisition alerts to the Navy Shipyard or Fleet Readiness Center sites as the order is updated by the ICP. Revises DLMS 870S.	0
379A	5/4/2012	Revised Supply Status Procedures to Support “Virtual Receipt” and Requisition Alert Processes under Navy BRAC SS&D/IMSP – Intermediate Supply Status. This change enhances procedures implemented under ADC 379 to include additional supply status requirements to Navy BRAC SS&D sites. The new supply status procedures will provide greater visibility to the Naval Shipyard or Fleet Readiness Center in response to Navy requisition alert transactions in three situations: Pre-shipment Notification, Pre-protection Notification, and Mission Support Materiel (MSM) Allocation Notification.	0
381A	11/1/2010	Procedures and Additional Data Content supporting Unit of Use Requirements under Marine Corps BRAC. This change authorizes a data field on multiple DLMS transactions to provide a cross reference to the assigned local stock number (LSN) when a unit of use requirement applies to that materiel. Revises DLMS 527R, 842A/W, 842A/R, 842C/I, 842C/R, 842S/Q, 842S/R, 846P, 846R, 867I, 943A, 945A, 947I.	0
381B	5/6/2011	Administrative Revision to Identify Delivery Location Position in Transactions. This administrative addendum clearly identifies the inclusion of delivery location in the DLMS. Revises 511R, 511M, 527D, 869F.	0
384A	4/7/2011	Special Programs for Non-DoD/Non-Federal Agency Requisitioners; Additions in Support of DLA Disposition Services Under Reutilization Business Integration (RBI). This change amends ADC 384 to establish procedures for additional Special Programs in support of DLA RBI, where the requisitioner is neither a Federal Agency nor a DoD entity. Revises Chapter 4, Requisitioning.	0

ADC Number	Date	Change Description	Change Number
387	7/2/2010	DLMS Enhancement: DLMS 846A Asset Reclassification Transaction and Associated Procedures, and Administrative Update to DLMS 947I Inventory Adjustment. This change expands capability of the 846A DLMS transaction, notes, and procedures. Revises Chapter 7, Inventory Adjustment, DLMS 846A, and DLMS 947I.	0
389	8/3/2010	Inventory Control Point /Integrated Item Manager (ICP/IMM)-Directed Shipments of Non-Requisitioned Government Furnished Materiel (GFM). This change authorizes an alternative process based on a bill of materiel enabling the source of supply to "push" GFM from the supply system, without initializing the requirement via a requisition (per current MILSTRIP "pull" for GFM). Revises Chapter 4, Requisitioning.	0
395	9/1/2010	Request for New Transportation Activity Processing Supply Status Code. This change adds Status Code BX to enable the transportation activity to report a more detailed supply status in response to a follow-up inquiry from supply. Revises DLMS Data Dictionary.	0
399	3/18/2011	Automated Data Capture for Serialized Item Shipments and Preparation of the Issue Release/Receipt Document (IRRD) (DD Form 1348-1A or DD Form 1348-2) Continuation Page. This change provides enhanced procedures in support automated data capture and establishes a mandatory continuation page for DD forms 1348-1A or 1348-2. Additionally, this change removes MILSTRIP guidance for an automated packaging list.	

ADC Number	Date	Change Description	Change Number
400	4/11/2012	<p>Elimination of the DLMS-MILSTRAP Logistics Asset Support Estimate (LASE) Process No Longer Required by the DoD Components. This change eliminates the DLMS-MILSTRAP LASE process as recommended by the DoD Components. This change documented that DLA and Army were not implementing LASE in their respective enterprise resource planning systems. The remaining DoD Components agreed to DLA and Army's elimination of the LASE process. The Navy, Air Force, and Marine Corps concurred with the elimination of LASE. Deletes Chapter 24, LASE, and removes LASE from the DLMS Acronyms, Definitions and Terms. DLMS 842L, LASE Transaction is cancelled and DLMS 870L was revised.</p>	0
401	2/17/2012	<p>Procedures and Data Content for DLMS Warehouse Service Request (940S) and Warehouse Service Advice (943A) under Navy and Marine Corps BRAC. This change establishes procedures and new DLMS transactions to communicate a Warehousing Service Request (DLMS 940S) for re-warehousing and/or protection, staging, or picklist/callout actions to the Distribution Depot and a new DLMS transaction and to communicate a Warehouse Service Advice (DLMS 943A) to provide positive or negative status on the requested warehousing action. Establishes the DLMS 940S and 943A.</p>	0
402	10/29/2010	<p>Revise DLMS 947I Inventory Adjustment Transaction and Associated Procedures to Support Marine Corps BRAC Storage and Distribution Interface. This change provides new procedures and updates to a DLMS transaction to communicate DLMS 947I Inventory Adjustment Quantity or Status Adjustment Reason (QSAR) Code 'AG-Ownership Change' for a new (second) purpose specific to USMC BRAC to identify a gain or loss resulting from ownership change associated with re-warehousing. This ownership change can be requested by the Marine Corps or can occur as a result of material identified as discrepant upon receipt. Revises DLMS 947I Inventory Adjustment.</p>	0

ADC Number	Date	Change Description	Change Number
404	12/9/2010	Revision to Small Arms and Light Weapons (SA/LW) Procedure to Address Reporting Foreign Weapon Serial Numbers and Definition Updates. This change provides new procedures for assignment of serial numbers for foreign weapons with unrecognizable serial number character. Revises Chapter 18, SA/LW Serial Number Registration and Reporting.	0
405	12/28/2010	DLMS Mapping for Air Force Unique Transactions Used between Air Force Locations and Expeditionary Combat Support System (ECSS). This change establishes DLMS mapping to applicable unique Air Force transactions (e.g., BF7, BL0, and B7A) used between Air Force locations and ECSS. Revises DLMS 940R and 945A.	0
407	12/27/2010	Requirements for Unique Item Tracking (UIT) in the DLMS Supply Status (870S) Supporting the Cargo Movement Operations System (CMOS) Interface. This change allows for the inclusion of UII and/or Serial Number data in DLMS 870S in support of the retail supply transportation interchange, authorizes the generation of an information copy of the DLMS 870S to Air Force PIC Fusion as applicable, and adds a new qualifier to identify the retail supply activity generating the supply status. Revises Chapter 5, Status Reporting, Chapter 19, Unique Item Tracking, as well as DLMS 870S.	0
409	2/14/2011	Intra-DLA Revisions to DLMS 867I Issue and Associated Procedures to Support Relocation of Material between DLA Disposition Services Field Offices under RBI. The DLMS 867I Issue transaction will be used to track the material issues between DLA Disposition Service Field Offices for disposal items. Revises Chapter 16, Disposition Services, as well as DLMS 867I.	0
410	2/25/2011	Intra-DLA Revisions to Procedures and DLMS 527D Pre-Positioned Materiel Receipt (PMR) to Add Disposition Container ID for use with Relocation of Material between DLA Disposition Field Offices Under RBI. This change revises DLMS 527D, to add the DTID number as a secondary reference number for PMRs associated with relocation. Revises Chapter 16, Disposition Services.	0

ADC Number	Date	Change Description	Change Number
410 Addendum	10/12/2011	Intra-DLA Revision to Procedures and DLMS 527D PMR to Add Disposition Container ID for use with Relocation of Material between DLA Disposition Services Field Offices Under RBI – Addendum Adds DTID Number. This change adds the DTID number to DLMS 527D for PMRs associated with relocation. Revises Chapter 16, Disposition Services.	0
411	4/12/2012	Update Functionality for DLMS 856S Shipment Status and DLMS 945A Material Release Advice. This change establishes procedures for the originating activity to generate an update to the DLMS 856S and 945A in the event the outbound shipment details change from what was originally transmitted. Revises Chapter 4, Requisitioning, and Chapter 5, Status Reporting, as well as DLMS 856S and 945A.	0
412	2/21/2012	Intra-DLA Change - Establish New DLMS 846C, DLA Disposition Category Update Transaction and Procedures for use by DLA Disposition Services under RBI. This change establishes new DLMS Disposition Category Update transaction for communication of disposition category between DLA Disposition Services ICP and Field Offices. The disposition category serves as an input to the stow process and determines which system will process the property. Revises Chapter 16, Disposition Services, and creates new DLMS 846C.	0
413	9/01/2011	Intra-DLA Revisions to Procedures and DLMS 846A Asset Reclassification Transaction to Add Disposition Services Container ID Number Change Functionality for use by DLA Disposition Services Under RBI. This change adds 'Disposition Container ID Change' functionality to DLMS 846A Asset Reclassification transaction. In order to maintain disposition services container synchronization between EBS and DSS, this change will account for the removal or switching of an item from one container to another container. Revises Chapter 16, Disposition Services, and DLMS 846A.	0

ADC Number	Date	Change Description	Change Number
414	3/28/2011	<p>Revisions to DLMS and MILSTRAP Procedures to Address Owner/Manager Research of Inventory Adjustments (Accounting Error). This change addresses owners/managers research requirements for 'Inventory Adjustments (Accounting Error)' by adding a section on "Research of Potential or Actual Inventory Adjustments (Accounting Errors) – DIC D8B/D9B". In addition, a code list is added to clearly identify the inventory adjustment error classification codes that apply to the inventory adjustments (accounting error). Revises Chapter 6, Physical Inventory Control, as well as DLMS 947I.</p>	0
415	11/29/2011	<p>Revise the DoD Inventory Control Effectiveness (ICE) Report (General Supplies) and Revise Type Physical Inventory/Transaction History Code C and Add Code Z. This change realigns the ICE Report information to enhance data analysis to provide meaningful performance data for the varied range of line items managed by the Components and the depth of inventories, including the Monetary Values related to Record Reconciliation and end of day processing. Revises Definitions and Chapter 6, Physical Inventory Control.</p>	0
416	10/25/2011	<p>Hazardous Material/Hazardous Waste (HM/HW) Profile Transaction, DLMS 996H, in Support of RBI. This change established an interface through DLA Transactions Services to electronically convey HM/HW Profile Sheet (HWPS) and shipment status information for shipments to DLA Disposition Service Field Offices. The interchange accommodates a three-way mapping between the existing Generator Communication Standard v5.0 in either pipe-delimited or XML schema formats and a new DLMS 996H. Revises Chapter 16, Disposition Services, and creates new DLMS 996H.</p>	0

ADC Number	Date	Change Description	Change Number
417	4/26/2011	Shipment Status for Local Delivery Manifested, Outbound MILS Shipments on Behalf of On-Base Customers, Re-Warehousing Actions between Distribution Depots, and non-MILS Shipments to Off-Base Customers, with Passive RFID. This change establishes procedures for use of the DLMS shipment status for pRFID tagging for shipments that are either local delivery manifesting to base customers, outbound MILS shipments on behalf of on-base customers, re-warehousing actions/transshipments between Distribution Depots in support of industrial activity home and forward site materiel requirements, or non-MILS (DD1149) shipments to off-base customers. Revises Chapter 5, Status Reporting, as well as DLMS 856S and 856R.	0
418	4/06/2011	Advice Code 2W for Free Issue. This change authorizes Navy and Marine Corps use of Advice Code 2W when requisitioning on a free fill or kill basis where the requisition is satisfied through Navy-owned residual end-use assets managed under Navy ERP. Revises the DLMS Data Dictionary.	0
420	4/5/2011	Administrative Update to Eliminate Unique Item Tracking Designator Code (UITDC) Value 'UID' in Favor of a new cataloging code for Item Unique Identification (IUID) under Serialized Item Management (SIM). This change removes the unused code value 'UID' and associated guidance from the UITDC. The unused code was established as a placeholder that will not be used in light of evolving IUID logistics policy that has shifted to development of a separate and distinct Federal Logistics Information System (FLIS) code for IUID that focuses on two specific levels of intensity: Standard and High. Removes mention of UID in Chapter 19, Unique Item Tracking.	0
422	10/6/2011	Supply Shipment Status Updated to Support RBI Turn-Ins. This change updates the DLMS shipment status to add data elements in support of new containerization business process and the turn-in of Hazardous Material/Hazardous Waste. Revises Chapter 16, Disposition Services, and DLMS 856S, Shipment Status.	0

ADC Number	Date	Change Description	Change Number
423	9/29/2011	Revise DLMS 527D to Allow Use of Supply Condition Code (SCC) with Due-In (Procurement Instrument Source) and Specifically with Logistics Reassignment Memorandum Due-In (MILSTRAP DDX). This change allows Use of SCC with Due-In (Procurement Instrument Source) transactions and specifically with Logistics Reassignment (LR) Memorandum Due-In (MILSTRAP DIC DDX functionally). DLA uses SCC in LR Memorandum Due-In transactions (Procurement Instrument Source). Revises DLMS 527D.	0
425	10/4/2011	Revised SDR Codes and Procedures including Incorrect Part Number Discrepancy Codes and DoD WebSDR Data Edits and Forwarding Enhancements. This change clarifies and revises SDR codes and procedures, including incorrect part number reporting. This change establishes procedures for improving data integrity and facilitating proper identification of activities and discrepant materiel. Revises Chapter 17, Supply Discrepancy Reporting, as well as DLMS 842A/W and 842A/R.	0
426	5/10/2011	Intra-Navy DLMS 511R, Requisition, Inclusion of Requested Storage Activity. This change revises the DLMS to allow for the identification of the desired storage activity from which a requisitioned item is to be supplied. This change will be adopted as an intra-Navy DLMS enhancement in support of organic maintenance requisitioning procedures. Revises DLMS 511R.	0
427	11/28/2011	Requisition Document Number Date Edit. This change establishes DAAS edits to check for an appropriate ordinal date in requisitions prior to forwarding to DLA for processing and to reject those that are greater than one year old or are more than one day in the future. Revises Chapter 4, Requisitioning.	0
428	5/23/2011	Support to Missile Defense Agency (MDA) as a Foreign Military Sales (FMS) Implementing Agency and Assignment of New Service and Agency Code I. This change modifies initial guidance in ADC 384, which assigned Service Code I to Missile Defense Agency. Since the alpha I is very similar to the numeric 1 assigned to Section 1122 Program DoDAACs, this change has been made to avoid possible confusion in human readable form. Revises the DLMS Data Dictionary.	0

ADC Number	Date	Change Description	Change Number
428A	6/09/2011	Approved Addendum Support to MDA as a FMS Implementing Agency and Assignment of New Service and Agency Code I. This addendum issues administrative corrections to the approved change documentation and documents additional requirements for a new distribution code and fund codes to support MDA.	0
430	6/13/2011	Timeframe Change for Security Assistance SDR Requests for Reconsideration. This change established an exception to the 45 day reconsideration timeframe for FMS customers who are receiving a returned exhibit item as a result of their previous SDR submission. This change re-instates the 90 day reconsideration timeframe where materiel/exhibits must be returned to the customer, thereby allowing additional time for the return-to-customer transportation and the customer's re-evaluation of their returned property. Revises Chapter 17, Supply Discrepancy Reporting.	0
431	7/19/2011	Map Intra-Army DIC BZE, Consumption Report (Government Furnished Materiel (GFM)), to the DLMS 846I. This change provides DLMS mapping for the Army DIC BZE. This will allow contractors to submit their GFM consumption data to the Management Control Activity using a DLMS formatted transaction. Revises DLMS 846I.	0
433	6/24/2011	Requirements for Estimated Shipment Date in the DLMS Shipment Status (856S) Supporting the Estimated Shipment Date. This change adds the estimated shipment date to the DLMS shipment status for transfers to DLA Disposition Services Field Offices, when the retail supply system has offline confirmation of shipment, but no actual transportation data. Revises Chapter 5, Status Reporting, as well as DLMS 856S.	0
434	11/09/2011	Intra-DLA Revisions to the DLMS 940R, Materiel Release, and Associated Procedures to Support Directed Release of Materiel under RBI. This change enhances the DLMS 940R to support the new DLA Disposition Services business process of containerization and other new data requirements. It provides procedures for use of the DLMS 940R when property is ready to be released to a customer and to communicate cancellation and follow-up requests, all to be done at the DTID level. Revises DLMS 940R, Materiel Release.	0

ADC Number	Date	Change Description	Change Number
435	10/03/2011	Use of Referential Data to Support Standard Financial Information Structure (SFIS). This change authorizes the Component and Agency preferred solution of exchanging SFIS accounting data elements using referential data keyed on a fund code. This change expands the fund code table to include additional SFIS data elements and modifies DLMS transactions to add Business Partner Number as an authorized DLMS enhancement. Revises DLMS 511R, 511M, 869F, 180M, 517M, 867I, 940R, 856S, 842 A/W, 810L, 517G, 527D, 527R, 812L, 812R, 842A/R, 867D, 869A, 869C, 945A, and 947I.	0
436	8/4/2011	Administrative Revisions to DLMS Supplements to Remove Obsolete Routing Identifier Code (RIC) “Streamline” Notes and Update MILSTRIP/DLMS Documentation Associated with RICs. This change updates the RIC field note in the DLMS to remove obsolete references to future streamlining. Revises DLMS 140A, 180M, 511M, 511R, 517G, 517M, 527R, 527D, 536L, 650A, 650C, 810L, 812L, 812R, 824R, 830D, 830R, 830W, 846A, 846D, 846F, 846I, 846P, 846R, 846S, 856R, 856S, 867D, 867I, 869C, 869F, 870L, 870M, 870N, 870S.	0
437	9/26/2011	Additional Data Element Requirements for the Issue Release/Receipt Document (IRRD) (DD Form 1348-1A or DD Form 1348-2) Continuation Page Supporting RBI. This change authorizes additional data and label requirements to the DD Form 1348-1A or DD 1348-2 to support issue of DLA Disposition Services property. Revises Chapter 16, Disposition Services.	0
438	7/6/2011	Revise Advance Shipment Notice (ASN) (DLMS 856) to add the Purchase Request (PR) Number supporting the Electronic Document Access (EDA)/Wide Area Workflow (WAWF) Interface. This change adds the purchase request number to the DLMS 856 to enable pre-population of that data from EDA to WAWF. Revises DLMS 856.	0

ADC Number	Date	Change Description	Change Number
439	7/6/2011	Revise Advance Shipment Notice (ASN) (DLMS 856) for Additional Content for Defense Medical Logistics Standard Support (DMLSS)/Wide Area Workflow (WAWF) Interface. This change adds new data elements to the DLMS 856 in support of DMLSS. The change adds new codes for materiel identification; allows notification that the contents require special handling due to perishable, refrigerated, or hazardous items; and includes additional characteristics relevant to these items including batch/lot information. Revises DLMS 856.	0
441	8/22/2011	Exception Rules to Accommodate Communication of Ammunition/Ammunition Related Quantities in Excess of Five Digits. This change authorizes DLA Transaction Services to split large quantities for ammunition communicated via a DLMS transaction into two legacy 80-record position transactions without creating or changing the suffix code. Legacy systems receiving the resulting two transactions are required to accumulate the identified quantities under existing unique ammunition processing rules, rather than interpreting them as duplicate or replacement transactions. Revises DLMS 856S, 870S, and 846R.	0
441A	1/20/2012	Clarification to Exception Rules to Accommodate Communication of Ammunition/Ammunition Related Quantities in Excess of Five Digits. This change added Federal Supply Group 6810 and RIC B38 to the conditions triggering the DAAS maps associated with ADC 441.	
442	1/6/2012	Intra-DLA Revisions DLMS 527R Receipt and Associated Procedures for Use by DLA Disposition Services under RBI. The DLMS 527R Receipt transaction will be used for the receipt of items that have been turned into the DLA Disposition Services Field Offices. Additionally, the DLA Disposition Services Field Office will use the Receipt (Relocation) transaction for the receipt of items that have been moved from one DLA Disposition Services Field Office to another on a Redistribution Order (RDO). Revises Chapter 16, Disposition Services, as well as DLMS 527R.	0

ADC Number	Date	Change Description	Change Number
443	11/15/2011	<p>Intra-DLA Revisions to Procedures and to 527R Receipt and 947I Inventory Adjustment for the Downgrade for Scrap Process for use by DLA Disposition Services under RBI. This change revises Receipt and Inventory Adjustment (Loss) transactions to clearly identify those transactions associated with the DLA Disposition Services downgrade of materiel to scrap subsequent to the initial receipt of the materiel from the customer. Revises Chapter 6, Physical Inventory Control, as well as DLMS 527R and 947I.</p>	0
444	12/1/2011	<p>Revise Asset Status Report Transactions, DLMS 846I and MILSTRAP DZA, to Document Ammunition Systems Use by Agreement of Nine Digit Quantity On-Hand. This change revises procedures so that, at the end of each day, LMP will send an 846I Asset Status Report transaction to the Air Force, Marine Corps, and Navy to report asset balances for their owned assets stored in an LMP storage location. Revises DLMS 846I.</p>	0
445	9/08/2011	<p>Adopt Navy Serial Number and Lot Number Transactions (DIC BG1/BG2) to Air Force and Marine Corps Ammunition System Use for DLMS. The Army Logistics Modernization Program (LMP), supporting ammunition, migrated the non-DLSS Navy DIC BG1/BG2 serial/lot number data to DLMS 527R (Receipt), 867I (Issue), and 947I (Inventory Adjustment) and DLMS 846R (location reconciliation) to support an existing interface between Army LMP and the Naval Operational Logistics Support Center Ordnance Information System. As the Single Manager for Conventional Ammunition, Army manages conventional ammunition for all Services. As a result of this, the Navy DIC BG1/BG2 data was also required to be sent to the Air Force Combat Ammunition System and the Marine Corps Ordnance Information System – Marine Corps system. This change authorizes DLA Transaction Services mapping to accommodate the LMP interface with Navy be expanded to include Air Force and Marine Corps. Revises DLMS 527R, 846R, 867I, and 947I.</p>	0

ADC Number	Date	Change Description	Change Number
446	11/15/2011	<p>Proposed New Supply Condition Code T, Serviceable (Ammunition Suitable for Training Use Only). This change established a new Supply Condition Code (SCC) T for 'Serviceable (Ammunition Suitable for Training Use Only)'. SCC T is authorized for Intra-Service use and authorized for staggered implementation for inter-Service use by agreement of impacted trading partners. SCC T is scheduled for October 2012 implementation in the Ordnance Information System used by Navy, Marine Corps, and Coast Guard. For Army, further analysis is required to determine supportability of SCC T in Logistics Modernization Program. Air Force does not use SCC T. Revises the DLMS Data Dictionary.</p>	0
447	11/7/2011	<p>Intra-DLA Revisions to the DLMS 832N, Catalog Data Support and Associated Procedures under RBI. This change expands the DLMS 832N to support DLA Disposition Services cataloging of an LSN when a DLA Disposition Services item cannot be identified by a NSN or when an item is turned into a DLA Disposition Services Field Office as a quantity less than the FLIS unit of measure. Revises Chapter 16, Disposition Services.</p>	0
449	11/21/2011	<p>Intra-DLA Revisions to the DLMS 945A, Materiel Release Advice, Cancellation Reason Code, Management Codes, and Associated Procedures under RBI. This change revises the DLMS 945A to include passing reasons for rejection in response to a Materiel Release Order that had been sent from EBS to DSS. This reason for rejection will be utilized by EBS either to cancel the sales order in its entirety by sending separate transactions for each Disposal Turn In Document (DTID) or to cancel a specific line item based on the DTID Number passed in the transaction. Revises Chapter 16 as well as the DLMS 945A.</p>	0
452	12/19/2011	<p>Implementation of DoD WebSDR Automated SDR Rejection Capability. This change revises requirements within the DoD WebSDR to edit and reject transactions systemically based upon the pre-established business rules. Revises Chapter 17, Supply Discrepancy Reporting.</p>	0

ADC Number	Date	Change Description	Change Number
453	12/9/2011	<p>Component Turn-In Documentation, Issue Release/Receipt Document (IRRD) (DD Form 1348-1A or DD Form 1348-2), Supporting Disposition Services. This change clarifies funding information required for reimbursement of scrap proceeds and obligation for hazardous waste disposal costs. It also reduces the number of paper DD Form 1348-1A or DD Form 1348-2 documents required at time of turn-in. Revises Chapter 16, Disposition Services.</p>	0
454	11/14/2011	<p>Automated Distribution of New Air Force SDR Management Report and Enhanced Query by Major Command (MAJCOM). This change revises DoD WebSDR functionality to automatically generate and disseminate a monthly report using pre-established criteria. Additionally, the DoD WebSDR management report capability is revised to support ad hoc queries using the SDR submitter or action activity MAJCOM as selection criteria.</p>	0
455A	2/6/2012	<p>Revisions to Procedures and Supply Status (DLMS 870S/ DIC AE_) from DLA Disposition Services under RBI. This change documents procedures for generating suffix codes in customer requisitions submitted to RTD Web from customer supply systems, when the customer does not assign a specific DTID in the requisition. It also adds new status codes to support status reporting from the RTD Web. Revises Chapter 16, Disposition Services.</p>	0
456	11/23/2011	<p>Intra-DLA Sales Contract Catalog Data Support Transaction under RBI. This change allows sales contract data to be pre-positioned at the DLA Disposition Services Field Office. Transmitting this data from EBS to DSS will provide the DLA Disposition Services Field Offices with sales contract information specific to their location. Revises Chapter 16, Disposition Services, as well as DLMS 832N.</p>	0

ADC Number	Date	Change Description	Change Number
457	12/21/2011	<p>Intra-DLA Revisions to Procedures and DLMS 511R Requisition to Support Directed Release of Materiel (Post-Post Action) by DLA Disposition Services Field Offices under RBI. This change documents the procedures for DLA-directed materiel release orders in support of designated disposal categories and sales categories. It also adds new data elements: disposal consolidation number, disposition category code, and disposition sub-category code. Revises Chapter 16, Disposition Services, as well as DLMS 511R.</p>	0
458	12/12/2011	<p>Documentation of Intra-Army Use of Army Data Elements for MILSTRAP DZA and DLMS 846I Asset Status Transactions. This change updates the DIC DZA format multi-use fields to reflect the Army's use of a stockage list code and project code. It updates DLA Transaction Services mapping between MILSTRAP legacy DZA and DLMS 846I. Revises DLMS 846I.</p>	0
459	11/28/2011	<p>DLMS Transactions, Discrepancy Codes, SDR Type/Disposition Services Type Codes, and Associated Procedures to Support SDRs under RBI. This change establishes new procedures for reporting discrepancies identified in shipments between the Recycling Control Pont (RCP) and the DLA Disposition Services Field Office, between RCP and the customer, between the two DLA Disposition Services Field Offices, and between the DLA Disposition Services Field Office and the customer. Revises Chapter 17, Supply Discrepancy Reporting, Chapter 16, Disposition Services, as well as DLMS 842A/W and 842A/R.</p>	0
460	2/21/2012	<p>Revises DLMS Supplement 869C, Requisition Cancellation, and Associated Procedures in Support of RBI. This change adds the DTID number to the DLMS 869C. It also provides unique procedures required to ensure that the document number used for a cancellation submitted from a Component supply system matches the document number employed by DLA Disposition Services. Revises Chapter 16, as well as the DLMS 869C.</p>	0

ADC Number	Date	Change Description	Change Number
461	12/01/2011	Revision for Commercial Asset Visibility-Organic Repairables Module Estimated Completion Date on MILSTRAP DIC DAC/DLMS 947I. Navy Commercial Asset Visibility-Organic Repairables Module requires the capability to accept and pass a repair item's estimated completion date and updated estimated completion date. This capability was added to DLMS 947I, Inventory Adjustment, for Commercial Asset Visibility use by ADC 343. This change expands the applicability to Commercial Asset Visibility-Organic Repairables Module. Revises DLMS 947I, as well as, administrative updates to DLMS 527D, 527R, 856S, and 867I.	0
463	11/23/2011	Intra-DLA Change to Revise DLMS 940R, Release Order, to Support Directed Release of Materiel in Support of RBI Public Sales Process. This change documents the public sales process and specific data content for the DLMS release order. Revises Chapter 16, Disposition Services, as well as DLMS 940R.	0
464	3/02/2012	Intransit Control System (ICS), Shipment Status (DLMS 856S/Document Identifier Code (DIC) AS3), and Disposal Shipment Confirmation Follow-up (DLMS 940R/ DIC AFX/AFZ) under RBI. This change adds a new shipment hold code for receipt in place and establishes new utilization code to recognize turn-ins processed outside the Service's supply system when ICS follow-up procedures are required. Revises Chapter 16, AP6.33, AP7.17, and DLMS 940R.	0
465	2/23/2012	Additional Contract-Related Data for 870S with BV Status. This change adds contract-related data to the DLMS supply status transaction when the status indicates that the item is procured and on contract for direct shipment to the consignee. Revises DLMS 870S.	0

ADC Number	Date	Change Description	Change Number
466	3/28/2012	Revisions to Procedures and DLMS 511R, Requisition, to Support Requisitioning from DLA Disposition Services under RBI. This change identifies new procedures for transmission of DLMS 511R by GSA Personal Property for Reuse and Sale and RTD to DLA Disposition Services. The change also updates DLMS to accommodate inclusion of the controlling document number suffix code and/or a DTID number suffix code when either or both are applicable. Revises Chapter 16, Disposition Services, as well as DLMS 511R, 511M, 527D, 527R, 842A/W, 856S, 869C, 869F, 870S, 940R, and 945A.	0
470	1/10/2012	Revise DLMS 846R, Location Reconciliation Request in Support of RBI. This change modifies the 846R Location Reconciliation Request transaction to include passing a DTID number, and the Demilitarization Code. DLA Disposition Services use the DTID number to uniquely identify individual property, as well as performing all inventories and accounting processes. Revises Chapter 16, Disposition Services, as well as DLMS 846R.	0
471	1/13/2012	Administrative Update to DLMS 824R Reject Advice. This change identifies administrative updates to DLMS 824R, Reject Advice transaction.	0
473	1/13/2012	DLMS Revisions to Add the Associated Purchase Order Number in Support of the Defense Logistics Agency (DLA) Interface with the Exchange. This change adds the purchase order number to the Exchange customer order and perpetuates it through shipping and billing functions. Revises DLMS Dictionary entry for purchase order number, as well as the DLMS 511R, 511M, 856S, 869F, and 940R.	0
474	4/4/2012	New Materiel Receipt Acknowledgment (MRA) Discrepancy Indicator Code. This change creates a new MRA discrepancy code for use with Navy ships to indicate that an MRA is being submitted in response to a follow-up request, but that there has not yet been an opportunity to pick-up/stow the order due to deployment or extended transit times. Revises Chapter 10, MRA.	0

ADC Number	Date	Change Description	Change Number
477	3/8/2012	Component Performing Procurement/Contracting for another Component Involving Government Furnished Property (GFP). This change clarifies procedures when one Component is performing the procurement/contracting service for another Component to ensure that the requesting Component's Management Control Activity has access to the necessary contract and applicable contract modification information to perform its management control and accountability functions over Government supply system materiel access. Revises Chapter 4, Requisitioning.	0
481	2/22/2012	Revise DLMS 846I Asset Status Report to Provide for a Transaction Count to Support Asset Status Report Transaction Reconciliation under DLA-Navy BRAC SS&D IMSP. Updates the Asset Status Report requires to allow the receiving system to reconcile whether all files and balances sent by the inventory manager have been received. Supports BRAC Retail Supply, Storage and Distribution (SS&D)/IMSP. Revises DLMS 846I.	0
482	4/12/2012	Revision Documenting Changes to the Materiel Receipt Acknowledgment (MRA) Report. Revises the manual to document the changes to the on-line MRA Management Information Report structure agreed to by the Supply Process Review Committee, updates the report descriptions, and provide additional information regarding the capability to save the reports to a spreadsheet for additional analysis. Revises Chapter 10, MRA.	0
485	3/14/2012	DoD Physical Inventory Control Program Chief Financial Officers Act (CFOA) of 1990 Statistical Sampling Requirements and Procedures. This change amends the DoD Physical Inventory Control Program to include the requirements and procedures to conduct the annual CFO Statistical Sample. Revises Chapter 6, Physical Inventory Control.	0

ADC Number	Date	Change Description	Change Number
488	4/24/2012	<p>Republication of DLMS SDR Guidance. This change consolidates documentation associated with SDR guidance in preparation for re-issuance of the DLMS Manual. Additionally, this change deletes obsolete Appendix 3, SDR Distribution, and integrates SDR distribution rules within the chapter guidance, as well as, establishing a new DLMS Manual appendix for SDR-relevant data element code sets. It clarifies requirements for cancelation of the DLAI 4140.55, AR 735-11-2 SECNAVINST 4355.18A, AFJMAN 23-215, Reporting of Supply Discrepancies, concurrent with re-issuance of the DLMS manual. Revises Chapter 17, Supply Discrepancy Reporting, replaces Appendix 3, and revises Appendix 4.</p>	0
489	4/25/2012	<p>Administrative Change to Maintain Inventory Control Effectiveness (ICE) Report Ammunition Procedures. This change updates procedures for ICE Report Ammunition to provide explicit procedures specific to the ICE Report Ammunition (rather than using references to the ICE Report General Supply procedures). Revises Chapter 6, Physical Inventory Control.</p>	0
1006	7/12/2012	<p>Exception Processing for DLA Contractor Furnished Materiel (CFM) Requisition. This change documents an exception/deviation to the current requirements under MILSTRIP procedures for contractor access to Government supply sources. It establishes an automated DLA Transaction Services Defense Automatic Addressing System (DAAS) edit/interface to provide management control activity (MCA) validation for requisitions submitted by DLA contractors for contractor-furnished materiel (CFM). Revises Chapter 4, Requisitioning.</p>	1
1011	8/13/2012	<p>Routing Identifier Code (RIC) Format Rule for Defense Contract Management Activity (DCMA). This change modifies business rules for Routing Identifier Code (RIC) assignment for the purpose of establishing a business rule supporting a machine-readable method of distinguishing between RICs representing Defense Logistics Agency (DLA) and those representing Defense Contract Management Agency (DCMA) activities. Revises Appendices AP7.2, Service and Agency Codes, and AP7.3, Routing Identifier Codes.</p>	1

ADC Number	Date	Change Description	Change Number
1012	7/6/2012	<p>Accommodation of Disposition Services Local Stock Number (LSN) in Generator Communication (GENCOMM). Due to the use of Materiel Groups of SCRIP (for scrap) and SPSV (for special services) items throughout the warehousing and distribution processes within RBI, the Federal Supply Classification (FSC) field of the Hazardous Waste Profile Sheet (HWPS) Disposal Turn-In Document (DTID) Record must be repurposed as the FSC or Materiel Group field. Establishes Appendix 9, Generator Communications Interface Standard 5.0.0.</p>	1
1013	6/15/2012	<p>Intra-DLA Change: Disposal Turn-In Document (DTID) Number Suffixing for DLMS 846C and DLMS 846R for use by DLA Disposition Services under RBI. This change updates DLMS 846C Disposition Category Update and DLMS 846R Location Reconciliation to accommodate inclusion of the controlling document number suffix code and/or a DTID number suffix code when either or both of these are applicable. Revises DLMS Supplements 846C and 846R.</p>	1
1014	8/17/2012	<p>Revised Procedures for Inclusion of Contract Data in Transactions Associated with Government Furnished Property (GFP) and Management Control Activity (MCA) Validation of Contractor Furnished Materiel (CFM) Requisitions. This change updates DLMS procedures and multiple DLMS transactions to enhance the visibility of GFP through associated logistics transactions. It perpetuates the DFARS contract number through the requisitioning and MCA validation processing and establishes a mandatory requirement for inclusion of the applicable GFP contract number in relevant requisitions, redistribution/materiel release orders, and shipment status, thereby providing capability to monitor GFP through enterprise visibility/accountability program. Revises Chapter 4, Requisitioning, Chapter 5, Status Reporting. Revises Appendices AP6.1 Forms/Message Formats Introduction, AP8.2, Requisition, AP8.23, Passing Order, AP8.24, Referral Order/Lateral Redistribution Order for Retail Assets, AP8.48, Materiel Release Document DD Form 1348-1A or DD Form 1348-2. Revises DLMS Supplements 511R, 511M, 517G, 856S, 856R, 867I, 869C, 869F, 870S, and 940R</p>	1

ADC Number	Date	Change Description	Change Number
1016	6/12/2012	<p>Intra-DLA Change: New Disposition Services Indicator for Controlled Property Branch Verified, for DLA Disposition Services use with DLMS 527R Receipt Transactions under RBI. This Intra-DLA change adds a new Disposition Services Indicator, for use with DLMS 527R Receipt, identifying that materiel has been verified as non-controlled. This change satisfies a DLA Disposition Services business requirement under RBI. Revises Chapter 16, Disposition Services. Revises DLMS Supplement 527R.</p>	1
1021	7/17/2012	<p>Intra-DLA Revision to Procedures and DLMS 527D Pre-Positioned Materiel Receipt to Add Container Detail Supporting Relocation of Materiel between DLA Disposition Services Field Offices under RBI. The 527D PMR (Relocation) transaction requires an additional data element (Disposition Services Complete Container Count) to allow for enhanced processing of container transfers between DLA Disposition Services Field Offices. Revises Chapter 16, Disposition Services. Administrative Update to DLMS 511R, 527R, and 940R</p>	1

C1. CHAPTER 1

INTRODUCTION

C1.1. GENERAL

C1.1.1. **Purpose.** This volume provides Department of Defense (DoD) standard procedures and electronic data interchange (EDI) conventions to effect supply actions using American National Standards Institute (ANSI) Accredited Standards Committee (ASC) X12 transactions with the Defense Logistics Management System (DLMS).

C1.1.2. **Defense Logistics Management System Volume Access.** Use of this volume requires simultaneous access to DLMS Manual Volume 1 administrative items such as the lists of acronyms and abbreviations, terms and definitions, and references; instructions for acquiring access to the DLMS standards data base; specific guidance that applies to all DLMS Supplements; DLMS to Defense Logistics Standard System (DLSS) cross-references and conversion and both functional and technical information that is relatively stable and applies to the DLMS as a whole.

C1.2. **POLICY.** The DoD policy governing the procedures in this volume are:

C1.2.1. **DoD Instruction 4140.01.** "Supply Chain Materiel Management Policy", December 14, 2011

C1.2.2. DoD 4140.1-R, "DoD Supply Chain Materiel Management Regulation", May 3, 2003

C1.3. **APPLICABILITY.** This volume applies to the Office of the Secretary of Defense, the Military Departments, the Joint Staff, the Combatant Commands, and Defense Agencies. The manual applies, by agreement, to external organizations conducting logistics business operations with DoD including (a) non-Government organizations, both commercial and nonprofit; (b) Federal agencies of the U.S. Government other than DoD; (c) foreign national governments; and (d) international government organizations.

C1.4. **SUPPLY PROCESS REVIEW COMMITTEE.** The Supply Process Review Committee (PRC) is the forum through which the DoD Components and other participating organizations may participate in the development, expansion, improvement, maintenance, and administration of supply requirements for the DLMS. The Supply PRC chairperson, in coordination with the DoD Component Supply PRC representatives, is responsible for the contents of this volume of the DLMS. Representatives to the Supply PRC are identified on the DLA Logistics Management Standards Website. See DLMS Volume 1, Chapter 1 for a discussion of DLMS PRC functions and responsibilities.

C1.5 **JOINT PHYSICAL INVENTORY WORKING GROUP.** The Joint Physical Inventory Working Group (JPIWG) recommends guidance and develops program

enhancements for the physical inventory control of DoD supply system materiel. The JPIWG chairperson coordinates with DoD Component representatives for general supplies and ammunition to maintain the physical inventory control procedures contained in Chapter 6 of this volume. Representatives to the JPIWG are identified on the DLA Logistics Management Standards Website.

C1.6. JOINT SMALL ARMS AND LIGHT WEAPONS COORDINATING GROUP. The DoD Joint Small Arms and Light Weapons Coordinating Group (JSA/LWCG) supports the continuous improvement of the Small Arms Serialization Program (SASP), identification of inter-DoD Component problems with inventory management of small arms and light weapons, and the formulation of solutions to those problems. The JSA/LWCG chairperson coordinates with representatives from DoD Components to maintain the SASP procedures contained in Chapter 18 of this volume. Representatives to the JSA/LWCG are identified on the DLA Logistics Management Standards Website

C1.7. NONCOMPLIANCE. If reasonable attempts to obtain compliance with prescribed procedures or resolution of DLMS supply-related problems are unsatisfactory, the activity having the problem may request assistance from their DLMS Supply PRC representative. For noncompliance issues that impact the JSA/LWCG as well as the JPIWG, refer concerns to the Service/Agency representative on the aforementioned committees. The request shall include information and copies of all correspondence pertinent to the problem; including the transaction set number, the document number and the date of the transaction involved. The representative shall take the necessary actions to resolve the issue or problem. The actions may include requesting assistance from the Supply PRC chairperson.

C1.8. TRANSACTION REVERSAL. Processing activities may reverse select MILSTRAP functional area transactions. See Chapter 6 for quality control requirements and for additional controls required when reversing physical inventory adjustments. See Chapter 9 for additional controls required when reversing logistics transfer/decapitalization transactions.

C2. CHAPTER 2

SPECIAL PROGRAM REQUIREMENTS AND DEMAND DATA EXCHANGE PROJECTED SUPPLY PLAN

C2.1. GENERAL

C2.1.1. Purpose. This chapter provides procedures for Special Program Requirements (SPR) and for Demand Data Exchange (DDE) Projected Supply Plan.

C2.1.2. Transactions. This chapter addresses the procedures applicable to the SPR and DDE functions using DLMS 830R and DLMS 830D respectively. Other Defense Logistics Management System (DLMS) formats such as extensible markup language (XML) are also available. See the DLA Logistics Management Standards Website for available formats at

www.dla.mil/j-6/dlmsso/elibrary/transformats/140_997.asp.

C2.1.2.1. The DDE Projected Supply Plan function uses DLMS 830D (version 4030) identified by Accredited Standards Committee (ASC) X12 beginning segment (1/BFR12/0200) Planning Schedule Type Code AA—Customized Ordering Forecast. The DDE function is further broken down in 1/LN01/0100 to identify a DDE Projected Supply Plan submission (LN01 Code H) and a DDE Projected Supply Plan cancellation (LN01 Code C) for a given national item identification number (NIIN). This transaction is a DLMS enhancement and has no corresponding DLSS MILSTRAP legacy transaction.

C2.1.2.2. The SPR function uses DLMS 830R (version 4010) identified by ASC X12 beginning segment (1/BFR12/020) Planning Schedule Type Code XA—Requirement Forecast. SPR functions are further broken down in 2/LIN01/10 to identify SPR Request, SPR Security Assistance Request, SPR Cancellation, SPR Modification, SPR Acceptance or Rejection of Substitute Item, and SPR Inquiry. The corresponding [MILSTRAP](#) legacy 80 record position transaction functionality is identified for information purposes in a mixed DLSS/DLMS environment. DLMS 830R provides functionality of MILSTRAP legacy Document Identifier Codes (DIC) DYA, DYB, DYC, DYD, DYG, DYH, DYJ, DYK, DYL, and DYM. Table C2.T1. provides the specific 2/LIN01/10 correlation to the legacy DICs.

Table C2.T1. DLMS 830R MILSTRAP Equivalent Documents/Codes

Legacy DIC	MILSTRAP Title	830R LIN01 Code	DLMS Title	Required BFR Action Code
DYA	SPR Request	A	SPR Request	
DYB	SPR Request (Exception Data)	A	SPR Request	OT, indicates exception data is provided
DYC	SPR Cancellation	C	SPR Cancellation	
DYD	SPR Modifier	D	SPR Modification	
DYG	SPR Substitute Item Acceptance	F	SPR Substitute Item Acceptance	
DYH	SPR Substitute Item Rejection	G	SPR Substitute Item Rejection	
DYJ	SPR Follow-up	E	SPR Follow-up	
DYL	SPR Request (Cooperative Logistics Supply Support Arrangement (CLSSA))	B	SPR Security Assistance Request	
DYM	SPR Request (Exception Data for CLSSA)	B	SPR Security Assistance Request	OT, indicates exception data is provided

C2.1.2.3. SPR Status transaction is DLMS 870L identified by ASC X12 beginning segment (1/BSR01/020) Status Report Code 9–Response to a Requirement Forecast. This transaction provides MILSTRAP legacy DIC DYK functionality.

C2.1.2.4. Status Notification is DLMS 870L identified by beginning segment (1/BSR01/020) Status Report Code 3–Unsolicited Report. This transaction provides MILSTRAP legacy DIC DZ9 functionality.

C2.2. SPECIAL PROGRAM REQUIREMENTS. This section provides requirement forecasting procedures for items required to support nonrepetitive special programs or projects that cannot be forecast by the inventory control point (ICP) based on demand data, and which have the greatest probability of materializing and resulting in the eventual submission of requisitions. GSA does not participate in the SPR process.

C2.2.1. Forecasting activities may submit SPR requests for requirements meeting one or more of the following criteria:

C2.2.1.1. One-time training exercises or maneuvers.

C2.2.1.2. Repair or rebuild programs that are either nonrecurring or are seldom or irregularly programmed.

C2.2.1.3. New constructions (e.g., ships, buildings).

C2.2.1.4. One-time alterations, modifications, or conversion programs.

C.2.2.1.5. Initial issue of existing items (e.g., outfittings, activations, and changes in authorized allowances).

C2.2.1.6. Initial requirements for special operational projects.

C2.2.1.7. Initial testing.

C2.2.1.8. Government-furnished property.

C2.2.1.9. Infrequently planned support operations such as Arctic and Antarctic resupply missions.

C2.2.1.10. Special nonrepetitive situations required to support authorized Security Assistance Program requirements (e.g., initial pipeline stockage requirements in support of approved CLSSA).

C2.2.2. Excluded Requirements. The following types of requirements are excluded from identification as SPRs:

C2.2.2.1. Provisioning, recurring type.

C.2.2.2.2. War Materiel Requirements.

C.2.2.2.3. Requirements for which the DoD Component has a recurring demand.

C2.2.2.4. Subsistence, all categories.

C2.2.3. SPR Submission and Routing

C2.2.3.1. Submission Timeframe. The time window for submission of SPRs is between 90 calendar days and five years prior to the support date (the first day of the month for which it is anticipated that materiel will be requisitioned for the program). When procurement is necessary, delivery for an early support date may not be possible since the procurement lead time for most items will be greater than 90 calendar days. Therefore, forecasting activities should submit SPRs to ICPs as far in advance of the support date as practical.

C2.2.3.2. Forecasting. Forecasting activities shall prepare an SPR Request Transaction to transmit SPR data to the ICP. When the requirement for an item is such that materiel will be required in phases (e.g., 100 each per month; 100 per quarter), the forecasting activity shall stratify the forecast quantity by the support date as allowed by the DLMS Transaction.

C2.2.4. DLA Transaction Services Processing. DLA Transaction Services shall pass or route SPR inquiries as follows: Upon receipt of the DLMS 830R SPR transactions, DLA Transaction Services shall edit the national stock number (NSN) of the incoming transaction to determine whether 1) the NIIN can be identified, 2) the Federal supply class (FSC) is compatible with the NIIN, and 3) the transaction is directed to the correct source of supply. DLA Transaction Services shall pass the transaction, reject the transaction, or effect necessary changes to process the transaction and provide appropriate status notification or reject transactions to the submitter as follows:

C2.2.4.1. If the NIIN is valid (including NIINs coded obsolete/inactive) but the FSC and NIIN are not compatible, DLA Transaction Services shall correct the FSC and provide a DLMS 870L Status Notification Transaction to the submitter. DLA Transaction Services shall prepare the notification whenever the FSC is corrected in the incoming transaction. Show the correct FSC and Status Code BG in the Status Notification Transaction.

C2.2.4.2. If the NIIN is valid (including NIINs coded obsolete/inactive), screen the source of supply file Service record (or Integrated Materiel Manager (IMM) record when the Service record source is either another DoD Component activity or matches the input transaction "From" organization) and process as follows:¹

C2.2.4.2.1. Correct Source of Supply. If the transaction is directed to the correct non-GSA source of supply, DLA Transaction Services shall pass the transaction to that activity.

C2.2.4.2.2. Incorrect Source of Supply–Reroute. If the inquiry is directed to an incorrect source of supply, and the correct source of supply is not GSA, DLA Transaction Services shall reroute the transaction to the correct source of supply and transmit a Status Notification to the submitter citing Status Code BM. DLA Transaction Services shall identify the correct source of supply in the notification transaction.

C2.2.4.2.3. GSA Directed Transactions. If the inquiry is directed to a correct GSA source of supply or to an incorrect source of supply, but GSA is the correct source of supply, DLA Transaction Services shall reject the transaction to the submitter with DLMS 824R, Reject Advice citing Reject Advice Code AX.

C2.2.4.3. If the NIIN cannot be identified, DLA Transaction Services shall reject the transaction to the submitter citing Reject Advice Code AD.

C2.2.5. Reject Advice Transaction Recipients. Activities in receipt of DLMS 824R Reject Advice transactions shall take appropriate action as indicated by the reject advice code. In addition, recipients of Reject Advice Code AB shall advise their

¹ Source of supply for obsolete/inactive items will be taken from the source of supply file when possible; otherwise, the source of supply will be the activity identified as the "To" activity in the incoming transaction.

designated DoD Component cataloging data contact point of a DLA Transaction Services source of supply file discrepancy.

C2.2.6. Status Notification Transaction Recipients. Activities in receipt of Status Notification Transactions shall notify other activities requiring knowledge of the change and ensure that all future SPR transactions show the change identified by the status code in the notification.

C2.2.6.1. Recipients of Status Code BG shall update internal SPR records to show the correct FSC identified in the notification. The recipient shall review the NSN (FSC and NIIN) to ensure the SPR being processed is for the desired item. If the NSN is not the desired item, the SPR originator shall submit an SPR Cancellation to the source of supply.

C2.2.6.2. Recipients of Status Code BM shall update their records to show the correct source of supply.

C2.2.7. IMM Processing of SPR Requests

C2.2.7.1. Source of Supply Risk. The IMM measures the size of the requirement being forecasted to determine its acceptability in terms of the risk of long supply being generated. This measurement requires consideration of the size of the forecasted quantity in relation to the normal demand estimated for the item being forecasted, the value (cost) of this quantity, the supply status of the item being forecasted, funding capability of the IMM, accuracy of past forecasts, and the degree of assurance that requisitions will follow.

C2.2.7.2. SPR Status Transaction. The IMM shall determine action to be taken on the SPR and within 15 calendar days after receipt of the request shall provide appropriate status using SPR Status Transaction. SPR status transactions shall advise the forecasting activity of acceptance, rejection (other than for correction and resubmission), or other action required on the SPR. When an IMM receives an SPR Request Transaction that cannot be processed due to erroneous or missing data, the IMM shall reject the request using DLMS 824R for correction and resubmission.

C2.2.8. Inquiry on SPR Requests. When the forecasting activity has not received an SPR Status Transaction or a DLMS 824R within 21 calendar days from the SPR request submission date, the forecasting activity may submit an SPR Inquiry Transaction to the ICP.

C2.2.9. ICP Action on SPR Follow ups

C2.2.9.1. No Record of Receipt. When there is no record of receipt of the original SPR request, the IMM shall process the SPR Inquiry Transaction as an original SPR request.

C2.2.9.2. Replies to SPR Requests. IMM shall prepare replies to SPR inquiries, as specified in paragraph C2.2.7.

C2.2.20. Modification of SPR Requests. The forecasting activity shall send an SPR Modification Transaction to submit changes for a previously submitted SPR request to replace data in the original request. Submit SPR modifiers only to change the quantity, the project code, the coast designator, the support date, the ship-to address, and/or the initiator of the SPR requirement. If the originator of the SPR modifier differs from the originator of the original SPR, maintain a record of the revised originator.

C2.2.11. Response to SPR Modification. The ICP shall prepare replies to SPR modifiers, as specified in paragraph C2.2.7.

C2.2.12. Cancellation of SPR Requests. The forecasting Activity may submit an SPR Cancellation Transaction for a previously submitted SPR request. Cancellations must be for the total quantity applicable to the SPR.

C2.2.13. Response to SPR Cancellations. The ICP shall reply to SPR Cancellation Transactions with an SPR Status Transaction citing SPR Status Code PD indicating that the cancellation was accepted.

C2.2.14. Acceptance/Rejection of Substitute Item. Forecasting activities in receipt of SPR responses offering a substitute item shall transmit an SPR Acceptance or Rejection of Substitute Item Transaction to indicate acceptance or rejection of substitute materiel.

C2.2.15. Response to Substitute Item Rejection. The IMM shall initiate action on the item originally requested. The IMM must prepare status responses as specified in paragraph C2.2.7.

C2.2.16. Retention of SPR Requests. The ICP shall retain SPR requests until:

C2.2.16.1. The support date of those requirements for which SPR Status Code PA was furnished or until a requisition is received that can be identified to all or a portion of a particular SPR quantity.

C2.2.16.2. One procurement lead time/assembly time away from the support date when procurement/assembly is required in support of those requirements for which SPR Status Code PB was furnished.

C2.2.16.3. Assembly time prior to support date when extra time is required for assembly in support of those requirements for which SPR Status Code PC was furnished.

C2.2.17. Follow-on Status. The IMM shall provide revised SPR Status Transactions when the situation changes (e.g., change in procurement lead time, procurement is required for materiel originally anticipated to be available from stock). Generally, these situation changes are unusual in nature, are not programmed, and require off-line processing. IMM's must provide the status as specified in paragraph C2.2.7. x

C2.2.18. Preparation of SPR Shipments

C2.2.18.1. Response Timeframe. When an SPR Status Transaction citing SPR Status Code PA is received, requisitions citing Demand Code P should be submitted for the SPR-related requirements in time to allow for delivery within the appropriate Uniform Materiel Movement and Issue Priority System (UMMIPS) time standard. Demand Code P indicates to the ICP that the requisition is for materiel previously forecasted as an SPR. This enables the ICP to control and apply the appropriate logic for the demand generated by the requisition.

C2.2.18.2. Establishing Audit Trail. Requisitions submitted as a result of an SPR shall include the document number from the original SPR to establish an audit trail between the SPR and the subsequent requisitions. This audit trail provides a means to determine whether follow-on requisitions are submitted for requirements forecasted through SPRs.

C2.2.18.3. Item Deletion. When an SPR Status Transaction is received citing SPR Status Code PR, the SPR is being deleted and the item is a procurement lead time/assembly time away from the support date. If the requirement is still valid, the requiring activity must immediately submit a DLMS 511R, Requisition citing Demand Code O.

C2.2.19. Logistics Reassignments

C2.2.19.1. Logistics Loss. When an item is involved in a logistics loss to an IMM of another DoD Component, the losing inventory manager (LIM) shall send an SPR Status Transaction to the forecasting activity containing SPR Status Code PV. This status indicates that the item has been involved in a logistics reassignment and a new SPR Request Transaction must be submitted to the gaining inventory manager (GIM).

C2.2.19.2. Logistics Loss within Same DoD Component. When the logistics loss is to an IMM within the same DoD Component, the LIM shall forward the record of the SPR Request Transaction to the GIM. No status need be furnished the forecasting Activity.

C2.3. DEMAND DATA EXCHANGE PROJECTED SUPPLY PLAN. This section provides procedures for the exchange of DDE projected supply plan data between DLA and DoD customers. The two components of this business process are the transmission of customer requirements via DDE and DLA/customer collaboration. Business rules for the submission and processing of DDE shall be documented in a DLA customer support agreement, (e.g., Joint Collaboration Agreement) This agreement must be in place prior to the initial submission of DDE. DLA shall use the DDE/collaboration process to improve the accuracy of DLA's demand planning to support customer requirements.

C2.3.1. DDE supply planning activities may submit to DLA their projected supply plan/collaboration data for future requirements expected to be obtained from DLA using the DLMS 830D, DDE Projected Supply Plan Transaction. Separate DDE projected supply plans into monthly periods based on the projected dates that the materiel will be

ordered from DLA. Types of demands for which collaboration data may be submitted include, but are not limited to:

C2.3.1.1. Requirements for which the DOD Component has a recurring demand.

C2.3.1.2. Subsistence, all categories.

C2.3.1.3. One-time training exercises or maneuvers.

C2.3.1.4. Repair or rebuild programs which are either nonrecurring or which are seldom or irregularly programmed.

C2.3.1.5. New constructions (e.g., ships, buildings).

C2.3.1.6. One-time alterations, modifications, or conversion programs.

C2.3.1.7. Initial issue of existing items (e.g., outfittings, activations, and changes in authorized allowances).

C2.3.1.8. Initial requirements for special operational projects.

C2.3.1.9. Requirements for initial testing.

C2.3.1.10. Requirements for infrequently planned support operations such as Arctic and Antarctic resupply missions.

C2.3.1.11. Special situations of a nonrepetitive nature when required in support of authorized Security Assistance Program requirements (e.g., initial pipeline stockage requirements in support of approved CLSSA).

C2.3.1.12. Zero or reduced requirements, which are different from past demand history patterns.

C2.3.2. DDE Projected Supply Submission and Routing

C2.3.2.1. Submission Timeframe. DDE Transactions must be submitted each month. Demand forecasting data should be submitted by the first of the month and may be submitted up to 5 business days prior to the first of each month, with a buffer until the third of the month to accommodate transmission errors or failures.

C2.3.2.2. DDE Projected Supply Plan. DDE supply planning activities shall prepare the DDE projected supply plan for each item = Demand Forecast Unit (e.g., NIIN, Ship to DoD activity address code (DoDAAC), and Sold To DoDAAC) for which the customer wishes to collaborate with DLA. Each transaction set must include the projected supply plan period beginning date and the projected supply plan period ending date. The projected supply plan period span can be as little as 12 months or as much as 60 months.

C2.3.3. DLA Transaction Services Processing. DLA Transaction Services shall route all DDE transactions to DLA's Enterprise Processing Center, source of supply "SMS."

C2.3.4. DLA Validation of NIIN. DLA shall screen transaction sets and will only accept valid NIINs for processing.

C2.3.5. DLA Processing of DDE Data. DLA shall compare the collaboration customer's projected supply plan to the projected customer supply plan calculated by the Planning and Collaboration Subsystem or the previous collaborative projected supply plan if the NIIN is a recurring Demand Forecast Unit.

C2.3.5.1. Collaborative items (which may or may not exceed system tolerance parameters) shall be available for collaboration interaction with the customer and DLA via the Planning and Collaboration Subsystem.

C2.3.5.2. Items previously identified for inclusion in DDE that are not in the current DDE submission shall remain flagged as Collaborate with the most recent DDE projected supply plan quantities received from the customer. If the customer would like to remove an item from the DDE effort, the customer shall submit a DLMS 830D, DDE Cancellation Transaction for the NIIN and the item will be removed from the DDE/ Collaboration effort.

C2.3.5.3. The setting of system tolerance parameters used in this review requires consideration of the following: size of the DDE projected supply plan quantity in relation to the Planning and Collaboration Subsystem forecasted demand for the item; value (cost) of the projected supply plan quantity; accuracy of customer's past DDE projected supply plans; and degree of assurance that requisitions will follow.

C2.3.6. Collaboration Interaction. All Collaborative items (which may or may not exceed system tolerance parameters) shall be available for monthly collaboration interaction with the customer and DLA. The point of contact for the customer shall be alerted, via e-mail by the Collaboration lead at the DLA Field Activity (DLA Aviation, Richmond, VA, DLA Land and Maritime, Columbus, OH, DLA Troop Support, Philadelphia, PA, by the seventh business day of every month, to notify the customer of the open and close dates of the monthly collaboration window. The customer will have until the fourth Thursday of the month to complete the review (specific open and close dates will be cited in the e-mail). The DLA demand planner will then have until the fourth Friday of the month (also know as "Demand Month End") to complete the review and publish the demand plan for inclusion in the projected supply plan.

C3. CHAPTER 3

WAR MATERIEL REQUIREMENTS AND SIMULATED MOBILIZATION EXERCISES

C3.1. GENERAL

C3.1.1. Purpose. This chapter prescribes procedures for War Materiel Requirements (WMR) and simulated mobilization exercise.

C3.1.2. Transactions. This chapter address the procedures applicable to the WMR function using the DLMS 830W, WMR Transaction. The WMR function is identified by the DLMS 830W American National Standards Institute (ANSI) Accredited Standards Committee (ASC) X12 beginning segment (1/BFR12/020) Planning Schedule Type Code XF–War Reserve Forecast. Other DLMS formats, such as Extensible Markup Language (XML), are also available. The DLMS formats are available on the DLA Logistics Management Standards Website www.dla.mil/j-6/dlmsso/elibrary/Transformats/140_997.asp. The Defense Logistics Standard System (DLSS) Military Standard Transaction Reporting and Accountability Procedures (MILSTRAP) legacy 80 record position counterpart is provided for information purposes in a mixed DLSS/DLMS environment. The DLMS WMR Transaction provides the functionality of MILSTRAP legacy Document Identifier Codes (DIC) DMA, DMB, DMC, DMD, and DME. The 2/LQ01/190 WMR Code corresponds to to the legacy DICs:

C3.1.2.1. DIC DMS, Recurring U.S. Other WMR Data = LQ01 qualifier 'LZ' WMR Code 7–Recurring U.S. Balance War Reserves.

C3.1.2.2. DIC DMB, Nonrecurring U.S. Other WMR Data = LQ01 qualifier 'LZ' WMR Code 8–Nonrecurring U.S. Balance War Reserves.

C3.1.2.3. DIC DMC, Nonrecurring Allies Other WMR Data = LQ01 qualifier 'LZ' WMR Code 9–Nonrecurring Allies. Balance War Reserves.

C3.1.2.4. DIC DMD, WMR Forecasted Return Data = LQ01 qualifier 'LZ' WMR Code 4–WMR Forecasted Repairable Return.

C3.1.2.5. DIC DME, WMR Visibility Data = LQ01 qualifier 'LZ' WMR Code 10–Pre-Positioned War Reserve. Wholesale, Protected and Nonprotected.

C3.2. WAR MATERIEL REQUIREMENTS

C3.2.1. DoD Policy. [DoD Instruction 3110.06](#), “War Reserve Materiel Policy,” June 23, 2008, contains DoD policy for management and development of WMR.

C3.2.2. WMR procedures provide for:

C3.2.1.1. DoD Component submission of WMR data to the integrated materiel managers (IMMs) of the Military Departments, DLA, and GSA.

C3.2.1.2. IMM edit and validation of WMR Transaction data and rejection of incomplete or invalid input.

C3.2.1.3. Providing output from the losing inventory manager (LIM) to the gaining inventory manager (GIM) upon logistics reassignment of an item.

C3.2.3. DoD Component Input. The DoD Components shall send WMR data to reach IMMs by 15 February of each year and shall submit corrections and/or changes as required. Do not submit zero quantity requirements.

C3.2.4. IMM Responsibility. The IMM shall control each DoD Component's input WMR Transactions by national stock number (NSN), edit the WMR Transactions, and validate the edited transactions for data adequacy and accuracy. The IMM shall consider validated requirements in the annual computation of the Balance War Reserve, and in any recomputation of these requirements upon receipt of corrected or revised input. When a WMR Transaction contains an invalid NSN, unit of issue, quantity, or date, process a DLMS 824R, Reject Advice. However, when the transaction is invalid for any other reason, manually reject the entire submission to the submitting DoD Component. Include all rejects on a listing showing an image of the input transaction and a code identifying the reason for the reject. Mail the listing together with a letter explaining the reject code and action(s) required of the submitter.

C3.2.5. Logistically Reassigned Items. When items are logistically reassigned, the LIM shall send the GIM a listing of WMR data with a supporting WMR Transaction, as prescribed in the [Chapter 9](#) of this manual.

C3.3. SIMULATED MOBILIZATION EXERCISES

C3.3.1. When establishing plans that require simulated mobilization exercises, identify the associated transactions as simulated mobilization exercise transactions as provided in the applicable DLMS transaction. Do not process simulated mobilization transactions in the supply distribution system(s) as action documents that affect accountable/unit records. The DoD Component activities responsible for initiating these exercises must use extreme caution to ensure explicit procedures and complete coordination with all participants.

C3.3.2. C15.3.2. Military Standard Requisitioning and Issue Procedures (MILSTRIP), prescribes Project Codes in the 3E series that are reserved for use in simulated mobilization exercises.

C4. CHAPTER 4

REQUISITIONING

C4.1. **GENERAL**. This chapter prescribes procedures for the preparation and submission of requisitions with specific requisitioning requirements involving Government Furnished Materiel (GFM), Security Assistance (SA), Not-Mission-Capable Supply (NMCS), Anticipated NMCS (ANMCS), Pre-Positioned War Reserve Materiel Stock (PWRMS), conventional ammunition, subsistence, and GSA non-mailable items. This chapter also provides procedures for requisition cancellations, modifications, and inquiries. In addition, this chapter prescribes the source of supply and storage activity processing procedures of the aforementioned transactions including the preparation and processing of the materiel release, materiel release advice, and DAAS edits associated with requisition processing.

C4.2. **PREPARATION OF REQUISITIONS**. Requisitioning organizations must use the DLMS 511R, Requisition, to submit requisitions for all materiel requirements.

C4.2.1. **Document Number**. The document number uniquely identifies each requisition within the supply system as follows:

C4.2.1.1. **Identification Code**. This consists of the first six positions of the document number and is a six-position constructed code for identification purposes. Use the applicable DoD activity address code (DoDAAC) (AAC for Federal Civil Agencies) or International Logistics Control Office (ILCO) assigned identification code for SA requisitioners not assigned a DoDAAC. For Grant Aid (GA), the U.S. Service Implementing Agency code identifies the U.S. Service or Agency responsible for administering the program line in the first position, the country or international organization code in the second and third positions, the customer-within-country/activity code in the fourth position, a zero in the fifth position, and the type of assistance and financing code in the sixth position. For Foreign Military Sales (FMS), the Service assignment code identifies the U.S. Service Implementing Agency responsible for administering the case in the first position, the country or international organization code in the second and third positions, the customer-within-country/activity code in the fourth position, the delivery term code (see DTR 4500.9-R or [DLMS dictionary](#) (Logistics Data Resources Management System (LOGDRMS) for code definition and applicable values) in the fifth position, and the type of assistance and financing code in the sixth position. (NOTE: Shipments to Canada identify the customer-within-country code/activity as a two-position code in the fourth and fifth positions.)

C4.2.1.2. **Transaction Control Date**. This is a four-position ordinal date (one position year of century and three-position day of year) to identify the requisition preparation date. It is located in the seventh through tenth positions of the document number.

C4.2.1.3. Serial Number. This is the assigned four-position line item code for each requisition within the transaction set. It is located in the eleventh through fourteenth positions of the document number. Use the Utilization Code in the LQ segment to identify the purpose of the requisition.

C4.2.2. Priority Designators and Required Delivery Dates

C4.2.2.1. Assignment of PD. The priority designator (PD) is based upon a combination of factors that relate the relative importance of the requisitioner's mission, expressed by its Force or Activity Designator (F/AD) (a Roman numeral) and the urgency of need of the end use expressed by the Urgency of Need Designator (UND). The F/AD is assigned by the Secretary of Defense, the Chairman of the Joint Chiefs of Staff, or a DoD Component authorized by the Chairman of the Joint Chiefs of Staff, to assign F/ADs for their respective forces, activities, programs, or projects. The criteria for assignment of an appropriate F/AD is in [DoD 4140.1-R](#). The requisitioning activity determines the UND (an alphabetic character).

C4.2.2.2. Commanding Officer Responsibilities. Commanding officers of requisitioning installations are responsible for the accurate assignment of PDs consistent with the F/AD and UND, and the validity of required delivery dates (RDDs) when assigned to requisitions. Commanding officers of ILCOs, receiving requisitions from SA requisitioners, are responsible for review of assigned PDs and delivery dates. Commanding officers shall accomplish the following reviews prior to sending requisitions to the source of supply:

C4.2.2.2.1. Commander Requirements Review. Commanders (or acting commanders during absences) shall personally review all requirements based on UND A to certify an inability to perform the mission.

C4.2.2.2.2. Designation of Reviewers. Commanders shall designate, in writing, specific personnel who shall personally review all requirements based on UND B to certify that the urgency has been accurately determined.

C4.2.2.3. Determining UND. Determine the appropriate UND as follows:

C4.2.2.3.1. UND A. Use UND A in requisitioning materiel that is:

C4.2.2.3.1.1. Required for immediate end-use and without which the force or activity is unable to perform its assigned operational mission or without which the force or activity will be unable to perform its assigned operational mission within 15 calendar days (20 calendar days if the force or activity is located outside continental United States (OCONUS)).¹

¹Materiel requirements of this nature affect the readiness of mission-essential materiel and actually result in a report of casualty in accordance with equipment readiness information systems authorized by the Office of the Secretary of Defense (OSD), the Chairman of the Joints Chief of Staff, or the DoD Component headquarters.

C4.2.2.3.1.2. Required for immediate installation on, or repair of, mission-essential materiel and without which the force or activity is unable to perform its assigned operational mission.

C4.2.2.3.1.3. Required for immediate end-use for installation on, or repair of, direct support equipment (such as ground support and firefighting) necessary for the operation of mission-essential materiel.²

C4.2.2.3.1.4. Required for immediate end-use in the replacement or repair of mission-essential training materiel and without which the force or activity is unable to perform its assigned training missions.

C4.2.2.3.1.5. Required for immediate end-use to effect the replacement or repair of the essential physical facilities of an industrial or production activity and without which that activity is unable to perform its assigned missions.

C4.2.2.3.1.6. Required for immediate end-use to eliminate an existing work stoppage at an industrial or production activity that is engaged in manufacturing, modifying, or maintaining mission-essential materiel.

C4.2.2.3.1.7. Required for immediate end-use to eliminate an existing work stoppage on a production line that is performing repair and maintenance of unserviceable items having a Military Mission Essentiality Code of 1 or 2.

C4.2.2.3.2. UND B. Use UND B in requisitioning materiel that is:

C4.2.2.3.2.1. Required for immediate end-use and without which the capability of the force or activity to perform its assigned operational mission is impaired.

C4.2.2.3.2.2. Required for immediate installation on, or repair of, mission-essential materiel and without which the capability of the force or activity to perform its assigned operational missions is impaired.³

C4.2.2.3.2.3. Required for immediate end-use for installation on, or repair of, auxiliary equipment. Auxiliary equipment is defined as equipment that supplements mission-essential materiel or takes the place of such materiel should it become inoperative.

C4.2.2.3.2.4. Required for immediate end-use in the replacement or repair of mission-essential or auxiliary training equipment and without which the capability of the force or activity to perform its assigned missions is impaired.

²Ibid.

³Materiel requirements of this nature directly affect the capability of the force or activity to perform its mission; it can temporarily accomplish assigned missions and tasks but with effectiveness and efficiency below the DoD Component Headquarters-determined level of acceptable readiness.

C4.2.2.3.2.5. Required for immediate end-use to effect replacement or repair of the essential physical facilities of an industrial or production activity and without which the capability of that activity to perform its assigned missions is impaired.

C4.2.2.3.2.6. Required to preclude an anticipated work stoppage at an industrial or production activity that is engaged in manufacturing, modifying, or maintaining mission-essential materiel.

C4.2.2.3.2.7. Required to preclude an anticipated work stoppage on a production line performing repair and maintenance of unserviceable intensive management or critical items.

C4.2.2.3.2.8. Required for the immediate replacement of the safety level quantity of mission-essential items on allowance and load lists (such as, prescribed load lists, spares kits, station sets, or coordinated shipboard allowance lists) when the last item has already been issued.

C4.2.2.3.2.9. Required for immediate stock replenishment at overseas forward area supply activities when a customer's mission-essential stock level goes below the safety level and stock due in is not anticipated to arrive prior to stock on hand reaching a zero balance. The quantity ordered should be the minimum amount sufficient to ensure the maintenance of a positive stock balance until materiel that is due in actually arrives.

C4.2.2.3.3. UND C. Use UND C in requisitioning materiel that is:

C4.2.2.3.3.1. Required for on-schedule repair, maintenance, manufacture, or replacement of all equipment.

C4.2.2.3.3.2. Required for replenishment of stock to meet authorized stockage objectives.

C4.2.2.3.3.3. Required for purposes not specifically covered by any other UND.

C4.2.2.4. Deriving PDs. Refer to Table C4.T1 to derive the PD from the F/AD and UND.

Table C4.T1. Derivation of Priority Designators (Relating F/AD to UND)

<u>FORCE OR ACTIVITY DESIGNATOR</u>	<u>URGENCY OF NEED DESIGNATOR</u>		
	<u>A</u>	<u>B</u>	<u>C</u>
I	01	04	11
II	02	05	12
III	03	06	13
IV	07	09	14
V	08	10	15

C4.2.2.5. Validation of F/AD Activities. By direction of the Office of the Secretary of Defense, the DLA Transaction Services shall validate F/AD I usage through the requisitioning process. DLA Transaction Services shall maintain an edit table consisting of authorized F/AD I activities. To preserve accuracy and timely update, the Joint Chiefs of Staff (JCS) shall forward to DLA Transaction Services and GSA all Office of Secretary of Defense (OSD) approved assignments of F/AD I immediately upon approval. Telephonic or electronic communication, to include online update, with DLA Transaction Services and GSA is authorized for time-sensitive updates; however, formal documentation shall be forwarded to DLA Transaction Services and GSA to support inclusion of all F/AD I authorized activities. In order to maintain unclassified communication, the JCS contact points are advised to identify authorized activities by DoDAAC only (no clear-text activity names) and make no reference to the associated F/AD. F/AD I requisitions (DLMS 511R or DLMS 511M, Modification, Transaction Type Codes A0, BM, BN, AM) that do not identify an authorized activity in the document number, ship-to, bill-to, or mark-for fields shall be identified for investigation without interruption of normal requisition processing. In addition, DLA Transaction Services shall assess the validity of transactions that bypass the F/AD I validation process as a result of alternative requisition submission, e.g., Defense Supply Expert System (DESEX) input, using the requisition image transaction. Suspected abuse shall be output to the Unauthorized Priority Designator Assignment Report.

C4.2.2.5.1. The Unauthorized Priority Designator Report produced by DLA Transaction Services identifies suspected abuse of PD assignment. This report also provides visibility of requisitions downgraded automatically by DLA Transaction Services during requisition processing based upon the DoD Component authorization. The report is prepared monthly. Summary sections, Parts I, II, IV, and V, are also available quarterly and annually. The report is in seven parts as follows:

C4.2.2.5.1.1. Part I – Service/Agency Summary of Requisitions Submitted Through DAAS,

C4.2.2.5.1.2. Part II – DoDAAC Summary by Service/Agency of Requisitions Submitted Through DAAS,

C4.2.2.5.1.3. Part III – Requisition Detail by DoDAAC of Requisitions Submitted Through DAAS,

C4.2.2.5.1.4. Part IV – Service/Agency Summary of Requisitions not Submitted Through DAAS,

C4.2.2.5.1.5. Part V – DoDAAC Summary by Service/Agency of Requisitions not Submitted Through DAAS,

C4.2.2.5.1.6. Part VI – Requisition Detail by DoDAAC of Requisitions not Submitted Through DAAS,

C4.2.2.5.1.7. Part VII – Requisition Detail by DoDAAC for Requisitions Downgraded to a Lower Priority by DAAS.

C4.2.2.5.2. Security Assistance Requisitions. SA requisitions (identified by Service/Agency Code B, D, K, P, or T in the document number or supplementary address field) shall be reviewed for appropriate PD assignment by the ILCO prior to release. Specific procedures to accomplish this may be deferred until implementation of the Defense Security Assistance Management System (DSAMS). SA requisitions shall not be revalidated by DLA Transaction Services against the established edit table. However, any SA requisitions with PD 01, 04, or 11 shall be displayed as suspected abuse in the Unauthorized Priority Designator Report under the appropriate Service/Agency heading with no activity name.

C4.2.2.5.3. GSA Requisitions. DLMS requisitions submitted directly to GSA for GSA managed items shall be reviewed for appropriate PD assignment prior to further processing. Any requisitions with PD 04 or PD 11 shall be downgraded as follows: if the PD is 01 (for USCG, USAF JM accounts and SA only) then DAAS shall change to PD 03; if PD 04, DAAS shall change to PD 06; and if PD 11, DAAS shall change to PD 13.⁴ PD 01 requisitions may be downgraded with the exception of Air Force (Service Code F) requisitions.⁵ GSA shall notify the requisitioner of the downgrade by generating a Supply Status Transaction with BK Status, and route to DAAS for distribution to the correct recipient(s) depending on the Media/Status and Distribution Codes in the transaction. The modified requisition shall be forwarded within GSA for processing based on the new PD. GSA shall report downgrading action to DAAS via the DLMS 511R (future enhancement) Transaction. Action will allow DLA

⁴ Effective November 3, 2003, DLA Transaction Services implemented logic change to allow requisitions with DoDAAC N00421 in rp 30-35, Document Number Serial Numbers FQ and GQ (in rp 40-41) and PDs 04 and 11 to pass through DLA Transaction Services processing without being downgraded. Requisitions with DoDAAC N00421, document number serial numbers beginning with FQ and GQ for PDs 01, 04, and 11 shall not be included in the monthly Priority Designator Reports.

⁵ Refer to ADC 279, Automated Downgrade for Priority Abuse and Reporting Procedures. The exception for the Air Force is an interim waiver pending better methodology for identification of the F/AD 1 authorized activity in AF requisitions.

Transaction Services to merge GSA priority abuse data into the Unauthorized Priority Designator Assignment Report on a monthly basis.

C4.2.2.5.4. DoD EMALL Requisitions. DAAS shall apply automatic downgrading to DoD EMALL prepared requisitions unmatched to the Authorized DoDAAC List with exception of Air Force PD 01 and MILSTRIP Order Entry Program (MOES) PD 01.

C4.2.2.5.5. Participating Service/Agency Points of Contact Responsibilities. DoD 4140.01-R, Appendix 9, requires the DoD Components to designate a single office of primary responsibility to act as focal point for Uniform Materiel Movement and Issue Priority System (UMMIPS) matters. To provide clear visibility of such points of contact, the JCS, the Military Services, DLA (if needed), and GSA, shall provide contact information to DLA Logistics Management Standards for publication in the DLM 4000.25-1, MILSTRIP, Appendix 2.14. Contact information shall include office name/symbol and communications numbers. Primary and alternate information should be included. The DoD Component responsibilities for monitoring F/AD assignments and conducting annual reviews are prescribed in DoD 4140.01-R.

C4.2.2.5.6. The Service/Agency F/AD Points Of Contact: Refer to the DLA Logistics Management Standards Website for the list of contacts www.dla.mil/j-6/dlmsso/eLibrary/ServicePoints/default.asp.

C4.2.2.6. Special Circumstance Precedence. In the following special circumstances, use the stated PD, irrespective of F/AD, but do not use for the routine replenishment of stocks to meet authorized stockage objectives:

C4.2.2.6.1. Emergency Medical/Disaster Supplies. Use PD 03 for medical or disaster-relief supplies or related items of equipment that are required immediately for:

C4.2.2.6.1.1. Prolonging life, relieving avoidable suffering, or expediting recovery in case of injury, illness, or disease.

C4.2.2.6.1.2. Avoiding or reducing the impact of epidemics or similar potential mass illnesses or diseases when in the opinion of medical professionals the probability of epidemics or similar potential mass illnesses is imminent.

C4.2.2.6.2. Emergency Civil Disturbance Equipment. Use PD 03 for emergency supplies or items of equipment that are required immediately for controlling a civil disturbance, civil disorder, or rioting.

C4.2.2.6.3. Individual Emergency Supplies Precedence. Use PD 06 for emergency supplies of individual and organizational clothing required immediately to provide a minimum of essential clothing to active duty military personnel who are actually without their required clothing.

C4.2.2.7. Specific End-Use Requisitions. If local stocks are exhausted and the local supply activity must requisition a specific immediate end-use requirement for a supported activity with a higher F/AD, the supply activity may assign a PD, commensurate with the F/AD of the supported unit, to the specific requirement. Do not use this authority for the routine replenishment requirements of the supported unit.

C4.2.2.8. Commercial Contractor GFM Requisitions. Whenever a DoD Component executes a contract that provides that a commercial contractor shall requisition GFM from the DoD distribution system, the DoD contracting officer shall advise the contractor of the PDs to use in such contractor-prepared requisitions. The advice shall be aware of the F/AD of the national priority program, force or activity for which the contract is executed, and the potential urgencies of need.

C4.2.2.9. Issue Priority Groups. PDs are grouped into Issue Priority Groups (IPGs) as follows:

C4.2.2.9.1. PDs 01, 02, and 03 form IPG I

C4.2.2.9.2. PDs 04, 05, 06, 07, and 08 form IPG II

C4.2.2.9.3. PDs 09, 10, 11, 12, 13, 14, and 15 form IPG III.

C4.2.2.10. Required Delivery Dates (RDD)

C4.2.2.10.1. Response Time Requirements. Requisitioning activities, after determining the appropriate PD applicable to requisitions, shall determine the appropriate entry for the RDD data field. The combination of the PD and the designation or nondesignation of an RDD or other allowable entry⁶ shall determine the supply and transportation system response time requirements. The response times (UMMIPS time standards) are displayed in DoD 4140.01-R.

C4.2.2.10.2. Nonstandard Delivery Times. When an RDD shorter than the UMMIPS time standards is assigned, the appropriate PD, consistent with the activity's F/AD and UND, must be cited in the requisition.

C4.2.2.10.3. Customer Unspecified Delivery Date. If the customer does not specify a delivery date, the customer should expect the total time from order placement to delivery to be within the total order and ship time specified by the UMMIPS time standards.

C4.2.2.10.4. Mandatory RDD Data Field Requirements. For subsistence, the RDD is mandatory in all requisitions, with the assigned PD prescribing the precedence of internal supply processing actions for requisitions showing identical RDDs. To ensure delivery on the RDD, the Inventory Control Point (ICP)/storage activity may bank the requisitions until the correct processing date; computed by

⁶ Non-date entries in the RDD field, i.e., Codes E, F, N, R, 444, 555, 777, and 999, are referenced as Special Requirement Codes under the DLMS.

subtracting number of days needed for depot processing and transit time from the RDD. Submit all requisitions using schedules established by the ICP.

C4.2.2.10.5. Collocated Stock. If the customer is collocated with the storage activity issuing the materiel, or has, through local negotiations, obtained collocated customer status and does not require the fastest possible service of the supply and transportation system, the customer should cite Special Requirements Code 444 in the LQ segment and not indicate an RDD.

C4.2.2.11. Expedited Handling and Expedited Transportation. Requisitioners may request expedited handling and transportation by citing Special Requirements Code 777.

C4.2.3. Nonreimbursable Materiel. Use the no-charge indicator in non-excess personal property requisitions to identify the requisitions for nonreimbursable materiel. Use the utilization code in requisitions to the DLA Disposition Services for excess personal property requisitions to denote free issue. See Chapter 16 for reutilization and marketing requisitioning procedures.

C4.2.4. Exception Data. Requisitioners must limit repetitive exception data to aid timely source of supply processing of requisitions to meet IPG processing times, standard delivery dates (SDDs), or RDDs, particularly those that satisfy high priority requirements. Use available requisitioning capabilities to ensure maximum utilization of automated processes. Processing exception data requisitions is resource intensive, prone to errors, and generally delays required support. The sources of supply shall disregard all unnecessary exception data (such as ship by commercial air, do not use postal system, ship by fastest traceable means, or ship overnight delivery) and continue processing. Sources of supply shall process all requisitions under UMMIPS (see DoD 4140.1-R). Within the UMMIPS time segment for transporting the materiel, it is the shipper's prerogative to select the mode of shipment based on time, distance, item characteristics, and economic factors. The repetitive use of the same exception ship-to address is an uneconomical way of doing business for all concerned. A separate DoDAAC assignment for this type of ship-to address should be made or the Transportation Account Code (TAC) 2 address of the involved activity should be changed and the resulting DoDAAC(s) used on applicable requisitions. Activities having multiple locations should assign a separate DoDAAC to each receiving location. It is incumbent upon the requisitioner to work with the applicable DoD Component focal point to develop procedures to automatically process requisitions.

C4.2.5. Limitation on Use of Exception Data

C4.2.5.1. Applicability. Exception data shall normally be limited to the conditions listed below. Commanders must approve, or delegate in writing to specific personnel the authority to approve, the submission of exception-data requisitions.

C4.2.5.2. Authorized Conditions. Authorized conditions for use of exception ship-to addresses are listed below. Requisitions containing exception ship-to addresses other than those listed shall be rejected with Status Code D6.

C4.2.5.2.1. Sales/donations/issues of materiel to qualifying Federal, state, or civil organizations or individuals approved by the Service Secretaries.

C4.2.5.2.2. Issues of nuclear assets as directed by Defense Threat Reduction Agency to Department of Energy contractors.

C4.2.5.2.3. Materiel in Supply Condition Code (SCC) L to contractors.

C4.2.5.2.4. Issues required by national emergency or natural disasters.

C4.2.5.2.5. Shipments of ammunition requiring special controls.

C4.2.5.2.6. Shipments to contractors for special testing.

C4.2.5.2.7. Requisitions from deployed naval units with an R or V in the first position of the document number; Utilization Code E, G, or W; PD 01, 02, or 03; and Special Requirements Code 999.

C4.2.5.3. Limitations. Exception data will normally be limited to the following:

C4.2.5.3.1. Non National Stock Number (NSN) lumber products identified and ordered by description only or other commodities that require additional descriptive information.

C4.2.5.3.2. Authorization/identification for items when such requirement is imposed by the ICP, by the parent Component, or by the requisitioning activity.

C4.2.5.3.3. NSN requirements needing additional identifying information; for example, requisitions initially rejected with Status Code CG or CJ.

C4.2.5.3.4. Requisitions for LEVEL 1/SUBSAFE and nuclear reactor plant materiel.

C4.2.5.3.5. NSN items for chemicals for boiler water and feed water analysis.

C4.2.5.3.6. Requisitions used to establish a registered user with the ICP in a Primary Inventory Control Activity (PICA)/Secondary Inventory Control Activity (SICA) situation.

C4.2.5.3.7. Requisitions for Marine Corps Pre-Positioned War Reserve (PWR) or Pre-Positioning Ships Program.

C4.2.5.3.8. DoD EMALL-generated requisitions using IMPAC card as the method of payment.

C4.2.6. Special Program Requirements. Requisitions resulting from special program requirements (SPRs) must cite the associated SPR transaction number to establish an audit trail between the draw-down requisition and the SPR against which the requirement was established.

C4.2.7. Nonstandard Materiel. The requisitioner may cite an estimated unit price to advise the source of supply of a reasonable expectation of the cost of the item. The source of supply may contact the requisitioner, if in its estimation, the price incongruity between estimated price and quoted price warrant further clarification relative to the item being ordered. Requisitioners should use the last price paid as their estimate if they have previously ordered the item or use the price of a similar item ordered if they have not previously ordered the item.

C4.2.8. Government Furnished Materiel Requisitions

C4.2.8.1. General

C4.2.8.1.1. Purpose. This section prescribes policies and procedures for requisitioning GFM by or for contractors from the DoD Supply System. These procedures establish guidelines for requisitioners, authorized contractors, and the DoD Components to obtain GFM from DoD inventories in support of contract requirements. These procedures also support the use of DLMS requisitioning by authorized contractors to obtain materiel from Government sources of supply to be used as **contractor furnished materiel (CFM)** under controls established by the authorizing Component and as specified in this chapter. In those instances where one Component is performing the procurement/contract writing for another Component that includes the authorization for a contractor to order or receive GFP (or Army CFM), the Component providing the procurement/contracting service and the Component requesting the contract shall coordinate efforts to ensure that the requesting Component's management control activity (MCA) has access to the necessary contract and applicable contract modification information to perform its management control and accountability functions over Government supply system materiel access.

C4.2.8.1.2. Establishing an MCA. The DoD Components shall assign a **unique RIC and distribution code** to each MCA. Requisitioners, authorized contractors, and the DoD Components shall send all requisitions for GFM to the appropriate MCA for validation.

C4.2.8.1.3. Violations. Any attempt to circumvent GFM/CFM validation requirements is sufficient cause to refer the violation to the appropriate criminal investigating activity to determine possible fraud, waste, and abuse. The sponsoring Component or monitoring activity must refer all violations to the criminal investigators based on reports of rejected transactions or violations discovered during the post-validation process.

C4.2.8.1.4. Applicability. These procedures apply to all contractors and all DoD Components requisitioning GFM or CFM from DoD sources of supply. The production of ammunition is excluded from GFM control.

C4.2.8.2. Preparation of Requisitions and Related Transactions For Government Furnished Materiel to Contractors

C4.2.8.2.1. Initiation. Requisitions for GFM may be initiated by the responsible DoD Component or, subject to the terms of the contract, by contractors. Requisitions for GFM shall be prepared and initially submitted by GFM requisitioners, both contractors and DoD Components, using **legacy MILSTRIP or DLMS transaction formats** to the MCA designated for monitoring the contract. Transmission through DAAS shall be used to the extent practical.

C4.2.8.2.2. Source of Supply Processing. Sources of supply shall process requisitions and associated transactions containing the DoD **Service/Agency** codes designated for contractors under GFM controls and restrictions except when the issue will be for CFM with contractor reimbursement by other than an Army contractor. All Army contractor requisitions and associated transactions shall be processed under GFM/CFM controls.

C4.2.8.2.3. Required Information. All GFM requisitions, **including referral and passing orders**, must include GFM-related information as follows:

C4.2.8.2.3.1. MCA monitoring the contract **shall be identified as the RIC-To**.

C4.2.8.2.3.2. DoDAAC of the contractor requesting and/or receiving the materiel.

C4.2.8.2.3.3. Indication when issue is without reimbursement **(including applicable signal code)**.

C4.2.8.2.3.4. Identification of the contract number.

C4.2.8.2.3.5. Identification of the call or order number, when applicable.

C4.2.8.2.3.6. Identification of the contract line item number, when applicable.⁷

C4.2.8.2.4. Contract Information. All GFM requisitions for or by contractors must identify **the contract number and other** appropriate contract data, **as required. Components authorizing GFM may direct the inclusion of the**

⁷ Refer to ADC 1014. Staggered implementation is authorized for the transition to the full DFARS compliant contract number (rather than the abbreviated contract number authorized under legacy MILSTRIP procedures).

manufacturing directive number (MDN) as supplemental to the authorizing contract number.⁸

C4.2.8.3. Submissions of Government Furnished Materiel Requisitions

C4.2.8.3.1. Requisitioners, control offices, and monitoring activities must submit all requisitions and associated transactions for GFM, regardless of origin (such as contractor or DoD Component-initiated), to the appropriate DoD Component MCA.

C4.2.8.3.2. After validating the GFM requisitions, the DoD Component MCA shall forward the validated requisitions to the source of supply. The DoD Component MCA may pass validated transactions internally where the MCA and source of supply are collocated. The DoD Component MCA shall send the validated transactions via DAAS when the MCA and source of supply are not collocated.

C4.2.8.3.3. **Modifier Transactions. Modifier transactions are authorized for GFM requisitions to modify information such as the project code, priority designator (PD), advice code, and the required delivery date (RDD). Modifiers may not be used to change the ship-to/bill-to information. Modifiers are subject to GFM controls and validation procedures.**

C4.2.8.4. Management Control Activity Processing of Government Furnished Materiel Requisitions and Related Transactions

C4.2.8.4.1. Management Control Activity Actions. The MCA shall receive and validate the data in the GFM requisitions, **referral orders, and passing orders, as well as subsequent modifiers and follow-ups**, based on the criteria furnished by the procurement and/or contracting offices **and as described in Table C4.T2**. The MCA shall make changes, reject, or continue the processing action.

C4.2.8.4.2. The MCA shall maintain a requisition history file to serve as an auditable record of each GFM transaction. In addition, the MCA shall generate reports required by DoD 4140.1-R.

C4.2.8.4.3. Under emergency conditions, such as a potential contract work stoppage, the MCA may receive telephonic requisitions, with PDs 01-08, for GFM. When this occurs, the MCA may telephone the requisitions to the appropriate source of supply and validate the requirements afterward. If the post validation process reveals the requisitioner is not authorized GFM, the MCA shall:

C4.2.8.4.3.1. Send cancellation requests to the appropriate source of supply, and

C4.2.8.4.3.2. advise the appropriate criminal investigating agency for determination of fraud, waste, and abuse.

⁸ Refer to ADC 1014. Staggered implementation is authorized for the transition to the mandatory inclusion of the contract number (rather than MDN as an alternative to the contract number).

C4.2.8.4.4. Upon completion of the validation process, the MCA shall identify itself as the FROM organization in the transaction and forward the **requisition** transactions, or internal transactions (optional only when the MCA and source of supply are collocated in the same distribution system), **cancellations, follow-ups, modifiers, passing orders, or referral orders** to the applicable source of supply via DAAS.

C4.2.8.4.4.1. Update the outgoing transaction to insert the RIC-To of the source of supply.

C4.2.8.4.4.2. Insert the distribution code of the MCA validating the transaction.

C4.2.8.4.4.3. Perpetuate all applicable contract data. Under DLMS, the MCA must include the DFARS contract number. Where required by the Component, the MCA may also perpetuate the MDN consisting of the MCA's distribution code and two other alpha/numeric characters as assigned.⁹

C4.2.8.5. Management Control Activity Processing of Government Furnished Materiel Validation Requests. MCAs in receipt of a GFM validation request (DLMS 517G, GFM Validation **Request**) shall validate the data **contained therein. This validation process must be completed and a DLMS 517G GFM Validation Response transaction created and forwarded to the applicable source of supply within 15 days or receipt of the GFM validation request transaction.** A GFM validation response (DLMS 517G) **shall be transmitted** to the applicable source of supply as follows:

C4.2.8.5.1. If the requisition has been previously validated, cite Advice Code 2M.

C4.2.8.5.2. If the requisition has not been previously validated and the call order number/procurement instrument identification number (PIIN) (or MDN, **if required by the Component in addition to the call order number/PIIN**) is not present, cite Advice Code 2U.

C4.2.8.5.3. If the requisition has not been previously validated and the call order number/PIIN is present, validate the stock number, unit of issue/quantity, and contractor, and generate the GFM Validation response as follows:

C4.2.8.5.3.1. If the validation process reveals that the contract is not valid, respond with Advice Code 2U.

⁹ Refer to ADC 1014. *Staggered implementation is authorized for the transition to the full DFARS compliant contract number (rather than the abbreviated contract number authorized under legacy MILSTRIP procedures) and for the transition to the mandatory inclusion of the contract number (rather than MDN as an alternative to the contract number).*

C4.2.8.5.3.2. If the validation process reveals that the requested quantity exceeds the contract authorized quantity, respond with Advice Code 2R and indicate the quantity approved for issue.

C4.2.8.5.3.3. If the validation process reveals that the requested quantity exceeds the contract authorized quantity, respond with Advice Code 2Q and indicate the total quantity is disapproved for issue.

C4.2.8.5.3.4. If the validation process reveals that the requested item, or contractor is not authorized GFM under a valid contract, respond with Advice Code 2V.

C4.2.8.5.3.5. If the validation process reveals that the requested item is authorized, respond with Advice Code 2M.

C4.2.8.5.4. MCAs in receipt of **supply status** (DLMS 870S transactions) with Status Code BF shall review for establishment of a valid requisition. If **a valid** requisition exists, a DLMS 869F transaction will be generated. If a valid requisition does not exist, a report will generated for internal review. Subsequent receipt of a valid requisition shall be processed under the procedures/validation process indicated in Table **C4.T2**.

Table C4.T2. MCA Validation Process for GFM Transactions

CODE OR DATA ELEMENT	VALIDATION OF ENTRY
Transaction Type	<i>If DLMS 511R, Requisition, Referral, or Passing Order (DICs A01, A02, A04, A05, A0A, A0B, A0D, A0E, A3_, A4_) DLMS 511M, Requisition Modification (DIC AM_) (for modification to RDD, project code, PD, or advice code), DLMS 869F, Requisition Follow-up (DIC AT_), continue the GFM validation.</i>
Stock Number	<i>Verify item requisitioned against a valid contract to determine authority for issue to the contractor. If blank, incorrect, or not authorized, reject with Status Code DN.</i>
Unit of Issue	<i>Validate the unit of issue in conjunction with the quantity to ensure that the requisitioned quantity does not exceed the authorized quantity. If quantity is excessive, see validation of quantity field. (Note: If a change of unit pack has occurred, appropriate adjustment should be made for authorized quantity.)</i>

Table C4.T2. MCA Validation Process for GFM Transactions

CODE OR DATA ELEMENT	VALIDATION OF ENTRY
Quantity	<i>If ordered item is authorized by contract, verify the quantity. If blank or invalid, reject with Status Code CD. If the requisitioned quantity exceeds the remaining authorized quantity, reject the quantity exceeding the authorized quantity with Status Code DJ. If authorized quantity has been exhausted by previous requisition(s), reject total requisitioned quantity with Status Code DQ.</i>
Requisitioner	<i>If blank or incorrect, discard. If not authorized, reject with Status Code DN.</i>
Document Number	<i>If blank or incorrect, reject with Status Code CD.</i>
Supplementary Address	<i>If contractor DoDAAC, and affected by signal code, and incorrect or not authorized, reject with Status Code DN.</i>
Signal and Fund	<i>If signal and fund codes indicate issues without contractor reimbursement, process as GFM; otherwise, consider as CFM. CFM requisitions, except for Army, are not subject to MCA review. All Army contractor requisitions and associated transactions shall be processed under GFM controls. DAAS shall respond to requests for MCA review for Army CFM under special processing rules authorized by the Army.</i>
Manufacturer's Directive Number	<i>If the MDN option is required by the Component and the MDN equates to a valid contract number, validate; otherwise, reject with Status Code DB.</i>
Contract Call Order Number	<i>If specified by S/A contract, and entry is blank or incorrect, reject with Status Code DB.</i>
Procurement Instrument Identification Number	<i>If blank, or contract is not on MCA file, or contract has expired, reject with Status Code DB. (If requisition originated in the legacy MILSTRIP format, then only the last eight positions of the PIIN are mandatory.)</i>

C4.2.8.6. Source of Supply Processing of Government Furnished Materiel Requisitions and Related Transactions

C4.2.8.6.1. Sources of supply receiving GFM requisitions, modifiers, **follow-ups**, and cancellations, regardless of the method of transmission, shall process such transactions under these procedures. Sources of supply receiving GFM requisitions for items not managed by their activity shall reject the requisitions with Status Code CH. Sources of supply shall edit the GFM transactions for the prescribed data elements and codes and correct, continue the processing actions, or provide the appropriate reject status.

C4.2.8.6.2. Sources of supply shall validate all GFM transactions.

Sources of supply in receipt of requisitions, passing orders, referral orders, modifiers, or follow-ups being treated as requisitions, containing a contractor's **Service/Agency** code shall perform the source of supply/MCA validation process except when the signal and fund codes indicate the issue will be with contractor reimbursement by other than an Army contractor. All Army contractor requisitions and associated transactions shall be processed under GFM/CFM controls. The source of supply/MCA validation process is not required when an internal requisition transaction is received from a collocated MCA in the same distribution system. However, sources of supply must have safeguards in place to ensure that only internal transactions generated by the collocated MCA are accepted/processed.

C4.2.8.6.3. Under emergency conditions, sources of supply may receive telephonic (PD 01-08) requisitions from the MCA or requisitioner. The source of supply may process these requisitions for immediate supply action. Subsequent to taking immediate supply action, the GFM validation process shall be performed. If **the GFM validation response is not received within 15 days of the request** or the **advice code indicates that the transaction** is not authorized GFM, refer the incident to the appropriate criminal investigating agency.

C4.2.8.7. Source of Supply Government Furnished Materiel Validation Process. For each GFM requisition or transaction that is treated as a requisition, the source of supply shall employ one of the following options:

C4.2.8.7.1. Create and forward a DLMS 517G GFM Validation Request to the MCA **or distribution code** identified in the requisitioner's transaction. If the MCA **and distribution code are** invalid or missing, reject with Status Code CL.

C4.2.8.7.2. Create and forward a GFM validation request to DLA Transaction Services even if an MCA is contained in the requisitioner's transaction. DLA Transaction Services shall perform edits regarding the validity of the MCA data.

C4.2.8.7.3. Use a combination of the above options: one for intra-Component transactions and one for inter-Component transactions.

C4.2.8.7.4. Suspend further supply support action on the requisitioner's transaction pending receipt of the GFM validation response **or until 15 days have elapsed from the date** of the GFM validation request, whichever occurs first.

C4.2.8.7.5. If the GFM validation response is not received **and 15 days have elapsed from** the GFM validation request, reject the requisitioner's transaction with Status Code DR.

C4.2.8.7.6. Upon receipt of the GFM validation response, the source of supply shall process the suspended transaction using instructions provided by the advice/status code.

C4.2.8.7.6.1. If Advice Code 2U, reject with Status Code DB.

C4.2.8.7.6.2. If Advice Code 2R, process for the approved quantity indicated in the GFM validation response. Reject the quantity difference between the suspended transaction and the GFM validation response with Status Code DJ.

C4.2.8.7.6.3. If Advice Code 2Q, reject with Status Code DQ.

C4.2.8.7.6.4. If Status Code CL, reject with Status Code CL.

C4.2.8.7.6.5. If Advice Code 2V, reject with Status Code DN.

C4.2.8.7.6.6. If Advice Code 2M, process under applicable source of supply procedures.

C4.2.8.7.6.7. If the advice/status code is invalid or an advice/status code is not indicated, reject with Status Code DR.

C4.2.8.7.7. If a GFM validation response is received and there is a record of the requisition, but a GFM validation request has not been submitted, discard the GFM validation response and generate a GFM validation request.

C4.2.8.7.8. If a GFM validation response is received and there is no record of the requisition, provide Status Code BF.

C4.2.8.8. DAAS Processing Of GFM Transactions. DAAS shall pass the following:

C4.2.8.8.1. All GFM transactions to the identified MCA. If the MCA is not a valid MCA, reject with Status Code CL.

C4.2.8.8.2. All GFM validation requests to the identified MCA. If the MCA is invalid, generate a GFM validation response with Status Code CL to the source of supply.

C4.2.8.8.3. All GFM validation responses to the identified source of supply.

C4.2.8.9. Exception Processing for Government Furnished Materiel for Packaged Fuel Additives Managed by DLA. DLA Transaction Services shall perform the DLMS 517G validation on behalf of the DLA Energy for selected requisitioning/bill-to activities and stock numbers in accordance with the following procedures:

C4.2.8.9.1. DLA Transaction Services shall maintain a DLA Energy GFM table that will identify DLA Energy-established U-series contractor DoDAACs authorized to requisition specified additive NSNs. The authorized DLA Energy POC shall provide to DLA Transaction Services the U-series DoDAAC/NSN combinations for the DLA Energy GFM table.

C4.2.8.9.2. DLA Energy sponsored orders for GFM shall specify DoDAAC SJ0630 (Americas East), SJ0606 (Americas West), SJ0629 (Middle East), SJ0601 (Europe), SJ0600 (Pacific), and SC0600 (DLA Energy for UC series DoDAAC contingency locations) as the requisitioner/bill-to activity. They will contain a U-series DoDAAC designated as the ship-to activity, and contain **the applicable contract number and** the DLA Energy assigned MDN.

C4.2.8.9.3. DLA Transaction Services shall route requisitions and requisition related transactions (DLMS 511R/511M/869F) to the source of supply for the NSN ordered, and the source of supply will generate the required DLMS 517G, GFM Validation Request to DLA Transaction Services.

C4.2.8.9.4. DLA Transaction Services shall capture any DLMS 517G transactions containing DoDAAC SJ0630, SJ0606, SJ0629, SJ0601, SJ0600, or SC0600 (for UC locations) as the requisitioner/bill-to and a U-series DoDAAC as the ship-to and match it against the DLA Energy GFM table. If a table match is made by U-series DoDAAC and the NSN, then DLA Transaction Services shall respond to the source of supply with a DLMS 517G MCA GFM Validation Response, with Advice Code 2M, indicating the order is authorized for processing. If no match, DLA Transaction Services shall respond with DLMS 517G with Advice Code 2V, indicating the order is not authorized for processing.

C4.2.8.9.5. The source of supply shall process the DLMS 517G Validation Response and either honor the order or reject the suspended transaction using Status Code DN, based on the advice code provided by DLA Transaction Services.

C4.2.8.10. DAAS Special Processing for Army¹⁰. Pending full implementation of MCA procedures in Army systems, DLA Transaction Services shall assist the Army by performing the GFM MCA transaction validation requirement for the Army wholesale MCAs and recording all transactions into a history file for eventual processing to the appropriate MCA using the following procedures:

C4.2.8.10.1. Process all DLMS 511R (DIC A0_) Army contractor identified requisitions with the below listed first two positions of the DoDAAC to the applicable Army MCA. Contractor requisitions with other than the DoDAAC entries indicated are considered Army retail and will be routed to the proper source of supply with the DAAS RIC SGA or SHA identified as the MCA.

C4.2.8.10.1.1. If the first two positions of the document number or supplementary address is CB, pass to RIC A81 (TACOM MCA)

C4.2.8.10.1.2. If the first two positions of the document number or supplementary address is CL, pass to RIC A82 (AMCOM MCA).

¹⁰ Procedures to control access to DoD material inventories by defense contractors last reported as not implemented by USA (Retail). Refer to AMCL 1A.

C4.2.8.10.1.3. If the first two positions of the document number or supplementary address is CG, pass to RIC A83 (CECOM MCA).

C4.2.8.10.1.4. If the first two positions of the document number or supplementary address is CM, pass to RIC A84 (TACOM MCA)

C4.2.8.10.1.5. If the first two positions of the document number or supplementary address is CK, pass to RIC A85 (TACOM MCA).

C4.2.8.10.1.6. If the first two positions of the document number or supplementary address is CH, pass to RIC A86 (AMCOM MCA)

C4.2.8.10.2. For requisition modifications (DLMS 511M/DIC AM_) and requisition follow-ups (DLMS 869F/DIC AT_) transactions, containing a valid MCA distribution code as identified below, the DAAS RIC SGA or SHA will be entered into MCA field and routed to the appropriate source of supply. If a valid MCA is not identified and the transaction contains the entries cited above in the first two positions of the document number or supplementary address, the transaction will be passed to the appropriate MCA. If none of these conditions apply, the transaction will be considered retail and be routed to the appropriate source of supply with the DAAS RIC SGA or SHA entered into MCA RIC field. The following are valid MCA distribution codes:

C4.2.8.10.2.1. I (India) - TACOM MCA

C4.2.8.10.2.2. L (Lima) - AMCOM MCA

C4.2.8.10.2.3. P (Papa) - CECOM MCA

C4.2.8.10.2.4. S (Sierra) - TACOM MCA

C4.2.8.10.2.5. Y (Yankee) - TACOM MCA

C4.2.8.10.2.6. E (Echo) - AMCOM MCA

C4.2.8.10.2.7. 8 (Eight) - USACEA MCA

C4.2.8.10.3. Upon receipt of GFM validation transactions, a GFM validation response transaction shall be generated with Status Code 2M and returned to the RIC of the source of supply submitting the GFM validation request transaction.

C4.2.8.11. Contractor Requisitions for Contractor Furnished Materiel

C4.2.8.11.1. Requisitions for materiel from Government sources of supply for shipment to contractors that identify the contractor as the bill-to activity are not subject to GFM MCA controls with the exception of Army contractor requisitions to which MCA controls are applicable. DAAS shall validate transactions for Army

contractor requisitions of CFM for those items that contractors are authorized to requisition as CFM as specified in this chapter and for non-wholesale level supply as designed by the contractor-series DoDAAC. DoD Components shall establish appropriate procedures for oversight of CFM requisitions in accordance with the Federal Acquisition Regulation.

C4.2.8.11.2. DAAS Processing of CFM Transactions. The process described in this subparagraph provides mandatory CFM controls for CFM requisitions where the bill-to-activity, as identified in the requisition, is an Army contractor and the source of supply is DLA. This process is optional for other DoD Components and may be expanded to include other sources of supply, if needed. DAAS shall maintain a list of DoD Component-authorized contractor DoDAACs and the associated NSNs/DoD-managed part numbers for which these contractors may submit CFM requisitions on a CFM Authorized Materiel Table for use in validating requisitions regardless of method of payment. CFM contractor transactions that match the CFM Authorized Materiel Table by DoDAAC, but do not match by NSN or part number, shall be rejected with Status Code CL; requisitions that match on DoDAAC and NSN/part number shall be processed as valid. DAAS shall enter the DAAS RIC SGA or SHA as the validating MCA. DAAS shall perform DLMS 517G validation requirement for authorized CFM requisitions that match to the CFM Authorized Materiel Table. DAAS will furnish CFM reports upon request for use by the contracting officer in verifying that quantities ordered are within the contract allowance. Army contractor requisitions that do not match the CFM Authorized Materiel Table shall be processed by DAAS under the MCA waiver exception process or passed to the applicable MCA. **For DLA CFM, processing will be as identified in C4.2.8.11.3.** CFM requisitions for other Service contractors shall be passed to the source of supply. NSNs listed in the table may be modified over the course of this agreement when appropriate Army contracting officer provides such authority. Updates to the authorized list shall be collected, consolidated into one Excel file by the designated DLA Lead Center POC with proof of Army Contracting Officer (CO) concurrence and provided to Headquarters DLA Army Performance Based Logistics (PBL) action officer. DLA shall coordinate updates to individual contractor lists with DLA DoD EMALL and DLA Transaction Services on a monthly basis. To optimize program changes, all additions to Army partnership lists shall be made during an agreed-to monthly timeframe between DLA and support entities.

C4.2.8.11.3. **DLA Transaction Services Processing of DLA CFM Transactions**

C4.2.8.11.3.1. DLA Transaction Services shall maintain a DLA CFM Authorized DoDAAC Table listing DLA contractor DoDAACs authorized to requisition CFM. DLA Transaction Services shall populate or delete DoDAACs to/from the table as directed by DLA. Requisitions identifying a DLA-assigned U-series contractor DoDAAC as the bill-to activity shall be edited against this table. DLA Transaction Services is required to edit all incoming DLMS 511R/511M/869F, (legacy 80 record position A0_, A3_, A4_, AM_ and AT_ equivalent), transactions containing a U-series DoDAAC when identified as the bill-to activity against the DLA CFM Authorized DoDAAC Table. If matched to the table, then DAAS shall

route/pass the transaction based on established DAAS rules to the appropriate source of supply for further processing. If the U-series bill-to DoDAAC does not match the table, then DAAS shall reject the transaction using Status Code DB.

C4.2.8.11.3.2. DLA Transaction Services shall capture any DLMS 517G (DIC AX1) transactions containing a DLA U-series DoDAAC identified as the bill-to DoDAAC and match it against the DLA CFM Authorized DoDAAC Table. If the U-series bill-to-DoDAAC matches the table, then DAAS shall respond with a DLMS 517G (DIC AX2) transaction with Advice Code 2M indicating the requisition is authorized. If the U-series bill-to-DoDAAC does not match the table, then DAAS shall respond with a DLMS 517G (DIC AX2) transaction with Advice Code 2U indicating the requisition is not authorized.

C4.2.8.12. Preparation of DoD EMALL Requisitions by Contractors.

Authorized contractors may establish DoD EMALL accounts to facilitate materiel requisition submissions. To register, go to <https://dod-email.dla.mil> and click on New User Registration. Access to DoD EMALL is now fully Common Access Card (CAC)/Public Key Infrastructure (PKI) enforced. Details of the access requirements are listed on the registration pages of the EMALL site. Prior to establishing the account, the applicable contracting officer must ensure that the contractor is authorized access to Government supply sources and must agree to review monthly or quarterly reports prepared by the DoD EMALL monitoring contractor activity. The applicable contracting officer must also provide a list of approved NSN/part numbers associated with each account/contractor DoDAAC for Army authorized CFM. Army contractors will be processed under GFM/CFM controls as described.

C4.2.8.12.1. DoD EMALL shall validate that contractors are authorized to purchase materiel from DoD supply sources as a prerequisite for submission of EMALL orders. DoD EMALL requisitions for GFM will be subjected to prescribed rules for MCA controls within DoD EMALL or within the DAAS. DoD EMALL CFM requisitions indicating corporate credit card method of payment are subject to special processing controls as described below. Additionally, CFM requisitions for Army authorized contractors shall be validated to ensure that requisitioned NSNs or DoD managed part numbers are authorized regardless of the method of payment under CFM controls described above.

C4.2.8.12.2. The DoD EMALL program office shall identify to DLA Transaction Services all contractors authorized access to Government materiel for purchase as CFM using a corporate credit card as the method of payment. DAAS shall maintain these DoDAACs as an authorized contractor edit table (referenced hereafter as the DoD EMALL CFM Table) to be employed during initial processing and for DLMS 517G processing.

C4.2.8.12.3. DoD EMALL requisitions for shipment to contractors using corporate credit card payment are assigned Signal Code B, Fund Code XP, and the supplemental address of the DoD EMALL DoDAAC (SP5200). This configuration identifies a Government DoDAAC as the bill-to activity, thereby triggering DAAS and the

DoD Component source of supply processing systems to misinterpret such transactions as GFM requisitions. DAAS shall validate these transactions against existing GFM edits and the DoD EMALL CFM Table to determine appropriate action. If the contractor requisition does not contain a valid MCA identification code and the DoDAAC is not listed in the DoD EMALL CFM Table, DAAS shall reject with Status Code CL. If an MCA is identified by either a distribution code or a RIC, DAAS shall forward the requisition to the source of supply. The source of supply shall submit a DLMS 517G to DAAS for validation following GFM MCA procedures (including Army CFM). DAAS will recognize the EMALL supplemental address and again employ existing GFM edits and the DoD EMALL CFM Table to take appropriate action. If the validation using the DoD EMALL CFM Table identifies the contractor DoDAAC as authorized by the contracting officer for ordering CFM using corporate credit cards, then DLA Transaction Services shall validate the requisition and respond to the source of supply with a DLMS 517G Validation Response using Advice Code 2M indicating the requisition is valid. The source of supply shall continue processing. If the contractor DoDAAC is not contained on the DoD EMALL CFM Table, but the requisition contains a valid MCA code, then DLA Transaction Services shall forward the DLMS 517G Validation Request to the MCA for validation. If the contractor DoDAAC is not contained on the DoD EMALL CFM Table, or does not match the CFM Authorized Materiel Table, when applicable, and the requisition does not contain a valid MCA code, then DAAS shall provide a DLMS 517G Validation Response with Status Code CL indicating the transaction is invalid. The source of supply shall reject the requisition. ***For DLA contractor credit card purchases (identified by a DLA-assigned U-series DoDAAC in the document number), DAAS processing rules shall be as described in this paragraph, except that the requisition shall be validated based upon the requisitioner DoDAAC matching to the DLA CFM Authorized DoDAAC Table.***

C4.2.8.12.4. To support DoD requirements for oversight of materiel sold to contractors, the DoD EMALL program office shall provide reports to monitor contractor activity. For contracts having a maximum total dollars ceiling, a DoD EMALL report shall be provided to the contracting officer when the cumulative value of CFM ordered reaches 80 percent of the ceiling.

C4.2.8.13 Inventory Control Point/Integrated Materiel Management-Directed Shipment of Non-Requisitioned Government Furnished Materiel Based on a Bill of Materiel. ICP/IMM-directed shipments of GFM may be managed through the use of a Bill of Materiel (BOM) as identified under the terms of the DoD contract. In this context, the BOM identifies the raw materials/component parts needed to assemble/manufacture/repair the end item or final product. Based on the unit of allowance, the number/amount of GFM component materiel needed to accommodate the total number of end items to be manufactured/assembled/repared on a specific contract/purchase order, may be calculated and provided. This procedure eliminates the need for separate GFM requisitions for the component materiel and subsequent MILSTRIP MCA validation. Instead, this process allows the ICP/IMM to push the materiel to the contractor as required by schedule and/or usage.

C4.2.8.13.1. Upon contract award for production of an end item or final product, the BOM becomes the basis for determining the quantity of GFM required by the contractor. These deliveries shall only include stocked raw materiel/component parts that the Government provides at no separate charge to the contractor for assembly/manufacture of the end item/final product. Under this process, the ICP/IMM shall use internal control procedures to monitor consumption of raw materiel/component parts against the receipt of items awarded by contract.

C4.2.8.13.2. The ICP/IMM shall prepare materiel release orders for stock shipment using document numbers based upon a DLA established DoDAAC. The ship-to location cited in the release order shall identify the contractor DoDAAC authorized to receive GFM. **The MRO shall include the authorizing contract number, and the call/order and CLIN, when applicable.** The storage activity shall provide shipment confirmation to the ICP/IMM for monitoring GFM shipments and shall prepare shipment status **perpetuating applicable contract data.** For contractors without capability to accept legacy 80 record position/DLMS transactions, status of the GFM component delivery shall be provided upon request by the contractor. The assembled/manufactured end items may be shipped directly to customers or shipped to a storage location for future use.

C4.2.8.13.3. Use of the above business process does not relieve the ICP/IMM from a management reporting requirements required by DoD 4140.1-R, DoD Supply Chain Materiel Management Regulation. Material Receipt Acknowledgement is required for GFM, including pushed shipments, under MILSTRAP procedures.

C4.2.8.13.4. This process is discretionary and may not be applicable to all commodities and contracts requiring GFM. This process may only be used to support GFM requirements satisfied by the DoD Component issuing the contract (that is, by design, it does not support inter-Component materiel support).

C4.2.9. Security Assistance Requisitions

C4.2.9.1. General

C4.2.9.1.1. Requisitions. SA countries and SA organizations shall prepare and send requisitions to the applicable U.S. Service International Logistics Control Office (ILCO). The ILCO shall send the SA requisitions to the appropriate source of supply for processing.

C4.2.9.1.2. Requisition Status Determination. ILCOs must identify the programmed or nonprogrammed status of a requisition to the source of supply by using the appropriate cooperative logistics program support code (CLPSC). The source of supply shall process SA requisitions without a CLPSC as unprogrammed requirements.

C4.2.9.1.3. Restrictions. Certain SA requisitions are subject to a restriction in quantity when it is determined that the total requirement for an item will result in more than 25 shipment units. This constraint is employed to preclude the assignment of nonconforming transportation control numbers (TCN) that occur when the

number of shipment units exceeds 25 and that causes a loss of identity to the shipment. The DoD Component shall specify the items of equipment to which the quantity restriction applies. Generally, these items are equipment such as wheeled/tracked vehicles or other items when a unit of issue of one each constitutes a single shipment unit.

C4.2.9.2. Requisition Identification Code. All SA requisitions shall contain a unique six-position identification code consisting of a combination of codes that identifies the requisitioning country or international organization and that provides specific requisitioning and shipping instructions for the source of supply and shipping activities. This identification code is the first six positions of the document number. [DLM 4000.25 Volume 6, Chapter 3](#), Military Assistance Program Address Directory (MAPAD); [DoD 5105.38-M](#), Security Assistance Management Manual (SAMM); and [DoD 7000.14-R](#), DoD Financial Management Regulation, in combination, provide the interpretation of these codes. See paragraph C4.2.1. above, for specifics on the actual code construction.

C4.2.9.3. Required Availability Dates

C4.2.9.3.1. Identification. Always identify the effective required availability dates (RAD) in SA requisitions for major weapons systems, end items, and concurrent spares. In FMS cases, compute the RAD by adding the lead time stated on the U.S. Letter of Offer and Acceptance (LOA) to the date of acceptance by the purchaser. For Grant Aid, compute the RAD by adding the ICP determined lead time to the date of the Grant Aid order.

C4.2.9.3.2. RAD Identification. The DoD Components shall identify the RAD in requisitions for major items and associated support equipment and the initial issue parts for Grant Aid, as soon as practicable, but not later than 120 calendar days after receiving an approved funded order. Materiel not immediately available should be acquired and shipped by the last day of the month. However, depending on availability, materiel may be acquired and shipped after the RAD expires unless cancellations are submitted. Appropriate status will be provided to the address(es) designated in the requisition.

C4.2.9.3.2.1. RAD time begins with the date of the requisition (i.e., the date contained in the requisition document number) and does not have the effect of holding release of the materiel. The actual date for calculation of the RAD will be the last day of the month depicted. Shipment of materiel will be made at the time of initial requisition processing to the extent that releasable assets are available regardless of the number of lead time months shown.

C4.2.9.3.2.2. RAD Modification. Requisitioners shall modify RADs when contract-forecasted delivery dates indicate a change in the availability of the items. Requisitioners shall use Status Code BB, BV, or B3 to show the true RAD. The ILCO/requisitioner shall adjust all records to cite the new RAD information. When unable to meet the established RAD, the source of supply must use Status Code B3 to

notify the ILCO of the RAD slippage. An extended RDD in an FMS requisition will indicate the number of months from the date of the requisition before which delivery is required. The release date is defined as 5 days prior to the last day of the month. Releasable assets will be held until 50 days prior to the last day of the month indicated.

C4.2.9.3.2.3. In the case of DLA support, the extended RDDs will cause intentional holding of support. For those orders, the support date is calculated externally by DLA Transaction Services upon receipt of the transaction and fed to the Enterprise Business System (EBS). DLA Transaction Services sends EBS (RIC SMS) the actual Standard Delivery Date, which in the case of extended (S-coded) RDDs will cause the order to go into BP status and be held until 50 days prior to the release date.

C4.2.9.4. DAAS Processing of Security Assistance Requisitions

C4.2.9.4.1. DAAS shall reject requisitions, referral orders, passing orders, DLMS 869F, Requisition Follow-up, and DLMS 511M, Requisition Modification containing MAPACs that do not have valid ship-to and mail-to addresses in the MAPAD, to the ILCO using DLMS 870S, Supply Status, with Status Code DP.

C4.2.9.4.2. ICPs may reject requisitions received off-line (mail, message, courier, fax, telephone) that contain Military Assistance Program Address Codes (MAPAC) that do not have valid ship-to and mail-to addresses in the MAPAD to the submitting ILCO. This includes remarks/exception type DLMS 511R, Requisition, transactions directing materiel to various shipping points. DLMS 870S, Supply Status, with Status Code CX applies.

C4.2.10. Not-Mission-Capable Supply and Anticipated Not-Mission-Capable Supply Requisitions

C4.2.10.1. General

C4.2.10.1.1. Approval Authority. Commanders shall approve, or delegate in writing to specific personnel the authority to approve, all NMCS/ANMCS requisitions and submit the requisitions by the most expeditious means. Commanders of the DoD Component ILCOs shall approve, or delegate in writing to specific personnel the authority to approve, all FMS CLSSA requisitions applicable to NMCS or ANMCS conditions.

C4.2.10.1.2. Priority Requirements. Submit NMCS and ANMCS requisitions only for the quantities of materiel needed to return the mission-essential system or equipment to mission capable/operationally ready status or when items are not available in ready-for-issue condition at the supporting post, camp, station, or OCONUS theater. Use overnight or next day delivery service for NMCS and ANMCS shipments whenever possible.

C4.2.10.2. Not-Mission-Capable Supply Conditions Meeting Special Requirements Code 999

C4.2.10.2.1. Use. Use Special Requirements Code 999 in PD 01-03 requisitions for materiel that will cause an NMCS condition to occur in mission-essential systems and equipment. Special Requirements Code 999 identifies transactions related to critical items as requiring expedited handling. Any special requirements code used in the requisition must appear in the materiel release order (MRO) and the shipping documentation. This procedure applies only to NMCS materiel shipped to U.S. Forces OCONUS or to Forces alerted for deployment within 30 calendar days of the date of the NMCS requisition. Special Requirements Code 999 does not apply to SA.

C4.2.10.2.2. Purpose. Special Requirements Code 999 identifies the need for expedited handling of the NMCS materiel when meeting the specific conditions listed below. (The commanding officer of the requisitioning activity shall either personally review, or delegate in writing to specific personnel the authority to review, all requisitions identified for expedited handling to certify compliance with the prescribed criteria.)

C4.2.10.2.2.1. The requisitioning unit must possess F/AD I, II, or III, and,

C4.2.10.2.2.2. The items or equipment required are causing mission-essential systems or equipment to be incapable of performing any of their assigned missions (NMCS) or,

C4.2.10.2.2.3. The items or equipment required have been identified during maintenance or testing as necessary to prevent mission-essential systems or equipment from being unable to perform assigned operational missions or tasks within five calendar days of the date of the requisition.

C4.2.10.3. NMCS Conditions Meeting Special Requirements Other Than Special Requirements Code 999. Apply the following to requisitions for NMCS conditions other than Special Requirements Code 999 originating from activities where Forces in CONUS are not alerted for deployment:

C4.2.10.3.1. Use PDs 01-08 only.

C4.2.10.3.2. Cite Special Requirements Code N. Note: FMS requisitions applicable to NMCS conditions will cite Special Requirements Code N, which identifies transactions related to critical items and requiring expedited handling.

C4.2.10.3.3. Indicate short RDDs.

C4.2.10.3.4. Use the PD to process these requisitions.

C4.2.10.4. ANMCS Conditions. Prepare requisitions for materiel to prevent degradation of the mission capability of such systems/equipment as follows:

C4.2.10.4.1. Use PDs 01-08 only.

C4.2.10.4.2. Cite Special Requirements Code E. Note: FMS requisitions applicable to ANMCS conditions must cite Special Requirements Code E, which identifies transactions related to critical items and requiring expedited handling.

C4.2.10.4.3. Indicate short RDDs.

C4.2.10.4.4. Use the PD to process these requisitions.

C4.2.11. Pre-Positioned War Reserve Material Stock (PWRMS) Requisitions

C4.2.11.1. Initial Fill. Use Demand Code O and Project Code 3AA to identify requisitions for the initial fill of PWRMS consumable item requirements. Use Project Code 3PR in PWRMS replenishment requisitions. DoD organizations cannot submit non-reimbursable requisitions to GSA.

C4.2.11.2. Reimbursements. Use the appropriate treasury symbol number and fund purpose code in all reimbursable requisitions for PWRMS requirements. Only use PDs 11-15 in reimbursable requisitions for PWRMS requirements; however, if overriding or operational situations justify immediate supply support, use PDs 01-03.

C4.2.12. Conventional Ammunition Requisitions

C4.2.12.1. DoD Component owners of single manager for conventional ammunition (SMCA) managed items may grant authority to the SMCA ICP to issue assets below established stock reservation levels. The Component owner must convey this authority to the SMCA ICP by using Advice Code 2S in a DLMS 511R transaction.

C4.2.12.2. Use Advice Code 3Q, 3V, 3W, 3X, 3Y, or 3Z, as applicable, when usable SCC E materiel is acceptable.

C4.2.13. Special GSA Procedures on Non-Mailable Items

C4.2.13.1. Advice Code 2A Processing. GSA shall process requisitions received with Advice Code 2A (item not available locally) regardless of the possible excessive transportation costs.

C4.2.13.2. Low Item Value. GSA shall cancel requisitions (with Status Code CW) when received without Advice Code 2A for an item valued at \$25 or less if, at the time of shipment, transportation costs incurred for shipping that order is in excess of 50 percent of the item value. GSA shall notify the ordering activity when this condition exists and the requisitioner should attempt to procure the item locally. If local procurement cannot be effected, submit a new requisition with Advice Code 2A. In response, GSA shall supply the item regardless of the transportation costs.

C4.2.13.3. Non-Applicability. These procedures do not apply to SA requisitions.

C4.2.14. Special Procedures Associated with Industrial/Maintenance Site Requisitions

C4.2.14.1. Industrial/Maintenance Site Requisitions Subsequent to Receipt of Product Quality Deficient Materiel. Under approved procedures for Base Realignment and Closure (BRAC) Supply, Storage and Distribution (SS&D) Inventory Management and Stock Positioning (IMSP) industrial/maintenance sites, the requiring activity is authorized to submit requisitions or requisition alerts (Navy IMSP only) citing Management Code P to request the DLA source of supply satisfy the specified requirement for an alternative source. These replacement requisitions shall also include the original funded requisition document number/suffix for cross-reference. This is applicable when timely replacement is required subsequent to receipt of a quality deficient item for which a Product Quality Deficiency Report (PQDR) has been submitted. Use of Management Code P ensures materiel received is not subject to the same quality deficiency as previously supplied materiel and avoids delays while existing wholesale stock is screened for quality.

C4.2.14.2. Industrial/Maintenance Requisitions Subsequent to Receipt of Storage Activity Denial For Release of Materiel Purchased From DLA. Under approved procedures for BRAC Inventory Management and Stock Positioning (Navy IMSP only) industrial/maintenance sites, the requiring activity is authorized to requisition citing Management Code 3 or 9 to request the DLA source of supply satisfy the specified requirement from an alternative storage location or new procurement, if no stock is available. This is applicable only when re-requisitioning subsequent to purchase of materiel that was sourced from a collocated depot without visual inspection of the materiel. Use of the Management Code 3 will indicate that purchased materiel did not satisfy shelf-life requirements. Management Code 9 will indicate that the materiel was not available in one continuous length. The prior (original) requisition document number and shipment suffix code (if applicable due to split shipment), must be included on the new requisition. The originally purchased materiel will be returned to DLA via BRAC returns procedures.

C4.2.15. Timeframes and Submission of Requisitions

C4.2.15.1. Frequency. The frequency of submitting requisitions is the sole prerogative of the requisitioner and, except for subsistence items; the distribution systems shall not prescribe scheduling. Submit requisitions when necessary to meet requirements for stock or to meet specific requirements for immediate use. To make the system more efficient and cost-effective, activities should consider consolidating requirements to reduce the submission of low-value requisitions.

C4.2.15.2. Effective Time Period. The requisition submission time period extends from the date of the requisition to the date of receipt by the initial wholesale source of supply; for example, the ICP or stock point that maintains any asset availability records for the purpose of filling materiel demands or ordering other supply action.

C4.2.15.2.1. Requisition Date. The date of requisition shall indicate the actual date of transmittal from the requisitioner to the initial source of supply. Do not predate requisitions to facilitate local processing. The transaction set process shall reflect the true date of transmittal.

C4.2.15.2.2. Approval Time. Time consumed by review/approval of control offices that are intermediary between the requisitioner and the initial source of supply is counted in the time standard for this segment.

C4.2.16. Maintenance of Requisition History and Due-In Files

C4.2.16.1. Requirement. All DoD Components must maintain a requisition history and due-in file for each transaction processed.

C4.2.16.2. Expeditious Processing. Requisitioners must expeditiously process transaction status and materiel receipts to requisition and due-in files to preclude the unnecessary generation of follow-ups.

C4.2.17. Special Army Single Stock Fund (SSF) Procedures for Image, Working, and Post-Post Requisitions and Authorization of Edit Action Codes (EACs) for Both SSF and non-SSF Army Activities. The following procedures are restricted to use by the Army on an intra-Service basis.

C4.2.17.1. These procedures include Army-unique data elements required to accurately process transactions in the Army wholesale system that originate from the Army retail system for SSF activities. For both Army retail replenishment orders for authorized stock listed items and for dedicated customer orders for non-stock listed items, an image of the order containing a special EAC, management code, and date generated is created and passed to the wholesale system. For these replenishment and dedicated customer orders, the EAC indicates that the order is to be held until either post-post issue requisitions are received equaling the image requisition quantity or a live/working requisition is received for the total or residual quantity of the image requisition. Additionally, customer/consumer orders for authorized stock listed items that cannot be filled by the retail system are backordered at the retail level and an image of the consumer requisition containing an EAC, management code, and date generated is created and passed to the wholesale system. For these backordered consumer requisitions, the EAC indicates that the order is to be held until either post-post issue requisitions are received equaling the image requisition quantity, or a cancellation is received. Based on business rule parameters, these EAC codes facilitate the Army process, that searches for assets at multiple retail levels, prior to requiring a wholesale asset search to fill the retail and consumer level requisitions. The post-post issue requisition also contains an EAC, management code, and date generated. Additionally, the post-post requisition contains the SSF routing identifier code (RIC) of the activity issuing the assets and codes indicating the ownership, purpose and condition of these assets, as well as a suffix code, if it is only a partial issue of the image requisition quantity. The following are the types of requisitions included in this process:

C4.2.17.1.1. Image Request Order Number Requisition. An image of the customer's original requisition containing an EAC, management code and the date generated date is submitted by the SSF site to the Army wholesale source of supply. Upon receipt, the wholesale source of supply builds a document control file, creates a demand record, and freezes the requisition on backorder. The only action that can clear the frozen backorder is a post-post requisition or a cancellation request from the SSF site.

C4.2.17.1.2. Image Document Order Number Requisition. An image of the original replenishment requisition containing an EAC, management code, and the date generated is submitted by the SSF site to the Army wholesale source of supply. Upon receipt, the wholesale source of supply establishes a document control file with a requisition quantity control, creates a demand record, and takes no further action until receipt of a post-post or working requisition.

C4.2.17.1.3. Working Document Order Number Requisition. Upon receipt of a working document order number requisition by the wholesale source of supply, action will be taken to support the requisition quantity. The document number on both the working and image requisitions are the same; however, the working requisition does not contain an EAC or management code.

C4.2.17.1.4. Image Dedicated Requisition. An image of a dedicated requisition containing an EAC, management code, and the date generated is submitted by the SSF site to the Army wholesale source of supply. Upon receipt, the source of supply establishes a document control file with a requisition quantity control, creates a demand record, and takes no further action until receipt of a post-post or working requisition.

C4.2.17.1.5. Working Dedicated Requisition. Upon receipt of a working dedicated requisition by the wholesale source of supply, action will be taken to support the requisition quantity. The document number on both the working and image requisitions are the same; however, the working requisition does not contain an EAC or management code.

C4.2.17.1.6. SSF Post-Post Requisition. A post-post requisition containing an EAC, management code and storage site RIC is submitted by the SSF site to the Army wholesale source of supply when assets are issued from an SSF site in support of a previously provided image requisition. Upon receipt, the source of supply creates internal issue transactions and creates an audit trail.

C4.2.17.2. Post-Post Requisition Processing. When the requisition is satisfied by an SSF site, the wholesale system shall receive a post-post requisition containing a special EAC and management code, as well as the RIC of the SSF site issuing the assets, and codes indicating the ownership, purpose, and condition of these assets. If the post-post issue requisition is for a partial quantity, it will also contain a suffix code. The wholesale system may receive post-post requisitions with the same document number and suffix code, but with different storage activity RICs. These will

not be considered duplicates. Based upon receipt of the post-post requisition, the wholesale system will internally generate a materiel release order (MRO), materiel release confirmation (MRC) and a materiel receipt acknowledgement (MRA). The wholesale system receives post-post requisitions in order to record shipments and generate appropriate bills.

C4.2.17.3. Working Requisition Processing. If the SSF site can fill the total requisition through post-post issues, the wholesale source of supply shall not receive a working requisition. However, if the SSF site is unable to satisfy the total demand quantity of the requisition, the wholesale site shall receive either a working requisition for the residual quantity or a cancellation on the same document number as the image requisition. Upon receipt of the working requisition the wholesale source of supply shall initiate normal support actions. Any actions taken by the wholesale source of supply on the working requisition shall always begin with Suffix Code L. The total quantity of all post-post requisitions and all working requisitions received on a single document number should not exceed the quantity on the original image requisition.

C4.2.17.4. EAC Authorization. In addition to the use of the EAC in the above SSF procedures, for both Army SSF and non-SSF activities, the EAC is authorized to be used for requisition reinstatement and other varied purposes.

C4.2.18. Requisitioning Repairables for Induction to Maintenance

C4.2.18.1. When materiel is scheduled for organic maintenance, based on the repair schedule the maintenance activity shall requisition the materiel from the materiel owner using a DLMS 511R Requisition. All requisitions will cite Advice Code 2J (fill or kill), and the appropriate supply condition code.

C4.2.18.2. To preclude billing by the materiel owner, the requisition shall also contain the following data elements to denote free issue. For requisitions submitted to:

C4.2.18.2.1. Air Force: For Air Force principals (RIC TO of F**), use Project Code 3BB.

C4.2.18.2.2. Navy: For Navy principals (RIC TO of N**), use Signal Code B and Fund Code 26. If RIC TO is N32, use N00383 as the Supplemental Address; if RIC TO is N35, use N00104 as the Supplemental Address.

C4.2.18.2.3. Army: For Army principals (RIC TO A** or B**), use Project Code 3BB, Fund Code GM, and Signal Code D or M.

C4.2.19. DoDAAC Authority Code Edits. Requisitions shall be prepared using valid DoDAACs for the purpose(s) intended. DoDAACs designated as the requisitioner, bill-to, or ship-to activity shall be validated based upon the authority code assigned to each DoDAAC in the DoD Activity Address File. Refer to DAAS edit of incoming requisitions below for edit rules.

C4.3. RETRANSMITTED REQUISITIONS. Use the FROM address in the requisition to identify the activity passing and/or referring the requisition and TO address to identify the activity to receive the requisition. In addition, indicate the applicable suffix code of the retransmitted requisition if the quantity is less than the original requisition quantity, and the appropriate demand code. Indicate the date of receipt of the demand as recorded by the initial source of supply when retransmitting requisitions to another source of supply. Use Special Requirements Code 888 to identify retransmitted requisitions generated from backorder releases submitted only to the SMCA.

C4.4. REQUISITION CANCELLATIONS

C4.4.1. General

C4.4.1.1. Requests. The requisitioner, monitoring activity, the DoD Component, and authorized command elements may request cancellation of previously submitted requisitions by using the DLMS 869C, Cancellation. The activity initiating the cancellation action, if other than the requisitioner, must advise other interested activities of the cancellation action. Send single line-item cancellations to the last known source of supply holding the applicable requisitions. Under normal circumstances, cancellation requests represent a discontinued need of specific items and quantities. Do not deobligate funds or update individual due-in records until you receive status from the source of supply confirming cancellation.

C4.4.1.2. Receipt from Contractor. Do not submit single line-item cancellations when a CONUS activity has received notice of shipment for materiel from a contractor's facility or a depot.

C4.4.1.3. Minimum Value Item. Do not submit single line-item cancellations when an OCONUS activity has received shipment status and the line-item value of the cancellation is less than \$200, or the materiel was shipped by air mail, or parcel post, or the materiel was shipped more than 10 calendar days by air shipment to an aerial port of embarkation (APOE), or 45 calendar days by surface shipment to a water port of embarkation (WPOE).

C4.4.1.4. Conditions Not Excluded. Submit cancellations for conditions not excluded when there is no longer a need for a requisitioned quantity regardless of line-item dollar value or status. Such submissions shall authorize the source of supply to properly adjust demands, when appropriate, and initiate cancellation action, when feasible.

C4.4.1.5. Status Code BV. Sources of supply may initiate billings to requisitioning activities for transportation charges and/or contract termination costs even though the source of supply is able to effect cancellation/diversion if requisitions are assigned Status Code BV.

C4.4.1.6. Disposition of Materiel for Failed Cancellations. The consignee, the appropriate commander, or Service headquarters is responsible for the utilization or disposition of materiel that cannot be canceled or diverted to an alternate consignee.

C4.4.1.7. Material Shortages. Requisitioning activities must submit a new requisition with a new document number, citing appropriate issue PDs, whenever shortages occur for materiel previously canceled or rejected. Do not submit requests to reinstate previously canceled or rejected requisitions to sources of supply.

C4.4.2. Mass or Universal Cancellation of Requests

C4.4.2.1. General. Base closures, termination of special projects, ship and unit inactivation, termination of agreements, or termination of vessel outfitting or construction, are events that can necessitate the requirement for a mass or universal cancellation of multiple lines. Although these events may ultimately require mass or universal cancellation action, they are normally known to the affected activities well in advance of the effective date of such closures or termination action. In these instances, every effort will be made by the requisitioning activity to minimize the continued processing of requisitions by the sources of supply, and the subsequent entry of unwanted shipments into the Defense Transportation System (DTS), through initiation of single line-item cancellations. When the DoD Component is aware that a total project (or total requirement for a single base) is no longer required and should be canceled and there is insufficient time remaining to permit continued cancellation on a single line basis, the DoD Component may initiate a mass or universal cancellation request of multiple lines by indicating a date range for the applicable requisition transaction number dates, appropriate project code(s) and/or various organizations.

C4.4.2.1.1. Mass Cancellation. A mass cancellation permits continued supply action and shipment processing for selected requisitions.

C4.4.2.1.2. Universal Cancellation. A universal cancellation serves to terminate all such processing, even requisitions previously identified for continued transaction and shipment processing under mass cancellation situations.

C4.4.2.2. Requirements for Continued Shipment. Requisitions that require continued supply action and shipment processing under mass cancellation situations must be identified by the requiring activity at the earliest date through submission of requisition modifiers, DLMS 511M, Requisition Modification, containing Special Requirements Code 555 in the LQ segment. For SA, use of this code is restricted to approved CLSSA requisitions with Type of Assistance Code U or V. Sources of supply shall not cancel requisitions that have been modified to contain Special Requirements Code 555 during a mass cancellation process.

C4.4.2.2.1. Requisition Changes. The requisition may not be changed to contain Special Requirements Code 555 by means of a requisition modification submitted after the effective date of the requested mass cancellation.

C4.4.2.2.2. Applicability. Requisitions that fall within the scope of the announced mass cancellation criteria submitted after the effective date of the mass cancellation action, must contain Special Requirements Code 555.

C4.4.2.3. Initiation of Requests. Requests for mass or universal cancellation of requisitions shall be initiated by the DoD Component or by an authorized command element. The DoD Component contact points established for issuance and receipt of requests for mass and universal cancellation are listed on the Defense Logistics Management Standards website at www.dla.mil/j-6/dlms/eLibrary/Restricted/SvcPointsPOC/default.asp. Inter-DoD Component dissemination of requests for mass or universal cancellation must be made by the designated contact points. The mass or universal cancellation request shall be accomplished by preparation of the DLMS 869C.

C4.4.2.4. Dissemination of Intra-DoD Component S/A Requests. Intra-DoD Component dissemination of requests for mass or universal cancellations shall be accomplished by the DoD Component contact point designated. Intra-DoD Component dissemination shall include all Component sources of supply, storage activities, and other activities within the DoD Component processing supply transactions or shipments with capability to cancel requisitions or divert shipments. In addition, the designated DoD Component contact points shall ensure that the appropriate overseas theater, force, logistics, or type commanders are aware of mass or universal cancellation actions affecting their areas of responsibility.

C4.4.2.5. Required Information. Requests for mass or universal cancellation action, DLMS 869C, Cancellation, shall be submitted to the DoD Component designated contact point(s) for cancellation of all open requisitions applicable to specific projects, or bases (as identified by AACs). The request for mass or universal cancellations shall contain identification of the activity having submitted the request, the effective date, and the required codes for identification of one of the following, for which cancellation of all applicable requisitions is requested:

C4.4.2.5.1. Project code and ship-to address.

C4.4.2.5.2. One project code and various addresses.

C4.4.2.5.3. No project code and various addresses.

C4.4.2.5.4. Various project codes and one address.

C4.4.2.5.5. Federal supply classification (FSC), Federal supply group (FSG), NSN, or part number when associated with the address of the original requisition document number ship-to address and/or project designator.

C4.4.2.6. Continuing High Priority Demands. A need may exist to continue the processing of certain requisitions and shipments during mass cancellations such as high priority demands to satisfy NMCS conditions (identified by Special Requirements Code 999 or N in the requisition). In addition, a need may exist to allow continued processing of requisitions for materiel required to effect base closure. In these instances, submit a requisition–modification, containing Special Requirements Code 555 in the LQ segment and one of the following selective criteria, to applicable sources of supply prior to the submission of the mass cancellation request:

C4.4.2.6.1. Project code(s) when associated with the ship-to address being canceled.

C4.4.2.6.2. Special Requirements Code 999 or NB when associated with the ship-to address being canceled.

C4.4.2.6.3. FSC, FSG, NSN, or part number when associated with the ship-to address being canceled.

C4.4.2.6.4. Specific requisition document number and RIC from the status received or the RIC to which the requisition has been transmitted if status has not been received.

C4.4.2.6.5. Specific PD when associated with the ship-to address being canceled.

C4.4.2.6.6. Required Delivery Period (RDP) when associated with the ship-to address being canceled—conventional ammunition only.

C4.4.2.7. Identifying Continued Processing Requests. Upon receipt of the requisition modification containing Special Requirements Code in the LQ segment reflecting a high priority demand and one of the above selective criteria, sources of supply shall review all affected requisition(s) and all associated transactions to identify those for which continued processing has been requested. In the case of items scheduled for direct delivery, the source of supply shall forward requisition modifications to procurement sources. Sources of supply, storage activities, and procurement sources shall annotate the affected requisition(s) and all associated transactions with Special Requirements Code 555 in the LQ segment.

C4.4.2.8. DTS Processing. DTS shall continue movement of materiel to which a Special Requirements Code 555 has been applied except when a universal cancellation has been announced.

C4.4.2.9. Diverting OCONUS Shipments. When OCONUS shipments have already departed from CONUS ports, the responsibility for diversion or disposition is that of the consignee or the appropriate theater, force, logistics, or type commander. Notice to the latter shall be the transportation lift data provided by the DTS clearance authority. (See paragraph C4.7.25.10.)

C4.4.2.10. Diverting CONUS Shipments. No attempt shall be made to divert materiel destined to CONUS customer activities beyond the point of shipment.

C4.4.2.11. Designated Storage Points. All shipping DoD Components shall designate storage points within their distribution system to receive shipments redirected as a result of mass or universal cancellation. Fund citations for bill of lading (BL) preparation must also be provided. These designated points and fund citations shall be provided to Air Mobility Command (AMC), Military Surface Development and Distribution Command (SDDC), or theater commanders, and shall serve as

predesignated consignees for any announced mass or universal cancellation. If more than one storage point is designated, instructions shall be furnished to specify on a geographical basis the storage point designation in relation to each range of water and aerial ports (such as, the west, gulf, and east coasts). In addition, canceling DoD Components shall designate a contact point(s) to provide disposition instructions on materiel that does not meet the automatic diversion conditions specified in paragraph C4.7.25.10. Designated contact points shall provide requested disposition instructions to DTS within 24 hours on materiel located at air terminals and within 48 hours on materiel located at water terminals.

C4.4.2.12. Single Line-Item Cancellation. Customers retain the authority to submit single line-item cancellation requests via DLMS 869C at any time before, during, or after the effective date of the mass cancellation.

C4.5 REQUISITION MODIFICATIONS

C4.5.1. Requesting Modifications. The requisitioner, control office, or monitoring activity may request the modification of previously submitted requisitions using the DLMS 511M, Requisition Modification. Any activity initiating a requisition modification shall notify other interested parties of such action, especially if the activity initiating the modification is other than the requisitioner. A requisition modifier shall be prepared by originating activities completing all prescribed data element entries for a requisition. Send the requisition modification to the last known source of supply. Requisition modifications may be used to change/modify the following fields in an original requisition document:

C4.5.1.1. Non-GFM Requisitions

- C4.5.1.1.1. Ship-To and/or Bill-To Address(es)
- C4.5.1.1.2. FMS Offer and Release Option Code
- C4.5.1.1.3. FMS Freight Forwarder
- C4.5.1.1.4. Treasury Symbol Number/Fund Purpose Code
- C4.5.1.1.5. Project Code
- C4.5.1.1.6. Special Requirements Code
- C4.5.1.1.7. PD
- C4.5.1.1.8. RDD or RDP
- C4.5.1.1.9. Advice Code
- C4.5.1.1.10. Ultimate Recipient Code

C4.5.1.1.11. Transportation Priority Code

C4.5.1.1.12. Media and Status

C4.5.1.1.13. Signal Code

C4.5.1.1.14. Distribution Code

C4.5.1.1.15. Fund Code

C4.5.1.2. GFM Requisitions

C4.5.1.2.1. Project Code

C4.5.1.2.2. PD

C4.5.1.2.3. Advice Code

C4.5.1.2.4. RDD

C4.5.1.2.5. Media and Status Code

C4.5.1.2.6. Signal Code

C4.5.1.2.7. Distribution Code

C4.5.1.2.8. Fund Code

C4.5.2. Identifying Applicable Supply Actions. Identify requisitions for which supply action must be continued during mass cancellation situations and submit modifications with Special Requirements Code 555 to the source of supply at the earliest possible date to ensure the continued processing of the requisitions.

C4.5.3. Pertinent Modification Data. Only data on the modification transaction shall be changed. All other data shall remain as stated on the original requisition.

C4.5.4. Modifying Codes. When a requisition modifier is submitted to modify the ship-to and/or bill-to DoDAAC(s), signal code, or fund code, the DAAS DoDAAC authority code edits discussed in C4.10 shall be reapplied.

C4.6. REQUISITION INQUIRIES/REQUESTS FOR SUPPLY ASSISTANCE

C4.6.1. General. Use DLMS 869A, Requisition Inquiry/Supply Assistance, to follow-up or request supply assistance to improve estimated shipping dates (ESD) over the dates indicated in the latest supply status transaction on previously submitted requisitions. Use either DLMS 869A or DLMS 869F, Requisition Follow-Up, to follow up the latest supply transaction on previously submitted requisitions. Management Code P shall be perpetuated to all applicable supply status in support of BRAC IMSP.

C4.6.2. Follow-Ups. Submit follow-ups to obtain the latest status for a previously submitted requisition.

C4.6.2.1. Follow-Up Format. Requisition follow-ups can be accommodated in two formats. DLMS 869A provides a streamlined requisition follow-up. DLMS 869F Requisition Follow-up offers the additional capability of conveying all information provided on the original requisition (with the exception of quantity stratification by weapon system) so that the follow-up may act as a requisition if the inquiry is unmatched to the IMM's data base. When a DLMS 869F follow-up that may act as a requisition is submitted, it will be subject to the authority code edits of paragraph C4.10.

C4.6.2.2. Follow-Up Submission Criteria

C4.6.2.2.1. Delay Status Not On Hand. Submit follow-ups when status data is not on hand to indicate a delay in receipt of materiel beyond the SDD or RDD or when the UMMIPS order and shipping time standard for receipt of materiel has elapsed.

C4.6.2.2.2. Receipt Status Not Received. Send follow-ups to the source of supply where you sent the requisition if you have not received status indicating another activity is responsible for the demand. When supply status has been received, direct the follow-up to the activity indicated as currently processing the requisition; for example, the last known source of supply. The source of supply may follow up to a shipping activity on open MROs.

C4.6.2.2.3. Materiel Not Received. Do not submit follow-ups after receiving shipment status evidencing completion of shipment unless you do not receive the materiel within normal transit time based on the date of the shipment as cited in the shipment status transaction.

C4.6.2.3. Follow-Up Submission Timeframes

C4.6.2.3.1. PD 01-08. For PD 01-08 demands, submit follow-ups only after expiration of at least three calendar days from the date of the requisition or transaction date of the latest supply status.

C4.6.2.3.2. PD 09-15. For PD 09-15 demands, submit follow-ups only after expiration of at least seven calendar days from date of the requisition or transaction date of the latest supply status.

C4.6.3 Request for Supply Assistance

C4.6.3.1. Initiation. Requisitioners may initiate requests for supply assistance only for PD 01-08 requisitions after receipt of supply status indicating an unacceptable delivery date. Requests for supply assistance includes status of requisitions, timely supply of requirements, interchangeable and substitutable (I&S) items, release of cancellation or backordered requisitions, and diversion of materiel shipments. Do not generate requests for supply assistance prior to the receipt of supply status indicating open status.

C4.6.3.2. Submission

C4.6.3.2.1. Forward requests for supply assistance on previously submitted PD 01-08 requisitions to the source of supply processing the requirement. Requests for assistance may be done by e-mail, message, letter, or telephone to the appropriate source of supply. Telephone requests should not exceed seven lines; however, the limitation of items shall be determined by the source of supply ability to record the items and initiate timely responses. Include the urgently needed quantity (supply assistance may be requested for entire quantity requisitioned or a lesser quantity required for mission performance).

C4.6.3.2.2. DLA accepts supply assistance requests via the DoD EMALL requisition query function for open requisitions PD 01-08 with MILSTRIP Supply Status BB, BV, BZ, or BD.

C4.6.3.2.3. In addition to the above, the DLMS 869A, Supply Assistance request (BS108=AR) is designed to transmit requests electronically. This is a DLMS enhancement that cannot be used without prior coordination to ensure that the receiving source of supply has implemented this business process using transaction exchange. The DLMS format supports identification of point of contact information, identification of acceptable substitute items, alternative sources for the requested item, and a codified mission impact resulting from delay or lack of support for the required item:

C4.6.3.2.3.1. Code 1: Inability to perform assigned mission for a classified project.

C4.6.3.2.3.2. Code 2: Inability to perform assigned mission.

C4.6.3.2.3.3. Code 3: Performance of assigned mission anticipated to be curtailed or stopped if materiel is not received within 15 days continental United States (CONUS) or 20 days other than continental United States (OCONUS).

C4.6.3.2.3.4. Code 4: Mission performance below prescribed level of effectiveness and efficiency.

C4.6.3.2.3.5. Code 5: A classified NMCS condition exists due to lack of required assets.

C4.7. REQUISITION PROCESSING AND RELATED ACTIONS. Sources of supply receiving requisitions, follow-ups, modifications, cancellations, and/or supply assistance requests shall process such transactions using these procedures.

C4.7.1. General

C4.7.1.1. Verification. Sources of supply shall validate the data elements and codes in these transactions and accomplish changes, continue processing action, or reject with the appropriate status code using DLMS 870S, Supply Status. Rejection

of transactions shall be done only after an attempt has been made to correct the questionable data element or code. If rejection action is a result of more than one data element or code, and no other reject status code applies, reject using Status Code CA.

C4.7.1.2. Batch Processing. When sources of supply and storage activities utilize the sequential (or batch) method of processing and do not possess real time processing capability, such processing must be done as frequently as necessary in order to meet UMMIPS time standards, or specific RDD for subsistence requisitions as applicable. In every such cycle, cancellation requests (including automatic cancellation initiated by the source of supply) and Material Obligation Validation (MOV) reconciliation requests shall be processed prior to backorder releases and new requisitions. Demands shall be sequenced as follows:

C4.7.1.2.1. Priority Designator.

C4.7.1.2.2. OSD/the Chairman of the Joint Chiefs of Staff project codes.

C4.7.1.2.3. Special Requirements Code 999 and PD 01, 02, or 03.

C4.7.1.2.4. Special Requirements Code N (NMCS), E (ANMCS), or 555 and PD 01-08.

C4.7.1.2.5. Requisition document number date.

C4.7.1.2.6. RDP, if later than the computed SDD--conventional ammunition only.

C4.7.1.3. Backorders. Backordered requirements shall be merged (in the above sequence) with all new transactions in any requisition processing cycle in which additional assets become available; for example, receipts of materiel and debit onhand adjustments.

C4.7.1.4. Receipt Processing. Processing points shall record the date of receipt of each requisition received. The date of receipt enables sources of supply to compute the requisition submission time. The computation shall be made by subtracting the date in the demand transaction from the date received. The submission time provides a basis for the ICPs to measure the first cycle segment of supply effectiveness.

C4.7.1.5. Document Numbers. The document number, and a suffix, when applicable, shall be used as a basis for determining duplicate transactions. The recipient shall disregard all duplicate transactions.

C4.7.2. Effect of Priority Designator on Requisition Processing

C4.7.2.1. Assigning PDs. Each requisition must contain a PD assigned by the requisitioning activity, which shall not be changed by processing points except in the following conditions:

C4.7.2.1.1. Special Requirements Code 999 is present, requisition is for U.S. Forces, and the PD is not 01, 02, or 03. The source of supply shall enter PD 03 and send Status Code BK.

C4.7.2.1.2. An OSD/Joint Chiefs of Staff project code is present, but the PD is not 01-15. The source of supply shall cite PD 03 and send Status Code BK.

C4.7.2.1.3. Special Requirements Code N or E is present, and the PD is not 01 – 15. The source of supply shall enter PD 08 and send Status Code BK.

C4.7.2.1.4. Special mass cancellation coding 555 is present and the PD is not 01-15. The source of supply shall enter PD 08 and send Status Code BK.

C4.7.2.1.5. Special Requirements Code 777 is present and the PD is not 01 – 15. The source of supply shall enter PD 08 and send Status Code BK.

C4.7.2.1.6. RAD is present and the PD is not 01-15. The source of supply will enter PD 15.

C4.7.2.1.7. Extended RDD is present and the PD is other than 09-15. The source of supply shall enter PD 15 and send Status Code BK, and process.

C4.7.2.1.8. Work stoppage indicator is present and the PD is not 01-08. The source of supply shall enter PD 08 and send Status Code BK, and process.

C4.7.2.1.9. Service Code is B, D, K, P, or T and Special Requirements Code is N, E, 555, or 777 and Type of Assistance is not U or V. The source of supply shall blank the special requirements code and process using the priority. Type of assistance is identified as the sixth position of the SA identification data portion of the document number or separately in the LQ segment.

C4.7.2.1.10. For all other conditions, if the PD is not 01 - 15, the source of supply shall enter PD 15.

C4.7.2.2. Time Standards. The assigned PD dictates the precedence of internal supply processing actions (such as, from the receipt of a transaction until release to transportation) and determines the SDD. Mandatory time standards for processing of transactions are covered in DoD 4140.1-R, Appendix 8. For subsistence requisitions, the assigned RDD is the primary processing criteria, while the assigned PD dictates the precedence of internal supply processing action for requisitions reflecting identical RDDs. Time standards indicated in UMMIPS do not apply to subsistence requisitions.

C4.7.2.3. IMM Control Levels. On occasion, available assets may be insufficient to satisfy all current demands and backorders for specific items. The IMM shall reserve assets of such critical items through the use of item control levels and criteria that will restrict issue to specific categories of requirements only, i.e., those within designated ranges of PDs, Joint Chiefs of Staff approved projects, or firm

commitments for delivery of materiel to SA recipients. Control levels shall be established for IMM to reserve stocks for issue only for PD 01-03. These requirements shall be satisfied by issue to zero stock balance of serviceable stocks. Control levels may be established at the discretion of the IMM to reserve a greater level of stocks that may not be issued for PD 09-15 requirements.

C4.7.2.4. Source of Supply Control Levels. Control levels shall also be established by the source of supply to restrict issues against requisitions for the initial fill of PWRMS consumable item requirements to ensure that:

C4.7.2.4.1. Availability Below Approved Force Acquisition Objective (AFAO). Assets available below the AFAO are not issued against requisitions for nonreimbursable PWRMS requirements regardless of the PD.

C4.7.2.4.2. Availability Below Reorder Point. Assets available below the reorder point (ROP) are not issued against requisitions for nonreimbursable PWRMS requirements that contain a PD of 11-15 during initial processing of the requisition. Later processing of such requisitions is prescribed in paragraph C4.7.5., below.

C4.7.2.5. OSD/the Chairman of the Joint Chiefs of Staff Project Priority. These projects, when so designated, and PD 01-03 requisitions containing Special Requirements Code 999, shall be ranked above all other requisitions with the same PDs for processing purposes. Special Requirements Code 999 requisitions and related transactions shall receive special attention to provide for expedited processing actions.

C4.7.2.6. Releasing Demands. When system-wide inventory levels do not permit positive supply action on all requisitions within a given PD, supply procedures shall provide for a release of demands containing the specifically designated OSD/Joint Chiefs of Staff project codes and Special Requirements Code 999 as the respective most urgent. PD 01-08 requisitions, including FMS requisitions, containing Special Requirements Code 555 in the RDD field and other requisitions/materiel obligations, shall be processed for release as prescribed in paragraph C4.7.1.2.

C4.7.3. Source of Supply Processing of Requisitions with Advice Code 2D, 27, or 29. Sources of supply shall edit all requisitions containing Advice Codes 2D, 27, and 29 to determine if an increase in the requisition quantity to the quantity unit pack is less or more than \$5. If less than \$5, the source of supply shall disregard the advice code in the requisition. If \$5 or more, the source of supply shall honor the advice code and process the requisition for the exact quantity requested. When a quantity adjustment is made using the above criteria, the source of supply shall use Status Code BJ to notify the customer of the quantity adjustment.

C4.7.4. Source of Supply Processing of Requisitions for Quantities that Exceed the Normal Demand. The source of supply may request verification of requisitions that show quantities that exceed normal demands or quantities that appear to be excessive or in error before taking positive supply action. When the source of supply determines that the requisitioned quantity needs to be verified, the source of supply shall generate a

DLMS 517M, Materiel Obligation Validation, to request verification of the quantity. The source of supply must indicate a response due date in the quantity verification inquiry, normally 30 calendar days for U.S. Forces and 75 calendar days for SA customers. The organization verifying the requisitioned quantity shall send a response to the source of supply by the response due date indicated in the quantity verification inquiry; otherwise, the source of supply shall automatically cancel the requisition with Status Code D3. The quantity in the response must be the actual quantity required. If the quantity is less than the original requisitioned quantity, the difference shall be canceled with Status Code BQ. If the quantity field contains zero, the entire requisition shall be canceled with Status Code BQ. Quantity increases are not authorized.

C4.7.5. Source of Supply Processing of PWRMS Requisitions

C4.7.5.1. General. Sources of supply, except GSA, shall process funded and unfunded requisitions for the initial fill of PWRMS consumable item requirements using the criteria established below. GSA shall process only funded requisitions for PWRMS requirements and does not differentiate between those requisitions and others.

C4.7.5.2. Processing Criteria. Upon receipt of PWRMS requisitions for the initial fill of consumable item requirements (Demand Code O and Project Code 3AA), the source of supply shall determine asset availability in excess of the AFAO and :

C4.7.5.2.1. Sufficient Assets Available. If sufficient assets are available in excess of the AFAO to satisfy the total requisition quantity, the total requisition shall be processed as free issue.

C4.7.5.2.2. Excess Assets. If the assets available in excess of the AFAO are not sufficient to satisfy the total requisition quantity, then the portion of the requisition quantity equal to the quantity of assets available in excess of the AFAO shall be processed as free issue and the balance of the requisition quantity shall be processed as follows:

C4.7.5.2.2.1. When the source of supply determines that assets are not available in excess of the AFAO, the basis of unit price code in the PO1 segment of the PWRMS requisition for the initial fill of consumable item requirements (Demand Code O and Project Code 3AA) shall be checked and:

C4.7.5.2.2.2. If free issue, the unfilled quantity on the requisition must be rejected. The rejection shall be accomplished under Status Code CB since all unfunded PWRMS requisitions must be processed as fill or kill.

C4.7.5.2.2.3. If a basis of unit price code is not identified, the PWRMS requisitions shall be processed as containing Advice Code 2L and the PD must be checked to determine further processing routines.

C4.7.5.2.3. PD 01-03 PWRMS Requisitions. Except for subsistence, PWRMS requisitions with PD 01-03 shall be processed for issue using UMMIPS source

of supply processing standards. Subsistence requisitions must be processed to meet a specific RDD.

C4.7.5.2.4. PD 11-15 PWRMS Requisitions. Except for subsistence, PWRMS requisitions with PDs 11-15 shall be issued from assets available above the ROP or equivalent. When assets above the ROP or equivalent are not available to satisfy the requisitioned quantity, the unfilled quantity shall be placed on backorder and the appropriate supply status shall be provided with an estimated shipping date (ESD) equal to one procurement lead time. Backordered PWRMS requisitions with PDs 11-15 must be released from backorder at the end of the procurement lead time or when sufficient stocks are available above the ROP. (PWRMS requisitions with PDs 04-10, when received, shall be processed in the same manner as PD 11-15 requisitions.)

C4.7.6. Source of Supply Processing of RDP Requisitions (Conventional Ammunition Only)

C4.7.6.1. Earliest Delivery Date within Standard UMMIPS Timeframe. Requisitions with an RDP that has an earliest delivery date that is within the standard UMMIPS timeframes for the PD must be processed using the time period established for that PD.

C4.7.6.2. Earliest Delivery Date Outside Standard UMMIPS Timeframe. Requisitions with an RDP that has an earliest delivery date that is longer than the standard UMMIPS timeframes for the PD shall not be placed on backorder. If stock is not available, the requisition shall be referred or rejected back to the customer. If stock is available, an MRO shall be issued to the storage facility. The shipping activity shall establish necessary control mechanisms to provide timely shipment to the customer.

C4.7.6.3. Rejecting Late Requisitions. Requisitions that cannot be delivered within the RDP shall be rejected with Status Code CB.

C4.7.6.4. SA Deliveries. RDP procedures do not apply to SA requisitions.

C4.7.7. Source of Supply Processing of Requisitions for Nonconsumable Items From a Nonregistered User. Process nonconsumable items from nonregistered users according to the following criteria:

C4.7.7.1. PD 01-08. If the PD is 01-08, process the requisition for issue and provide Status Code DS to the requisitioner.

C4.7.7.2. PD 09-15. If the PD is 09-15 and assets are available above the ROP, process the requisition for issue and provide Status Code DS to the requisitioner.

C4.7.7.3. Assets Not Available. If the PD is 09-15 and assets are not available above the ROP, reject the requisition with Status Code CC or CN, as appropriate.

C4.7.8. Source of Supply Processing of Subsistence Requisitions. Do not backorder subsistence requisitions. Process subsistence requisitions to meet the specific RDD.

C4.7.9. Source of Supply Processing of Requisitions with Management Codes 3, 9 and P.

C4.7.9.1. Requisitions with Management Code P. Management Code P is only applicable to requisitions/requisition alerts submitted to DLA. All other sources of supply in receipt of Management Code P shall disregard and continue processing. DLA will verify that the requisitioning activity is a BRAC IMSP industrial/maintenance sites. If not, DLA will disregard the management code.¹¹ Where authorized, Management Code P will be recognized as a request for materiel sourced from an alternative source due to previous receipt of like materiel with product quality deficiency reported via PQDR. DLA would apply unique logic applicable to the management code. If the item being requested is managed as a direct vendor delivery (DVD), then the DLA forward-positioned buyer shall process for procurement from a vendor other than cited on the PQDR if materiel is available to meet the (RDD). If the item is managed as a stocked item, the request shall be processed as one-time emergent request and the DLA forward-positioned buyer shall process as a customer direct order. In instances where the RDD cannot be met or the forward buyer is unable to locate an alternate vendor, the forward buyer shall work directly with the engineer to satisfy the requirement.

C4.7.9.2. Requisitions with Management Codes 3 or 9. Management Codes 3 and 9 are only applicable to requisitions submitted to DLA. All other sources of supply in receipt of Management Code 3 or 9 shall disregard and continue processing. DLA will verify that the requisitioning activity is a BRAC Inventory Management and Stock Positioning (IMSP) industrial/maintenance site authorized to use these codes. If not, DLA shall disregard the management code. Where authorized, Management Codes 3 and 9 shall be recognized as a request for materiel sourced from an alternative storage location or new procurement, if stock is not available, due to previous receipt of materiel that did not support shelf life or continuous length requirements. The prior requisition document number and the shipment suffix (if applicable due to a split shipment) shall be used for cross reference to the original requirement and storage location. This process is only applicable to materiel originally sourced from a co-located depot without physical inspection of the materiel. The suitability for shelf life and length could not be determined until directed release by the Service owner at which time the storage activity would provide a denial citing Management Code 3 or 9, as applicable. The DLA would apply unique logic applicable to the management code. If the item is available in an alternative storage site, then a materiel release order would be sourced to that alternative storage site. When no stock is available in the network, a new procurement action will be initiated. The DLA ICP will also update an internal denial table to preclude

¹¹ Expanded use for all DoD Components requisitioning from DLA is planned for future implementation (approximately 2014.)

other comparable requests from being sourced to the original storage activity until inventory balances have been reconciled.¹²

C4.7.10. Processing of Requisitions for Induction to Maintenance.

C4.7.10.1. Upon receipt of a DLMS 511R Requisition from maintenance for the purpose of inducing a reparable, the materiel owner shall process the requisition on a 'fill or kill' basis, and direct the issue to the co-located storage activity. If there are insufficient assets at the co-located storage activity, the requisition shall be 'killed' for that portion of the requisition that cannot be issued. No billing shall be initiated on requisitions from maintenance activities for DMISA assets, when the requisition was submitted consistent with C4.2.18.2. requirements.

C4.7.10.2. The "Principal" system shall interpret the DLMS 511R Requisition with Advice Code 2J (fill or kill) as "no substitution allowed" but will allow for a partial fill, (i.e., do not backorder unfilled quantity, or pass an MRO to other than the co-located storage activity). The source of supply (Principal) shall furnish the requisitioning activity (maintenance) DLMS 870S Supply Status using CB status for any unfilled quantity.

C4.7.10.3. DLMS source of supply preparation of materiel release orders (MROs) to the co-located storage activity shall be accomplished using the DLMS 940R.

C4.7.11. Maintenance of Requisition History Records. Sources of supply shall retain accessible requisition history records for a minimum period of 6 months after the closing of requisition records by cancellation, rejection, or shipment to provide for responsive replies to requisition inquiries.

C4.7.12. Rejection of Requisitions. Sources of supply shall provide supply status to requisitioning and status organizations identified in the requisition or follow on transactions, as notices of requisition rejection with the reason for such action indicated by an appropriate status code.

C4.7.13. Release of Materiel Obligations. A materiel obligation is that quantity of an item requisitioned that is not immediately available for issue, but is recorded as a stock commitment for future issue. Sources of supply shall establish procedures for the partial release of the materiel obligation when assets are insufficient to satisfy the entire demand consistent with the PD and delivery requirements of the requisition involved.

C4.7.14. Preparing MROs

C4.7.14.1. Originator. MROs, DLMS 940R, Materiel Release, are prepared by the source of supply as a result of processing requisitions against inventory records and determining that materiel is available. MROs are used as a directive for release and shipment of materiel from stock.

¹² Refer to ADC 359, implementation date December 2010.

C4.7.12.1.1 MROs directing shipment of requisitioned GFM shall perpetuate contract data to include the contract number authorizing GFP, and the call/order and CLIN when available. Contract data shall be provided by the source of supply for pushed GFM not initiated by a requisition.

C4.7.12.1.2. MROs directing shipment of reparable for induction for commercial maintenance shall include the contract number authorizing GFP, and the call/order and CLIN when available.

C4.7.12.1.3. MROs directing shipment of GFP in contractor custody shall include the contract number authorizing GFP, and the call/order and CLIN when available.

C4.7.14.2. Advice Code 2T. Requisitions or MROs that contain Advice Code 2T and do not contain an RDD shall be processed under the assigned PD without regard to the advice code.

C4.7.15. Reserved.

C4.7.16. Materiel Release Confirmation (MRC)

C4.7.16.1. Purpose. The MRC serves as advice from a storage site to the source of supply that initiated the MRO of supply action taken. The MRC shall be provided using DLMS 945A. The MRC shall include enhanced data content under DLMS to include:

C4.7.16.1.1. Both the TCN, when applicable, and a secondary transportation number, such as the small package carrier number, when this is applicable.

C4.7.16.1.2. Identification of the carrier when other than United States Postal Service (USPS) by Standard Carrier Alpha Code (SCAC).

C4.7.16.1.3. For OCONUS shipments made via Defense Transportation System (DTS), GBL/CBL, parcel post, and small package carrier shipments, specific identification of the Port of Embarkation (POE) or Consolidation and Containerization Point (CCP), the air terminal, water terminal, or CCP by applicable qualifier code. (During MILSTRIP/DLMS transition, DAAS may substitute a generic terminal qualifier for MRC transactions converted from MILSTRIP legacy format transactions where the type of facility is unknown.)

C4.7.16.2. Source of Supply Follow-Up. Sources of supply shall follow up on storage activities at least once every 30 calendar days for unconfirmed MROs that are seven calendar days old for PDs 01-08 and 15 calendar days old for PDs 09-15.

C4.7.16.3. Materiel Release Confirmation Changes/Updates. In the event a shipment from the storage/shipping activity does not get lifted as originally intended (e.g., shipment is left off the truck), the storage/shipping activities that originate the

DLMS 945A Materiel Release Confirmation shall send an updated transaction with all of the changed transportation information to the ICP. This ensures required visibility of the shipment information and enables the ICP to prepare an updated DLMS 856S Shipment Status when needed. Examples of changed transportation information would include transportation method code, standard carrier alpha code (SCAC), ship date, bill of lading information, and tracking information.

C4.7.16.3.1. Preparation of the Materiel Release Confirmation Change/Update

C4.7.16.3.1.1. The materiel release confirmation change/update message shall be identified by a unique code (W0602 =“RR”) in the transaction to flag it as an updated MRC.

C4.7.16.3.1.2. It shall convey a new Shipping Date Change Reason Code (W0610 =“13” Shipping Location Handling) to advise the ICP that the updated MRC corrects erroneous content data (e.g., transportation data, pRFID data).

C4.7.16.3.1.3. It shall repeat the information from the original MRC, in addition to any changes to the original information.

C4.7.16.3.1.4. It shall convey changed transportation information (e.g., transportation method code, standard carrier alpha code [SCAC], ship date, bill of lading information, and tracking information.)

C4.7.16.3.1.5. When the ICP sends a shipment status in response to a customer follow-up, based on an updated MRC, the DLMS 856S shall be transmitted as an original transaction, thereby enabling legacy-based supply systems to receive the converted DIC AS_ from DLA Transaction Services. Do not use the BSN01 = “RR” and BSN07 = “A40” codes in this case, since the presence of these codes will indicate to DLA Transaction Services not to convert these DLMS transactions to MILSTRIP legacy format.

C4.7.16.3.1.6. The ICP shall adjust its Materiel Release Acknowledgement (MRA) follow-up timeframes based on the updated MRC in accordance with standard MILSTRAP business rules.

C4.7.16.3.2. DLA Transaction Services Distribution of MRC Change/Update. DLA Transaction Services shall route the MRC change/update to the ICP per standard business rules for distribution of MRC messages. DLA Transaction Services shall not distribute the MRC change/update to DLSS-based recipients.

C4.7.16.3.3. Use of the MRC Change/Update by the ICP. The value of this transaction to the ICP is to provide corrected transportation data, enabling it to prepare an updated shipment status message. DLMS compliant systems should handle the updated transactions as the official MRC in their application, since they carry the corrected data.

C4.7.17. Storage Activity Denial or Rejection of Materiel Releases

C4.7.17.1. Preparation. Materiel Release Denials (MRD), DLMS 945As, are prepared by storage sites and sent to the source of supply that initiated the MRO as notification of negative action on the MRO and shall show the quantity denied and the appropriate management code.

C4.7.17.2. Delivery Status. If the storage activity cannot meet the delivery timeframe specified by the RDP, the storage activity shall use the materiel release advice to provide Status Code CB to the source of supply. The source of supply shall provide this status advice to the eligible status recipients (applies to conventional ammunition requisitions only).

C4.7.17.3 Storage Activity Denials of Materiel Releases for Induction to Maintenance.

C4.7.17.3.1. MRDs prepared under paragraph C4.7.10. shall be used to provide a negative response to source of supply (Principal) initiated MROs directing release of a repairable asset for maintenance action.

C4.7.17.3.2. If the storage activity cannot provide the repairable asset for maintenance action in response to directed release, the source of supply (Principal) shall provide supply status using CB status to advise the requisitioning activity (maintenance) that the asset is not available for induction.

C4.7.18. Component-Owned Stocks Centrally Managed and Stored by DLA under Memorandum of Agreement

C4.7.18.1. The following procedures have a limited and restricted applicability controlled by a Memorandum of Agreement (MOA) between DLA and the requesting DoD Component. Upon request by a DoD Component and agreement by DLA, DLA will centrally manage Component-owned stocks within the DLA distribution system. All instructions to storage activities relative to the Component-owned stocks accepted under the MOA must originate from the owning ICP as the sole source authorized to direct delivery, issue, or other disposition of stock. Component-owned stocks accepted under the MOA for central management by DLA will be commingled with like DLA-owned stocks.

C4.7.18.2. To establish assets controlled by the DLA ICP under the MOA, the DoD Component may initiate an "in-place" sale. To accomplish this, the DoD Component requisitions materiel to be centrally managed by DLA, establishing the Component-owned assets on the DLA records. Ownership changes from DLA to the DoD Component, but DLA maintains item management control and continues to store the item in a DLA distribution depot. The DLMS 511R, Requisition, must contain the preferred depot DoDAAC for stock to be commingled and Advice Code 8D. The DLA ICP internally produces and posts the DLMS 940R, Materiel Release, (which is not actually sent to and from depot) and uses a DLMS 867I, Issue (DoD Activities), to drop and a DLMS 527R, Materiel Receipt – Other Than Procurement Instrument Source

(DoD Activity) to post assets to the DLA ICP inventory record under Component-ownership. An image of the DLMS 527R, Materiel Receipt – Other Than Procurement Instrument Source (DoD Activity) shall also be sent to the Component ICP for recording the financial receipt. Normal procedures shall be followed for billing the reimbursable in-place sale.

C4.7.18.3. To direct shipment of these assets, the DoD Component must send a DLMS 511R, Requisition, to the DLA ICP to perform item management. To relate the requisition to Component-owned assets, the following entries are mandatory in the source document: Advice Code 2J; DLA distribution depot to indicate the storage location from which shipment of Component-owned materiel is to be made; ownership code; and condition code of the materiel.

C4.7.18.4. Requisitions created by organizational elements other than the Component ICP and sent to the Component ICP for approval shall be forwarded to the DLA ICP using DLMS 511R, Referral Order. Mandatory entries prescribed in paragraph C4.7.18.3 for requisitions also apply to referral orders.

C4.7.18.5. DLA shall process a requisition or referral order and create a DLMS 940R, Materiel Release. Additionally, DLA shall produce and forward a DLMS 867I, Issue (DoD Activities), to the Component ICP for the issue quantity dropped from the DLA inventory records. Quantities not available shall be rejected to the Component ICP using Status Code CB.

C4.7.18.6. In the event a warehouse denial occurs, the distribution depot shall report the denial in the normal manner. DLA shall send a DLMS 867I, Issue (DoD Activities), reversal and a DLMS 947I, Inventory Adjustment – Decrease (Physical Inventory), to the applicable Component ICP. Requisition documents shall not be reinstated for continued supply action.

C4.7.18.7. Under the MOA, the DoD Component assets may be issued directly to DLA assembly points. The DLMS 511R, Requisition, must include Advice Code 8L; the depot to ship from, the DLA assembly point DoDAAC, Signal Code M, ownership code, and condition code. DLA shall process a requisition in this format and create the MRO. Additionally, DLA shall produce a DLMS 867I, Issue (Assembly/Disassembly/Conversion/Modification), and post to the DLA ICP records. An image of the DLMS 867I shall be sent to the Component ICP.

C4.7.18.8. To accomplish a redistribution action of Component-owned assets between DLA depots under the MOA the following procedures apply. These actions shall be limited to a dual ownership change between the DLA ICP and the Component ICP. That is, no materiel is actually moved; only DLA ICP inventory record changes are made. To accomplish the redistribution action the DoD Component shall provide a DLMS 511R, Requisition, (DLMS 940R, Redistribution Order, is not allowed). The following entries are required: DoDAAC of new depot to show Component-owner assets; Signal Code M; Advice Code 8G (indicates dual ownership change); depot previously showing Component-owned assets; ownership code; and condition code. A

DLMS 867I, Issue (DoD Activities), and DLMS 527R, Materiel Receipt – Other Than Procurement Instrument Source (DoD Activities), shall be recorded for DLA-owned materiel on the DLA ICP inventory record. A DLMS 867I, Issue (Returned Purchases), and DLMS 527R, Materiel Receipt – Other Than Procurement Instrument Source (DoD Activity), for the Component-owned inventory shall be recorded and an image of the DLMS 867I and DLMS 527R shall be sent to the Component ICP.

C4.7.18.9. To terminate the asset posture under the MOA, the Component ICP may direct shipment of the materiel using the directed shipment format above, or one of the following methods.

C4.7.18.9.1 Change the ownership while maintaining the inventory at the same depot. To accomplish this, the DoD Component shall submit a DLMS 511R. The following entries are required: Advice Code 8H, the depot, ownership code, and condition code. The DLA ICP generates a DLMS 947I Issue (Other), internally and sends the Component ICP an image of the DLMS 947I and a DLMS 527R, Materiel Receipt – Other Than Procurement Instrument Source (Other).

C4.7.18.9.2 Direct the materiel to a DLA Disposition Services Field Office. To accomplish this, the DoD Component shall send a DLMS 511R. The following entries are required: Advice Code 8J; depot; and the DLA Disposition Services Field Office.

C4.7.19. Retransmitting Requisitions to Another Source of Supply

C4.7.19.1. Continued Supply Action. The source of supply may retransmit requisitions to another source for continued supply action. The source of supply must always identify the date of receipt of the original requisition in the PO1 Loop, G62 segment, in the retransmitted requisition. The source of supply must always include Special Requirements Code 888 in retransmitted requisitions submitted to the SMCA that are backorder releases from the DoD Component ICPs.

C4.7.19.2. Nonconsumable Items. When a SICA receives a requisition for a nonconsumable item from a SICA activity, the SICA may initiate supply action if stocks are normally held for this purpose, or the SICA may forward the requirement to the PICA. If forwarded to the PICA, the SICA must record the requisition as received from the SICA requisitioning activity and recode the requirement, as necessary, with status addressees, treasury symbol number/fund purpose code, and/or project code that will ensure PICA output of status, billing, MOV requests, and consignment instructions consistent with the SICA Service's NIP implementing instructions. If the PICA is only to provide status to the SICA, the SICA shall not provide Status Code BM to the requisitioning activity. The SICA shall provide the SICA requisitioning activity with status received from the PICA based on the data elements and coding contained in the original requisition.

C4.7.20. Processing Follow-Ups

C4.7.20.1. Time Standards. Process the DLMS 869A or DLMS 869F to determine the current status of requisitions. Time standards for dispatching status in reply to follow ups established for the distribution system are as follows:

C4.7.20.1.1. PD 01-08. For PD 01-08, dispatch status within two calendar days from the date of receipt of the follow-up.

C4.7.20.1.2. PD 09-15. For PD 09-15, dispatch status within five calendar days from the date of receipt of the follow-up.

C4.7.20.2. Providing Shipment Confirmation. A storage activity, in response to a follow-up initiated by a source of supply, shall use the DLMS 945A to provide shipment confirmation, denial, or supply status information, as appropriate.

C4.7.20.3. Storage Activity Processing. Storage activities shall provide Status Code BE if there is a record of the MRO but no record of having taken action in response to the MRO. Sources of supply in receipt of this status validate the original requirement with the requisitioner or, for GFM requisitions, with the MCA. The MCA is responsible for taking the necessary action to validate GFM requirements with the requisitioner and the source of supply. If the requested materiel has not been received, and the requisitioner or the MCA's response indicates a continued valid requirement, the processing point shall generate an MRO modifier transaction that contains the same data as the original MRO. Storage activities in receipt of MRO modifiers shall process them using paragraph C4.7.23.

C4.7.20.4. Generation of Pseudo Shipment Status. Sources of supply in receipt of Status Code BE, or after 60 calendar days have passed from the MRO generation date without confirmation or receipt of an MRA, shall generate a shipment status DLMS 856S with Transaction Type Code NC, to DAAS. Shipment status for SA requisitions shall be forwarded to the applicable ILCO. This shipment status shall not cite a TCN or the mode of shipment and the generation date will be used as the date released to the carrier. DoD Components shall establish a management evaluation program that monitors storage activities providing Status Code BE. Goals should be established and the performance attained be a rating element of the activity commander.

C4.7.20.5. Storage Activity Response with no Record Receipt. Storage activities responding to a follow-up initiated by a source of supply on an MRO for which no record is held at the storage activity shall provide Status Code BF.

C4.7.20.6. Source of Supply Follow-Up Response. Sources of supply in receipt of storage activity responses to follow-ups shall furnish appropriate status to eligible recipients using section C4.7 procedures.

C4.7.20.7. Request for Supply Assistance

C4.7.20.7.1. Requests for supply assistance require management decisions relative to supply requirements that are not normally programmed in a manner to permit mechanical processing. Therefore, these transactions should be manually reviewed to permit a determination as to whether the ESDs can be improved. Receipt of requests for supply assistance serves as notification of the need for the concerned materiel to be received by consignees on dates earlier than those that would result from the shipments accomplished using the source of supply ESDs. The actual date of the requirement need is the prerogative of the requisitioning activity. Any advancement of the ESDs, including a single day, shall be considered by sources of supply as an improvement. Management decisions, designed to improve ESDs, should include one or more of the following, and/or any other additional actions that will improve the ESDs:

C4.7.20.7.1.1. Cannibalization of existing equipment.

C4.7.20.7.1.2. Acceleration of repair programs.

C4.7.20.7.1.3. Offers of I & S items.

C4.7.20.7.1.4. Diversion of materiel shipments.

C4.7.20.7.1.5. Supply from reserve assets.

C4.7.20.7.1.6. Supply from known station or depot excess stocks.

C4.7.20.7.1.7. Supply resulting from screening of materiel held pending classification.

C4.7.20.7.2. ESD Improvement Considerations. During the course of actions taken to improve ESDs, follow-up inquiries shall not be construed by sources of supply as authority to override any requirements of equal and/or higher priority. Consideration shall not be given to diversion of any assets required to satisfy requirements of equal and/or higher priority.

C4.7.20.7.3. Improving ESD. When determination is made that requested improvement in ESDs can be accomplished, the revised ESDs shall be transmitted to status recipients. When actions taken by management do not result in improved ESDs, status recipients shall be provided with the latest status applicable to the requisitions concerned.

C4.7.20.7.4. Source of Supply Status. Sources of supply, in receipt of follow-ups on requisitions for which MROs were created directing lateral redistribution of retail stock, shall provide applicable status as follows:

C4.7.20.7.4.1. If the current status is BA and the ESD or the UMMIPS timeframes, whichever applies, has not passed, provide Status Code BA with the appropriate ESD to the requisitioner.

C4.7.20.7.4.2. If the current status is BA and the ESD or the UMMIPS timeframes has passed, provide Status Code B5 to the requisitioner and send a DLMS 940R, Materiel Release, with Transaction Type Code NB to the reporting activity. Sources of supply in receipt of responses to follow-ups shall send appropriate status to eligible recipients using section C4.7. procedures.

C4.7.20.7.4.3. If the current status is positive shipping status, provide a DLMS 856S with Transaction Type Code AS.

C4.7.20.7.5. Retransmitting Inquiries. Processing points retransmitting requisition inquiries to another source of supply for continued action shall cite their DoDAAC as the FROM-address. Processing points receiving such retransmitted transactions shall not automatically retransmit such transactions back to the processing point from which the transaction was received without obtaining the prior agreement of that activity.

C4.7.21. Force-Closed MRCs. After generating pseudo shipment status transactions for unconfirmed MROs under subparagraph C4.7.20.4., sources of supply shall hold the MRO record open pending an MRA response (under Chapter 10). If an MRA response is received, use it to close the record. For shipments to SA recipients, the source of supply may elect to use the MRA data or generate a DLMS 940R, indicating the mode of shipment and date shipped from the MRA, to interface with billing. If an MRA response is not received within the initial and follow-up timeframes, the source of supply may force-close the MRO. For shipment to SA recipients, sources of supply shall ensure that proper inventory accounting and billing procedures are applied. In response to an MRA indicating non-receipt, the source of supply may force-close the open MRO and bill for the materiel, or reprocess (ship) the materiel based upon established dollar thresholds.

C4.7.22. Processing Redistribution Orders (RDO)

C4.7.22.1. RDOs are originated by an ICP/IMM to direct release of materiel from a supply distribution activity to another within the same distribution system.

C4.7.22.2. Prepare RDOs using the DLMS Supplement 940R.

C4.7.23. Processing Requisition and MRO Modifiers

C4.7.23.1. Source of Supply Processing. Sources of supply shall process a DLMS 511M, Requisition Modifier transaction to provide for modification of requisitions on backorder or for which MROs have not been processed to storage or retail activities. The corresponding original requisitions in process, and materiel obligations, shall be recycled under DoD Component policy and normal processing actions shall be continued to accommodate the modified PD, special requirements code, or RDD/RDP.

C4.7.23.1.1. Modification. Modification of MROs is at the discretion of the DoD Components. However, modifications shall not be processed against requisitions for which MROs of retail assets have been generated.

C4.7.23.1.2. Direct Delivery Modification. Modification of requisitions that have been submitted to procurement sources for direct delivery is not required, except for requisition modifier transactions that contain:

C4.7.23.1.2.1. A revised country FMS offer/release option code and/or FF code.

C4.7.23.1.2.2. Special Requirements Code 555.

C4.7.23.1.2.3. Changes to the SHIP-TO address.

C4.7.23.1.3. Split Actions. The application of modifiers on requisitions for which split actions have been taken by the source of supply is at the option of the DoD Components.

C4.7.23.1.4. Source of Supply Status. Sources of supply shall provide status (DLMS 870S) after processing requisition modifier transactions as follows:

C4.7.23.1.4.1. Invalid Transaction Entries. When the modifier transaction contains invalid entries for data elements listed in paragraph C4.5.1. or the DoDAAC authority code edits in paragraph C4.10.11., the modifier request shall be rejected using Status Code D7.

C4.7.23.1.4.2. Requisition Modifier Transaction Not Honored. When the requisition modifier transaction is not honored because the requested modifications cannot be made, sources of supply shall provide Status Code B2 to the activities designated on the unmodified requisition.

C4.7.23.1.4.3. Modifications Successfully Processed. When the requested modifications have been successfully processed, Status Code BK shall be provided.

C4.7.23.1.5. In addition, when modifier transactions are processed, sources of supply shall provide the latest supply or shipment status to all parties identified in the original or modified requisition transaction.

C4.7.23.1.6. Sources of supply shall process requested modifications only when all data fields can be modified, as requested. If this cannot be done, reject the modifier using DLMS 870S with Status Code B2.

C4.7.23.2. Submitting Modifier Transactions to Storage Activities. When the DoD Components modify MROs, submit a modifier transaction (DLMS 940R) to the applicable storage activity. Prepare the DLMS 940R modifier transaction as a result of processing the requisition modification.

C4.7.23.2.1. Storage activities, upon receipt of MRO modifier transactions, shall modify the original MRO whenever the modifier is received prior to the actual printing of the [DD Form 1348-1A](#), "Issue Release/Receipt Document." This

shall be accomplished by matching the document numbers of modifier transactions with document numbers of MROs having been previously received, including a match of suffix codes.

C4.7.23.2.2. These modified transactions shall be processed in the normal manner prescribed for MROs.

C4.7.23.2.3. When storage activities receive MRO modifier transactions for which they have no record of the original MRO, they shall process the modifier transactions as new MROs.

C4.7.23.2.4. Storage activities shall provide DLMS 945A with Status Code B2 or BK to advise sources of supply when requested modifications are or are not accomplished.

C4.7.23.3. Referring Activity Processing. When requisition modifications are referred to another source of supply, the referring activity shall identify the activity to which the requisition was referred as well as their own activity in the transaction and retransmit. Processing points receiving such passed transactions shall not automatically pass such transactions back to the processing point from which the transaction was received without obtaining the prior agreement of that activity.

C4.7.24. Processing Single Line-Item Cancellation Requests. Sources of supply, procurement, storage, and reporting activities shall process single line-item cancellations, as prescribed herein.

C4.7.24.1. Preventing Shipment of Unwanted Materiel. Sources of supply, procurement, and storage, and reporting activities are responsible for exercising the fullest practical resourcefulness in preventing the issue and shipment of unwanted materiel. The practical considerations involved in processing cancellation requests include such factors as time, related packing and handling costs, the dollar value, and location of materiel for which cancellation is requested.

C4.7.24.2. General Rules. General rules for the disposition and diversion of materiel that has been shipped are as follows:

C4.7.24.2.1. Sources of supply are responsible for providing diversion and/or disposition instructions for all items under their control destined for OCONUS that have progressed to the point where procurement actions cannot be terminated or shipment into the DTS has occurred. When OCONUS shipments have been lifted from CONUS terminals, the responsibility for diversion or disposition is that of the consignee, the appropriate theater commander, or the DoD Component.

C4.7.24.2.2. Sources of supply may request diversion or disposition instructions from the DoD Component contact points designated on the DLA Logistics Management Standards Website www.dla.mil/j-6/dlms/eLibrary/Restricted/SvcPointsPOC/default.asp for both

nonstocked and non-NSN items. However, sources of supply may, based on their stock position, divert materiel to depot stock.

C4.7.24.2.3. The DoD Components may predetermine and designate alternate consignees so that the DoDAAC of these activities may be inserted in later supply and/or transportation transactions. These predetermined destinations shall be based on considerations as stated above, and may vary by NSN, FSC, or Federal Supply Group (FSG).

C4.7.24.2.4. When OCONUS shipments cannot be diverted or held for disposition, storage, and procurement, activities shall advise sources of supply when elements of the DTS were unable to accomplish the desired shipment diversion or hold. The source of supply shall provide a DLMS 856S to all eligible recipients of status. These transactions shall contain a date, as provided by the clearance authorities, on which the shipment was lifted from the terminal for delivery OCONUS.

C4.7.24.2.5. When diversion of OCONUS shipments is accomplished by the DTS, sources of supply shall furnish a DLMS 870S with Status Code B6 to all authorized status organizations. The advice of actions taken by the DTS shall be provided under DTR 4500.9-R.

C4.7.24.2.6. Sources of supply shall automatically initiate cancellation action for unfilled quantities of materiel obligations or open requisitions upon deletion from the DoDAAD of a DoDAAC identified as requisitioner, ship-to, or bill-to activity. Applicable supply and shipment status shall be furnished to authorized recipients and, in the event DAAS does not have a recorded DoDAAC, the status shall be disposed of.

C4.7.24.2.7. Costs incurred in cancellations/diversion shall be billed as provided in subparagraph C4.7.28.6.

C4.7.24.2.8. No attempt shall be made to stop or divert shipments to CONUS (domestic) consignees once released for shipment, regardless of the mode of shipment.

C4.7.25. Processing Mass or Universal Cancellation Requests

C4.7.25.1. Sources of supply are responsible for ensuring that requisition processing, procurement, and storage activities exercise the fullest practical resourcefulness in preventing the issue and shipment of unwanted materiel. The practical considerations involved in the processing of cancellation requests include such factors as time, packing and handling, related costs, and the location of materiel for which cancellation is requested.

C4.7.25.2. Sources of supply in receipt of mass or universal cancellation requests shall cancel quantities for which MROs, and/or purchase requests have not been submitted to storage or procurement activities. Provide a DLMS 870S, with Status Code BQ or B4, as appropriate, as notice of accomplished cancellations to all authorized status organizations within the timeframe for sending status.

C4.7.25.3. Sources of supply shall send a DLMS 870S with Status Code B9 to all authorized status organizations under Chapter 5 within the timeframes for sending status for:

C4.7.25.3.1. Unconfirmed MROs and open procurement actions.

C4.7.25.3.2. MRCs that indicate shipment to OCONUS activities within 45 calendar days of the effective date of the mass cancellation.

C4.7.25.4. Provide a DLMS 870S with Status Code BQ, B4, or B6 as notification for each line-item actually canceled or diverted and Status Code B8 for each line-item not canceled or diverted.

C4.7.25.5. Sources of supply shall provide storage activities cancellation requests, DLMS 940R, for all unconfirmed MROs and MRCs that indicate shipment to OCONUS activities within 45 calendar days of the effective date of the mass or universal cancellation.

C4.7.25.6. Sources of supply shall provide procurement activities cancellation requests, DLMS 869C, for all open procurement actions.

C4.7.25.7. Sources of supply shall not provide storage and procurement activities with cancellation requests when:

C4.7.25.7.1. In receipt of MRCs that show shipment has been accomplished by parcel post.

C4.7.25.7.2. In receipt of MRCs that show shipment to CONUS activities has been accomplished.

C4.7.25.7.3. In receipt of MRCs that show shipment to OCONUS customers was accomplished more than 45 calendar days prior to the receipt of the mass or universal cancellation request.

C4.7.25.8. The following rules apply to mass or universal cancellation of shipments from storage:

C4.7.25.8.1 Upon receipt of the mass or universal cancellation DLMS 869C pending the receipt of single line-item cancellation requests DLMS 940R from the source of supply, the storage activity shall identify all affected MROs where the items have not been released to a carrier for delivery to the consignee.

C4.7.25.8.2. For universal cancellation, the storage activity shall suspend further processing of all MROs, including any containing Special Requirements Code 555.

C4.7.25.8.3. For those OCONUS shipments that meet the mass or universal cancellation criteria and have entered the DTS within 45 calendar days of the

date of the mass or universal cancellation request, the storage activity shall generate a DLMS 945A with Transaction Type Code NR in the WO6 segment and Status Code DW in the LQ segment.

C4.7.25.8.4. Storage activities shall accomplish cancellation for all items for which single line-item cancellation requests, DLMS 940R with Transaction Type Code ND, are received from the source of supply and the items have not been released to a carrier for delivery to the consignee.

C4.7.25.8.5. Storage activities shall advise the source of supply of their actions taken in response to cancellation requests. When a shipment has not been released to the carrier for delivery to consignee and cancellation is accomplished, DLMS 945A shall be prepared and sent to the source of supply with Status Code BQ.

C4.7.25.8.6. When storage activities do not accomplish cancellation, the source of supply shall be furnished DLMS 945A with Status Code B8.

C4.7.25.8.7. Storage activities in receipt of transportation confirmation of shipment diversion transactions shall send to the appropriate source of supply a materiel release advice with Status Code BQ, for requisitions contained within the shipment unit. The materiel release advice in this instance shall contain, in addition to the normal data elements, the identification of the new consignee.

C4.7.25.8.8. Storage activities in receipt of transportation denial of shipment diversion transactions shall send to the appropriate source of supply a materiel release advice with Status Code B8.

C4.7.25.9. All rules governing single line-item cancellation of shipments from procurement also apply to requests for mass or universal cancellation, except as modified herein:

C4.7.25.9.1. The source of supply shall initiate cancellation requests for all items scheduled for direct delivery, and for which purchase requests have been submitted, regardless of materiel costs.

C4.7.25.9.2. Procurement activities shall not initiate actions with the DTS to cause diversion of shipments at terminals.

C4.7.25.9.3. For those OCONUS shipments that have entered the DTS within 45 calendar days of the date of the mass or universal cancellation request, or from the date of receipt of the DLMS 869C from the source of supply, the procurement activity shall send a DLMS 945A with Action Code AW in the W06 segment to the DLA Transaction Services.

C4.7.25.9.4. Procurement activities in receipt of confirmation of shipment diversion transactions shall send to the appropriate source of supply a DLMS 945A with Status Code BQ for requisitions contained within the shipment unit. The

DLMS 945A in this instance will contain, in addition to the normal data elements, the DoDAAC of the new consignee.

C4.7.25.9.5. Procurement activities in receipt of denial of shipment diversion transactions shall send, to the appropriate source of supply, a DLMS 945A with Status Code B8.

C4.7.25.10. Disposition of Frustrated Shipments and/or Materiel from Mass/Universal Cancellation Actions

C4.7.25.10.1. The disposition of frustrated shipments at WPOEs/APOEs that are the result of mass or universal cancellation action shall be as follows:

C4.7.25.10.1.1. Shipments from DoD storage activities, or from commercial vendors acting under the direction of a DoD procuring activity, shall be diverted to the predesignated storage sites of the shipping/procuring DoD Component.

C4.7.25.10.1.2. Shipments from GSA storage points, or from commercial vendors acting under the direction of a GSA-procuring activity, shall be diverted to predesignated GSA materiel returns facilities.

C4.7.25.10.1.3. DTS attempts to divert/frustrate shipments shall terminate 45 calendar days from the effective date of the mass or universal cancellation message.

C4.7.25.10.2. Certain strategic and tactical operations or political considerations may dictate that all shipments for a given consignee be stopped or diverted. In these most restrictive of shipment diversion situations, economic considerations, such as, the comparison of accessorial cost of stopping, holding, and returning the materiel to storage activities, the value of the canceled materiel, and the costs of the receiving activity to perform the necessary processing or reprocessing of the materiel are not controlling factors. In most situations, however, the strategic, tactical, or political environment is such that complete disregard of these economic considerations is not warranted.

C4.7.25.10.3. Transportation diversion procedures are established to permit diversion only if the materiel being shipped can be identified and located by TCN.

C4.7.25.10.3.1. Non-Consolidated Shipment Units. Shipment units eligible for cancellation that have not been consolidated into a container with other shipments shall be stopped and diverted by the POE up to the point of lift. Diversion of cancellation eligible shipments at or beyond the POD shall be the responsibility of the appropriate theater, force, logistics, or type commander.

C4.7.25.10.3.2. Consolidated Multiple Shipment Units. Individual line-items shall not be removed from multiple-line shipment units (consolidated packs), nor shall a shipment unit container be removed from a multi-container shipment (SEAVAN) type device. Shipment units cannot be diverted in the DTS if stuffed or

loaded with other shipment units or on multiple shipment unit devices; such as, SEAVANS, container express (CONEX), MILVANS (Military Van), and Aircraft 463LPallets.

C4.7.25.10.4. For those mass or universal cancellation requests that specify FSC, FSG, NSN, or part number data, the DTS shall stop and frustrate, for the DoD Component review, all shipments of the canceling DoD Component for the affected consignees. Disposition of cancellation eligible shipments at or beyond the POD shall be the responsibility of the appropriate theater, force, logistics, or type commander.

C4.7.25.10.5. DTS shall generate specified documentation for the following categories of shipments:

C4.7.25.10.5.1. For all shipments that are diverted, as a result of mass or universal cancellation, DTS shall generate a confirmation of shipment diversion transaction to DAAS. The confirmation of shipment diversion shall contain complete transportation movement and control document (TCMD) data for each shipment unit and, if available, the contract number. In addition:

C4.7.25.10.5.1.1. For shipments diverted under pre-positioned instructions, DTS shall send a BL to the new consignee.

C4.7.25.10.5.1.2. For shipment units frustrated but not diverted to a specific site, DTS shall send a request for disposition instructions to DAAS, that will route the transactions to the appropriate DoD Component contact points. In situations where the designated DoD Component contact point is a collocated liaison office, the request for disposition instruction transactions shall be listed and provided to the contact point directly. After receipt of disposition instructions for such frustrated shipments, DTS shall prepare a BL or other appropriate transaction for the new consignee.

C4.7.25.10.5.1.3. For shipments in transit to, at, or between POD and OCONUS consignee, OCONUS DTS activities shall request disposition instructions from the appropriate theater, force, logistics, or type commander's designated contact point.

C4.7.25.10.5.2. For shipments in transit between WPOE/APOE and OCONUS consignees less than 30 calendar days, DTS shall:

C4.7.25.10.5.2.1. Generate a listing of the manifest shipment unit data, vessel/aircraft identification, and departure date, water port of debarkation (WPOD)/aerial port of debarkation (APOD), and estimated time of arrival (ETA). This listing shall be sent to the affected OCONUS command component, the appropriate WPOD/APOD, and to the designated contact point, if requested.

C4.7.25.10.5.2.2. Send denial or shipment diversion transactions for each individual shipment unit to DAAS.

C4.7.25.10.6. Storage sites in receipt of diverted shipments shall report the receipt to the appropriate source of supply under Chapter 13. Reconsignment/disposition shall be as directed.

C4.7.25.10.7. The DoD Component initiating cancellation requests applicable to U.S. Forces requisitions shall be charged with: (1) transportation and terminal costs associated with holding, stopping, and returning materiel to storage; (2) procurement termination costs when it is determined that termination is in the best interest of the Government; and (3) excess transportation costs that may be incurred when moving cargo unaffected by the mass or universal cancellation action. Specific instructions concerning materiel transportation charges and credit allowances are contained in the [DoD 7000.14-R](#), [DoD 4140.1-R](#), [FPMR 101-26.311](#), and [FPMR 101-27.505](#).

C4.7.26. Processing of Mass or Universal Cancellation Transactions by DAAS

C4.7.26.1. Upon receipt of the mass or universal cancellation request, DLA Transaction Services shall begin the establishment of a transportation to supply documentation correlation (TSDC) file. DLA Transaction Services shall add to the TSDC file a copy of each DLMS 945A that has Transaction Type Code NR in the WO6 segment and Status Code DW in the LQ segment.

C4.7.26.2. When a confirmation of shipment diversion transaction is received from the DTS, DAAS shall match the TCN with the TCN in all applicable DLMS 945A transactions in the TSDC file. DAAS shall send a DLMS 870S with Status Code B6 to the applicable source of supply for each materiel release advice transaction matched. In this instance, the supply status transaction shall contain the DoDAAC of the new consignee.

C4.7.26.3. When a denial of shipment diversion transaction is received from DTS, DAAS shall match the TCN with the TCN in all applicable materiel release advice transactions in the TSDC file. DAAS shall send DLMS 870S with Status Code B8 to the applicable source of supply for each materiel release advice matched.

C4.7.26.4. When a request for disposition instructions is received from DTS, DAAS shall match the TCN with the TCN in all applicable materiel release advice transactions in the TSDC file. DAAS shall send a narrative message to the designated canceling DoD Component contact point that provides the contact point with the TCMD transaction data, plus all supporting materiel release advice transactions that comprise the shipment.

C4.7.26.5. For those materiel release advice transactions on which confirmation/denial shipment diversion, or request for disposition instruction transactions are not received within 21 calendar days of the date of the mass or universal cancellation request, DAAS shall initiate a shipment tracer action under [DTR 4500.9-R](#), "Defense Transportation Regulation," to the APOE/WPOE indicated in the materiel release advice.

C4.7.26.6. When confirmation/denial of diversion or request for disposition instruction transactions are received from the transportation clearance authorities and DAAS does not find a corresponding materiel release advice record within the TSDC file, DAAS shall forward DLMS 870S transactions to the shipping activity identified in the transportation mass/universal cancellation status transactions.

C4.7.27. Source of Supply Processing of Single Line-Item Cancellation Requests. Process cancellation requests DLMS 869C, as follows:

C4.7.27.1. First, against backorders in the following order of assigned Status Codes: BB, BC, BD, **BP**¹³ BZ, and BV.

C4.7.27.2. Second, against unconfirmed shipments (Status Code BA).

C4.7.27.3. Third, confirmed OCONUS shipments DLMS 945A, when shipped (to surface/aerial POEs and SEAVAN assembly points) prior to ICP receipt of cancellation requests in less than 45 calendar days for surface mode and 10 calendar days for air mode.

C4.7.27.4. Fourth, against all other status.

C4.7.28. Processing Point Procedures. Processing points receiving passed follow-up transactions shall not automatically pass such transactions back to the processing point from which the transaction was received without obtaining prior agreement of that activity.

C4.7.28.1. Initiating. Initiate/accomplish cancellation actions against the quantity in the cancellation request received.

C4.7.28.2. Editing. Edit cancellations processed to preclude duplicate cancellations. As a minimum, this edit shall compare quantity, document number, suffix, and preparation date. Discard duplicates. Process all other cancellations as received.

C4.7.28.3. Processing. Process cancellation requests, regardless of dollar value or quantity, to immediately cancel quantities for which MROs and purchase requests have not been submitted to the storage, reporting, or procurement activities.

C4.7.28.4. Quantity Limits. If the quantity in the cancellation request is equal to, or less than, the backorder quantity at the source of supply (Status Code BB, BC, or BD), effect cancellation immediately and send a DLMS 870S with Status Code BQ to all authorized status organizations. Since cancellation action cannot be effected immediately on requisitions in Status Code BV, send a DLMS 870S with Status Code B9 to all authorized status organizations.

¹³ **Staggered implementation authorized. Refer to ADC 93A.**

C4.7.28.5. Diversions. When cancellation requests are against released shipments or direct vendor delivery with Status Code BV, the source of supply shall consider diversion of the materiel to depot stock or to fill other demands/backorders, or contract termination, as appropriate. The foregoing also applies to nonstocked and non-NSN materiel at S/A option, when there is a foreseeable demand for the item.

C4.7.28.6. Status. In the event the above actions are taken, use a DLMS 870S with Status Code B4 to indicate that the organization identified in the canceled requisition may be billed as follows:

C4.7.28.6.1. Transportation costs for returning the materiel to storage and/or procurement termination costs when it is determined that termination is in the best interest of the Government.

C4.7.28.6.2. Specific instructions concerning materiel, transportation charges, and credit allowances are contained in the MILSBILLS procedures documented in DLM 4000.25, Volume 4, Finance.

C4.7.28.6.3. In addition to the above costs, when applicable, the source of supply shall bill rebuilding costs and other expenses incurred in canceling SA requisitions under [DoD 5105.38-M](#).

C4.7.28.6.4. Charge for transportation (such as terminal costs associated with stopping, holding, and returning materiel to depots or storage) and procurement termination costs incidental to actual diversion/cancellation of FMS requisitions under [DoD 5105.38-M](#).

C4.7.28.7. Reversals. Demand data previously recorded will be reversed by the quantity of the cancellation request. The demand data must always be adjusted regardless of the outcome of processing the cancellation request.

C4.7.28.8. Notification. Provide notice of the success or failure of cancellation or diversion actions to all authorized status organizations under section C5.2. Use the supply or shipment status to provide this notice as follows:

C4.7.28.8.1. DLMS 870S with Status Code B4, B6, BQ, BR, or BS to indicate cancellations/diversions accomplished.

C4.7.28.8.2. DLMS 870S with Status Code B9 to indicate cancellation/diversion action being attempted.

C4.7.28.8.3. DLMS 856S with shipment status to indicate cancellation/diversion not accomplished.

C4.7.28.8.4. DLMS 870S with Status Code B8 to indicate cancellation not accomplished as a follow-up to the previously sent Status Code B9.

C4.7.28.8.5. DLMS 870S with Status Code BF to indicate no record of the transaction reference number for the cancellation request submitted.

C4.7.28.8.6. DLMS 870S with an appropriate B_, C_, or D_ series status code for those transactions showing a record of a previous cancellation or rejection.

C4.7.29. Source of Supply Submission of Single Line-Item Cancellation/Diversion Requests to Procurement

C4.7.29.1. Using DLMS 869C. Use a DLMS 869C to prepare cancellation requests. Cite the appropriate contract data when sending cancellation requests to procurement. Identification of the contract data or procurement/purchase request number (PRN) shall be dependent upon whether a number is assigned to a contract and is known to the source of supply at the time of receipt of the cancellation request. When the PRN is used, indicate the DoDAAC of the consignee to which to divert the shipment. When the source of supply does not desire diversion, do not indicate a diversion address.

C4.7.29.2. Required Information. All requests for cancellation/diversion submitted to the procurement activity shall contain the following minimum information:

C4.7.29.2.1. Notification that the transaction is a request for cancellation or diversion.

C4.7.29.2.2. Identification of the source of supply submitting the request.

C4.7.29.2.3. The stock or part number or description of the item involved.

C4.7.29.2.4. The quantity of the item to be canceled/diverted.

C4.7.29.2.5. The original requisition document number and the suffix code, if applicable.

C4.7.29.2.6. Identification of the ship-to and mark-for addresses, as contained in the applicable purchase request.

C4.7.29.2.7. All contract data, if known; otherwise, the PRN and date of the purchase request.

C4.7.29.2.8. Diversion or hold instructions to include coded and in-the-clear, ship-to, and mark-for addresses for shipment, if diversion is to be accomplished.

C4.7.29.3. Cancellation/Diversion Requests. Submit cancellation/diversion requests to procurement activities:

C4.7.29.3.1. Regardless of dollar value and/or quantity, when the purchase requests have been submitted but the contracts have not been awarded. This applies to items and/or quantities assigned Status Code BZ.

C4.7.29.3.2. For items and/or quantities on awarded contracts and/or purchase agreements and the dollar value of the cancellation/diversion action exceeds \$200.

C4.7.29.4. Source of Supply Responsibilities. Sources of supply shall decide whether to suspend or continue the cancellation, diversion, or hold actions. Decisions to continue cancellations or diversions shall be provided to procurement activities by cancellation request documents prepared in the manual format and containing the notation: SOURCE OF SUPPLY DECISION FOR CANCELLATION OR DIVERSION. Sources of supply shall advise the ILCO of contractual agreements that will result in cost conditions if cancellations, diversions, or holding are accomplished. ILCOs shall decide whether the cancellation, diversion, or hold actions will be suspended or continued. Decisions to continue cancellations or diversions shall be sent to the source of supply by narrative message containing the notation: ILCO DECISION FOR CANCELLATION OR DIVERSION.

C4.7.29.5. Exceptions to Cancellation/Diversion Requests. Do not submit cancellation/diversion requests or requests for determination whether cancellation is in the best interest of the Government to procurement activities when:

C4.7.29.5.1. The dollar value of the request is less than \$200.¹⁴

C4.7.29.5.2. DD Form 250, "Material Inspection and Receiving Report," shipment performance notice (SPN), vendor shipment notice, or equivalent is on record indicating:

C4.7.29.5.2.1. Shipments to CONUS consignees were released to carriers regardless of dollar value.

C4.7.29.5.2.2. Shipments to OCONUS consignees were previously released to carriers, and the number of days prescribed above have elapsed (10 calendar days air/45 calendar days surface).

C4.7.29.5.2.3. Shipment/delivery by air mail or parcel post. In this case, shipment status shall be sent in response to cancellations received.

C4.7.29.6. Notice of Cancellation/Diversion Actions. Send notice of the success or failure of cancellation or diversion actions to authorized status organizations under the procedures of Chapter 5. Use supply and/or shipment status to provide this notice as follows:

¹⁴As an exception for intra-Component use only, cancellation/diversion may be submitted to procurement regardless of dollar value when critical/short supply items are affected.

C4.7.29.6.1. DLMS 870S with Status Code B4, B6, BQ, or BS applies to cancellations/diversions accomplished.

C4.7.29.6.2. DLMS 870S with Status Code B9 indicates cancellation/diversion action being attempted.

C4.7.29.6.3. DLMS 856S with shipment status indicates cancellation/diversion not accomplished.

C4.7.29.6.4. DLMS 870S with Status Code B8 indicates cancellation not accomplished when Status Code B9 previously sent.

C4.7.30. Procurement Activity Processing of Single Line-Item Cancellation and/or Diversion Requests to Procurement

C4.7.30.1. Processing Sequence. DLMS 869C and manual cancellation/diversion requests shall be processed in PD sequence.

C4.7.30.2. Immediate Cancellation. Immediate cancellation action shall be taken when contracts have not been awarded and/or firm orders have not been issued/placed.

C4.7.30.3. Procurement Activity Responsibilities. Procurement activities shall advise the source of supply of contractual agreements that may result in unfavorable cost conditions if cancellation, diversion, or holding actions are accomplished. Sources of supply shall decide whether the cancellation, diversion, or hold actions will be suspended or continued. Decisions to continue cancellation or diversion shall be sent to procurement activities by cancellation request documents prepared in the manual format and containing the notation: SOURCE OF SUPPLY DECISION FOR CANCELLATION OR DIVERSION.

C4.7.30.4. Cost of Diversion. The cost of diversion or shipment hold actions shall be sent to the source of supply for appropriate billing. Costs incurred in contract termination and diversion shall also be sent to sources of supply to permit appropriate billing.

C4.7.30.5. Procurement Actions with Clearance Authorities. Procurement activities are required to initiate actions with clearance authorities to cause diversion of shipments at terminals. Procurement activities requiring diversion instructions, when a new consignee is not provided, shall request these instructions from the source of supply by telephone or message.

C4.7.30.6. Actions Not in Government's Best Interest. When the above cancellation/termination or diversion/hold actions would not be in the best interest of the Government, the source of supply shall be advised and requested to give a decision by a specified date.

C4.7.30.7. Initiating Contract Actions. Actions to cancel, divert, or terminate contracts shall be initiated within one working day from receipt of cancellation requests. These actions must be completed as fast as possible, but shall not exceed five working days for PD 01-08 requests and 10 working days for PD 09-15 requests. When multiple cancellation requests are received on the same day, consideration shall be given to the priority of the requests, OCONUS destination, the dollar value of the materiel, and the status of the contract involved.

C4.7.30.8. Source of Supply Notification. The procurement activity shall advise the source of supply the attempted stop/diversion action has/has not been done by DTS within two working days of receiving the confirmation/denial notification from DTS.

C4.7.31. Source of Supply Processing of Cancellation Requests for MROs of Retail Assets

C4.7.31.1. Requirements. Source of supply cancellation requests, DLMS 940R, shall be sent to reporting activities regardless of dollar value and quantity when Status Code BA is recorded, but shipment status has not been received. The source of supply shall send DLMS 870S with Status Code B9 to all eligible recipients. If shipment status has been received, provide this status to all eligible recipients.

C4.7.31.2. Status Reporting. Sources of supply in receipt of responses to cancellation requests shall send appropriate status to all eligible recipients.

C4.7.32. Source of Supply Submission of Single Line-Item Cancellation and/or Diversion Requests to Storage Activities

C4.7.32.1. Requirements. Source of supply cancellation requests or follow-ups on cancellation requests, DLMS 940R, shall be sent to storage activities:

C4.7.32.1.1. Regardless of dollar value and quantity when Status Code BA is recorded, but an MRC has not been received; this applies to PD 01-15 requisitions/MROs for U.S. Forces, CONUS and OCONUS, and SA.

C4.7.32.1.2. When MRC is recorded on an OCONUS shipment released to a carrier for shipment to POE, less than 45 calendar days by surface mode or less than 10 calendar days by air mode, and the dollar value of the shipment exceeds \$200.

C4.7.32.2. Diversions. DLMS 940R shall identify the DoDAAC of the activity to which shipments will be diverted when shipment has already been released. When the source of supply does not desire or cannot provide diversion to a specific activity, do not indicate a diversion address. In the latter case, the source of supply shall obtain and provide alternate destinations, if requested, by storage activities.

C4.7.32.2.1. Attempted Diversions. In the case of an attempted diversion, the source of supply shall send DLMS 870S with Status Code B9 to authorized status organizations.

C4.7.32.2.2. Exceptions. Sources of supply shall not send storage activities requests for cancellation/diversion when:

C4.7.32.2.2.1. In receipt of the MRC at the time of receipt of a cancellation request and the item requested for cancellation has a line-item value of less than \$200 and is for an OCONUS shipment.

C4.7.32.2.2.2. Receipt of an MRC and OCONUS shipment has been done by parcel post, priority mail, or UPS.

C4.7.32.2.2.3. The MRC is recorded on an OCONUS shipment released to the carrier for shipment more than 45 calendar days by surface mode or 10 calendar days by air mode prior to receipt of the cancellation request.

C4.7.32.2.2.4. Receipt of the MRC and shipment to a CONUS activity was done prior to the receipt of the cancellation request.

C4.7.32.2.3. Shipment Status Reporting. In the instances described above, send DLMS 856S to authorized status organizations.

C4.7.33. Storage Activity Processing of Single Line-Item Cancellation and/or Diversion Requests

C4.7.33.1. Processing Cancellations. Process cancellations using DLMS 940R in the sequence prescribed in paragraphs C4.7.1.2, and C4.7.27.

C4.7.33.2. Maintaining Records. Maintain records to allow a determination whether line items shipped were in single-line or multi-line shipment units and the respective dollar value of each. This allows identification of shipment units susceptible to cancellation and determination whether cancellation actions should be continued under the following policies and procedures.

C4.7.33.3. DoD Component Data Processing. To the extent that processing capability is available, the DoD Components shall develop and maintain data to:

C4.7.33.3.1. Allow identification of the depot work area to which shipment processing should have progressed. Work areas for consideration are shown in Table C4.T3.

Table C4.T3. Depot Work Area Identification

COMPUTER	STORAGE	SHIPMENT PREPARATION	SHIPPING
Mechanized processing of DLMS 940 - Materiel Releases and output of DD Forms 1348-1A and stop shipment notices	Bin Area Bulk Area	Preservation Packaging Packing Consolidation Parcel Post	Consolidation Air Freight Motor (Truck) Freight Rail Freight

C4.7.33.3.2. Include the maximum time experienced in processing DD Form 1348-1A or [1348-2](#), "Issue Release/Receipt Document with Address Label," shipments in each of the above work areas (within total time allowed by DoD 4140.01-R from receipt of MRO to release to transportation). Such data would provide a basis for determining the work areas where stop shipment action could be taken on receipt of a source of supply cancellation request to the storage activity. Also, consider the transaction priority as it affects processing time in hours versus days.

C4.7.33.4. Routing. The storage activity, upon receipt of a cancellation request DLMS 940R from the source of supply, shall determine the appropriate work area(s) to which the stop shipment notices would be sent when cancellation of an in process DD Form 1348-1A shipment is required. Stop shipment notices shall include pertinent line-item/transaction identification, priority, and information whether a single-or multi-line shipment unit, is involved. A separate stop shipment notice shall be issued to the current work area and every other work area through which the shipment would later be processed.

C4.7.33.5. Cancellation. Do cancellation for all items/quantities for which a DD Form 1348-1A has not been released to storage work areas.

C4.7.33.6. Release to Storage Work Area. Attempt cancellation for all items/quantities for which a DD Form 1348-1A has been released to storage work areas and there is no record of transportation release to a carrier, unless:

C4.7.33.6.1. The dollar value is less than \$25 for a single line-item shipment unit.

C4.7.33.6.2. The dollar value of a single line-item packed in a consolidated shipment unit is less than \$200.

C4.7.33.7. Source Notification. The storage activity shall advise the source of supply and, if applicable, all authorized status organizations of actions taken in response to cancellation requests. Send this notice as follows:

C4.7.33.7.1. When the storage activity has no record of the MRO receipt, provide Status Code BF using a DLMS 945A.

C4.7.33.7.2. When the items have not left the depot and cancellation action is accomplished, respond only to the source of supply with a DLMS 945A with Status Code BQ.

C4.7.33.7.3. When cancellation is not attempted under the less than \$25/\$200 criteria, the storage activity shall send the source of supply a DLMS 945A with Status Code B8.

C4.7.33.7.4. When the items have been released to a carrier in shipments destined to a CONUS customer, take no action to stop/divert the materiel beyond the point of shipment. Send the source of supply a DLMS 945A with Status Code B8 (Transaction Type Code NJ in the WO6 segment) and pertinent shipping information in the applicable segments.

C4.7.33.7.5. When the items have been released to a carrier in shipments destined for an OCONUS consignee, the storage activity shall initiate actions under DTR 4500.9-R to stop or divert shipments within the DTS. Send Status Code B9 to the source of supply via a DLMS 945A.

C4.7.33.7.6. The storage activity shall not initiate action to stop or divert OCONUS shipments within DTS when:

C4.7.33.7.6.1. The items are consolidated in a multi-line shipment unit.

C4.7.33.7.6.2. The items were in OCONUS shipments released to carriers for shipment more than 45 calendar days by surface or more than 10 calendar days by air prior to receipt of the cancellation request.

C4.7.33.7.6.3. The items were shipped to OCONUS customers by priority mail, parcel post, or UPS.

C4.7.33.7.6.4. A single line-item shipment has a total dollar value of less than \$200.

C4.7.33.7.6.5. The single line-item shipment unit has a total dollar value of less than \$1,000 and was shipped in consolidation with other shipment units in a larger container, such as a CONEX and SEAVAN.

C4.7.33.8. Status Notification. Following receipt of confirmation that shipment stop or diversion action has been accomplished by DTS, the storage activity shall provide Status Code B6 to the source of supply.

C4.7.33.9. Stop/Diversion Non-Initiated. When the storage activity does not initiate stop or diversion action with DTS because of one of the conditions identified above or, when notified that a requested stop or diversion action has not been done by DTS, the storage activity shall send to the source of supply a DLMS 945A with Status

Code B8 (Transaction Type Code NJ in the WO6 segment) and pertinent shipping information in the applicable segments.

C4.7.33.10. Notification Requests. Storage activities requiring diversion instructions when applicable information is not included in the cancellation request shall request such instructions from the source of supply by telephone or message.

C4.7.33.11. Processing Time. Storage activities must complete the above actions in two working days for PDs 01-08 and five working days for PDs 09-15.

C4.7.33.12. Status of Stop/Diversion Request. The storage activity must advise the source of supply the attempted stop or diversion action has or has not been done by DTS within two working days of receiving the confirmation or denial notification from DTS.

C4.7.34. Reporting Activity Processing Cancellation Requests for Lateral Redistribution Orders (LRO) of Retail Assets

C4.7.34.1. Cancellation. Reporting activities shall attempt cancellation to the maximum extent possible.

C4.7.34.2. No LRO Record. When the reporting activity has no record of the LRO receipt, send the source of supply a DLMS 945A with Status Code BF.

C4.7.34.3. Cancellation not Possible. When cancellation cannot be done, send the source of supply a DLMS 945A with Status Code B8.

C4.7.34.4. Successful Cancellation. When cancellation can be done, send the source of supply a DLMS 945A with Status Code BQ.

C4.7.34.5. Diversion. The reporting activity shall not attempt diversion of materiel confirmed shipped.

C4.7.35. Direct Vendor Delivery on Requisitions

C4.7.35.1. Supply Activity Interface. In instances where requisitions are done by DVD, an interface is required between supply and purchasing operations. This interface will result in an interchange of specific information and documentation between sources of supply and procurement activities to ensure:

C4.7.35.1.1. Transmission of status to designated recipients in an orderly and timely fashion.

C4.7.35.1.2. Proper marking of shipment containers.

C4.7.35.1.3. Delivery of materiel using priorities or RDDs.

C4.7.35.2. Purchase Requests. Purchase requests must contain specific in-the-clear and coded data, as specified below, that shall be perpetuated on procurement instruments and related transactions:

C4.7.35.2.1. The original requisition number, including suffixes when assigned.

C4.7.35.2.2. In-the-clear, ship-to address of the ultimate consignee and mark-for address, when applicable.

C4.7.35.2.3. Project code and project name, if applicable.

C4.7.35.2.4. Schedule of deliveries using RDDs or RADs, as applicable. List items on procurement requests in descending sequence of delivery or availability dates. (A separate requisition number is required for each delivery date, consignee, and priority.) This sequence will provide for listing items with earliest dates first and shall result in the required schedule of deliveries.

C4.7.35.2.5. Identification and address of the organization to receive the notice or evidence of shipment made by contractors as required by Defense Federal Acquisition Regulation Supplement (DFARS) Appendix F.

C4.7.35.3. DVD Requisitions. Identify requisitions to be supplied by DVD sources separately from stock replenishment buys on purchase requests.

C4.8. ARMY EXCHANGE REPARABLE PRICING PROCESS

C4.8.1. The Army approach to the Exchange Pricing (EP) is a multi-system functionality implementation. EP employs a dual pricing system for reparable NSN items based upon standard price (latest acquisition cost plus recovery rate), EP (latest repair cost plus cost recovery rate), and a “buy one – return one” relationship with the customer. That is, a qualified exchange pricing customer buys at the EP and pays a penalty if a reparable is not turned-in within a specified period of time from the issue date. This process is applicable to Army customers and Army-managed materiel only; other Services will continue to pay Standard Price and receive 65% credit exchange upon receipt of carcass by the Army PICA.

C4.8.2. Once an item of supply is identified for a national repair program and the NIIN has an established Exchange Price, all requisitions for the items shall be priced at the Exchange Price if the customer is an authorized EP customer.

C4.8.3. When a requisition submitted to the Supply Support Activity (SSA) is processed by the Standard Army Retail Supply System (SARSS), SARSS shall determine if both the customer DoDAAC is an EP customer, and the NIIN has an established EP indicator. As this transaction is processed through the Army supply system, middleware, Funds Control Module (including EP Tracking), DAAS, Commodity Control Supply System (CCSS), and Army Logistics Modernization Program (LMP), the EP indicator shall be used to identify the transaction as EP related. All the legacy

systems shall continue processing the legacy 80 record position transactions; LMP shall process DLMS transactions that are converted by DLA Transaction Services.

C4.8.4. All related supply transactions prepared by Army shall carry and perpetuate the EP Indicator. As a result of the EP implementation the following transactions are impacted: Requisition; Requisition Modifier; Requisition Follow-up; MRO; and Supply Status. The returns process shall also process EP related transactions. The Materiel Receipt Transaction shall be generated by SARSS for all returns of EP NIINs, and shall include an EP Type of Credit indicator for unserviceable credit when applicable, as well as an EP conversion indicator to identify the need to provide credit according to the pre-EP credit policy, that lasts for 60 calendar days following the implementation of EP.

C4.8.5. If the return is in an un-repairable condition code or the item is not returned within the established timeframe (Delta Delay Days), the National Level systems (LMP, CCSS) shall create an obligation adjustment based on the receipt from Middleware Funds Control Module of a Materiel Returns Supply Status (Delta Bill Trigger) Transaction. As a result of processing the delta bill trigger the national systems shall create the logistics/interfund bill transaction with an EP Indicator and type bill code to identify the specific type of EP bill to the Army financial system.

C4.9. NAVY EXCHANGE REPARABLE PRICING PROCESS

C4.9.1. Navy uses a two-tier pricing system for selling Depot Level Repairable materiel to Navy customers. The Navy sells DLRs to other Services at full (standard) price and then provides carcass value credit when the carcass is returned. This is the same method the Air Force and Army use when selling repairable items to the Navy. The Standard Price is the price representing the full value of the DLR item, and is the price charged when a Not Ready For Issue (NRFI) unit (also referred to as a 'Carcass') is not turned in. The Net Price (also referred to as Exchange Price) is the price that represents the cost of repairing a DLR item, and is the price charged to customers when a NRFI unit has been or will be turned in. Navy customers indicate on their requisitions whether or not a NRFI unit is available for turn-in via the Advice Code, and they are then charged Net or Standard Price accordingly.

C4.9.2. Requisitions received indicating that a carcass will be returned are tracked in the Navy's Carcass Tracking System. This system monitors these requisitions and matches them with carcass returns as they occur. This system also generates follow-ups to customers who have not returned their carcasses as promised. Ultimately, the system triggers an additional charge to the customer, if the carcass is not returned. Navy uses the term Carcass Charge for this additional billing; it represents the difference between Standard Price and Net (Exchange) Price. This additional billing is also referred to as a Delta Bill. If the customer returns the carcass after receiving the Carcass (Delta) Bill, then the additional billing is reversed, resulting in a Carcass Charge Reversal (Credit Delta Bill). Navy customers may also return excess DLRs for credit. The credit can be Standard, Net, or Carcass value.

C4.9.3. Under MILSBILLS legacy 80 record position billing, the Navy ICPs use the Sales Price Condition Code to indicate to customers that a particular bill is either Net (Exchange) Price or Carcass (Delta) Price. Once operational, Navy's Enterprise Resource Planning will replace the Navy ICP's legacy MILSBILLS billing system with a DLMS based system. Since DLMS does not utilize a Sales Price Condition Code, Navy will use a combination of Stock Exchange Code and Type of Bill Code to indicate on the bill that the price charged is Standard, Net, or Carcass price. The DAAS shall convert Navy DLMS bills back to MILSBILLS legacy 80 record position format for any Navy customers unable to accept DLMS formats.

C4.10. DEFENSE AUTOMATIC ADDRESSING SYSTEM EDIT OF INCOMING REQUISITIONS

C4.10.1. DAAS shall edit all incoming requisitions and other DLMS transactions for data errors and validity under procedures in DLM 4000.25-4, "Defense Automatic Addressing System."

C4.10.2. As a result of these edits, DAAS shall correct data entries or reject transactions. In case of source of supply errors, the correct source of supply shall be entered and the transaction rerouted, as appropriate.

C4.10.3. DAAS shall reject all requisitions/EMALL orders containing GY/GZ series AACs. DAAS shall send DLMS 870S transactions with Status Code CX to advise all concerned of rejection of the requisition.

C4.10.4. DAAS shall pass DLMS 511R part-numbered (DIC A02 and A0B) requisitions to the RIC present in the incoming transaction.

C4.10.5. DAAS shall validate requisitions for invalid/expired OSD/JCS Category D project codes
www.dla.mil/j-6/dlms/eApplications/LOG.NET/UI/Log_Qualifiers/lqvqcDetails.aspx?code=78
 DAAS shall blank out the inappropriate project code and send DLMS 870S with Status Code BK to the customer.

C4.10.6. DAAS shall validate F/AD I usage through the requisitioning process. Requisitions with an unauthorized priority designator according to
www.dla.mil/j-6/dlms/eApplications/LOG.NET/UI/Log_Qualifiers/lqvqcDetails.aspx?code=79
 shall be downgraded. DAAS shall send DLMS 870S with Status Code BK to the customer.

C4.10.7. DAAS shall perform validation of requisitions (DLMS 511R, DLMS 511M, 517M, and DLMS 869F) for accuracy and reasonableness of the entry in the RDD field and its compatibility with the PD. DAAS shall send a DLMS 870S with Status Code BK to advise the requisitioner of the resulting modification. For SA requisitions forwarded to the applicable ILCO, DAAS shall not blank out customer input. DAAS shall perform PD and RDD edits according to Table C4.T1.

C4.10.8. DAAS shall identify non-appropriated instrumentalities and prime vendor contractors using non-contractor DoDAACs for billing and provide for billing under non-interfund procedures by changing the fund code for these requisitions to XP. A DoD Prime Vendor contractor is identified as a DoDAAC beginning with SD. A non-appropriated funded activity is identified as a DoDAAC beginning with FT or FF. DAAS shall send a DLMS 870S with Status Code BK to the customer.

C4.10.9. DAAS shall perform validation of requisitions for authorized ordering or billing DoDAACs. Reject requisitions when the requisitioning DoDAAC is not authorized to order, identified as follows: DoDAACs beginning with F followed by all numeric, FA, or FY. Reject requisitions when the DoDAAC may not be used for billing, identified as DoDAACs beginning with FA or FY. DAAS shall send a DLMS 870S transactions with Status Code CX to advise all concerned of the rejection of the requisition.

C4.10.10. Requisition Date Edit. DAAS shall edit requisitions to reject any requisitions that are greater than one calendar year old, or are more than one day in the future.¹⁵ For all requisitions (DIC A01, A0B, A02, A0E, A05, A07, A04, A0D), where the requisition is not applicable to FMS/Grant Aid or Navy initial outfitting (document number Service Code N, R, or V, and Fund Codes equals: VO (Victor Oscar), V7 (Victor Seven), or LQ (Lima Quebec)), then:

C4.10.10.1. Reject requisitions that are more than one day in the future. If the document number ordinal date YDDD (rp 36-39) converted to CCYYDDD is greater than the current date plus 1 (CCYYDDD + 1), reject with Supply Status CD, and if less than or equal to the current date plus 1, allow to process.

C4.10.10.2. Reject requisitions that are greater than one year old. If the document number ordinal date YDDD (rp 36-39) converted to CCYYDDD is equal to or less than the current date minus 1 year (CCYYDDD - 1000), reject with Supply Status CD, and if greater than the current date minus 1 year (CCYYDDD - 1000), allow to process.

C4.10.11. DAAS and the source of supply shall perform validation of requisitions, modifiers, and follow-ups that can be treated as requisitions for authorized ordering, bill-to, or ship-to DoDAACs according to the DoDAAC Authority Codes below (Table C4.T4.), and will reject requisitions that do not meet the DoDAAC authority code edits.¹⁶ DAAS or the source of supply shall furnish Status Code CX to advise all concerned of the rejection of the requisition. If the transaction failing the edit is a modifier, then DAAS or the source of supply shall reject with Status Code D7 (see Table C4.T5.).

¹⁵ Refer to ADC 427

¹⁶ Deferred implementation of authority code edits is authorized pending supply source system modernization. Also note that DAAS is currently using MILSTRIP edits for DLMS transactions as an interim measure pending full DLMS implementation.

C4.T4. DoDAAC Authority Codes

Code	Description	Definition/Segment/Code
00	Requisition	Authorized to initiate a requisition/purchase for goods and services. Authorized ship-to and bill-to
	Required: TAC 1	
	Business Rules: No restrictions	
	DAAS DoDAAC authority code edit: no additional edit	
01	Ship-To Only	Can only be used as a ship-to address with no other implicit authority
	Required: TAC 1 and either TAC 2 and/or TAC 4	
	Business Rules: Not authorized to requisition or bill-to	
	DAAS DoDAAC authority code edit: DoDAAC may not be used in N101 with codes OB, BT, and BS, and may not be used in N901 with code TN	
02	Finance (Bill-To Only)	DoDAAC can only be used as a bill-to
	Required: TAC 1, TAC 3. Note TAC 2 is not allowed.	
	Business Rules: Cannot requisition, cannot be used as a ship-to designation	
	DAAS DoDAAC authority code edit: DoDAAC may not be used in N101 with codes OB, ST, Z7 and BS, and may not be used in N901 with code TN	
03	Do Not Ship-To	Cannot be used as a ship-to destination
	Required: TAC 1	
	Restriction: TAC 2 and TAC 4 are not allowed	
	DAAS DoDAAC authority code edit: DoDAAC may not be used in N101 with codes ST, Z7 or BS	
04	DLA Disposition Services Only	DLA Disposition Services Only (e.g., State agencies surplus). Used to identify activities that have no requisition authority other than for DLA Disposition Services Only materiel
	Required: TAC 1	
	Business Rules: Cannot requisition new materiel. Only authorized to obtain materiel from DLA Disposition Services Only (DoD excess only)	
	DAAS DoDAAC authority code edit: DoDAAC may only be used with DLA Disposition Services RIC (S9D) in RIC To	
05	Non-Requisition	Cannot initiate a purchase or request for goods and services
	Required: TAC 1	
	Business Rules: Cannot initiate a request for any goods/services	
	DAAS DoDAAC authority code edit: DoDAAC cannot be used as N101 code OB or N901 code TN	

C4.T4. DoDAAC Authority Codes

Code	Description	Definition/Segment/Code
06	Free Issue	No cost option. This activity is restricted to items that are available without cost (e.g., DLA Disposition Services, NGA Maps)
	Required: TAC 1	
	Business Rules: Cannot requisition/purchase any good/services. Similar to DLA Disposition Services, but can request free of cost items (e.g., maps from NGA)	
	DAAS DoDAAC authority code edit: DoDAAC may only be used with P0105 code NC	
07	Administrative	Administrative only. This code is used for information/identification purposes only (e.g., Defense Courier Service, or for future DoDAAC activation, such as in the case of DoDAACs reserved for contingencies (at which time a different authority code may be assigned.))
	Required: TAC 1	
	Business Rules: Cannot requisition, cannot be used as a ship-to designation, and cannot be used for billing. Information/identification use only	
	DAAS DoDAAC authority code edit: Cannot be used with N101 codes OB, BT, BS, ST, or Z7 or in N901 code TN	

Table C4.T5. Requisition Processing and Related Actions

CODE OR DATA ELEMENT	ENTRY IS BLANK OR INCORRECT
Routing Identifier Code	Determine correct source and continue processing
Media and Status	Process as zero (0)
Stock Number or Appropriate Item Identification	<ol style="list-style-type: none"> 1. If blank, reject. 2. If incorrect, research to determine¹⁷ if the stock number has changed (for example, FSC changed to match the NIIN). As a result of the review, take action as follows: <ol style="list-style-type: none"> a. If the stock number cannot be identified, reject with appropriate supply status. b. If the FSC is incompatible with the NIIN, check the FSC to determine if it matches a previously assigned FSC. If it matched, change the FSC to the current FSC, continue supply action, and furnish appropriate supply status. If it does not match, reject with appropriate supply status. c. If the stock number has changed (for example, FSC change), change the number to the new stock number and continue supply action. If the changed NSN is managed by another source of supply, initiate a passing order and furnish appropriate supply status. 3. If manufacturer's part number, compare to FLIS to determine if a stock number is assigned. If assigned, change the manufacturer's part number to the stock number and continue supply action. If the NSN is managed by another source of supply, initiate a passing order and furnish appropriate supply status.
Unit of Issue	Enter correct unit of issue or reject. If rejected, enter correct unit of issue in supply status transaction. ¹⁸
Quantity	Reject.
Requisitioner ¹⁹	Discard if entry is blank or incorrect. If the DoDAAC fails the Authority Code edits in C4.10.11, then the transaction will be rejected with CX or D7 status as appropriate.
Date	Reject. Sources of supply may reject if other than FMS/Grant Aid or Navy initial outfitting, and the requisition date exceeds one calendar year from the transaction processing date (current date) or is more than one day in the future. ²⁰

¹⁷ This edit does not apply to USN supply sources.

¹⁸ Requirement to provide correct unit of issue when original unit of issue on the requisition could not be converted last reported as not implemented by USN and DLA (Subsistence). Refer to AMCL 162.

¹⁹ Deferred implementation of Authority Code edits authorized pending supply source system modernization.

²⁰ Refer to ADC 427. Edit is mandatory during DAAS processing and optional for DoD sources of supply.

Table C4.T5. Requisition Processing and Related Actions

CODE OR DATA ELEMENT	ENTRY IS BLANK OR INCORRECT
Serial	Reject.
Demand	Process as recurring.
Supplementary Address ^{21,22}	Reject if blank or invalid and the signal code is B, J, K, L or M. If the DoDAAC fails the Authority Code edits in C410.11, reject the transaction with CX or D7 status as appropriate.
Signal	Reject.
Fund	No edit is required unless signal code is C or L. Reject (CX status) if signal code is C or L and fund code does not identify a valid bill-to activity as prescribed by MILSBILLS.
Distribution	Process as blank.
Project	<ol style="list-style-type: none"> 1. Process as blank. 2. If an OSD/JCS project code is entered, the requisition will be ranked above all other requisitions within the PD.²³

²¹ This data element is referred to as Supplemental Data under the DLMS.

²² Deferred implementation of Authority Code edits authorized pending supply source system modernization.

²³ Elimination of requirement to change the priority on CJCS project code requisitions last reported as not implemented by USAF, USMC, and DLA (Subsistence). Refer to AMCL 9.

Table C4.T5. Requisition Processing and Related Actions

CODE OR DATA ELEMENT	ENTRY IS BLANK OR INCORRECT
Priority Designator ²⁴	<ol style="list-style-type: none"> 1. If Expedited Handling Signal 999 is present in the Special Requirements Code field, requisition is for U.S. Forces and the PD is not 01-03, enter PD 03 and furnish BK supply status. 2. If an OSD/JCS project code is present and the PD entry is not an existing PD code (not 01-15), enter PD 03 and furnish BK supply status. 3. If NMCS/ANMCS indicator (N/E) is present in the Special Requirements Code field and the PD entry is not an existing PD code (not 01-15), enter PD 08 and furnish BK supply status. 4. If special mass cancellation coding 555 is present and the PD entry is not an existing PD code (not 01-15), enter PD 08 and furnish BK supply status. 5. If Expedited Transportation Signal 777 is present and the PD entry is not an existing PD code (not 01-15), enter PD 08 and furnish BK supply status. 6. If required availability date (A in first position of Special Requirements Code field) is present and the PD entry is not an existing PD code (not 01-15), enter PD 15. 7. If extended RDD (S or X) is present and PD is other than 09-15, enter PD 15, furnish BK supply status, and process. 8. If work stoppage indicator (F or R) is present and PD is not 01-08, enter PD 8, furnish BK supply status, and process. 9. For all other conditions, if PD is not 01-15, enter PD 15.

²⁴ See Footnote 11.

Table C4.T5. Requisition Processing and Related Actions

CODE OR DATA ELEMENT	ENTRY IS BLANK OR INCORRECT
Required Delivery Date ^{25,26}	<ol style="list-style-type: none"> 1. If NMCS/ANMCS indicator (N/E) is present and PD is 01-08, process. If indicator N or E is present, but PD 09-15 is present, blank the RDD, furnish BK supply status, and process using the priority. If there is an N or E, blank any remaining characters in the RDD and furnish BK supply status. <u>Exception:</u> For Air Force requisitions, blank only numeric characters (01-99); do not blank special coding to fulfill an Air Force internal requirement for NMCS/MICAP justification. (Note: This eliminates short RDDs associated with NMCS/ANMCS and expressed as number of days from requisition date.) 2. If Expedited handling Signal 999 is present and requisition is not intended for U.S. Forces, blank the expedited handling signal, furnish BK supply status, and process using the priority.²⁷ If requisition is intended for U.S. Forces, process. 3. If special mass cancellation coding 555 is present indicating continued processing during mass cancellation, process. 4. If Expedited Transportation Signal 777 is present and PD 01-08 is present, process. If the PD is 09-15, blank the expedited transportation signal, furnish BK supply status, and process using the priority. 5. If Co-Located Customer Handling Service Indicator 444 is present, process. 6. If RAD or extended RDD is A, S, or X, and remainder are not equal to 01-99, blank the total entry, furnish BK supply status, and process. 7. If work stoppage indicator (F or R) is present and remainder is not blank, blank the remainder, furnish BK supply status, and process. (Note: This eliminates short RDDs associated with work stoppage and expressed as number of days from requisition date.)

²⁵ Deferred implementation of PD/RDD compatibility edits and furnishing BK supply status under Approved DLMS Change 57 are authorized pending supply source system modernization. BK status resulting from ADC 57 not transmitted to US Army customers.

²⁶ Non-date entries in the RDD field; such as, Codes E, F, N, R, 444, 555, 777, and 999, are referenced as Special Requirements Codes under the DLMS.

²⁷ See Footnote 13.

Table C4.T5. Requisition Processing and Related Actions

CODE OR DATA ELEMENT	ENTRY IS BLANK OR INCORRECT
Required Delivery Date (cont.)	<p>8. For subsistence, except for conditions above, all requisitions will contain a specific RDD in ordinal day of year format. If blank, compute an SDD.²⁸</p> <p>9. For all other conditions, blank RDD field if entry does not indicate a calendar date that falls no more than 100 days subsequent to the requisition date^{29,30}, furnish BK supply status, and process.</p>
Required Delivery Period (Conventional Ammunition Only) ³¹	If B, C, D, G, H, J, K, L, M, P, T, U, V, or W, and 01-99 is present, process.
Advice	Process as blank.

²⁸ Use of the RDD to fill subsistence items last reported as not implemented by DLA (Subsistence). Refer to AMCL 7.

²⁹ The 100-day edit is not applicable to requisitions for FSC 1300 (conventional ammunition).

³⁰ Not applicable for Intra-USAF requisitions

³¹ Use of RDP for conventional ammunition last reported as not implemented by USAF. Refer to AMCL 148.

C5. CHAPTER 5

STATUS REPORTING

C5.1. SUPPLY AND SHIPMENT STATUS - GENERAL

C5.1.1. **Status Data**. Status data is either supply status or shipment status. Sources of supply to include inventory control point (ICP)/integrated materiel manager (IMM) and shipping activities prepare status transactions using the applicable transaction described under paragraphs C5.1.2. and C5.1.3.. Status documents from sources of supply shall be forwarded to the Defense Automatic Addressing System (DAAS) for transmission to status recipients. Status data may be informational or require additional action by organizations based on the assigned status code. Status recipients include, but are not limited to, requisitioners, storage activities, control offices, and/or monitoring activities. For security assistance (SA) shipment status, the control office or monitoring activity receives the status from the source of supply and provides it to the appropriate country status recipient. For foreign military sales (FMS) customers, the status goes to the Military Assistance Program Address Directory (MAPAD) type address code (TAC) 4 country status recipient. For grant aid (GA) customers, the status goes to the MAPAD TAC 3 country/in-country security assistance organization (SAO) status recipient.

C5.1.1.1. **Supply Status**. Supply status informs organizations of action taken or being taken on materiel requisitioned but not shipped, shipment consignment instructions, or disposition instructions for materiel offered under the materiel returns program (MRP).

C5.1.1.2. **Shipment Status**. Shipment status informs organizations of the actual shipping dates (such as the date released to the carrier), the release criteria for shipments, or shipment delay notifications. It also provides for an interface with transportation and for shipment tracing by organizations under [DTR 4500.9-R](#).

C5.1.2. Types of Supply Status

C5.1.2.1. **Supply Status**. Use a DLMS 870S transaction, Supply Status.

C5.1.2.1.1. Response to Requisition

C5.1.2.1.1.1. Sources of supply (or management control activities (MCA)), processing GFM transactions, use the DLMS 870S with appropriate status codes to convey advice to organizations. It is used to convey notice of action taken or being taken on requisitions and requisition-related transactions; such as, retransmitted requisitions, cancellations, modifications, and requisition inquiries (follow-ups and/or requests for supply assistance). Organizations shall identify additional status addressees in the original requisition and/or requisition-related transactions, as applicable. DAAS generates supply status in selected situations resulting from item

identification edits but shall indicate their RIC as the MESSAGE FROM address in the supply status.

C5.1.2.1.1.2. Reporting Status Decisions. Sources of supply or MCAs shall respond to requisition(s) to advise activities of action taken (as indicated), alone or in combination, to any of the requests listed below. This includes status upon processing a requisition inquiry (follow-up and request for supply assistance) or a cancellation request, and rejection status when rejecting transactions.

C5.1.2.1.1.2.1. Backorder.

C5.1.2.1.1.2.2. Partial issue or partial other action.

C5.1.2.1.1.2.3. Materiel substitution.

C5.1.2.1.1.2.4. Unit of issue changes.

C5.1.2.1.1.2.5. Retransmitted (rerouted) requisitions.

C5.1.2.1.1.2.6. Cancellation, modification, or inquiry.

C5.1.2.1.1.2.7. Any circumstance that predicts that issue may not be made within the timeframes established for the assigned priority designator (PD).

C5.1.2.1.2. Response to Direct Vendor Delivery (DVD). Sources of supply shall use the notice of response to DVD to advise organizations materiel is being supplied by DVD from procurement. The supply (procurement) source generates this notice for each requisition that is procured for DVD to a consignee. The DVD, DLMS 870S notice provides a cross-reference between the requisition document number and the contract information. Organizations may also use information in this notice to report nonreceipt of materiel using the appropriate discrepancy reporting process.

C5.1.2.1.3. Response to Supply Assistance. Sources of supply shall use the notice of response to supply assistance to advise organizations of action taken to expedite the shipment of the requested materiel.

C5.1.2.1.4. Materiel Processing Center (MPC) Supply Status

C5.1.2.1.4.1. The MPC shall provide Status Code NL to notify the Navy ship/customer that materiel has arrived at the MPC for sortation and temporary storage pending delivery to the customer.

C5.1.2.1.4.2. The MPC shall provide Status Code NW to provide systematic notification materiel has been delivered from the MPC to the Navy ship/customer.

C5.1.2.1.5. Air Force Integrated Logistics Solution-Supply (ILS-S) (Retail Supply). Supply Status DLMS 870S shall be used on an intra-Air Force basis to

provide the latest status to the intended receiving activity. Additionally, supply status shall be used to support the unique item tracking (UIT) program for positive inventory control (PIC) nuclear weapons related materiel (NWRM) by providing UII and/or serial numbers. For legacy items where the unique item identifiers (UIIs) have not been marked in accordance with item unique identification (IUID) policy, the serial number alone shall be passed.

C5.1.2.1.5.1. DLA Transaction Services shall enable transmission of information copies of the ILS-S Supply Status to the NWRM PIC Fusion Module UIT Registry to ensure the PIC NWRM program has near real time access to UIIs and the associated serial numbers of NWRM item movements.

C5.1.2.1.5.2. DLA Transaction Services shall block transmission of ILS-S Supply Status to non-Air Force recipients where feasible.

C5.1.2.2. Materiel Returns Supply Status. Organizations and sources of supply shall use the DLMS 870M, Materiel Return Supply Status to convey advice to one another as notice of action taken or being taken on Offer of Materiel Reports (OMRs) and OMR-related transactions. Use the DLMS 870M to send status to the ICPs/IMMs. The ICPs/IMMs shall use the DLMS 870M to provide status or disposition instructions for materiel to organizations, including disposition instructions related to discrepant materiel reported under Chapter 17. Follow Chapter 11 to determine the processing procedures for and the prescribed usage of this status.

C5.1.2.2.1. Unsolicited Report. Customer organizations shall use the unsolicited report to provide status to the source of supply on open OMRs for unshipped materiel.

C5.1.2.2.2. Response to Materiel Returns. Sources of supply shall use the DLMS 870M to provide informational status or disposition instructions to organizations for materiel reported under the MRP.

C5.1.3. Types of Shipment Status

C5.1.3.1. Preparation of Shipment Status. Shipment status shall be provided by the shipping activity or the source of supply for direct vendor delivery (contractor direct) or in response to a requisition follow-up. The consolidation and containerization point (CCP) and other locations performing consolidation subsequent to issuance of shipment status may also provide shipment status for the purpose of identifying passive RFID.¹ Under DLMS, the shipment status shall include enhanced data content and support item unique identification (IUID) and intransit visibility requirements as directed under DoD policy/procedures ([DoD 4140.1-R](#)), when available and pending full DLMS implementation/modernization. Shipment status shall be provided by the DoD shipping

¹ Refer to ADC 257, DLMS Shipment Status Generated by the Consolidation and Containerization Point (CCP)

activity, the CCP, or by the source of supply² using the DLMS 856S. Maintenance activities (organic and commercial) shall provide shipment notification to the receiving activity and other interested parties when materiel is shipped to the distribution depot, DLA Disposition Services Field Office, or other designated receiving activity per source of supply/inventory control point guidance. This may be accomplished using either the DLMS 856S Shipment Status, or the DLMS 856 Advance Shipment Notice (ASN), provided via Wide Area Work Flow-Receipt and Acceptance (WAWF-RA).³ The DLMS Shipment Status shall include asset visibility content, such as IUID, and intransit visibility requirements, such as passive RFID and the TCN as directed under DoD policy/procedures ([DoD 4140.1-R](#)). DLMS enhancements include, but are not limited to the following:

C5.1.3.1.1. Passive RFID for the shipment unit/case/pallet associated at the requisition document number level. The shipment status transaction may identify a hierarchy to clarify the relationship of passive tags within different shipment levels.

C5.1.3.1.2. For Unique Item Tracking (UIT) purposes, the IUID and/or serial number. Serial number without applicable IUID may only be used during MILSTRIP/DLMS transition and pending implementation of IUID capability. Additional UID information as identified in the DLMS 856S is optional. Refer to Chapter 19 for UIT guidance.

C5.1.3.1.3. Both the TCN and a secondary transportation number, such as the small package carrier number, when this is applicable.⁴

C5.1.3.1.4. Identification of the carrier when other than United States Postal Service (USPS) by name and Standard Carrier Alpha Code (SCAC).⁵

C5.1.3.1.5. Identification of the initial DoD shipping activity (origin) by DoDAAC.⁶

C5.1.3.1.6. For OCONUS shipments made via the Defense Transportation System (DTS), GBL/CBL, parcel post, and small package carrier shipments, specific identification of the POE or CCP. The shipment status shall specify air terminal, water terminal, or CCP by applicable qualifier code in the transaction. (During MILSTRIP/DLMS transition, DAAS may substitute a generic terminal qualifier

² Direct vendor delivery shipment status using the 856S includes shipment status prepared by the DLA-sponsored Defense Planning and Management System (DPMS) application.

³ Business rules for use of the 856 for GFM or Property Transfer, including internal DoD transfers, are evolving. Refer to the Defense Procurement and Acquisition policy for UID available at url; <http://www.acq.osd.mil/dpap/pdi/uid/index.html>. Specific applicability and interoperability issues to be resolved by the UID Program Office and DUSD(L&MR)SCI.

⁴ Refer to ADC 223, DLMS Shipment Status Enhancements: Secondary Transportation Number, Initial Shipping Activity, Carrier Identification, and POE, approved for phased and staggered implementation.

⁵ Ibid.

⁶ Ibid.

for shipment status transactions converted from legacy 80 record position transactions where the type of facility is unknown.)⁷

C5.1.3.1.7. Under DLMS, the shipment status shall perpetuate data content as applicable: project code, the special requirements code (legacy MILSTRIP required delivery date (RDD) coded entries, e.g. 999), and priority designator.⁸
Shipment status applicable to shipment of GFP, including requisitioned GFM and shipment of reparable to/from commercial maintenance, shall perpetuate contract data from the MRO, to include the contract number authorizing GFP, and the call/order and CLIN when provided.

C5.1.3.1.8. The transportation priority shall be included in all shipment status transactions as derived under DoD 4140.1-R guidance or other pertinent criteria.⁹

C5.1.3.1.9. The shipment status may include the unit price (required for Distribution Standard System (DSS)-generated shipment status; otherwise optional).¹⁰

C5.1.3.2. Shipment Status from the CCP or Other Locations Performing Consolidation. Shipment status shall be provided by the CCP or other locations performing consolidation subsequent to the original issuance of shipment status, for the primary purpose of providing updated RFID information. This in turn supports intransit asset visibility and receipt processing. Other locations include distribution depots performing consolidation of local deliveries resulting in passive RFID updates.

C5.1.3.2.1. Preparation of the CCP/Consolidation Shipment Status

C5.1.3.2.1.1. The CCP/consolidation shipment status shall be identified by a unique code in the transaction and shall include the information as describe below.

C5.1.3.2.1.1.1. Ship-To-Activity. This activity shall be explicitly identified.

C5.1.3.2.1.1.2. Lead TCN. This TCN may differ from that on the original shipment status.

C5.1.3.2.1.1.3. RFID Tag Value. When applicable, the transaction shall contain multiple passive RFID tag values using a hierarchical structure. The original passive RFID shall be repeated when it is available. Any additional tag values available shall also be provided.

⁷ Ibid.

⁸ Refer to ADC 242, Shipment Status DS 856S: Priority Designator (PD), Transportation Priority, Project Code, Special Requirements Code, approved for phased and staggered implementation.

⁹ Ibid

¹⁰ Refer to ADC 242A, Inclusion of Unit Price on DLMS Shipment Status (DS 856S).

C5.1.3.2.1.1.4. Transaction Originator. This shall identify the routing identifier code (RIC) of the ICP perpetuated from the original shipment status.

C5.1.3.2.1.1.5. Consolidation Activity. This shall identify the DoDAAC of the location where the consolidation occurred, e.g. CCP or depot performing local delivery manifesting.

C5.1.3.2.1.1.6. Shipment Date. This shall be the CCP/consolidation point shipment date.

C5.1.3.2.1.1.7. Mode of Shipment. This shall be the mode shipped by the CCP/consolidation point.

C5.1.3.2.1.2. Shipment status information content may be repeated from the original shipment status when this information is available, e.g., when the original shipper was a co-located distribution depot. Where access to the original shipment status information is not available, the original data content shall not be perpetuated and applicable data fields shall not be populated.

C5.1.3.2.2. DAAS Distribution of CCP/Consolidation Shipment Status. DAAS shall route the CCP/consolidation shipment status to the ship-to activity. Standard DAAS business rules for distribution of the shipment status to status recipients do not apply. In addition, DAAS shall not distribute the CCP shipment status to Distribution Depot ship-to locations or Materiel Processing Center (MPC) locations supported by DSS.

C5.1.3.2.3. Use of the CCP/Consolidation Shipment Status by the Receiving Activity. The value of this transaction to the receiving activity is to support passive RFID-enabled receipt processing. DLMS applications not supporting passive RFID may disregard this status or choose to append the mode of shipment and the shipment date. New content on the CCP/consolidation shipment status should not be viewed as replacement values for a previously received shipment status matching on document number/suffix. Since there may not be a match on the previously identified TCN, the CCP/consolidation shipment status information shall be handled in a way that does not impact quantity due or visibility of partial shipments that may not have been consolidated within the reconfigured shipment.

C5.1.3.3. Shipment Status for Local Delivery Manifested, Outbound MILSTRIP Shipments on Behalf of On-Base Customers, Re-warehousing actions/transshipments between Distribution Depots in support of 'Home' Industrial Activity and 'Forward Support' Industrial Activity site materiel requirements, and non-MILSTRIP Shipments (e.g., DD Form 1149) to Off-Base Customers, with Passive RFID. For shipments prepared by the transportation office that are local delivery manifested, materiel processing center (MPC) deliveries, outbound MILSTRIP shipments on behalf of on-base customers, re-warehousing actions between distribution depots, and outbound non-MILSTRIP shipments (e.g., DD Form 1149) to off-base customers, the shipment status shall be prepared in accordance with paragraph C5.1.3.1 using a

DLMS 856S, Shipment Status, to include identifying the passive RFID information and associating the tag data to the document number of the item(s) to be transshipped or cross-docked.

C5.1.3.3.1. For local delivery manifested shipments, MPC deliveries, and outbound MILSTRIP shipments for On-Base Customers, the DLMS 856S shall contain the transaction status reason code (BSN07 = 091 Transship/Cross-dock Shipment Status (non-CCP)) to denote that the shipment status is being provided by a location performing transshipping/cross-docking subsequent to the original shipment. The RIC From shall be the RIC of the activity executing the local delivery manifest. The remaining data elements for a shipment status transaction shall be ascertained from the pack list/shipping documentation accompanying the shipment. If the shipment already has a pRFID tag on it, no additional DLMS 856S is required; the existing pRFID tag will just need to be read and an XML Visibility transaction sent to DLA Transaction Services recording the tag read event. If there is no document number either on the inbound data or on the pack list/shipping documentation, then do not generate the DLMS 856S for conveying the pRFID tag. This is to preclude a mismatch of data with the original DLMS 856S transmitted by the ICP, that will have a document number.

C5.1.3.3.2. For re-warehousing actions/transshipments between distribution depots in support of 'Home' Industrial Activity site and 'Forward Support' Industrial Activity site materiel requirements, a normal DLMS 856S shall be generated and transmitted to DAAS. This transaction shall carry the normal shipment status message data, along with the pRFID tag identification numbers and any extended transportation data (e.g., bill of lading number, commercial carrier tracking numbers). Since there will never be a materiel receipt acknowledgement (MRA) for these re-warehousing actions/transshipments between the Home and Forward Industrial Activities, a status reason code (BSN07=048 Industrial Activity Re-Warehousing/Transship Shipment Status) shall be included so that DLA Transaction Services can flag these DLMS 856S instances and prevent them from triggering the MRA Report.

C5.1.3.3.3. For outbound non-MILSTRIP shipments documented on a DD Form 1149, a DLMS 856S shall be created. Table C5.T1 lists the minimum data elements that shall be included in the shipment status message; sources of the data are the DD Form 1149 and pRFID tag information. ***Shipment status applicable to shipment of GFP shall perpetuate all GFP contract data from the shipping documentation, to include the contract number authorizing GFP, and the call/order and CLIN when provided.***

Table C5.T1. Non-MILSTRIP Shipment Status Message

C5.1.3.3.4. DAAS Distribution of Shipment Status for Local Delivery Manifested, Deliveries to MPC, Outbound MILSTRIP Shipments on Behalf of On-Base Customers, and non-MILSTRIP Shipments (e.g., DD Form 1149) to Off-Base Customers. DAAS shall route the shipment status to the ship-to activity. Standard DAAS business rules for distribution of the shipment status to status recipients do not apply.

C5.1.3.3.5. DAAS Distribution of Shipment Status for Re-warehousing actions/transshipments between Distribution Depots in support of 'Home' Industrial Activity and 'Forward Support' Industrial Activity site materiel requirements. DAAS shall

route the shipment status according to standard DAAS business rules for distribution of the shipment status to status recipients.

C5.1.3.3.6. Receiving Activity Use of Shipment Status for Local Delivery Manifested, Deliveries to MPC, Outbound MILSTRIP Shipments on Behalf of On-Base Customers, Re-warehousing actions/transshipments between Distribution Depots in support of 'Home' Industrial Activity and 'Forward Support' Industrial Activity site materiel requirements, and non-MILSTRIP Shipments (e.g., DD Form 1149) to Off-Base Customers. The value of this transaction to the receiving activity is to support passive RFID-enabled receipt processing. DLMS applications not supporting passive RFID may disregard this status or choose to append the mode of shipment and the shipment date. New content on the shipment status should not be viewed as replacement values for a previously received shipment status matching on document number/suffix.

C5.1.3.4. Shipment Status Materiel Returns. The DLMS 856R, Shipment Status Materiel Returns, shall be used to prepare a shipment status and be submitted promptly to the ICP/IMM after materiel directed for return is released to the carrier. Refer to Chapter 11 for materiel returns program procedures. Shipment status for materiel returns shall include the TCN, shipment date, mode of shipment, and quantity shipped. It shall perpetuate data content from the DLMS 180M automatic return notification or the ICP/IMM DLMS 870M reply to the customer's asset report and shipping information, as applicable, per guidance in the DLMS Supplements. The DLMS 856R shipment status shall include asset visibility content and intransit visibility requirements as directed under DoD policy/procedures (DoD 4140.1-R). DLMS enhancements include, but are not limited to, the following:

C5.1.3.4.1. Passive RFID for the shipment unit/case/pallet associated at the document number level. The shipment status transaction may identify a hierarchy to clarify the relationship of passive tags within different shipment levels.

C5.1.3.4.2. For UIT purposes, the IUID and/or serial number. Serial number without applicable IUID may be used during MILSTRIP/DLMS transition and pending implementation of IUID capability. Refer to [Chapter 19](#) for UIT guidance.

C5.1.3.4.3. Both the TCN and a secondary transportation number, such as the small package carrier number, when this is applicable.

C5.1.3.4.4. Identification of the carrier, when other than USPS, by SCAC.

C5.1.3.4.5. Specific identification of all parties associated with the materiel return. This includes the party to receive credit when different from the document number DoDAAC (previously carried in the MILSTRIP supplementary address) and all parties to receive status. Transition to use of specifically identified parties facilitates full DLMS implementation, by enabling identification of multiple different activities (e.g. submitter, ship-from, credit-to, status-to). Prior coordination for this DLMS enhanced capability is required.

C5.1.3.5. Shipment Status Message Changes/Updates. In the event a shipment does not get lifted as originally intended (e.g., shipment is left off the truck) and the shipment is re-booked, the activities (e.g., shippers, ICPs) that originate the DLMS 856S shipment status transaction shall send an updated transaction with all of the changed transportation information. The shipment status update can also be used to convey updated passive RFID tagging information, if it changed from the original erroneous submission. Examples of changed transportation information includes transportation method code, SCAC, ship date, bill of lading information, and tracking information.

C5.1.3.5.1. Preparation of the Shipment Status Change/Update

C5.1.3.5.1.1. The shipment status change/update message shall be identified by a unique code (BSN02 = RR) in the transaction to flag it as an updated shipment status message.

C5.1.3.5.1.2. It shall convey a new Status Reason Code (BSN07 = A40) to advise the shipment status recipient that the updated shipment status transaction corrects erroneous content data (e.g., transportation data, pRFID data).

C5.1.3.5.1.3. It shall repeat the shipment status information from the original shipment status message, in addition to any changes to the original information.

C5.1.3.5.1.4. It shall convey updated passive RFID information if it has changed from the original erroneous submission. When applicable, the transaction shall contain multiple passive RFID tag values using a hierarchical structure. The original passive RFID shall be repeated when it is available. Any additional tag values available to the shipment status recipient shall also be provided.

C5.1.3.5.1.5. It shall convey changed transportation information (e.g., transportation method code, SCAC, ship date, bill of lading information, and tracking information).

C5.1.3.5.2. DLA Transaction Services Distribution of Shipment Status Change/Update. DLA Transaction Services shall route the shipment status change/update to the shipment status recipient per standard business rules for distribution of the shipment status. DLA Transaction Services shall not distribute the shipment status change/update to MILSTRIP legacy recipients.

C5.1.3.5.3. Use of the Shipment Status Change/Update by the Receiving Activity. The value of this transaction to the receiving activity is to provide corrected transportation data and to support passive RFID-enabled receipt processing. DLMS compliant systems' receiving applications should handle the updated transactions as the official shipment status, since they carry the corrected data.

C5.1.4. Requesting Status

C5.1.4.1. Purpose. Use the DLMS 869F Requisition Follow-Up to request status on a previously submitted requisition.

C5.1.4.2. Organizations Receiving Status. To ensure sources of supply automatically provide status data to all organizations required to receive supply and/or shipment status, identify all additional organizations to receive status in the initial requisition or in requisition related transactions. To obtain status on previously submitted requisitions or cancellation requests, activities may submit follow-ups.

C5.1.4.3. Reports. The DoD Components shall submit reports when requisition status reporting is required to designate status of a project. Obtain special reports, when required, from an eligible recipient of status identified in requisitions. Special reports are not required from the inter-DoD Component sources of supply.

C5.1.4.4. Status Code CA. When Status Code CA is received in response to a follow-up request and no record of the previous Status Code CA and the reasons for rejection can be located, authorized status recipients may inquire off line, such as via mail, message, or telephone, to the source of supply to obtain reasons for rejection.

C5.1.5. Status Recording. Organizations shall promptly record all status information received (automatically and/or in response to requisition inquiries) to applicable due-in records and/or requisition history (status) files, and, in the case of the DLA Disposition Services, the disposal suspense file. Status recipients shall use supply status data to establish or update the due-in record to monitor for materiel receipts under [Chapter 13](#). In addition, status recipients shall:

C5.1.5.1. Give particular attention to the supply status transaction date to ensure that records/files are updated in the proper chronological order/date sequence.

C5.1.5.2. Review the DLMS 870S received for any additional action required by the status code if any.

C5.1.5.2.1. If supply status identifies a processing delay due to storage site denial to the source of supply's materiel release order (Status Code BD with Management Code R), the customer/customer's system shall update/clear the local record for the suffix and quantity identified (so that later status on a next available suffix is not misinterpreted as duplicative/exceeding the quantity ordered, potentially triggering cancellation). Estimated shipping dates shall not be provided with BD status when associated with storage activity denial as indicated by Management Code R. Further supply action to satisfy the denied quantity shall be identified on later supply status transactions under the next available suffix code. Use of Status Code BD with Management Code R allows the customer's system to better track status and recognize the correct quantity in process.

C5.1.5.2.2. If a requisition has been rejected with a rejection status code, and the materiel is still required, the requirement shall be submitted as a new requisition with a new document number and a current transaction date.

C5.1.5.3. Treat shipment status received as notice shipment has been made and that additional follow up shall only result in receipt of another shipment status document.

C5.1.5.4. Anticipate receipt of materiel within prescribed Uniform Materiel Movement and Issue Priority System (UMMIPS) timeframe for the assigned PD, or the RDD cited in the requisition, upon receipt of supply status without an estimated shipping date (ESD).

C5.1.5.5. Evaluate status already received prior to submitting requisition inquires to follow up for additional status.

C5.1.5.6. Ensure appropriate status is sent to other activities requiring status when the only status recipient is the activity identified by a distribution code.

C5.1.6. Sending Status - General

C5.1.6.1. Requirements. Sources of supply shall automatically send a DLMS 870S when processing requisitions, redistribution orders (RDOs), cancellations, modifications, and requisition inquiries (follow-ups and requests for supply assistance). MCAs shall send reject status for requisitions they process. Sources of supply shall maintain and send current supply status as provided below. For these purposes, MCAs and sources of supply shall maintain accessible requisition history records for a minimum of 6 months after completing a shipment of materiel or canceling a requisition, to provide for timely status responses. MCAs shall maintain requisition history records until contract termination.

C5.1.6.2. Associated Transaction Status. Sources of supply initiated requisition status shall include all status transactions (supply and shipment) generated during source of supply processing that are not produced in response to requisition inquiries or cancellation requests.

C5.1.6.3. Normal Requisitioning Processing. The sources of supply shall provide supply status based on normal requisition processing, including additional supply status due to changes in requisition processing, such as, cancellation actions, modifications, item substitutions, DVD actions, changes in ESDs (when retransmitting requisitions to another source of supply), and requisition inquiries (follow-ups and requests for supply assistance). In addition, supply sources shall send:

C5.1.6.3.1. A DLMS 870S with Status Code BB (citing the scheduled ESD for release of materiel from stock to the customer) when backordering a requisition against a due-in to stock. The source of supply shall always send additional Status Code BB to organizations with a revised ESD when adjusting shipping dates.

C5.1.6.3.2. A DLMS 870S with Status Code BZ with an ESD after deciding to process the requirement as a DVD shipment. Sources of supply shall give Status Code BV after effecting contracts or procurement actions and establishing an agreed to contract shipping date. Status Code BV must contain contract shipping date and also the contract data that provides organizations with a cross-reference to the original requisition. At a minimum, contract data shall include the contract number, call/order number, notification of destination/origin acceptance, allowable quantity variances, and identification of the contractor by CAGE. The contract required shipping date shall be discretely identified and may be equal to the estimated shipment date. Additional contract data may be included as available.¹¹

C5.1.6.3.3. A DLMS 870S with additional Status Code BV with a revised ESD to organizations when adjusting contract shipping dates on items scheduled for DVD.

C5.1.6.4. Manual Requests. The source of supply may reject a requisition, or initiate a manual off-line request to obtain additional information, when the requisition contains insufficient information to continue processing. Use the STATUS TO organization identified in the requisition as the action addressee on all requests for additional information. Treat other organizations identified in the requisition, not designated as STATUS TO organizations, as information addressees on requests for additional information. When an inquiry for additional information is made, the source of supply shall send a DLMS 870S with Status Code BD, to all designated STATUS TO organizations. Sources of supply shall suspend further action on requisitions awaiting additional information until a response is received or until 30 calendar days from date of inquiry, whichever occurs first. Upon receipt of requested information, the source of supply shall continue normal processing. If the organization does not provide needed information within 30 calendar days, the source of supply shall reject the requisition using a DLMS 870S with Status Code D3.

C5.1.6.5. Status Frequency. For each reinstated requisition, retransmitted (rerouted) requisition, requisition modifier, and Materiel Release Order (MRO) processed, sources of supply shall automatically send supply and/or shipment status, as appropriate.

C5.1.6.5.1. Shipment Status to DAAS. Sources of supply shall transmit shipment status to DAAS for all source of supply requisitions to include a DLMS 856S for all DVDs, as required. Upon receipt of shipment status, DAAS shall convert the shipment status to the appropriate type of status and make distribution. Except for cancellation and rejections, DAAS shall send status to designated status recipients as identified by a significant media and status code (DoD or Component level), a significant distribution code
www.dla.mil/j-6/dlms/eApplications/LOG.NET/UI/Log_Qualifiers/lqvqcDetails.aspx?code=AK

¹¹ Refer to ADC 465, Contract Data for 870S_BV Status

and to any activity identified by RIC as a party to receive status. Sources of supply shall give shipment status for exception ship-to addresses.¹²

C5.1.6.5.1.1. Materiel Processing Center (MPC) Shipment Status.

DAAS shall also provide a copy of shipment status for materiel to be delivered to Navy ships to the applicable MPC operated by DLA Distribution at the co-located Distribution Depot (DD) receiving site. In order to accomplish this, DLA Transaction Services shall maintain a table of DoDAACs associated with a particular copy of DSS as identified by DLA Distribution that the copy of DSS MPC supports. DLA Distribution, in coordination with the Service, shall provide updates to DLA Transaction Services as needed. When DAAS processes the DLMS 856S/AS8 and the ship-to DoDAAC begins with N, R, V, Z, M, or as otherwise identified, DAAS shall match the ship-to DoDAAC to the MPC table. When an appropriate DSS DoDAAC for MPC support is identified, shipment status shall be forwarded to the DSS for establishment of pre-positioned materiel receipt (due-in) record at the applicable MPC.

C5.1.6.5.1.2. MPCs receiving shipment status are located at the distribution depot locations identified in Table C5.T2.

Table C5.T2. Distribution Depots and Co-Located Materiel Processing Centers

DEPOT WITH CO-LOCATED MPC	DEPOT DODAAC	MPC ROUTING IDENTIFIER
Norfolk	SW3117	PSJ
Jacksonville	SW3122	PSU
San Diego	SW3218	PSK
Puget	SW3216	PSN
Yokosuka	SW3142	PSL
Sasebo	SW3143	PSM
Guam	SW3147	SCN
Pearl Harbor	SW3144	PSY
Sigonella	SW3170	SNH
Bahrain	SW3183	SNN
Everett, Washington State	SW3237	SNY
Little Creek, Norfolk, VA	SW3187	SEF
D&S Pier, Norfolk, VA	SW3186	SEE
Subron 11, Point Loma, CA	SW3236	SNX
Groton, Ct	SW3188	SEX

¹² Refer to ADC 242B.

C5.1.6.5.1.3. The MPC shall use the supplementary address, project code, special requirements code, and transportation priority or priority designator from the due-in record or the shipment documentation to sort materiel for delivery per the Navy customer direction.

C5.1.6.5.2. Status of Unconfirmed Materiel Release Orders. Sources of supply shall send DLMS 856S transactions to DAAS in accordance with C5.1.6.5.1. DAAS shall send this status to the ship-to activity. If DAAS cannot determine the ship-to activity, DAAS shall return the transaction to the ICP for handling. DAAS shall route the pseudo shipment status transaction for SA requisitions to the applicable DoD Component International Logistics Control Office (ILCO).

C5.1.6.6. Turn-In Document Status. For each shipment on a defense turn-in document (DTID), the shipping activity shall provide a DLMS 945A, Materiel Release Advice, or a DLMS 856S with appropriate in-transit control coding as specified under Chapter 16 for materiel being shipped to the DLA Disposition Services. If pricing information is not available, enter an estimated unit price.

C5.1.6.7. Requisition/Reinstatement for Backorder. When a requisition or reinstatement of a requisition is to be backordered against due-in to stock, sources of supply shall furnish exception supply status. Sources of supply shall send Status Code BB and the ESD for release of materiel from stock to the customer. Sources of supply shall send Status Code BB to the customer with the revised ESD when shipping dates are adjusted.

C5.1.6.8. Exception Status. Sources of supply shall send a DLMS 870S Exception Supply Status when the intent to process for DVD is known. This exception status shall contain Status Code BZ and the ESD. When contracts or procurement actions have been effected and an agreed to contract shipping date is established, sources of supply shall send additional Status Code BV indicating the contract shipping date.

C5.1.6.9. Contract Shipping Date Adjustment. When contract shipping dates are adjusted on items scheduled for DVD, the source of supply shall provide a DLMS 870S with Status Code BV to indicate the revised shipping date. Sources of supply use the DVD notice DLMS 870S to notify organizations of materiel being supplied by DVD. This notice provides a cross-reference between the document number and contract data. When delivery dates are established for DVD shipments, the source of supply shall provide the DVD notice in addition to supply status.

C5.1.6.10. Indicating Processing Delay. Sources of supply shall furnish supply status indicating a processing delay when an MRO is denied by the storage activity. Use Status Code BD and denial Management Code R citing the MRO denied

quantity and suffix.¹³ Further supply action to satisfy the denied quantity is anticipated to occur on a later suffix code.

C5.1.6.11. Mandatory Status Reporting. The use of supply and shipment status is mandatory for all source of supply initiated requisition statuses. Supply source initiated requisition status includes all statuses generated during source of supply processing not produced in response to follow-ups or cancellation requests. Use of supply and shipment status in response to cancellation requests is optional when supply status distribution rules require multiple recipients of status. Upon receipt of a DLMS 856S, DAAS shall convert the request to the appropriate response transactions and make distribution to all eligible status recipients.

C5.1.6.12. Preparation of Status

C5.1.6.12.1. Late Delivery. All supply status transactions, indicating materiel will be released for shipment later than the standard delivery date (SDD) or RDD/required delivery period (RDP) must contain an ESD. Such supply status is applicable to materiel obligations including procurement for DVD. Conversely, the source of supply shall reject requisitions that contain Advice Code 2C, 2J, 2T, or 2W with Status Code CB when items are not available for immediate release or cannot be supplied by the SDD/RDD/RDP, with a DLMS 870S.

C5.1.6.12.2. Estimated Shipment. ESDs are also mandatory entries for those transactions reporting adjusted ESDs and any circumstance that predicts that issue may not be made within the timeframes established for the PD. Storage facilities in receipt of requisition inquiries on requirements that are in the process of being filled shall use supply status to provide ESDs to the requesting source of supply. Status transactions providing advice of such events as changes in stock numbers, unit of issue changes, rejections, and shipments shall not contain an ESD.

C5.1.6.12.3. Rejecting Requisitions. Sources of supply shall use a DLMS 870S with status codes in the C and D series when rejecting requisitions and RDOs.

C5.1.6.12.4. Processing Point Response. Processing points provide a DLMS 856S in response to receipt of a DLMS 869F, Requisition Follow-up, containing the DoDAAC of the initial (origin) transportation activity. If the processing point is unable to provide the DoDAAC information to the requesting activity, the follow-up transaction shall be rejected with Status Code DY.

C5.1.6.12.5. Requisition Inquiry. Status furnished by a DLMS 870S in response to a DLMS 869A, Requisition Inquiry, shall contain the most current information available regarding the status of the requisition. Supply status in response to a requisition inquiry shall contain a changed/new ESD, when applicable, and a

¹³ Authorized for use on an intra-Army basis (ADC 191) and later expanded to inter-Service/Agency use (ADC 312). Not implemented by DLA and other Components.

transaction date that corresponds to the date of the reply. A DLMS 856S in response to a requisition inquiry shall contain the shipping data for the materiel shipped.

C5.1.6.12.6. Narrative Explanation. Status Code CA and TD are the only status conditions to which the source of supply shall provide a narrative explanation (in a free-form format) identifying the reason for rejection.

C5.1.6.12.7. Abbreviated Messages. The DoD Components may opt to use abbreviated status to activities.

C5.1.6.12.8. Cancellation Request. A DLMS 870S with Status Code BF sent in response to cancellation requests, with a document number not matching source of supply records, prevents source of supply processing of later transactions for this same document number. When providing Status Code BF in response to a cancellation request, also provide Status Code BF in response to all other transactions received containing the same transaction reference number. Sources of supply shall retain accessible history records of Status Code BF generated from processing no-record cancellation requests for a minimum of six months following the generation of Status Code BF.

C5.1.6.12.9. Materiel Returns Status. Use [Chapter 11](#) procedures for providing materiel returns supply status transactions resulting from processing OMRs and OMR-related transactions.

C5.1.6.12.10. Free Issue. Requisitions that fail free issue validation shall be rejected with Status Code CM; a new funded requisition may be submitted if the materiel is still required. Requisitions that fail free issue validation after materiel release (post-post requisitions/issue) may be handled as funded requirements. In this case, the source of supply shall furnish Status Code DT alerting eligible status recipients that the post-post requirement is not authorized for free issue and to adjust fund obligation records as materiel will be billed to the requisitioner.

C5.1.6.12.10.1. Where a post-post requisition contains a free issue Signal Code D or M and free issue is not authorized, the signal code shall be modified to the applicable billable signal code. Where the original requisition identified a valid fund code, it shall be used for billing; otherwise, the fund code shall be modified to indicate non-interfund billing (Fund Code XP):

C5.1.6.12.10.1.1. Signal Code D shall be replaced with Signal Code A to show the correct shipping activity. (Both D and A ship-to the requisitioner as identified in the document number of original submission.)

C5.1.6.12.10.1.2. Signal Code M shall be replaced with Signal Code J to show the correct shipping activity. (Both M and J ship-to the supplementary address identified in the original submission.)

C5.1.6.12.10.2. Since post-post orders are already shipped and cannot be split, if part of the quantity ordered is not eligible for free issue, the entire order shall be denied free issue.

C5.1.6.13. Time Standards for Providing Status Transactions. When required, sources of supply shall dispatch applicable status on requisitions, retransmitted requisitions, reinstated requisitions, and responses to requisition inquiries within the times prescribed below:

C5.1.6.13.1. Supply Status

C5.1.6.13.1.1. Two calendar days from receipt of PD 01-08 transactions.

C5.1.6.13.1.2. Five calendar days from receipt of PD 09-15 transactions.

C5.1.6.13.1.3. Twenty-four hours after release of MOV requests.

C5.1.6.13.2. Shipment Status

C5.1.6.13.2.1. Twenty-four hours after shipment (or release to carrier) for PD 01-03 transactions.

C5.1.6.13.2.2. Forty-eight hours after shipment for PD 04-08 transactions.

C5.1.6.13.2.3. Three working days after shipment for PD 09-15 transactions.

C5.1.6.13.2.4. Twenty-four hours from receipt of PD 01-03 requisition inquiries.

C5.1.6.13.2.5. Forty-eight hours from receipt of PD 04-08 requisition inquiries.

C5.1.6.13.2.6. Three working days from receipt of PD 09-15 requisition inquiries.

C5.1.7. Distribution of Status

C5.1.7.1. Requisition Cancellations. Sources of supply shall automatically send supply and/or shipment status in response to requisition cancellations, including mass and universal cancellations. In addition to status sent to organizations, DLA Transaction Services shall send shipment status to storage/procurement activities and/or the source of supply (when DVD actions with Status Code BV are applicable) on all affected shipments entering the DTS during mass or universal cancellation situations. Sources of supply shall send the status of cancellation actions within five

calendar days of receipt of the requisition cancellations. Sources of supply shall revise this status as further actions are taken on the cancellation request.

C5.1.7.2. Procedures. Sources of supply shall address supply and shipment status sent in response to requisition cancellations as follows:

C5.1.7.2.1. When there is no record of the requisition cancellation, address the status transaction to the requisitioner.

C5.1.7.2.2. When there is a record of the requisition cancellation, address the status transaction to the organization(s) identified in the cancellation request, including any additional status organizations.

C5.2. NOTICE OF AVAILABILITY

C5.2.1. Notice of Availability

C5.2.1.1. General. U.S. shipping activities use the Notice of Availability (NOA) to notify the designated country representative/freight forwarder (CR/FF) addressee that materiel is ready for shipment. A manual NOA shall be prepared for all classified shipments and certain unclassified shipments for all FMS purchases except those customers specifically requesting mechanized NOAs such as the Federal Republic of Germany. FMS purchasers desiring to receive the mechanized NOA shall submit their request to the Director, DLA Logistics Management Standards. All purchasers requesting mechanized NOA shall be identified in this paragraph. Procedures for NOA preparation are contained in paragraphs below.

C5.2.1.2. For mechanized NOAs, use the DLMS 856N Notice of Availability.

C5.2.1.3. The NOA document, manual or mechanized, shall be assigned a notice number. The FMS notice number shall be the transportation control number (TCN) assigned to the shipment and created with guidance in the DTR 4500.9-R, Appendix L.

C5.2.1.4. Procedures to be followed in releasing shipments of FMS from storage activities shall be prescribed. When FMS Offer/Release Options Y and Z are prescribed, notification to the designated CR/FF is required prior to release of the shipment. When FMS Release Option A or X is prescribed, the shipment shall be released automatically, without providing an NOA to the CR/FF.

C5.2.1.5. When the shipment is unclassified and is to be accomplished by parcel post/small parcel delivery service, the shipment shall be released automatically without an NOA and should be either insured, certified, or registered. Evidence of shipment shall be provided for all FMS shipments regardless of shipment size, weight, or value. Classified shipments always require use of an NOA.

C5.2.1.6. From SDDC, an NOA shall be furnished to the CR/FF and the shipment shall be held pending release and shipping instructions from the CR/FF. NOAs for classified shipments shall be forwarded to the CR identified in the MAPAD.

C5.2.1.7. When an export release is required from SDDC under DTR 4500.9-R, Chapter 203 (Shipper, Transshipper, and Receiver Requirements and Procedures), the shipping activity shall submit a request for export release to the SDDC Operations Center before shipment. An NOA shall be furnished to the CR/FF and shall indicate that an export release has been requested. The export release provided by the SDDC releasing authority shall include shipping instructions as coordinated with the CR/FF.

C5.2.1.8. When a shipment does not require an export release, or the shipping activity has determined there is no requirement for a high degree of protection or control and Country FMS Offer/Release Option Y is indicated for the materiel, the shipment shall be released to the CR/FF on the 15th calendar day after the NOA date, unless alternate shipping instructions are received. When an export release is required, the shipment shall be held pending receipt of releasing and shipping instructions from the SDDC releasing authority, and if such instructions are not received within 15 calendar days after the NOA date, follow up only to SDDC instead of transmitting a duplicate NOA.

C5.2.1.9. In instances where the shipping activity has determined a need for a high degree of protection or control, or FMS Offer/Release Option Z is indicated, the shipment shall be held pending receipt of release and shipping instructions from the CR/FF. Should such instructions not be received within 15 calendar days after the NOA date, a duplicate of the NOA shall be transmitted to the designated notice recipient, with the same shipment unit number assigned. This duplicate NOA shall be annotated to indicate that the shipment delay is caused by the CR/FF's failure to furnish release and shipping instructions. Two copies of [DD Form 1348-5](#), "Notice of Availability/Shipment," together with [DD Form 1348-1A](#), shall constitute the delay NOA. The Service focal point shall be advised of the problem for Army and Air Force sponsored shipments; the Navy freight forwarder assistance office shall be advised for Navy and Marine Corps sponsored shipments.

C5.2.1.10. Note that Offer/Release Option Z procedures shall be followed if any unusual transportation factors apply. This includes oversized or overweight shipments, hazardous materiel shipments, classified shipments, sensitive shipments, ammunition, arms and explosives shipments, or any other factor that mandates coordinated release procedures (this does include Canada). Shipment shall not be made until a response from the NOA is received.

C5.2.2. Notice of Availability – Reply.

C5.2.2.1. Use the DLMS 870N, Notice of Availability (NOA) Reply.

C5.2.2.2. Consignment. FMS country representatives (CR)/freight forwarders (FF) shall use the DLMS 870N to provide shipment consignment instructions to shipping activities for materiel reported available for shipment.

C5.2.2.3. Response to Notice of Availability. The CR/FF shall use the DLMS 870N to respond to the key NOA specifying shipment consignment instructions, if any, and shall coordinate these or other shipment or delivery instructions with the Military Surface Deployment and Distribution Command (SDDC) releasing authority. The CR/FF shall indicate in the DLMS 870N the date when separate shipment instructions, if required, were mailed.

C5.2.2.3.1. Reject – Duplicate Shipment. When a country replies to a DLMS 856N using a DLMS 870N and rejects the shipment because the shipment unit contains materiel that constitutes a duplicate shipment, the U.S. shipping organization shall withdraw the rejected materiel from the shipment and prepare a new DLMS 856N.

C5.2.2.3.2. Delayed. Use a DLMS 870N to indicate that all of the referenced shipments are delayed.

C5.2.2.3.3. Export Release Not Required. Use a DLMS 870N to indicate that all referenced shipments do not require export release instructions.

C5.2.2.3.4. Export Release Required. Use a DLMS 870N to indicate that all referenced shipments require export release instructions.

C5.2.2.4. Shipment Release Instructions. Shipment release instructions shall provide for shipment or delivery of materiel to a single destination by shipment unit. Shipping activities shall not split shipment units identified by shipment unit numbers to accommodate shipments or deliveries to multiple points. Specify the need for coordinated instructions in instructions to the CRs/FFs regarding replies to NOAs when an export release is required and include provisions for the following minimum data in the DLMS 870N:

C5.2.2.4.1. The complete name and address of the consignee except when the CR/FF will pick up the materiel.

C5.2.2.4.2. The date the materiel is to be shipped or the date when the CR/FF will pick up the materiel.

C5.2.2.4.3. The complete name and telephone number(s) of the individual(s) who will be available and authorized to receive on behalf of the purchasing country, for the specific classified shipment covered by the NOA advising of the availability of a classified shipment.

C6. CHAPTER 6

PHYSICAL INVENTORY CONTROL

C6.1 GENERAL

C6.1.1. Purpose. This chapter provides procedures, performance objectives, and reporting requirements for maintaining accurate records of the physical inventory, conducting physical inventory counts, and reconciling record variance for materiel within the supply system of the Department of Defense.

C6.1.2. Transactions. This chapter addresses the procedures applicable to physical inventory control functions using the Defense Logistics Management System (DLMS) 846P, 846R, and 888I. The corresponding Military Standard Transaction Reporting and Accounting Procedures ([MILSTRAP](#)) legacy transaction functionality is identified for information purposes in a mixed Defense Logistics Standard System (DLSS)/DLMS environment. Other formats such as Extensible Markup Language (XML) are also available. See the DLA Logistics Management Standards Website www.dla.mil/j-6/dlmsso/elibrary/TransFormats/140_997.asp for available formats.

C6.1.2.1. DLMS 846P, Physical Inventory Request/Transaction History Request. Physical Inventory Request/Transaction History Request transaction functions of DLMS 846P is identified by the Accredited Standards Committee (ASC) X12 beginning segment (1/BIA/20) Report Type Code (BIA02).

C6.1.2.1.1. Physical Inventory Request Transaction is DLMS 846P identified by Report Type Code TC – Physical Inventory Request. The owner/manager uses this transaction to initiate, follow up on, or cancel a physical inventory. The storage activity uses it to initiate or cancel a physical inventory. This transaction provides MILSTRAP legacy DIC DJA functionality, except as noted below for Report Type Code DD.

C6.1.2.1.2. Response to Physical Inventory Request Transaction is DLMS 846P identified by Report Type Code DD – Distributor Inventory Report. This is used by the storage activity to respond to a Physical Inventory Request Transaction from the owner/manager when the response does not include asset balances. Use as a response relates to use with physical inventory transaction Management Code R, S, or Y. This transaction provides MILSTRAP legacy DIC DJA functionality when DJA is used as a response to indicate no record of stock number or no record of ownership; physical inventory in workload bank or in process; or response to follow-up when inventory already complete (Management Codes R, S, and Y respectively).

C6.1.2.1.3. Transaction History Request Transaction is DLMS 846P identified by Report Type Code TF – Transaction History Request. Owner/Manager uses this to request transaction history from the storage activity. This transaction provides MILSTRAP legacy DIC DZJ functionality.

C6.1.2.1.4. Response to Transaction History Request Transaction (No History Available) is DLMS 846P identified by Report Type Code AD – Agent/Distributor Inventory Report. Storage activities use this to respond to Transaction History Request when no history is available. This transaction provides MILSTRAP legacy DIC DZK functionality when DZK record position 30-43 is 8-filled or 9-filled.)

C6.1.2.1.5. End of Day Transaction Count Transaction is DLMS 846P identified by Report Type Code B1 – Batch Report. This transaction is sent by the storage activity to the owner/manager to advise the owner/manager of the number of accountable (balance affecting) transactions that were forwarded during the daily course of business. This transaction provides MILSTRAP legacy DIC DZM functionality.

C6.1.2.2. DLMS 846R, Location Reconciliation. Location Reconciliation transaction functions of DLMS 846R is identified by the ASC X12 beginning segment (1/BIA/20) Report Type Code (BIA02).

C6.1.2.2.1. Location Reconciliation Request Transaction is DLMS 846R identified by Report Type Code LC –Location Inventory Report. The storage activity sends this to the owner/manager to reconcile storage activity and owner/ manager records. This transaction provides MILSTRAP legacy DIC DZH functionality.

C6.1.2.2.2. Location Reconciliation Notification Transaction is DLMS 846R identified by Report Type Code X4 – Summary Report. The storage activity sends this to the owner/manager to advise of the number of Location Reconciliation Request transactions being forwarded. This transaction provides MILSTRAP legacy DIC DZN functionality.

C6.1.2.2.3. Location Reconciliation History Notification Transaction is DLMS 846R identified by Report Type Code ZZ – Mutually Defined. [An ASC X12 data maintenance was approved in version 5030 for DLMS 846R Report Type Code LN-Location Reconciliation History Notification.] The storage activity sends this to the owner/manager to advise of the number of transaction history transactions are being forwarded. This transaction provides MILSTRAP legacy DIC DZP functionality.

C6.1.2.3. DLMS 888I Storage Item Correction Transaction. Storage Item Data Correction/Change transaction function of DLMS 888I is identified by the ASC X12 beginning segment (1/BGN/15) Transaction Type Code (BGN07) A1 – Storage Item Data Change. The owner/manager sends this transaction to a storage activity to change elements of data pertaining to an item of supply. This transaction provides MILSTRAP legacy DIC DZB functionality.

C6.1.3. Applicability. Basic elements of the physical inventory program prescribed by this chapter apply to the DoD Components, and establish:

C6.1.3.1. Uniform procedures on existing DoD policy for maintaining accurate records, conducting physical inventories and location surveys/reconciliations, researching inventory discrepancies and causes for adjustments, performance

assessments, and for quality control of work processes prescribed by the DoD Physical Inventory Control Program (PICP).

C6.1.3.2. Management control of all DoD wholesale supply system materiel to include:

C6.1.3.2.1. principal items,

C6.1.3.2.2. packaged petroleum, oil, and lubricants,

C6.1.3.2.3. secondary items regardless of whether assets are purchased with stock fund or procurement appropriations,

C6.1.3.2.4. ammunition,

C6.1.3.2.5. forms and publications, and

C6.1.3.2.6. subsistence.

C6.1.3.3. Management data and performance standards necessary to measure the effectiveness of physical inventory control in the DoD supply system.

C6.1.4. Exclusions

C6.1.4.1. These procedures are not applicable to bulk petroleum; complete ships, aircraft, ballistic missiles, nuclear weapons, and space vehicles; assets located at contractor-owned and/or contractor-operated facilities that are not maintained on the DoD wholesale property accountability records; Industrial Plant Equipment reportable to the Defense Industrial Plant Equipment Center; National Security Agency /Central Security Service assets; and National Defense Stock Pile assets. Loaned and in-transit materiel shall be accounted for in accordance with Chapter 13 and the DoD Component procedures.

C6.1.4.2. Physical inventory control procedures for bulk petroleum are contained in [DoD 4140.25-M](#), "DoD Management of Bulk Petroleum Products, Natural Gas, and Coal."

C6.1.4.3. Nuclear weapons for which the Department of Defense has custodial responsibility.

C6.2. POLICY. DoD policy is contained in [DoD 4140.1-R](#), "DoD Supply Chain Materiel Management Regulation".

C6.2.1. Purpose. The purpose of the DoD physical inventory control process is to:

C6.2.1.1. Ensure materiel accountability is properly executed within the Department of Defense;

C6.2.1.2. Ensure that accurate property accountability records for the physical inventory are maintained in support of customer requirements and readiness by performing physical inventories and location surveys/reconciliations;

C6.2.1.3. Identify and help resolve problems in supply system work processes affecting property accountability records by performing quality control of the work processes; and

C6.2.1.4. Identify repetitive processing errors and maintain accurate records for supply system transactions generated within the supply system by researching and reconciling property accountability record imbalances and potential discrepancies.

C6.2.2. Philosophy And Guiding Policy

C6.2.2.1. Inventory systems shall support perpetual inventories where current item record balances are maintained by posting all balance affecting events such as the recording receipts, shipments, inventory adjustments and changes to condition, ownership, or location as they occur. If a system can't currently support perpetual balances, efforts shall be made to bring the system into compliance.

C6.2.2.2. The dynamic nature of the physical inventory control function and the cost of counting and reconciling records require that the approach be more selective than the "100 percent wall-to-wall total item count" concept. Available inventory resources shall be directed toward potential and actual discrepancies, controlled inventory items, and weapon system critical items for which maximum returns are derived from applied resources.

C6.2.2.3. A fundamental requirement of inventory integrity is to implement the technical capability that provides for the total item property record that includes a single shared asset balance maintained by the storage activity.

C6.2.2.4. Storage activities shall make use of any one or a combination of the following three inventory counting approaches, as appropriate to the physical inventory item policy requirements, storage facility physical constraints, physical inventory support system capabilities, types of items, and inventory accuracy conditions..

C6.2.2.4.1. Cycle counting, where a portion of the inventory is counted either daily, weekly, or monthly until the entire inventory has been counted within the time period specified. If a system can't support perpetual balances, the cycle counting approach shall not be selected.

C6.2.2.4.2. Statistical sample counts that are statistically significant and representative of the total inventory item population are an efficient approach to quickly determine the accuracy of the inventory with minimal operational disruption. When statistical sample counts are allowed and the resultant count is within required tolerances, the inventory is considered complete. If the statistical count is outside the allowed accuracy tolerance, then the entire results of the statistical sampling must be

voided. This requires scheduling another physical inventory via another sample count, cycle count, or wall-to-wall count as appropriate to the accuracy conditions determined by the first sample count. If another sample count is used, it shall not be the same sample or a sub-set of the same sample selected earlier.

C6.2.2.4.3. Wall-to-wall inventories, where the entire count is made at a point in time and they are conducted only when:

C6.2.2.4.3.1 It is essential to strike a point in time balance for inventory;

C6.2.2.4.3.2 The storage and inventory density are small enough that there is no detrimental impact to supply support operations; or

C.6.2.2.4.3.3 When safety and security of assets and access to such assets (such as munitions and explosives) are generally more restrictive and controlled.

C6.2.2.5. All physical counts shall be blind counts; that is, personnel conducting physical counts shall have no prior knowledge or access to the on-hand quantity balance in the inventory records. In those rare instances where segregation of duty controls cannot guarantee blind counts, other local effective risk mitigation techniques shall be applied such as increased supervision and two member count teams.

C.6.2.2.6. Personnel performing physical counts shall be are provided tools to perform the count including the part number, description, condition, location, number of requisite counts, etc., to ensure the correct item and location and count guidance is provided to inventory personnel conducting the inventories. The count the record shall not be provided to the counters.

C.6.2.2.7. The implementing procedures for the DoD Components are to:

C.6.2.2.7.1. Provide management priority and resources for the execution of PICP functions. Managers shall by direct or indirect supervision ensure that physical inventory teams are identified, properly staffed, trained, have the necessary instructions, tools, problem resolution assistance, and that duties are segregated to ensure accurate and timely physical counts, research, and records balance corrections.

C.6.2.2.7.2. Ensure that assets are protected against waste, loss, negligence, unauthorized use, misappropriation, and compromise in the case of controlled inventory item materiel.

C.6.2.2.7.3. Ensure that sufficient emphasis is placed on materiel accountability and inventory accuracy to promote improved performance of individuals directly responsible for the care, security, and management of DoD supply system materiel, as well as those responsible for making reports on the status of that inventory.

C.6.2.2.7.4. Ensure that duties such as receiving, posting transactions to records, and issuing are divided among the work force so that no single individual can adversely affect the accuracy and integrity of the inventory. Although multi-skilled personnel may conduct physical counts, the inventory organization must enter counts, apply in-float controls, and conduct pre-adjustment research. When adequate segregation of duties is not practical or cost-effective, other local risk mitigating controls shall be put in place to the maximum extent possible, such as increased supervision and two man count teams.

C.6.2.2.7.5. Conduct functional reviews of the PICP to ensure compliance with DoD and Component policy and procedures and establish physical inventory control as a mandatory element to be addressed in the annual internal management control assessments required by DoD Instruction 5010.40, "Managers' Internal Control Program (MICP) Procedures".

C.6.2.2.7.6. Ensure that training is provided to supply system personnel who perform functions affecting physical inventory control and that training courses are updated to teach current DoD policies, procedures, and performance goals. Training shall ensure familiarity of physical inventory staff with the items to facilitate item recognition and unit of measure peculiarities, the required count processes, research methods/tools available, and the count recording and records correction processes.

C.6.2.2.7.7. Separate dedicated physical count teams shall be established providing a knowledgeable and well trained work force to conduct physical inventory counts. An increased level of supervision is required for the less experience count team members. The exception to the forgoing is those isolated cases where the size of the storage activity is such that separate count personnel would be inefficient.

C.6.2.2.7.8. Performance goals shall be established within Government or Contractor personnel performance standards and evaluations for those individuals performing and managing physical inventory program functions on Department of Defense materiel. Feedback mechanisms for all personnel involved in the physical inventory function shall be established to compare and report actual results against standards and corrective plans of action shall be put in place when the performance does not meet the standard.

C6.2.3. Security of Materiel. Security is the first line of defense for physical inventory control; therefore, DoD Components shall pay special attention to safeguarding of inventory items. This shall include analysis of loss rates through inventories, financial liability investigation of property loss reports ([DD Form 200](#)), and criminal incident reports, to establish whether repetitive losses indicate criminal or negligent activity. Physical security procedures for supply system materiel are contained in [DoD 5200.08-R](#), "Physical Security Program."

C6.2.4. Asset Management. A single total item property record shall be shared to provide materiel asset information. At minimum, the total item property record shall include materiel that is due-in, in transit, in organic maintenance facilities, in a

contractor's custody, on loan, on-hand in distribution centers, reported on-hand at retail activities, and for reported assets in the custody of users. The record or record set shall identify the quantity, condition, and value of the item assets for each organizational entity having physical custody of these assets.

C6.2.5. Maintaining Property Accountability/Responsibility. The property accountability responsibility for total item property record segments may be delegated to, but not shared by, one or more organizational entities. However, asset balance information for a particular segment (such as the storage activity balance for an item) shall be shared; duplicative records shall not be maintained.

C6.2.5.1. Storage Activity Responsibility. The storage activity maintains the property accountability record for all materiel in storage and is responsible, at minimum, for materiel custody, care, receipt, storage, and issue; safeguarding and re-warehousing materiel; physical inventory and research; location survey/reconciliation; quality control checks; supply discrepancy report initiation, research and resolution; investigating and assessing financial liability for loss, damage, and destruction of Government property; and appropriate actions necessary to ensure that the physical on-hand quantity and the total item property record quantity are in agreement.

C6.2.5.2. Owning Department of Defense Component. The owning DoD Component shall either assume or assign the accountability for materiel not in the physical custody of a storage activity (e.g., materiel inducted for organic repair, test assembly/disassembly, conversion, modification, or reclamation; materiel in a contractor's hands (in accordance with provisions of the Federal Acquisition Regulation), in transit materiel, on-loan materiel).

C6.2.5.3. Integrated Materiel Manager Responsibility. The Integrated Materiel Manager is responsible for initiating and directing the conduct of physical inventories; providing discrepancy research and reports; resolving discrepancies, investigating, and assessing liability for loss, damage, and destruction of Government property; and taking appropriate actions necessary to ensure that the on-hand quantity and the total item property record quantity are in agreement for all DoD materiel that is not in the physical custody of DoD activities.

C6.2.6. End of the Day Processing. Use the following end of the day processing procedures pending the establishment of single shared asset balances (see paragraphs C6.2.2. and C6.2.4. above). End of the day processing shall be performed as follows:

C6.2.6.1. Owner/Manager and Storage Activity Responsibility. Owners/managers and storage activities shall match all active records (e.g., stock numbers that had any transaction affecting record balances) on-hand balances daily. The storage activity shall submit the daily closing on-hand balance to each affected owner/manager using a Location Reconciliation Request Transaction for End of Day Processing. (End of Day Processing is identified in DLMS 846R BIA06 Action Code Z; in MILSTRAP legacy DIC DZH by Type of Location Reconciliation Request Code 1 in record position 7.)

C6.2.6.2. Preparing Location Reconciliation Request and End of Day Accountable Transaction Count. Storage activities shall prepare location reconciliation request transactions by line-item (stock number + supply condition code (SCC) = line item), and type of pack, for each record experiencing transactions affecting the balance (including zero balance) and for no physical inventory adjustment required (DLMS 947I, Inventory Adjustment (Increase (Physical Inventory), with zero quantity, for Quantity or Status Adjustment Reason Code AA (MILSTRAP legacy DIC D8A)). The storage activity shall also send an End of Day Accountable Transaction Count Transaction to advise the owner/manager of the number of balance affecting transactions that were forwarded during the daily course of business. This end of day transaction count is compared to the actual number of transactions received by the owner/manager to identify missing transactions and aid in unreconciled balance (URB) research. Under DLMS, a single DLMS 846P can be used to provide the end of day transaction counts for the applicable five accountable transaction types. The five accountable transaction types for which the storage activity shall provide the owner/manager end of day transaction counts are as follows:

C6.2.6.2.1. Receipts (DLMS 527R with 1/BR02 Transaction Type Code D4; MILSTRAP legacy DIC D4_/D6_).

C6.2.6.2.2. Issues (DLMS 867I; MILSTRAP legacy DIC D7_).

C6.2.6.2.3. Inventory Adjustment-Increases (DLMS 947I with 2/W1916 Inventory Transaction Type Code AJ; MILSTRAP legacy DIC D8_).

C6.2.6.2.4. Inventory Adjustment-Decreases (DLMS 947I with 2/W1916 Inventory Transaction Type Code AD; MILSTRAP legacy DIC D9_).

C6.2.6.2.5. Inventory Adjustment-Dual (DLMS 947I with 2/W1916 Inventory Transaction Type Code DU; MILSTRAP legacy DIC DA_).

C6.2.6.2.6. For intra-Navy use only; Navy also provides an end of day transaction count for Asset Status Reports (DLMS 846I).

C6.2.6.3. Owner shall match the storage activity location reconciliation request Transactions to the affected records. Imbalances shall be programmatically researched to assure consideration of in-float documents, delayed transactions, and duplicate transactions. For unresolved mismatched quantities, the owner/manager shall update the affected record on-hand balance with the storage activity's closing on-hand balance. The mismatched quantity (gains and losses) shall be adjusted with Inventory Adjustment Increase/Decrease (Accounting Error) (DLMS 947I with Quantity or Status Adjustment Reason Code AB; MILSTRAP legacy DIC D8B/D9B).

C6.2.6.4. Owner/managers shall refer to section C6.6 for guidance on research of potential or actual Inventory Adjustments (Accounting Error), [Inventory Adjustment Increase/Decrease (Accounting Error), DLMS 947I with Quantity or Status Adjustment Reason Code AB; MILSTRAP legacy DIC D8B/D9B].

C6.2.6.5 Owners/managers shall request assistance from the storage activity to isolate causes of record imbalances to maintain transaction level integrity. The storage activity assistance should focus on data transmission (e.g., lost transactions). Owners/managers shall input Physical Inventory Transaction History Request, DLMS 846P Report Type Code TF; MILSTRAP legacy DIC DZJ, Transaction History Request to the storage activity for data transmission (e.g. lost transactions).

C6.2.7. Reconciling Total Item Property Records with Financial Records. Owing DoD Components shall reconcile total item property records and financial records as prescribed by [DoD 7000.14-R](#), "Department of Defense Financial Management Regulations (FMRS)" to ensure compatibility of the total inventory value reflected by these records and associated reports.

C6.2.8. Item Management/Control. DoD materiel is managed and controlled by stock number, and SCC, and by type of pack; therefore, physical inventories shall be conducted and the results reported to owners/managers by stock number and SCC, and by type of pack.

C6.2.9. Storage Activity Record Keeping. Storage activities shall maintain quantitative balance records for all on-hand materiel regardless of ownership. Storage activities shall maintain transaction histories to support the balance records. Maintenance of these records shall provide the capability to detect theft or diversion of materiel and improve the ability to determine the cause of inventory variances for corrective action.

C6.2.10. Inventory Prioritization. DoD Components shall select and prioritize items for inventory for which they are accountable as follows:

C6.2.10.1. Inventory Sampling

C6.2.10.1.1. Annual Record Accuracy Statistical Sample. A stratified, hierarchal inventory sample shall be accomplished at least once annually for the purpose of validating the accuracy of the accountable records. The results of this sample report on the percent of records that match the physical count exactly or are within the allowed tolerance. The annual record accuracy statistical sample provides a barometer of performance and improvement opportunities for local storage activity managers. The results of the sample shall be reported in accordance with the item categorizations stratification and tolerances cited in paragraph C6.2.12.5. When the physical count of an item is completed, the physical count and record quantity are compared; if the two are within the specified tolerance for Categories B and C the accuracy of that record is considered correct, if the tolerance is exceeded the record is counted as inaccurate. Items in Categories A and D have a zero tolerance; therefore, any difference between the physical count and the record quantity is counted as an inaccurate record.

C6.2.10.1.2. Annual Chief Financial Officer's (CFO) Statistical Sample Inventory. The Chief Financial Officer's Act (CFOA) of 1990 requires that the

Department of Defense, the Military Services, and Defense Agencies submit financial statements to the Congress. One of the financial statement elements is the dollar value of on-hand supply inventory. The purpose of the Annual CFO Statistical Sample Inventory is enable the Components to estimate the dollar value of the non-fuel portion of the DoD on-hand inventory held in storage for annual financial statement reporting. The Components shall conduct a stratified, hierarchal statistical sample inventory for the purpose of accurately estimating the true dollar value of their respective on-hand supply inventories. The initial implementation shall be for materiel in Defense Logistics Agency (DLA) storage sites managed by the Distribution Standard System (DSS), regardless of the materiel's ownership. The requirement to conduct the CFO Annual Statistical Sample Physical Inventory may be expanded to include inventories beyond that maintained by DSS. The following are the guidelines to conduct and report the results of the annual CFO Inventory sample.

C6.2.10.1.2.1. Annual CFO Statistical Sample Inventory Schedule.

The annual CFO statistical sample inventory shall be scheduled as close to the end of the fiscal year as possible allowing sufficient lead time to conduct the sample inventory, perform analyses, and report results to support the end of fiscal year financial reports.

C6.2.10.1.2.2. Annual CFO Statistical Sample Inventory

Guidelines.

C6.2.10.1.2.2.1. The items in storage shall be stratified into dollar value categories to minimize the number of items requiring inventory while yielding results with the confidence level and precision required below. The dollar value stratifications used for sample shall be included in the CFO Inventory Value Sample Plan for that year.

C6.2.10.1.2.2.2. Every item stored, regardless of owner/manager, within the extended dollar value strata identified in the Annual CFO Sample Plan for that year shall have an equal probability of being selected in the sample and inventoried.

C6.2.10.1.2.2.3. The sample results shall have a 95% confidence level and a level of precision within + (plus) or – (minus) 2.5%.

C6.2.10.1.2.2.4. DoD CFO Statistical Sample Inventory Plan. Each year's DOD CFO Annual Statistical Sample Plan shall be provided to the Joint Physical Inventory Working Group (JPIWG) Chair for posting to the JPIWG Web Page at: www.dla.mil/j-6/dlms0/Programs/Committees/JPIWG/JPIWG.asp

C6.2.10.1.2.2.5. DoD CFO Statistical Sample Inventory Results. The Components shall use the results of the CFO Inventory Sample to valueate materiel under their respective ownership and report those values to the DoD Chief Financial Officer for use in the preparation of their respective financial statement reporting. Note that the results of the CFO Inventory Sample shall include all

adjustments and documentation that supports the physical completion of the inventory process.

C6.2.10.1.3. Annual complete (100%) physical inventories can be performed as an alternative to statistical sampling.

C6.2.10.3. Items Designated for Complete Inventories. Complete inventories shall be performed as follows:

C6.2.10.2.1. Controlled Inventory Items. The following controlled inventory items (identified in [DoD 4100.39-M](#), "Federal Logistics Information System (FLIS) Procedures Manual") require complete physical inventory and do not qualify for use of a random statistical sampling approach:

C6.2.10.2.1.1. Top secret.

C6.2.10.2.1.2. Narcotics, drug abuse items, and alcohol.

C6.2.10.2.1.3. Category I non-nuclear missiles and rockets (semiannually in accordance with [DoDM 5100.76](#), "Physical Security of Sensitive Conventional Arms, Ammunition and Explosives").

C6.2.10.2.1.4. Precious metals.

C6.2.10.2.1.5. Small arms.

C6.2.10.2.1.6. Radioactive items.

C6.2.10.2.1.7. Inert nuclear ordnance materiel.

C6.2.10.2.1.8. Other items that may be designated by the Office of the Secretary of Defense (OSD) or the DoD Component.

C6.2.10.2.2. Ammunition or Subsistence. If ammunition or subsistence is subjected to complete inventory, physical inventory and location survey may be conducted concurrently.

C6.2.10.2.3. Random Statistical Sampling for Controlled Inventory Items Not Subject to Annual Complete Physical Inventory. Controlled inventory items not subject to annual complete physical inventory must be subjected to annual random statistical sampling. Acceptable statistical sampling techniques are widely prescribed and may be used so long as every item included in the population has an equal probability of being selected in the sample. At minimum, the statistical sampling technique must provide reasonable assurance that the property accountability records are accurate with a 95 percent level of confidence, accuracy level of 95 percent, and a maximum margin of error of two percent. If the sample inventory results do not satisfy the above criteria, complete physical inventory of the population from which the sample was selected shall be performed.

C6.2.10.3. Items Not Designated for Complete Inventories. Inventories for items not designated for complete inventory under subparagraph C6.2.10.2. shall be performed as a result of:

C6.2.10.3.1. Total or partial materiel release denials (spot inventory-- see subparagraph C6.3.4.1. and Type of Physical Inventory/Transaction History Code E);

C6.2.10.3.2. Location reconciliation variances;

C6.2.10.3.3. Location survey errors;

C6.2.10.3.4. Owner/manager request (special inventory); or

C6.2.10.3.5. Owners may select items for inventory based on the owner physical inventory prioritization methodology or model which considers characteristics identified by each Service based on the Service priorities, readiness drivers; etc. The owner and storage activity shall negotiate projected workload at least once annually (prior to each fiscal year). The owner would provide prioritization methodology/model results to the distribution depot annually by submission of a Physical Inventory Request Transaction with Type Physical Inventory or Transaction History Code I¹. Items selected for inventory based on the owner priority selection systems shall not be given priority over items in subparagraphs C6.2.10.1., C6.2.10.2., C6.2.10.3.1., C6.2.10.3.2., and C6.2.10.3.3.

C6.2.11. Potential Discrepancies. Potential discrepancies between the actual physical count of materiel and the property accountability record on hand balance shall be researched and resolved in accordance with Table C6.T3. by:

C6.2.11.1. Correctly posting supply transactions (e.g., receipts, issues, adjustments) discovered during the research process that were previously incorrect or unposted resulting in the record imbalance; and/or

C6.2.11.2. Posting an inventory adjustment to correct the record imbalance.

C6.2.12. Accuracy and Performance Goals. The acceptable DoD accuracy and performance goals are as follows:

C6.2.12.1. Materiel Denial Goal: Not greater than one percent.

C6.2.12.2. Receipt Processing Performance Goal: 90 percent stored and posted within receipt time standards (see Chapter 13).

¹ The Distribution Standard System is capable of accepting Physical Inventory Request Transactions with Type of Physical Inventory/Transaction History Code I; however, the DoD Services have not implemented this capability. The DoD Service Supply PRC representatives are to notify DLA Logistics Management Standards when an implementation date is known per Approved DLMS Change (ADC) 33 (available at www.dla.mil/j-6/dlms/eLibrary/Changes/approved4.asp).

C6.2.12.3. Record Reconciliation Program Goal:

C6.2.12.3.1. Location Survey Accuracy:

C6.2.12.3.1.1. General Supplies: 97 percent.

C6.2.12.3.1.2. Ammunition: 98 percent.

C6.2.12.3.2. Location Reconciliation Accuracy:

C6.2.12.3.2.1. General Supplies: 97 percent.

C6.2.12.3.2.2. Ammunition: 98 percent.

C6.2.12.4. Ammunition Property Accountability Record Accuracy Goal: 95 percent.

C6.2.12.5. General Supplies Record Accuracy Goals.² See Table C6.T1. below.

Table C6.T1. General Supplies Record Accuracy Goals Stratification Sub-Populations And Associated Goals And Tolerance Levels

CATEGORY	SUB-POPULATION	GOAL (PERCENT)	TOLERANCE (PERCENT)
A	UNIT PRICE > \$1,000	99	0
B	UNITS OF ISSUE THAT MAY BE NONDEFINITIVE OR DIFFICULT TO MEASURE ³ OR (ON-HAND BAL > 50 AND EXTENDED VALUE < \$50,000) OR NSN ACTIVITY (# transactions affecting balance in one year) > 50	95	10
C	DATE OF LAST INVENTORY > 24 MONTHS AND ON-HAND BALANCE < 50	95	5
D	ALL OTHER MATERIEL NOT MEETING ABOVE CRITERIA	95	0
95 percent Confidence Level +4 percent Bound applicable to each category			

² Within 30 calendar days after the end of the 4th quarter each fiscal year, the DoD Components must send record accuracy goal information to ADUSD (L&MR/SCI). Data may be obtained throughout the year.

³ Applicable Units of Issue: AT, AY, BF, BK, CD, CF, CZ, DZ, FY, FT, FV, GP, GR, HD, KT, LB, MR, OZ, OT, PG, PR, SE, SF, SO, SP, SY, TD, TE, TF, TN, TO, TS, MC, MX, YD

C6.3. PHYSICAL INVENTORY PROCEDURES

C6.3.1. Inventory Program Accomplishment. Storage activities shall monitor program accomplishment throughout the fiscal year to ensure that the requirements of paragraph C6.2.10. are met.

C6.3.2. Pre-Inventory Planning. The potential for count inaccuracies shall be reduced by conducting pre-inventory planning to include:

C6.3.2.1. Actions to ensure location integrity by correcting such situations as unbinned/loose materiel; questionable identity of materiel in location; and single locations containing multiple SCCs or stock numbers, inadequately labeled shelf-life items (date of manufacture/assembly/inspection/test, as appropriate); and/or materiel lots stored in a single location.

C6.3.2.2. Document cleanup to ensure to the extent possible that receipts, adjustments, transaction reversals, and other transactions are posted to the property accountability record and that in-process receipts are stored in location prior to the established physical inventory cutoff date.

C6.3.3. Scheduled Inventories

C6.3.3.1. Item Characteristics. Storage activities shall initiate all scheduled inventories based on item characteristics, specifically the controlled inventory item code and any other category codes designated by the DoD Components that require physical inventory not less than once each fiscal year, with a Physical Inventory Request Transaction using Type of Physical Inventory/Transaction History Code G.

C6.3.3.2. Selection and Prioritization Model. Storage activities shall initiate all scheduled inventories based on selection and prioritization model criteria with a Physical Inventory Request Transaction using Type of Physical Inventory/Transaction History Code I.

C6.3.3.3. Random Statistical Sample Inventories

C6.3.3.3.1. Storage activities shall initiate the scheduled random statistical sample inventory to meet the Department's requirements to validate the accuracy of the supply records with a Physical Inventory Request Transaction using Type of Physical Inventory/Transaction History Code N.

C6.3.3.3.2. Owners may initiate a scheduled random statistical sample inventory of line items owned to determine the overall accuracy of their records with a Physical Inventory Request Transaction using Type of Physical Inventory/Transaction History Code L.

C6.3.3.3.3. Storage activities may also initiate a scheduled random statistical sample inventory of line items in storage to determine the overall accuracy of

their records with a Physical Inventory Request Transaction using Type of Physical Inventory/Transaction History Code P.

C6.3.3.3.4. Storage activities shall initiate the scheduled annual stratified random statistical sample inventory to meet the Department's requirements to conduct the Annual CFO Statistical Sample Inventory identified in paragraph C6.2.10.1.2. with a Physical Inventory Request Transaction using Type Physical Inventory/Transaction History Code L.

C6.3.4. Unscheduled Inventories

C6.3.4.1. Special Inventory. Owners shall initiate special inventories using a Physical Inventory Request Transaction. If an inventory has not been taken within the past 90 calendar days, cite Type of Physical Inventory/Transaction History Code D or J in the transaction. If an inventory has been taken within the past 90 calendar days, an effort shall be made to construct a transaction history and from it determine what the item balance should be or what discrepancy may have caused an imbalance. Only when these efforts fail to produce satisfactory results shall special inventories be performed. In this case, cite Type of Physical Inventory/Transaction History Code H in the Physical Inventory Request Transaction. The procedure for restricting special inventories may be waived when the Inventory Manager has recorded backorders for the item.

C6.3.4.2. Spot Inventory

C6.3.4.2.1. Storage activities shall initiate spot inventories as a result of total or partial materiel denial on classified and sensitive items regardless of value, pilferable items when the value of the variance is greater than \$100, and for noncontrolled items variances greater than \$5,000. These requests shall cite Type of Physical Inventory/Transaction History Code E.

C6.3.4.2.2. Storage activities shall accommodate all requests for spot inventories.

C6.3.4.2.3. Storage activities systemically initiate special inventories for a specific SCC as a result of quantity mismatches between the quantity-by-location and owner balance records using Type Physical Inventory/Transaction History Code Z.⁴

C6.3.4.2.4. On-Hand Balance Mismatch Between Locator and Property Accountability Record. Storage activities may initiate unscheduled inventories as a result of on-hand balance mismatches between the locator and property accountability records with a Physical Inventory Request Transaction using Type of Physical Inventory/Transaction History Code M.

⁴ Refer to ADC 415

C6.3.4.2.5. Storage activities shall initiate special Inventories (for all SCCs) in support of inventory accuracy improvement initiatives, using Type Physical Inventory/Transaction History C.⁵

C6.3.5. Canceling Inventories

C6.3.5.1. General. When conditions exist which preclude accurate completion of an inventory that has been established, the inventory shall be canceled by the storage activity or the owner/manager. Conditions that may require cancellation include, but are not limited to, catalog changes, rewarehousing of materiel under inventory, insufficient resources, insufficient time to meet established inventory timeframes to notify other affected owners/managers, and acts of God.

C6.3.5.2. Owner/Manager Cancellation. When an owner/manager cancels an inventory, the owner/manager shall notify all affected storage activities using a Physical Inventory Request citing Management Code N.

C6.3.5.3. Storage Activity Cancellation. When a storage activity cancels an inventory, or when an owner/manager requests cancellation of an inventory, the storage activity shall notify the requesting owner/manager using a Physical Inventory Request Transaction citing Management Code N. When a canceled inventory is required to meet annual inventory schedule requirements, the storage activity must reschedule it within the current fiscal year. When a spot inventory (Type Physical Inventory/Transaction History Code E) is canceled, it must be rescheduled within 15 calendar days.

C6.3.6. Conducting, Recording, and Reporting the Inventory

C6.3.6.1. General. Physical inventory procedures at storage activities shall provide the required asset-to-record accuracy with positive control of materiel and documentation that are in-float (e.g. including materiel release orders, receipts, condition transfers, catalog, and other data changes).

C6.3.6.2. In-Float Document Control. The storage activity may reduce the volume of in-float accountable documents during the period required for an item count by suspending the issue of low priority materiel release transactions from items undergoing inventory. However, materiel shall be released for items undergoing inventory when such release is necessary to meet the order/ship timeframes prescribed by DoD 4140.1-R, to include the recognition of the required delivery date. The storage activity may also reduce the volume of in-float accountable documents by deferring routine SCC changes, providing that it complies with Chapter 7 control requirements.

C6.3.6.3. Physical Inventory Timeframe. Storage activities shall complete physical inventories and transmit the appropriate Inventory Adjustment (Physical Inventory) Transactions (DLMS 947I with Quantity or Status Adjustment Reason Code

⁵ Ibid

AA; MILSTRAP DIC D8A/D9A) to the owner/manager within 30 calendar days subsequent to the physical inventory cutoff date (PICD) for scheduled inventories and within 15 calendar days after the PICD for unscheduled inventories.

C6.3.6.4. Post Count Validation and Pre-adjustment Research. The storage activity shall compare the adjusted count with the balance kept by the storage activity to determine the potential variance and initiate post count validation and pre-adjustment research as required under section C6.4. Immediately upon completion of post count validation and pre-adjustment research, the storage activity shall record the count and date of last inventory on the storage activity quantitative balance record.

C6.3.6.5. Zero Quantity Adjustments. When no adjustment is required, the storage activity shall update the storage activity record with the date of last inventory and send an Inventory Adjustment Increase (Physical Inventory) transaction (DLMS 947I with Quantity or Status Adjustment Reason Code AA; MILSTRAP legacy DIC D8A) with zero quantity for each line item to the owner/manager to indicate completion of the inventory. The owner/manager shall update the date of last inventory using the adjustment transaction date.

C6.3.6.6. Prorating Adjustment for Commingled Assets. When the storage activity record reflects more than one owner for commingled materiel, the storage activity shall apply all gains and losses to the wholesale manager. The storage activity shall prorate any losses that cannot be applied to the wholesale manager among all owners having balances. Storage activities shall not consider foreign owner balances in the prorating process. Foreign owner and Special Defense Acquisition Fund balances shall not be altered unless they are the only remaining balances for reporting a loss. Resolution of these losses shall be in accordance with DoD Security Assistance Program policy.

C6.3.6.7. Processing Physical Inventory Adjustments. The storage activity shall process Inventory Adjustment (Physical Inventory) transactions (DLMS 947I with Quantity or Status Adjustment Reason Code AA; MILSTRAP legacy DIC D8A/D9A) by line-item and type of pack for subsistence, to update the storage activity quantitative balance record and each owner/manager record.

C6.3.7. Reconciling Manual Records for Controlled Items. When manual records are maintained for control of assets in secured storage, the storage activity, shall at minimum reconcile these records at the time of inventory with the corresponding storage activity records and physical materiel counts.

C6.3.8. Unscheduled Physical Inventory Follow-up

C6.3.8.1. Owner/manager Follow-up on Physical Inventory Request. When the owner/manager has requested an unscheduled inventory and no adjustment or completion transaction has been received within 40 calendar days of the date of the request, the owner/manager shall initiate a follow-up using a Physical Inventory

Request Transaction, citing Management Code X and duplicate the remaining data from the Physical Inventory Request Transaction that established the inventory.

C6.3.8.2. Storage Activity Response to Follow-Up on Physical Inventory Request. The storage activity shall respond to the owner/manager follow-up within five calendar days by providing the appropriate adjustment, completion, or cancellation transaction. If an adjustment or completion transaction was previously sent and a follow-up is received, the storage activity shall reply by sending a Response to Physical Inventory Request Transaction with Management Code Y to the owner/manager. The storage activity shall also send DLMS 947I showing the actual physical inventory adjustment, and identified as submission of historical information by 1/W1506/020, code W1. (Storage activities operating under MILSTRAP send MILSTRAP legacy DIC DZK Transaction History Transmittal for the physical inventory adjustment.)

C6.3.8.3. No Record of Physical Inventory Request. If the storage activity does not have a record of the owner/manager original Physical Inventory Request Transaction, the storage activity shall process the Physical Inventory Request Transaction with Management Code X as an original Physical Inventory Request Transaction.

C6.4. RESEARCH OF POTENTIAL OR ACTUAL INVENTORY ADJUSTMENTS (PHYSICAL INVENTORY) (DLMS 947I with Quantity or Status Adjustment Reason Code AA; – Document Identifier Code D8A/D9A)

C6.4.1. Policy. DoD Components shall ensure that potential or actual Inventory Adjustments (Physical Inventory), (DLMS 947I with Quantity or Status Adjustment Reason Code AA; D8A/D9A), are researched in accordance with the value of the adjustment and type of item. The DoD criteria for this research are set forth in Table C6.T3, and shall be used as the basis for selective research for supply system materiel. A reduction of the volume of erroneous adjustments can only be achieved by conducting specified degrees of research before posting the adjustment transaction. More stringent research requirements may be imposed by DoD Components based upon the limits of available resources and upon specific asset control problems. However, in no case shall adjustments be processed against items without required preadjustment research having been performed (see Table C6.T3.).

C6.4.2. Objectives. Analysis of inventory adjustments is vital to:

C6.4.2.1. Identify failures in the control systems so improvements can be made.

C6.4.2.2. Reduce similar discrepancies in the future.

C6.4.2.3. Ensure that the proper adjustment was made.

C6.4.2.4. Evaluate indicators of trends or system problems for corrective action.

C6.4.2.5. Detect negligence, abuse, or theft of materiel. Known or suspected negligence, abuse, or theft shall be researched in accordance with DoD 7000.14-R and Table C6.T3.

C6.4.3. Timeliness of Research. Timely completion of the research of potential or actual Inventory Adjustments (Accounting Error) is essential. Delay increases the complexities of adequate research and reduces the probability of conclusive findings.

C6.4.3.1. Pre-adjustment Research. Storage activity pre-adjustment research must be completed and the physical inventory adjustment/completion action posted to the owner/manager record within 30 calendar days from the PICD for scheduled inventories and 15 calendar days from the PICD for unscheduled inventories.

C6.4.3.2. Mandatory Causative Research. The storage activity must complete mandatory causative research within 45 calendar days from the date the adjustment transaction was posted. If sample causative research is used as allowed by Table C6.T3., Minimum Research Requirements, the sample causative research must be completed within 45 calendar days from the date the sample causative research listing is created.

C6.4.4. Transaction History. For intra-Component (or inter-Component, based on agreement of the involved DoD Components) reconciliation, the owner/manager may request transaction history for analyzing inventory discrepancies.

C6.4.4.1. Transaction History Request. The owner/manager shall request the history using a Transaction History Request Transaction citing the appropriate Type Physical Inventory/Transaction History Code. Transaction history shall consist of all transactions affecting the balance for the requested timeframe.

C6.4.4.2. Transaction History Data. The storage activity shall send transaction history data by submitting the affected transactions identified as a historical submission with beginning segment Action Code W1. DLMS transactions subject to historical submission are: receipt, issue, materiel release order, materiel release advice, and inventory adjustment (DLMS 527R, DLMS 867I, DLMS 940R, DLMS 945A, and DLMS 947I, respectively). When no history is available for the selected timeframe, submit a Response to Transaction History Request (No History Available) Transaction with Type of Physical Inventory/Transaction History Code 8 or 9. (Storage activities still operating under MILSTRAP shall send legacy DIC DZK Transaction History Transmittal for all transactions affecting the balance for the requested timeframe).

C6.4.5. Error Classification Coding for Physical Inventory Adjustments. Causes of potential/actual inventory adjustments are determined by research. Causes shall be classified, analyzed, and evaluated so action may be taken to correct situations that are causing the errors. Inventory Adjustment (Physical Inventory) Error Classification Codes shall be entered in Inventory Adjustment (Physical Inventory) Transactions

(DLMS 947I with Quantity or Status Adjustment Reason Code AA; MILSTRAP legacy DIC D8A/D9A)⁶. For analysis and evaluation, physical inventory adjustment error conditions shall be associated with the operation in which they occurred (e.g., receiving, issues) and classified by type within each operation. For reporting purposes, each operation and each error type have been identified by an alphabetic or numeric code in the Error Classification Code. The error classification system is structured to provide the DoD Components the latitude to amplify the DoD defined error classifications; however, the DoD Components shall summarize internally defined error classifications to the appropriate DoD classification for all reports provided to higher authorities, auditors, etc.

C6.4.6. Error Classification Feedback and Correction

C6.4.6.1. Causative History Summary. Storage activities shall send a quarterly summary of the causative research results for each individual National Item Identification Number (NIIN) to the Inventory Owners (or the service International Logistics Control activity in the case of Foreign Military Sales (FMS)-owned materiel). The summary information shall be provided for all adjustments of extended dollar value greater than \$16K and any adjustment of an item with a Controlled Inventory Item Code (CIIC) that is Classified, Sensitive or Pilferable. At minimum, the provided summary shall include, for each NIIN: SCC, Inventory Adjustment Transaction (DLMS 947I or MILSTRAP legacy DIC D8_/D9_), quantity adjusted, routing identifier code (RIC) of the storage activity making the adjustment, error classification code, controlled inventory item code, date created, date completed, and total adjusted dollar value.

C6.4.6.2. Error Correction

C6.4.6.2.1. Storage Activity Commanders. Commanders at the storage activities shall use this information to identify and correct recurring errors in their operations (e.g., through established depot training programs, quality control checks, and other actions as required).

C6.4.6.2.2. Inventory Owners. Inventory owners shall use this information as a means to gain insight into the adjustments and subsequent actions taken to resolve the error and to evaluate whether changes in procurement practices, cataloging data, or other actions may be taken to prevent potential distribution errors. A single point of contact shall be designated at the owner level to request information from DLA.

C6.4.7. Controlled Inventory Item Accounting Adjustments. Unresolved physical inventory adjustments for all classified and sensitive items regardless of value, and for pilferable items when the adjustment is in excess of \$2,500, as prescribed by DoD 7000.14-R, shall be referred to security officials of the storage activity at which the

⁶ The owner/manager may use Error Classification Codes in Inventory Adjustment (Accounting Error) Transactions (DLMS 947I with Quantity or Status Adjustment Reason Code AB; MILSTRAP legacy DIC D8B/D9B) pending establishment of single shared asset balances (see paragraphs C6.2.2. and C6.2.4.).

adjustment occurred to determine whether there is culpability or when fraud, waste, or abuse is suspected (see Table C6.T3).

C6.4.8. Materiel Release Denials. Chapter 4 prescribes DoD standard document formats, data codes, and criteria for the preparation and processing of materiel release denial at storage activities and by owners/managers.

C6.4.8.1. Upon initiation of a materiel release denial citing Management Code 1, 2, 3 (applies to subsistence only), or 4 (applies to subsistence and ammunition only), storage activities shall:

C6.4.8.1.1. Reverse the issue, adjust the storage activity record on-hand quantitative balance to zero, and send an inventory adjustment decrease transaction (DLMS 947I with Quantity or Status Adjustment Reason Code AA; MILSTRAP legacy DIC D9A) for the adjusted quantity to the owner/manager attempting to issue the materiel, citing denial Management Code 1, 2, 3, or 4, and send an inventory adjustment decrease to any other owners affected by the denial loss, citing denial Management Code Q.

C6.4.8.1.2. Initiate a spot inventory as required under subparagraph C6.3.4.2.

C6.4.8.2. If an inventory can be accomplished without delaying the processing of the Materiel Release Order beyond the prescribed Uniform Materiel Movement and Issue Priority (UMMIPS) timeframes (see DoD 4140.1-R), it may be conducted prior to processing a denial transaction.

C6.5. REVERSAL OF INVENTORY ADJUSTMENTS (PHYSICAL INVENTORY)-DOCUMENT IDENTIFIER CODE D8A/D9A. Storage activity reversal of Inventory Adjustment (Physical Inventory) Transactions (DLMS 947I with Quantity or Status Adjustment Reason Code AA; MILSTRAP legacy DIC D8A/D9A) is a required capability, which must be implemented with proper controls and supported by proper documentation. At a minimum, procedures for reversing adjustments shall contain the following control features:

C6.5.1. Posted/Unposted Source Documents. Regardless of age, reversals required to correct inventory records when posting previously unposted or incorrectly posted supply transactions (e.g., receipts, issues), are limited to those transactions that can be properly documented to reference the specific transaction document number(s) that shall be processed to offset the reversal.

C6.5.2. Inventory Adjustment Corrections. Reversals required to correct physical inventory adjustments that were made based on incorrect/incomplete information are limited to two years from the date of the original adjustment unless the requirements of paragraph C6.5.1. are met. All reversals must be properly documented.

C6.5.3. Limitations. Reversals shall not be processed solely on the basis of a previous offsetting physical inventory adjustment.

C6.5.4. Performance Assessment. Reversals after causative research allow for the proper posting of the correct supply transactions and audit trails. The number of inventory adjustments and related monetary values shall be separated and identified as follows⁷:

C6.5.4.1. Absolute adjustment rates shall include all gain and loss reversals from reporting and prior quarters' adjustment transactions.

C6.5.4.2. Initial adjustment rates shall not include gain and loss reversals from reporting or prior quarters' adjustments:

C6.6. RESEARCH OF POTENTIAL OR ACTUAL INVENTORY ADJUSTMENTS (ACCOUNTING ERRORS) – (DLMS 947I with Quantity or Status Adjustment Reason Code AB) - Document Identifier Code D8B/D9B⁸)

C6.6.1. Policy. DoD Components shall ensure that potential or actual Inventory Adjustments (Accounting Errors), DLMS 947I with Quantity or Status Adjustment Reason Code AB; D8B/D9B, are researched in accordance with the value of the adjustment and type of item. The DoD criteria for this research are set forth in Table C6.T3. and shall be used as the basis for selective research for supply system materiel. More stringent research requirements may be imposed by DoD Components based upon the limits of available resources and upon specific asset control problems. Though physical inventory adjustments are based on physical counts, accounting adjustments are based on the reconciliation of inventory records as part of End-of-Day or Location Reconciliation business processes. When differences exist between the 'systems', an accounting adjustment (gain/loss) (DLMS_947I with Quantity or Status Adjustment Reason Code AB; DIC D8B/D9B) shall be created to adjust the owner/manager's total item property record inventory balance to agree with the storage activity's closing end of day balance. As such, the causes of accounting adjustments are driven by the handling of 'transaction data' versus the physical handling of materiel. Therefore, research requirements shall focus on events/processes that cause the databases (between the storage activity and total item property record) to be out of sync. DoD Components shall research transaction histories and violation files to locate 'missing' supply transactions, clear exceptions, process the appropriate 'supply' transaction, and reverse the accounting adjustment to resolve the original mismatch condition.

C6.6.1.1. When subsequent research finds that the accounting adjustment was caused by an unposted, duplicate, or otherwise improperly posted transaction, a reversal of the accounting adjustment and (as appropriate) the incorrectly posted 'supply' transaction is required. The owner/manager shall ensure that proper audit trails are maintained to reflect the posting of the correct supply transaction.

⁷ Refer to ADC 415

⁸ Refer to ADC 414

C6.6.1.2. Owners/managers shall request assistance from the storage activity to isolate supply transaction processing errors and focus on data transmission and validation of system logic to resolve causes of database mismatches.

C6.6.2. Objectives. Analysis of Inventory Adjustments (Accounting Errors) is vital to:

C6.6.2.1. Identify failures in the control systems so improvements can be made.

C6.6.2.2. Reduce similar discrepancies in the future.

C6.6.2.3. Ensure that the proper adjustment was made.

C6.6.2.4. Evaluate indicators of trends or system problems for corrective action.

C6.6.3. Timeliness of Research. Timely completion of the research of potential or actual Inventory Adjustments (Accounting Error) is essential. Delay increases the complexities of adequate research and reduces the probability of conclusive findings.

C6.6.3.1. Mandatory Causative Research. The owners/managers must complete mandatory causative research within 45 calendar days from the date the adjustment transaction was posted.

C6.6.3.2. Sample Causative Research. If sample causative research is used as allowed by Table C6.T3., Minimum Research Requirements, owners/managers must complete the sample causative research within 45 calendar days from the date the sample causative research listing is created.

C6.6.4. Inventory Adjustment (Accounting Error) Error Classification Coding. Causes of potential/actual Inventory Adjustments (Accounting Error) are determined by research. Causes shall be classified, analyzed, and evaluated so action may be taken to correct situations that are causing the errors⁹. For analysis and evaluation, error conditions shall be identified and classified by type. For reporting purposes, each error type is identified by an alphabetic or numeric code as shown in MILSTRAP Appendix AP2.16B. The error classification system is structured to provide the DoD Components the latitude to amplify the DoD defined error classifications; however, DoD Components shall summarize internally defined error classifications to the appropriate DoD classification for all reports provided to higher authorities, auditors, etc.

C6.6.5. Error Classification Feedback and Correction

⁹ The owner/manager may use Error Classification Codes in Inventory Adjustment (Accounting Error) Transactions (DLMS 947I with Quantity or Status Adjustment Reason Code AB; MILSTRAP legacy DIC D8B/D9B) pending establishment of single shared asset balances (see paragraphs C6.2.2. and C6.2.4.).

C6.6.5.1. Causative History Summary. Owners/managers shall prepare a quarterly summary of causative research results for Inventory Adjustments (Accounting Error) (DIC D8B/D9B) and provide feedback to the appropriate owners/managers officials.

C6.6.5.2. Error Correction. Inventory Owners shall use this information as a means to gain insight into the inventory accounting adjustments and subsequent actions taken to resolve the error and to evaluate whether changes in supply transaction 'edits', cataloging data, or other actions may be taken to prevent potential inventory accounting errors. A single point of contact shall be designated at the owner level to request information from DLA.

C6.6.6. Controlled Inventory Item Accounting Adjustments. Unresolved Inventory Adjustments (Accounting Error) for all classified and sensitive items regardless of value, and for pilferable items when the adjustment is in excess of \$2,500 as prescribed by DoD 7000.14-R, shall be referred to security officials of the storage activity at which the adjustment occurred to determine whether there is culpability or when fraud, waste, or abuse is suspected (see Table C6.T3.).

C6.7. REVERSAL OF INVENTORY ADJUSTMENT (ACCOUNTING ERRORS) TRANSACTIONS. Reversal of DLMS_947I with Quantity or Status Adjustment Reason Code AB; DIC D8B/D9B inventory accounting adjustments is a required capability that must be implemented with proper controls and supported by proper documentation. (From MILSTRAP Appendix AP3, Introduction, Paragraph AP3.3.2, "When reversal or cancellation of the original transaction is required, enter a reversal indicator in record position 25.") At minimum, procedures for reversing adjustments shall contain the following control features:

C6.7.1. Posted/Unposted Source Documents. Regardless of age, reversals required to correct inventory accounting records when posting previously unposted or incorrectly posted supply transactions (e.g., receipts, issues), regardless of age, are limited to transactions that can be properly documented to reference the specific transaction document number(s) that shall be processed to offset the reversal.

C6.7.2. Inventory Accounting Adjustment Corrections. Reversals required to correct inventory accounting adjustments that were made based on incorrect/incomplete information are limited to two years from the date of the original adjustment unless the requirements of paragraph C6.5.1. are met. All reversals must be properly documented.

C6.7.3. Limitations. Reversals shall not be processed solely on the basis of a previous offsetting inventory accounting adjustment.

C6.7.4. Performance Assessment. Reversals against transactions processed within the adjustment period shall be separated and identified as follows:

C6.7.4.1. Gross inventory accounting adjustment during the current period,

C6.7.4.2. Reversal of prior quarters' inventory accounting adjustment transactions,

C6.7.4.3. Reversal of current quarters' inventory accounting adjustment transactions, and

C6.7.4.4. Total value of net inventory accounting adjustments during the current period (i.e., value of net gains added to value of net losses).

C6.8. RECORD RECONCILIATION PROGRAM. Each DoD Component shall implement a record reconciliation program that shall consist of both a location survey and a location reconciliation.¹⁰ The DoD acceptable accuracy goals are provided in subparagraph C6.2.12.3. The DoD Components may impose more stringent standards internally. The record reconciliation program is subject to the quality control checks delineated in section C6.10. Errors shall be subject to validation and research before they are counted as errors. The DoD Components shall collect and analyze all Type III errors (see subparagraphs C6.8.1.2.3. and C6.8.2.2.3.) by element.

C6.8.1. Location Survey

C6.8.1.1. Location survey requires a physical verification, other than actual count, between assets and recorded location data to ensure that all assets are properly recorded. When a discrepancy is identified during the location survey program (Type I or Type II error (see subparagraphs C6.8.1.2.1. and C6.8.1.2.2.)), the storage activity shall conduct prompt research and assess the need for a special inventory Physical Inventory Request Transaction with Type of Physical Inventory/Transaction History Code K). In some instances, location survey and physical inventory shall be conducted concurrently for ammunition and subsistence.

C6.8.1.2. Timing. Location survey shall be accomplished at each storage activity not less than once each fiscal year, by (1) performing complete location survey of all locations; (2) using a statistical sampling methodology that ensures all locations are included in the population and have a probability of selection; or (3) a combination of complete and statistical sampling.

C6.8.1.3. Rewarehousing. A location survey shall be conducted in both the gaining and losing storage areas following the completion of rewarehousing projects. A location survey conducted as a result of rewarehousing projects may be considered to have satisfied the annual survey requirement for the area surveyed.

C6.8.1.4. Comparison of Storage Locations with Locator Records. The proper sequence for operating a location survey requires comparing assets in storage locations with locator records. This sequence of operation is important to detect assets in unrecorded locations.

¹⁰ The location reconciliation process shall not be required with the establishment of single shared-asset balances (see paragraphs C6.2.2. and C6.2.4.).

C6.8.1.5. Lots/Segments. An objective is to identify items to location survey lots or segments. Lots/segments shall be of a manageable size (number of items) to permit location survey in minimum time, to ensure maximum uninterrupted service to customers, and to obtain the greatest degree of accuracy from the location survey.

C6.8.1.6. Items within Lot/Segment. Items within a lot/segment that have been subject to a complete item inventory shall satisfy the annual survey requirement when the entire lot/segment is located in a clearly designated, conterminous warehouse space. These inventoried lots/segments may be excluded from the complete survey for the fiscal year in which they were counted. Sites that perform complete physical inventories including empty locations have satisfied the location survey requirement. These sites shall not be required to collect location survey metrics.

C6.8.1.7. Permanent Item Locations. When permanent locations are reserved for items, unoccupied recorded locations shall be identified and/or verified during the location survey.

C6.8.1.8. Accuracy Measurement. To measure the accuracy of the results of the location survey, discrepancies shall be classified in one of the three categories listed below. Only one error per stock number per location is charged when locator delete, locator establish, or locator record correction is required for the same location. When the stock number and actual assets differ, the discrepancy shall be classified as a locator establish action only.

C6.8.1.8.1. Locator Record Deleted. The removal or change of a locator record when there is a recorded location but there are no physical assets—unless the location is being held open for new receipts. (Type I location survey error.)

C6.8.1.8.2. Locator Error Established. The recording of locations when assets are physically found in storage and no locator records exist, or when the recorded stock number disagrees with the materiel in the location. (Type II location survey error.)

C6.8.1.8.3. Locator Record Corrected. Changes to the locator record when physical materiel characteristics differ from any of the following data elements (Type III location survey error):

C6.8.1.8.3.1. Unit of issue.

C6.8.1.8.3.2. SCC.

C6.8.1.8.3.3. Controlled inventory item code (see DoD 4100.39-M, Volume 10, Table 61). Verification of the code shall consist of ensuring that assets are stored in areas providing the degree of security commensurate with the assigned code.

C6.8.1.8.3.4. Type of pack code (for subsistence only). (See Volume 2, Chapter 4.)

C6.8.1.8.3.5. Lot number, serial number, or unique item identifier (for ammunition only).

C6.8.1.8.3.6. Completeness and accuracy of magazine data card (for ammunition only).

C6.8.1.8.3.7. Special Inventory. To ensure accuracy of property accountability records, special inventories shall be performed when assets are found in an erroneous or unrecorded location, or when there are mismatches in the unit of issue that may result in a quantity variance.

C6.8.2. Location Reconciliation.¹¹

C6.8.2.1. Requirements. Location reconciliation requires a match between storage activity records and owner/manager records in order to identify and to correct situations when there is: (1) an owner/manager record with no corresponding storage activity record, (2) a storage activity record with no corresponding owner/manager record, (3) common elements of data that do not match, and/or (4) quantity discrepancies. Mismatches shall be researched and special inventories conducted when required to effect corrective action.

C6.8.2.2. Accuracy Measurement. To measure the accuracy of the results of the location reconciliation program, discrepancies shall be classified in one of the four categories listed below (report only one error per location reconciliation error).

C6.8.2.2.1. Owner/manager record shows balance for storage activity; no Location Reconciliation Request Transaction received. (Type I location reconciliation error.)

C6.8.2.2.2. Location Reconciliation Request Transaction received from storage activity; no corresponding owner/manager record (Type II location reconciliation error.)

C6.8.2.2.3. Mismatch of any of the following data elements (Type III location reconciliation error):

C6.8.2.2.3.1. Unit of issue.

C6.8.2.2.3.2. Ownership/manager identifier.

C6.8.2.2.3.3. Controlled inventory item code (see DoD 4100.39-M, Volume 10, Table 61).

C6.8.2.2.3.4. Type of pack code (subsistence only).

¹¹ The location reconciliation process shall not be required with the establishment of single shared-asset balances (see paragraphs C6.2.2 and C6.2.4).

C6.8.2.2.3.5. Shelf-life code.

C6.8.2.2.4. Quantity Discrepancy (Type IV Reconciliation Error).

C6.8.2.3. Guidance. The DoD Components shall perform location reconciliation in accordance with the following guidance:

C6.8.2.3.1. Annual Location Reconciliation. Owners/managers and storage activities shall reconcile all records annually. The reconciliation shall be performed prior to the Chief Financial Officer inventories in September. The annual reconciliation shall be done as required by subparagraph C6.8.2.3.3. below.

C6.8.2.3.2. Location Reconciliation Request. Storage activities shall prepare Location Reconciliation Request Transactions by line-item and by type of pack, for each stock number regardless of the balance (including zero balances). For annual location reconciliation request, storage activities shall cite DLMS 846R, Action Code 24 or, for MILSTRAP legacy DIC DZH, Type of Location Reconciliation Request Code 2. Storage activities shall send the request to the owner/manager. Storage activities preparing MILSTRAP legacy DIC DZH requests shall ensure that consecutive transaction numbers by RIC are assigned to the location reconciliation requests for control purposes.

C6.8.2.3.3. Location Reconciliation Schedule. All owner/manager and storage activity records (active and inactive records, including zero balances) shall be reconciled not less than once each fiscal year. Storage activities and Components may negotiate agreements for conducting annual location reconciliation any time during the fiscal year. When no such agreement exists, location reconciliation requests shall be prepared on the second Tuesday of the month indicated in the schedule in Table C6.T2. below:

Table C6.T2. Location Reconciliation Preparation Schedule When No Other Schedule Agreement Exists

Service or Agency	Preparations Date Second Tuesday in:
Army	January
Navy	March
Marine Corps	May
Air Force	July
Defense Logistics Agency	July

C6.8.2.3.4. Control of Location Reconciliation. Storage activities and owners/managers shall establish the following provisions for controlling location reconciliation:

C6.8.2.3.4.1. Location Reconciliation Notification. Storage activities shall advise intended recipients (owners/managers) of the number of transactions being forwarded, and cut-off date, using Location Reconciliation Notification Transaction.

C6.8.2.3.4.2. Location Reconciliation Transaction History

C6.8.2.3.4.2.1. Location Reconciliation History Notification Transaction. When transaction history is required with Location Reconciliation, the storage activity shall advise intended recipients (owners/managers) of the number of historical transactions being sent, and the cutoff date, using Location Reconciliation History Notification Transactions.

C6.8.2.3.4.2.2. Transaction History to Support Location Reconciliation. For transaction history associated with annual reconciliation, the owner/manager may cite Type of Physical Inventory/Transaction History Code Y in the Transaction History Request Transaction. Transactions subject to transaction history submission are receipt (DLMS 527R with 1/BR02/20/code D4; MILSTRAP legacy DIC D4_/D6), issue (DLMS 867I; DIC D7_), materiel release (DLMS 940R, MILSTRIP legacy DIC A5_), materiel release advice (DLMS 945A, MILSTRIP DIC AR_), and inventory adjustments (DLMS 947I; MILSTRAP legacy DIC D8_/D9_). The transaction history code may be included in the transaction history submission. DLA owner/managers shall use code Y for automatic submission of history requests for the Annual (Total) Reconciliation, and code W for automatic submissions of transaction history requests for their weekly process. The storage activity perpetuates the type of physical inventory/transaction history code in the transaction history submissions.

C6.8.2.3.4.3. Owners/managers shall use the Location Reconciliation Notification and Location Reconciliation History Notification Transactions to determine receipt of all Location Reconciliation and historical transactions. Where the number of transactions to be sent does not match what was actually received, the owner/managers may reject the Location Reconciliation Notification and/or Location Reconciliation History Notification transactions using Reject Advice Transaction (DLMS 824R; MILSTRAP legacy DIC DZG), with Reject Advice Code AY.

C6.8.2.3.5. Processing Location Reconciliation Request. In processing Location Reconciliation Request Transactions, owners/managers shall match the requests to the owner/manager records. When a mismatch is programmatically unresolved, Inventory Adjustment (Accounting Error) Transaction (DLMS 947I with Quantity or Status Adjustment Reason Code AB; MILSTRAP legacy DIC D8B/D9B) shall be processed to adjust the owner/manager records. All Type I, II, III, and IV mismatches meeting the criteria for causative research (see Table C6.T3.) shall be resolved as follows:

C6.8.2.3.5.1. Research of owner/manager active and historical records.

C6.8.2.3.5.2. Research of storage activity active/historical record using Transaction History Request Transaction with Type of Physical Inventory/Transaction History Code X.

C6.8.2.3.5.3. Request physical inventory using Physical Inventory Request Transaction with Type of Physical Inventory/Transaction History Code J.

C6.8.2.3.5.4. If the above actions fail to resolve the mismatch, the Inventory Adjustment (Accounting Error) Transaction (DLMS 947I with Quantity or Status Adjustment Reason Code AB ; MILSTRAP legacy DIC D8B/D9B) shall remain on the owner/manager records.

C6.8.2.3.6. Exceptions. A physical inventory is not required under the following conditions, except when the mismatch involves classified or sensitive items (regardless of dollar value), or pilferable items (when the extended dollar value of the variance is greater than \$100).

C6.8.2.3.6.1. The owner/manager record may be adjusted without special inventory when the extended value of the variance is \$5,000 or less and 10 percent or less of the beginning value of the variant owner/manager record for Type IV errors (see subparagraph C6.8.2.2.4.).

C6.8.2.3.6.2. The owner/manager record may be adjusted without special inventory when the extended value of the variance is \$5,000 or less for Type I and Type II errors (see subparagraphs C6.8.2.2.1. and C6.8.2.2.2.).

C6.8.2.3.7. Discrepancies. When a discrepancy is identified during the location reconciliation, send the following transactions, as appropriate, to the submitting activity:

C6.8.2.3.7.1. DLMS 824R (MILSTRAP legacy DIC DZG) – Reject Advice Transaction, as prescribed in Volume 1, Chapter 6.

C6.8.2.3.7.2. DLMS 888I Storage Item Data Correction/Change Transaction as prescribed in this chapter. Storage activities shall use the Storage Item Data Correction/Change Transaction to update stock records, item locator records, and bin tags.

C6.9. RETENTION OF ACCOUNTABLE DOCUMENTATION. Audit capability is required for a period of time following the processing of documents and data and completion of the research effort. The following retention criteria shall apply:

C6.9.1. Source Documents. Retain original source documents or facsimiles (microform (microfilm, microfiche), Compact Disk-Read-Only Memory (CD-ROM)) for at least two years. Where source documents are produced, these include only accountability change documents such as receipts, issues, shipments, transfers, SCC changes, and inventory and financial adjustments. Keep source documents providing evidence of shipment to FMS recipients for two years from date of materiel shipment.

C6.9.2. Transaction History. Retain registers, records, files, tapes, and data for at least two years in a format useful for audit trail purposes. Automated inventory control systems shall be designed to facilitate the printout of transaction histories that indicate the date the last physical inventory was conducted for each item.

C6.9.3. Adjustment Research. Retain backup documentation that directly pertains to individual cases of physical inventory adjustment research efforts for at least two years.

C6.9.4. Annual Statistical Inventory. Retain annual statistical sample inventory line-item detail data for at least two years.

C6.10. QUALITY CONTROL

C6.10.1. Goals and Objectives. DoD Components shall establish a quality control program at each owner/manager and storage activity. Portions of the program can be accomplished during ongoing practices within inventory processes. Quality control results shall assist management in identifying those human, procedural, or system errors that adversely affect record accuracy and in achieving better control over physical materiel and warehousing practices. Within the scope of this quality control program, work processes directly related to the control of physical materiel shall be monitored for attained quality levels and performance evaluated on improvements, not numerical goals. Accordingly, all quality control programs shall include reviews to assess the accuracy/quality of the following work processes:

C6.10.1.1. Warehousing Practices. This includes checks of storage practices, stock rotation, shelf-life management, identification of in-store materiel, mixed stock, location accuracy and rewarehousing projects.

C6.10.1.2. Receiving Practices. This includes checks of documentation, materiel identity, quantity, and SCC; checks for processing timeliness; and verification of daily input data to the location system.

C6.10.1.3. Issuing Practices. This includes checks of legibility of issue documents; accuracy of stock selection as to identity, quantity, unit of issue, shelf life, SCC, and type of pack (subsistence only); marking of outgoing shipments; and release to carriers.

C6.10.1.4. Validity of Automated Date. This includes checks of receipt, issue, and adjustment transaction data entries against input documentation.

C6.10.1.5. Inventory Practices. This includes checks of inventory counts, location surveys, location reconciliation corrective actions, causative research, and adjustments at both the owner/manager and storage activity.

C6.10.1.6. Catalog Practices. This includes checks of catalog change processing, accuracy, and timeliness, using the affected recorded locations as the universe.

C6.10.1.7. Locator File Updates. This includes checking the accuracy of changes to the locator file (e.g., all additions, deletions, and changes of unit of issue, SCC, shelf life).

C6.10.1.8. Supply Discrepancy Report Processing. This includes checks for processing timeliness and the accuracy of the SDR initiation, follow up and reply, investigation research including identification and correction of supply errors, adjustment of accountable and financial records, and preparation of Financial Liability Investigation of Property Loss Report ([DD Form 200](#)).

C6.10.1.9. Logistics Reassignment Processing. This includes checks to determine whether the logistic reassignment actions were completed (e.g., Losing Item Manager (LIM)/Gaining Item Manager (GIM) records were changed to reflect decapitalization/transfer, LIM directed the storage activity to change the decapitalized/transferred assets to GIM ownership, the storage activity effected and advised the LIM of the change, and the LIM initiated action to resolve any quantity variances.

C6.10.1.10. Suspended Asset Processing. This includes checks of the timeliness in reclassifying suspended (SCCs J, K, L, Q, and R) materiel.

C6.10.2. Assignment of Responsibility. Whenever possible, quality control checks of these work processes shall include identification of the individual performing the tasks. This shall facilitate the placement of responsibility for appraising and improving quality with each manager within the chain of command.

C6.10.3. Command Emphasis. Continued command management emphasis and performance review are essential for the success of the quality control program. Command managers must ensure effective organizational interrelationships among the functional element concerned with the PICP such as: comptroller, data systems, transportation, warehousing, maintenance, quality control, and supply management. The quality control program shall include provisions for initiation of corrective action when acceptable quality levels are not met.

C6.11. PHYSICAL INVENTORY CONTROL PROGRAM PERFORMANCE ASSESSMENT. Each DoD Component shall collect and maintain performance standards and management data prescribed in paragraphs C6.11.1. and C6.11.2. for all materiel for which the Component maintains the property accountability record. This includes all DoD wholesale supply system assets of principal and secondary items, including package fuels, less all materiel exclusions listed in DoD 4140.1-R. When required to report this information to higher authorities Report Control Symbol (RCS): DD-AT&L 935 applies. [DD Form 2338-1](#) ("Inventory Control Effectiveness Report - Ammunition") and [DD Form 2338-2](#) ("Inventory Control Effectiveness Report - General Supplies") are available for intra-Component use when required by the DoD Component.

C6.11.1. General Supplies Performance Standards and Data¹²

C6.11.1.1. General Supplies Inventory Adjustment Report Data -- Part I. Parentheses with each paragraph number refer to data shown on the Inventory Control Effectiveness (ICE) Report (RCS DD-AT&L 935).

C6.11.1.1.1. (Line 1.) Number of Physical Inventories and Variance Rate.¹³

C6.11.1.1.1.1. (Line 1.A.) Number of Inventories Completed. The total number of line items inventoried (scheduled and unscheduled). Each SCC for a stock number at each storage activity is a line item.

C6.11.1.1.1.2. (Line 1.B.) Number of Inventories with Adjustments. The total number of line items inventoried (scheduled and unscheduled) that had an inventory variance.

C6.11.1.1.1.3. (Line 1.C.) Inventory Variance Rate. Reflects the percentage of the line items inventoried that had an inventory variance. Compute this figure by dividing the lines with an Inventory Variance by the total line items inventoried and multiplying by 100. $((1B/1A) \times 100)$.

C6.11.1.1.1.4. (Line 1.D.) Number of Inventory Adjustments Equal to or Greater Than (\geq) Causative Research Criteria. The total number of line items inventoried (scheduled and unscheduled) that had an inventory variance (overage or shortage equal to or greater than Causative Research threshold) (dollar value of the variance is \geq \$16,000 for uncontrolled item, \$2500 for a pilferable item and all adjustments of sensitive/classified items).

C6.11.1.1.1.5. (Line 1.E.) Causative Research Variance Rate. The percentage of the total number of line items inventoried (scheduled and unscheduled) that had an inventory variance that met the Causative Research threshold. Compute this figure by dividing the lines that meet Causative Research Criteria by the total line items inventoried and multiplying by 100. $((1D/1A) \times 100)$.

C6.11.1.1.2. (Line 2.) Number of Adjustments¹⁴

C6.11.1.1.2.1. (Line 2.A.) Number of Adjustment Gains (D8A). The total number of inventory gain adjustments.

C6.11.1.1.2.2. (Line 2.B.) Number of Adjustment Losses (D9A). The total number of inventory loss adjustments.

¹² Refer to ADC 415 available at: www.dla.mil/j-6/dlmsso/eLibrary/changes/processchanges.asp

¹³ Book-to-Book Adjustments are not included in section 1.

¹⁴ Book-to-Book Adjustments are included in section 2.

C6.11.1.1.2.3. (Line 2.C.) Number of Gain Reversals (D8A Reversal). The total number of gain reversals of inventory adjustments (from reporting and prior quarters).

C6.11.1.1.2.4. (Line 2.D.) Number of Loss Reversals (D9A Reversal). The total number of loss reversals of inventory adjustments (from reporting and prior quarters).

C6.11.1.1.2.5. (Line 2.E.) Total Number of Inventory Adjustments. The total number of inventory gain or loss adjustments including the number of gain and loss reversals (from reporting and prior quarters) processed during the report period. (2A + 2B + 2C + 2D).

C6.11.1.1.2.6. (Line 2.F.) Number of Issues and Receipts (Transactions). The total number of Issues and Receipts posted during the report period.

C6.11.1.1.2.7. (Line 2.G.) Number of Adjustments, Gains, and Losses including Book-to- Book Adjustments. The total number of Adjustments, Gains, and Losses including Book-to- Book adjustments posted during the reported period.

C6.11.1.1.2.8. (Line 2.H.) Transaction Adjustment Rate. The total number of Adjustments, Gains, and Losses including Book-to- Book adjustments posted during the reported period, compared to the total number of Issues and Receipts posted during the report period. Compute this figure by dividing the total number of Adjustments, Gains, and Losses including Book-to- Book adjustments by the total number of Issues and Receipts. (2G/2F).

C6.11.1.1.3. (Line 3) Monetary Value of Adjustments¹⁵

C6.11.1.1.3.1. (Line 3.A.) Value of Adjustment Gains (D8A). Monetary value of gain adjustments excluding the monetary value of gain reversals processed during the report period.

C6.11.1.1.3.2. (Line 3.B.) Value of Adjustment Losses (D9A). Monetary value of loss adjustments excluding the monetary value of loss reversals processed during the report period.

C6.11.1.1.3.3. (Line 3.C.) Value of Gain Reversals (D8A). The total monetary value of gain reversals processed during the reporting period.

C6.11.1.1.3.4. (Line 3.D.) Value of Loss Reversals (D9A). The total monetary value of loss reversals processed during the reporting period.

¹⁵ Book-to-Book Adjustments are included in section 3.

C6.11.1.1.3.5. (Line 3.E.) Total Value of Inventory Adjustments. Monetary value of gains and losses resulting from inventory adjustments including the monetary value of gain and loss reversals (from reporting and prior quarters) processed during the report period (3A+3B+3C+3D).

C6.11.1.1.4. (Line 4) Adjustment Rates ¹⁶

C6.11.1.1.4.1. (Line 4.A.) Average Value of Materiel in Storage. The average value of on-hand assets as reflected on the storage activity's owner/manager property accountability records for the 12 months prior to the report cutoff date (i.e., current quarter plus three quarters).

C6.11.1.1.4.2. (Line 4.B.) Record Value of Items Inventoried. The extended value prior to inventory adjustments being posted during the reporting period.

C6.11.1.1.4.3. (Line 4.C.) Absolute Adjustment Rate for Materiel in Storage. Divide the value of the total number of inventory adjustments (including reversals) by the average value of materiel in storage. $((3E/4A) \times 100)$.

C6.11.1.1.4.4. (Line 4.D.) Absolute Adjustment Rate for Items Inventoried. Divide the value of the total number of inventory adjustments (including reversals) by the record value of items inventoried. $((3E/4B) \times 100)$.

C6.11.1.1.4.5. (Line 4.E.) Initial Adjustment Rate as Percentage of Inventory In Storage. Divide the value of the total number of inventory adjustments (without reversals) by the average value of materiel in storage $((3A + 3B) / 4A \times 100)$.

C6.11.1.1.4.6. (Line 4.F) Initial Adjustment Rate as Percentage of Items Inventoried. Divide the value of the total number of inventory adjustments (without reversals) by the record value of items inventoried. $((3A + 3B) / 4B \times 100)$.

C6.11.1.1.5. Denial Rates

C6.11.1.1.5.1. (Line 5.A.) Lines Directed for Shipment. The total number of line items directed for shipment (A5_ Materiel Release Order (MRO), A4_ referral order, and A2_ redistribution order).

C6.11.1.1.5.2. (Line 5.B.) Total Materiel Release Order Denials. The total materiel denials (sum of total and partial denials and warehouse refusals). Include denial transactions classified by denial Management Codes 1, 2, 3, (subsistence only) 4, and 5 (see Appendix AP2.6) in the total.

C6.11.1.1.5.3. (Line 5.C) Materiel Denial Rate. Compute this figure by dividing the total denials by the line items directed for shipment and multiplying by 100. $((5B / 5A) \times 100)$.

¹⁶ Book-to-Book Adjustments are included in section 4.

C6.11.1.2. General Supplies - Accuracy and Performance Data -- Part II.

Each DoD Component shall collect and maintain visibility of the following performance data for collective analysis of accuracy trends and corrective actions required.

C6.11.1.2.1. Receipt Processing. The accuracy rate is computed by dividing the total number of receipts (all types, e.g., new procurements, redistributions, returns from maintenance) posted and stored to the property accountability record on time by total number of receipts and multiplying by 100 during the reporting period. The Components may separately measure receipt processing timeframes by the type of receipt (e.g., D4_, D6A, D6Ks) based upon business processes and negotiated agreements.

C6.11.1.2.2. Location Survey. The accuracy rate is computed by dividing the locations with discrepancies (Types 1 and 2) by the total locations surveyed (during the reporting period), multiplying by 100, and subtracting the result from 100 percent.

C6.11.1.2.3. Location Reconciliation. This performance figure represents the total number of reconciled location records (i.e. sum of line items on the Inventory Manager's record and line items that were not on the Inventory Manager's record but were on the storage activities' records) during a specified reporting period. The accuracy rate is computed by dividing the number of discrepancies (as defined in paragraph C7.6.2.2.) by the number of reconciled records, multiplying by 100, and subtracting the result from 100 percent.

C6.11.1.2.4. Record Accuracy. This performance element represents the results of Type Physical Inventory/Transaction History Code N Sample Inventories. The sampling model incorporates a hierarchical approach where the total population of items is included and a single sample is randomly selected. Each selected line item (NSN/SCC) is placed in only one of the four categories by determining whether it meets a category's criteria, in sequential order. Table C7.T1. provides General Supplies Record Accuracy categories, goals and tolerances.

C6.11.2. Ammunition Performance Standards and Data. (The information in this section corresponds to information shown on DD Form 2338-1.)

C6.11.2.1. Performance - Part I

C6.11.2.1.1. Materiel Denials. DoD Components shall identify denials separately for low risk and high-risk items.

C6.11.2.1.1.1. (Line 1.A.) Lines Directed for Shipment. The total number of line items directed for shipment (MROs, referral orders, redistribution orders (DLMS 940R Material Release)).

C6.11.2.1.1.2. (Line 1.B.) Total Materiel Denials. The total materiel denials (sum of total and partial denials, and warehouse refusals DLMS 945A,

Materiel Release Advice). Include denial transactions classified by denial Management Codes 1, 2, 5, 6, and 7 in the total.

C6.11.2.1.1.3. (Line 1.C.) Material Denial Rate. Compute this figure by dividing total denials by the line items directed for shipment and multiplying by 100. $((1B / 1A) \times 100)$ The DoD performance goal for the materiel release denial rate is not greater than 1 percent.

C6.11.2.1.2. Receipt Processing Performance.

C6.11.2.1.2.1. (Line 2.A.) Receipts Posted and Stored. The total number of line item receipts posted and stored to the total item property record.

C6.11.2.1.2.2. (Line 2.B.) Receipts Posted and Stored on Time. The total number of line item receipts that were effectively posted and stored within the timeframes. Both storing and posting actions are considered complete when the item is in the storage location, or available for issue, and the quantity is posted to the total item property record.

C6.11.2.1.2.3. (Line 2.C.) On Time Receipt Rate. Compute this figure by dividing the total number of receipts posted and stored on time by the total number of receipts and multiplying by 100. $((2B / 2A) \times 100)$ The DoD performance goal for posting and storing receipts on time is 90 percent.

C6.11.2.1.3. Record Reconciliation Program. Shows the results of the location survey (ratio of accurate storage activity locator records to storage activity locations surveyed) and the location reconciliation¹⁷.

C6.11.2.1.3.1. (Line 3.A.) Locations Surveyed. The number of storage activity locations surveyed.

C6.11.2.1.3.2. (Line 3.B.) Survey Errors. The total number of location discrepancies as defined in subparagraph C6.8.1.8. Report only one error per stock number per location.

C6.11.2.1.3.3. (Line 3.C.) Survey Accuracy. Compute this figure by dividing the locations with discrepancies by the total locations surveyed multiplying by 100, and subtracting the result from 100 percent. $(100 - ((3B / 3A) \times 100))$ The DoD goal for location survey accuracy is 98 percent.

C6.11.2.1.3.4. (Line 3.D.) Locations Reconciled¹⁸. The total number of location records reconciled (i.e., the sum of line items on the

¹⁷ The location reconciliation process shall not be required with the establishment of a single shared asset balances (see paragraphs C6.2.2. and C6.2.4.).

¹⁸ Performance data maintained by owner/Inventory Manager regardless where material is stored.

owner's/Inventory Manager's record and line items not on the Inventory Manager's record but were on the storage activities' records).

C6.11.2.1.3.5. (Line 3.E.) Reconciliation Errors. The total number of discrepant location records as defined in subparagraph C6.8.2.2. Count one error per location reconciliation request (line item) or unmatched Inventory Manager's record.

C6.11.2.1.3.6. (Line 3.F.) Reconciliation Accuracy. Compute this figure by dividing the number of discrepancies by the number of records reconciled, multiplying by 100, and subtracting the result from 100 percent. $(100 - ((3E / 3D) \times 100))$ The DoD goal for location reconciliation is 98 percent.

C6.11.2.2. Physical Inventory Adjustments – Part II

C6.11.2.2.1. Physical Inventories

C6.11.2.2.1.1. (Line 1.A.) Number of Scheduled and Unscheduled Inventories Completed. The total number of line-items inventoried (scheduled and unscheduled). Each SCC for a stock number at each storage activity is a line item.

C6.11.2.2.1.2. (Line 1.B.) Number of Inventories with Variances. The total number of line items inventoried (scheduled and unscheduled) that had an inventory variance.

C6.11.2.2.1.3. (Line 1.C.) Inventory Record Accuracy. Reflects the percent of lines inventoried without an inventory variance. Compute this figure by dividing the lines with an inventory variance by the total lines inventoried and multiplying by 100, and subtracting the result from 100 percent. $(100 - ((1B / 1A) \times 100))$. The DoD inventory record accuracy goal for ammunition is 95 percent.

C6.11.2.2.2. Number of Inventory Adjustments from Other Than Physical Inventories¹⁹.

C6.11.2.2.2.1. (Line 2.A.) Number of Location Reconciliation Adjustments. The number of location reconciliation adjustments (DLMS 947I with Quantity or Status Adjustment Reason Code 'AB' ; MILSTRAP legacy DIC D8B/D9B).

C6.11.2.2.2.2. (Line 2.B.) Number of End of the Day Processing Adjustments. The number of end of the day processing adjustments (DLMS 947I with Quantity or Status Adjustment Reason Code 'AB' ; MILSTRAP legacy DIC D8B/D9B).

C6.11.2.2.2.3. (Line 2.C.) Total. Absolute total of adjustments from other than physical inventories. $(2A + 2B)$

¹⁹ The end of day process and location reconciliation process will not be required with the establishment of single shared asset balances (see paragraphs C6.2.2 and C6.2.4).

C6.11.2.2.3. (Line 3.) Total Inventory Adjustments. The sum of number of inventories with variances and the number of adjustments from other than physical inventories.

C6.11.2.2.4. Number of Reversals of Inventory Adjustments.

C6.11.2.2.4.1. (Line 4.A.) Number of Gain Reversals. The number of gain reversals of inventory adjustments.

C6.11.2.2.4.2. (Line 4.B.) Number of Loss Reversals. The number of loss reversals of inventory adjustments.

C6.11.2.2.4.3. (Line 4.C.) Total. Absolute total of inventory reversals (gains and losses).

C6.11.2.2.5. Monetary Value.

C6.11.2.2.5.1. (Line 5.A.) Average Value of Inventory. The average value of on-hand assets as reflected on financial records for the 12 months prior to the report cutoff date (i.e., current quarter plus last three quarters).

C6.11.2.2.5.2. (Line 5.B.) Record Value of Items Inventoried. The extended value prior to actual inventory of line-items inventoried (scheduled and unscheduled) during the reporting period.

C6.11.2.2.5.3. Value of Inventory Adjustments

C6.11.2.2.5.3.1. Physical Inventory Adjustments:

C6.11.2.2.5.3.1.1. (Line 5.C.(1)(A)) Gains. Monetary value of gains resulting from inventory less the monetary value of gain reversals (from current and prior quarters) processed during the report period.

C6.11.2.2.5.3.1.2. (Line 5.C.(1)(B)) Losses. Monetary value of losses resulting from inventory less the monetary value of loss reversals (from current and prior quarters) processed during the report period.

C6.11.2.2.5.3.1.3. (Line 5.C.(1)(C)) Gross Adjustments. Computed as lines (5C(1)(A) + 5C(1)(B)).

C6.11.2.2.5.3.2. Reversals--Current Quarter

C6.11.2.2.5.3.2.1. (Line 5.C.(1)(A)) Gains. The total monetary value of decreases to the record balances as a result of reversing gain adjustments processed during the reporting period. Compute the Fiscal Year (FY) to Date value for reversal of current quarter gains by adding the quarter ending value for reversal of current quarter gains to the prior quarter FY to Date value of reversal of current quarter gains.

C6.11.2.2.5.3.2.2. (Line 5.C.(1)(B)) Losses. The total monetary value of increases to the record balances as a result of reversing loss adjustments processed during the reporting period. Compute the FY to Date value for reversal of current quarter losses by adding the quarter ending value for reversal of current quarter losses to the prior quarter FY to Date value for reversal of current quarter losses.

C6.11.2.2.5.3.2.3. (Line 5.C.(1)(C)) Total. Absolute total of reversals of current quarter gains and losses. Computed as lines 5C(2)(A) + 5C(2)(B)

C6.11.2.2.5.3.3. Reversals--Prior Quarters

C6.11.2.2.5.3.3.1. (Line 5.C.(2)(A)) Gains. The total monetary value of decreases to record balances as a result of reversing gain adjustments reported in prior quarters. Compute the FY to Date value for reversal of prior quarters gains by adding the quarter ending value of reversal of current quarter gains to the prior quarter gains.

C6.11.2.2.5.3.3.2. (Line 5.C.(2)(B)) Losses. The total monetary value of increases to record balances as a result of reversing loss adjustments reported in prior quarters. Compute the FY to Date value for reversal of prior quarters' losses to the prior quarter FY to Date value for reversal of prior quarters' losses.

C6.11.2.2.5.3.3.3. (Line 5.C.(3)(C)) Total. Absolute total of reversals of prior quarter gains and losses. Computed as 5C(3)(A) + 5C(3)(B)

C6.11.2.2.5.3.4. (Line 5.C.(4)) Total Reversals. The total of reversals of current quarter and prior quarter gains and losses. Computed as 5C(2)(C) + 5C(3)(C)

C6.11.2.2.5.3.5. (Line 5.C.(5)) Total Record Imbalances. The total of gross adjustments and total reversals. Computed as 5C(1)(C) + 5C(4)

C6.11.2.2.6. Gross Adjustments As a Percent of

C6.11.2.2.6.1. (Line 6.A.) Average Value of Inventory. Divide the total value of gross adjustments by the average value of inventory and multiply by 100. $((5C)(1)(C) / 5A) \times 100$

C6.11.2.2.6.2. (Line 6.B.) Value of Items Inventoried. Divide the total value of gross adjustments by the record value of items inventoried and multiply by 100. $((5C)(1)(C) / 5B) \times 100$

C6.11.2.2.7. Total Record Imbalances As a Percent of:

C6.11.2.2.7.1. (Line 7.A.) Average Value of Inventory. Divide the value of the total record imbalances by the average value of inventory. $((5C)(5) / 5A) \times 100$)

C6.11.2.2.7.2. (Line 7.B.) Value of Items Inventoried. Divide the total value of gross adjustments by the record value of items inventoried and multiply by 100. $((5C)(5) / 5B) \times 100$)

C6.11.2.2.8. Monetary Value of Location Reconciliation.

C6.11.2.2.8.1. (Line 8.A.) Value of Line Items Reconciled. The extended value of line-items reconciled during the reporting period.

C6.11.2.2.8.2. (Line 8.B.) Gains. The monetary value of gains resulting from reconciliation during the period.

C6.11.2.2.8.3. (Line 8.C.) Losses. The monetary value of losses resulting from reconciliation during the period.

C6.11.2.2.8.4. (Line 8.D.) Total. Absolute total of location reconciliation gains and losses. $(8B + 8C)$

C6.11.2.2.9. Monetary Value of End of the Day Processing.

C6.11.2.2.9.1. (Line 9.A.) Gains. The value of gains resulting from end of the day processing.

C6.11.2.2.9.2. (Line 9.B.) Losses. The value of losses resulting from end of the day processing.

C6.11.2.2.9.3. (Line 9.C.) Total. Absolute total of end of the day processing gains and losses. $(9A + 9B)$

Table C6.T3. Minimum Research Requirements for Potential or Actual Physical Inventory Adjustments

	CONDITION OF DISCREPANCY	REQUIRED RESEARCH		
		Post Count Validation	Pre-adjustment Research	Causative Research
1.	□\$1,000	NO	NO	NO
2.	> \$1,000 but ≤ \$5,000 and ≤ 10 percent unit variance	YES	NO	NO
3.	> \$1,000 but ≤ \$5,000 and > 10 percent unit variance	YES	YES	NO
4.	> \$5,000 but ≤ \$16,000 and ≤ 25 percent unit variance	YES	YES	SAMPLE
5.	> \$5,000 but ≤ \$16,000 and > 25 percent unit variance	YES	YES	YES
6.	> \$16,000	YES	YES	YES
7.	Controlled Inventory Item	YES	YES	YES ²⁰
8.	Suspected Fraud, Waste, or Abuse	YES	YES	YES

C6.12. STORAGE ITEM DATA CORRECTION/CHANGE NOTIFICATION

C6.12.1. This section provides standard procedures required by Inventory Control Points (ICPs) to provide for the correction and/or updating of storage activity records when:

C6.12.1.1. Reported transactions indicate that the ICP and storage activity records are inconsistent.

C6.12.1.2. A catalog/stock list change is processed against an ICP record that affects stock control data maintained at the storage activities.

C6.12.2. Inventory Control Point Action. ICPs use the Storage Item Data Correction/Change Transaction to provide storage activities with data record changes on

²⁰ Sample causative research in lieu of complete causative research for pilferable and CIIC 7 item discrepancies with a value from \$.01 to \$2,500 may be accomplished to serve as a deterrent to fraud, waste, or abuse and to identify systemic inventory and security problems. Causative research shall be conducted on all adjustments (gains and losses) of classified and sensitive items regardless of dollar value of item or extended dollar value of adjustment. Causative research shall be conducted on all adjustments (gains and losses) of pilferable items, and CIIC 7 items, with an extended value greater than \$2,500, and all adjustments with an extended value of greater than \$16,000 or greater than 25 percent unit variance and greater than \$5,000.

supply items. The ICP enters the “correction/change code for storage item records” in the transaction to provide information on the nature of the change, actions to be taken, and data affected by the change.

C6.12.3. Storage Activity Action. Storage activities shall use the Storage Item Data Correction/Change Transaction to update stock records, item locator records, and bin tags.

C7. CHAPTER 7

INVENTORY ADJUSTMENTS

C7.1. GENERAL

C7.1.1. Purpose

C7.1.1.1. Adjustment/Change Procedures. This chapter provides procedures relating to the following types of adjustment and change actions:

C7.1.1.1.1. Adjustments caused by catalog change actions.

C7.1.1.1.2. Reidentification of improperly identified materiel.

C7.1.1.1.3. Offsetting adjustments to purpose and condition codes.

C7.1.1.1.4. Discrepancies disclosed by physical inventory.

C7.1.1.1.5. Ownership gains and losses applicable to the Single Manager for Conventional Ammunition (SMCA).

C7.1.1.2. This chapter also provides procedures relating to the Asset Reclassification transaction.

C7.1.2. Transactions. This chapter addresses the procedures applicable to the inventory adjustment function using the DLMS 947I, and the asset reclassification function using the DLMS 846A. DLMS 947I has corresponding Military Standard Transaction and Accountability Procedures (MILSTRAP) legacy transactions. The DLMS 846A is a DLMS enhancement with no corresponding MILSTRAP transaction.

C7.1.2.1. Inventory Adjustment. The inventory adjustment function is identified by the DLMS 947I, Accredited Standards Committee (ASC) X12 beginning segment (1/W1505/0200) Transaction Type Code NU – Inventory Adjustment. The Defense Logistics Standard System (DLSS) MILSTRAP legacy 80 record position transaction functionality identified by document identifier codes (DIC) is included for information purposes in a mixed DLMS/DLSS environment. Other formats, such as extensible markup language (XML) are also available. See the DLA Logistics Management Standards Website for available formats www.dla.mil/j-6/dlmso/elibrary/Transformats/140_997.asp.

C7.1.2.1.1. The inventory adjustment function encompasses increases, decreases, or dual adjustments. This relates to MILSTRAP legacy DICs D8_ (increase), D9_ (decrease), or DAC/DAD/DAS (dual adjustment), respectively.

C7.1.2.1.2. Inventory adjustments are further broken down by the DLMS 947I, ASC X12 warehouse adjustment item detail segment (2/W1901/0200) Quantity or

Status Adjustment Reason Code. The quantity or status adjustment reason codes correlate to the 3rd position of MILSTRAP legacy DICs D8_/D9_ or DAC/DAC/DAS as identified in Table C7.T1:

Table C7.T1. DLSS DIC/DLMS Quantity Or Status Adjustment Reason Code Correlation

W1901 Quantity or Status Adjustment Reason Code	Explanation	Corresponding MILSTRAP legacy DIC
AA	Inventory Adjustment (Physical Inventory). Gain or loss disclosed as a result of physical count of stock, single adjustment.	D8A or D9A
AB	Inventory Adjustment (Accounting Error). Gain or loss resulting from clerical or automated information system errors which are not subject to correction by reversal of original transaction, single adjustment.	D8B or D9B
AC	Inventory Adjustment (Condition). Gain, loss or dual adjustment resulting from condition transfer.	D8C or D9C or DAC
AD	Inventory Adjustment (Purpose). Gain, loss or dual adjustment resulting from purpose transfer.	D8D or D9D or DAD
AK	Inventory Adjustment (Logistics Transfer). Gain or loss of item management responsibility as a result of logistics transfer.	D8E or D9E
AL	Inventory Adjustment (Capitalization). Gain to, or loss from, a stock fund or stock fund division at time of activation or subsequent extension/expansion, as result of capitalization,	D8F or D9F
AJ	Inventory Adjustment Decrease (Survey Process). Loss from shrinkage, theft contamination, deterioration, and/or expired shelf life, single adjustment.	D9G only
AI	Inventory Adjustment Decrease (Disaster). Loss from major disasters, fire loss, enemy action, act of God, etc., single adjustment.	D9H only
AE	Inventory Adjustment (Reidentification). Gain resulting from inspection of an item in stock which has been misidentified, single adjustment.	D8J or D9J

Table C7.T1. DLSS DIC/DLMS Quantity Or Status Adjustment Reason Code Correlation

W1901 Quantity or Status Adjustment Reason Code	Explanation	Corresponding MILSTRAP legacy DIC
AF	Inventory Adjustment (Stock Number Changes). Gain or loss resulting from stock number change. Excludes change of unit price only.	D8K or D9K Inventory Adjustment (Catalog Changes).
AN	Inventory Adjustment (Unit of Issue Changes). Gain or loss resulting from unit of issue changes. Excludes change of unit price only.	Gain or loss resulting from stock number and/or unit of issue changes, single adjustment. Excludes change of unit price only.
AG	Inventory Adjustment (Ownership). Gain, loss, or dual adjustment resulting from ownership transfer by the single manager conventional ammunition (SMCA). Use is restricted to users of the conventional ammunition system.	D8S or D9S or DAS
AH	Inventory Adjustment (Other). Gain or loss for which a specific code is not otherwise provided. (Assignor of code will maintain detailed intelligence pertaining to its use and, as required, will furnish these data.)	D8Z or D9Z

C7.1.2.2. Asset Reclassification. The Asset Reclassification transaction is a DLMS enhancement and there is no corresponding MILSTRAP transaction or function. A DLMS 846A Asset Reclassification is used for the following transaction functions identified by DLMS 846A ASC X12 beginning segment (1/BIA02/020) Report Type Codes:

C7.1.2.2.1. Asset Reclassification Request Transactions. Asset reclassification transactions are identified by Report Type Code TE. Owners use this function for asset reclassification request transactions and asset reclassification follow-up transactions. The types of asset reclassification requests, as well as the asset reclassification request follow-up transaction, are further delineated by a variety of 1/BIA06/020 action codes.

C7.1.2.2.2. Asset Reclassification Denial Transaction. The Asset Reclassification Denial transaction is identified by Report Type Code TD. Storage activities generate this transaction. Asset reclassification request denial codes identify the reason a request was denied. Asset Reclassification Response Denial transactions (Action Code DE), must also cite the Asset Reclassification Denial Code at either 2/LQ01/260/ARD or 2/LQ01/376/ARD, as appropriate. (No reasons for denial have been identified for asset reclassification requests associated with SCC reclassification.)

C7.1.2.2.3. Asset Reclassification Extension Request Transaction. The asset reclassification extension request transaction is identified by Report Type Code AR. Storage activities generate this transaction.

C7.1.2.2.4. Asset Reclassification Extension Response Transaction. The asset reclassification extension response transaction is identified by Report Type Code AX. Owners generate this transaction.

C7.1.3. Adjustment Actions. DLMS provides two methods for effecting adjustments—single or dual actions.

C7.1.3.1. Single Adjustment. The single adjustment method accommodates processing techniques that use individual increase or decrease adjustment actions against the accountable and owner records.

C7.1.3.1.1. Increase. Identify single increase adjustments by using DLMS 947I ASC X12 warehouse adjustment item detail segment (2/W1916/0200) Inventory Transaction Type Code AJ – ‘Inventory Adjustment’ (legacy DIC D8_.)

C7.1.3.1.2. Decrease. Identify single decrease adjustments by using DLMS 947I ASC X12 warehouse adjustment item detail segment (2/W1916/0200) Inventory Transaction Type code AD – ‘Inventory Adjustment – Decrease’ (legacy DIC D9_.)

C7.1.3.2. Dual Adjustment. The dual adjustment method provides for offsetting adjustments to condition or purpose code in a single adjustment transaction. Identify dual inventory adjustments by using DLMS 947I ASX X12 warehouse adjustment item detail segment (2/W1916/0200) Inventory Transaction Type Code DU – ‘Inventory Adjustment – Dual’ (legacy DIC DAC, DAD, or DAS.)

C7.1.3.3. Single Transaction Prescribed. When the DoD Component practice prescribes the use of single adjustments internally for condition or purpose transfer, make provisions to accept and process dual adjustments from other DoD Components for condition or purpose transfer.

C7.1.4. Ownership/Purpose Code Changes. Changes between ownership codes, from purpose code to ownership code, or from ownership code to purpose code, shall not be made by an adjustment action. Process appropriate issue and receipt transactions to make the necessary accounting actions. An exception to this rule is the

use of dual or single inventory adjustment transactions to accomplish ownership gain/loss under the SMCA concept (C7.3.).

C7.1.5. Project Code Changes. Accomplish changes in project or distribution codes maintained on the owner record by using individual increase or decrease materiel adjustment transactions with the appropriate quantity or status adjustment reason code (other than Quantity or Status Adjustment Reason Code AA (Physical Inventory) (legacy DIC D8A/D9A)).

C7.1.6. Clerical/Automated Accounting Errors. Submit inventory adjustments resulting from clerical or automated information system errors that cannot be corrected by reversing the original transaction or from reconciliation between the storage activity and the owner using an Inventory Adjustment transaction with Quantity or Status Adjustment Reason Code AB (Accounting Error) (legacy DIC D8B/D9B).

C7.1.7. Nonspecific Inventory Adjustments. Use the Inventory Adjustment transaction with Quantity or Status Adjustment Reason Code AH (Other), to accomplish an adjustment increase or decrease when a quantity or status adjustment reason code is not otherwise provided. (The DoD Components shall maintain detailed backup information as to use and requirement for the transaction.)

C7.1.8. Specific Inventory Adjustments. The Inventory Adjustment transaction with Quantity or Status Adjustment Reason Code AJ (Survey) shall be used to report inventory adjustments resulting from shrinkage, theft, contamination, deterioration, and expired shelf-life. Losses resulting from major disasters, fire, enemy action, acts of God, etc., will be identified by Quantity or Status Adjustment Report Code AI (Disaster).

C7.2. CHANGES IN SUPPLY CONDITION OF MATERIEL

C7.2.1. Supply Condition Reclassification of Assets in Storage

C7.2.1.1. Reporting Classification Variance to Owners. When inspection of stocks on hand reveals that a SCC reclassification is required, storage activities shall report the variance to the owner within 3 calendar days using a dual Inventory Adjustment Transaction for SCC change (Inventory Adjustment with Quantity or Status Adjustment Reason Code AC (Condition Change) or legacy DIC DAC) for the affected condition codes.

C7.2.1.2. Changing Suspect Stock to SCC J. When immediate reclassification of suspect stocks is beyond current capabilities, transfer the materiel to SCC J using a dual inventory adjustment for SCC change (Inventory Adjustment with Quantity or Status Adjustment Reason Code AC (Condition Change) or legacy DIC DAC) for the affected condition codes.

C7.2.1.2.1. Reclassification Timeframe for SCC J. With the exception of ammunition, complete the materiel reclassification within 90 calendar days after reporting the change to the owner. Complete the reclassification of ammunition within 270 calendar days after reporting the change.

C7.2.1.2.2. Reporting Completion of Reclassification. When the reclassification is complete, report the change to the owner using dual Inventory Adjustment Transaction for SCC change (Quantity or Status Adjustment Reason Code AC (Condition Change) or legacy DIC DAC. Use the same document number used to report the materiel in SCC J.

C7.2.2. Reclassification of SCC Q (Suspended) Product Quality Deficiency Related Materiel

C7.2.2.1. Storage Activities shall report discrepant receipts in SCC Q as prescribed by Chapter 13, receipt procedures. When directed by the owner, storage activities shall also transfer stored, including suspended, materiel to SCC Q and report the action using a dual inventory adjustment transaction following C7.2.1.1.

C7.2.2.2. When inspection or technical/engineering analysis of materiel confirms a product quality deficiency, possibilities for other use of the materiel within the Department of Defense, as well as public health/safety and national security interests, must be considered. Owners shall determine if further use of the item can be made within the Department of Defense.

C7.2.2.3. When inspection of technical/engineering analysis of materiel indicates that litigation action is required, the owner shall direct transfer of the materiel to SCC L.

C7.2.2.4. If the deficiency does not prohibit further DoD use (i.e., the defect is minor or the item meets specifications for another national stock number (NSN)), owners shall direct storage activities to reidentify and/or transfer the suspended SCC Q materiel to the appropriate condition. Storage activities shall, within 3 calendar days from receipt of the ICP direction, reclassify the SCC Q materiel to the appropriate condition. Report completion of this action with an Inventory Adjustment transaction, using the same document number originally used to report the materiel in SCC Q (i.e., the document number of the original receipt or inventory adjustment transaction). For reidentifications, storage activities shall follow the procedure in C7.6.

C7.2.2.5. If the deficiency prohibits further DoD use, the materiel shall remain in SCC Q and owners shall direct transfer of the materiel to the DLA Disposition Services Field Offices following Chapter 16 procedures. Improperly documented, unauthorized source, defective, non-repairable, and time-expired Aviation CSI/FSCAP materiel that is not mutilated by the holding activity shall be directed to the DLA Disposition Services Field Office in SCC Q with Management Code S. All such materiel shall be mutilated. When turning such Aviation CSI/FSCAP materiel in to a DLA Disposition Services Field Office, the turn-in document must clearly note that the part is defective, non-repairable, time-expired, or otherwise deficient and that mutilation is required.

C7.2.3. Reclassification of SCC L Receipts

C7.2.3.1. Storage Activity Reporting. Storage activities shall report discrepant receipts from procurement and materiel held pending resolution of a transportation discrepancy in SCC L as prescribed by Chapter 13. When directed by the owner (C7.2.8.), storage activities shall also transfer materiel to SCC L and report the action using a dual adjustment transaction following the procedures in C7.2.1.

C7.2.3.2. Materiel Owner Responsibilities. Owners are responsible for monitoring materiel suspended in SCC L and directing change of the materiel to its correct condition when litigation or other action to resolve the discrepancy is completed using an Asset Reclassification Request transaction in accordance with C7.2.6. If inspection or technical/engineering analysis confirms that a product quality deficiency prohibits further use of the materiel within the Department of Defense, the owner shall direct transfer of the materiel to SCC Q.

C7.2.3.3. Reclassification Procedures. When directed by the owner, storage activities shall, within 3 calendar days from receipt of an asset reclassification request, reclassify the suspended materiel to its correct SCC. Report completion of action with an Inventory Adjustment – Dual (SCC Change) using the same document number originally used to record the materiel in SCC L (i.e., the document number of the original receipt or inventory adjustment transaction). See C7.2.8. for storage activity asset reclassification denial procedures when requested reclassification action cannot be done.

C7.2.4. Reclassification of SCC K and SCC R Receipts

C7.2.4.1. Suspension of Materiel. Under Chapter 13, Materiel Receipt processing procedures, storage activities may suspend materiel in SCC K upon receipt for SCC determination. Storage activities may also receive materiel identified as SCC R (suspended) from reclamation activities that lack the capability to determine the materiel condition.

C7.2.4.2. Storage Activity Actions. Storage activities shall reclassify these suspended receipts to their correct condition within the timeframes prescribed in the following paragraphs. When materiel has been reclassified to its correct condition, the storage activity shall send an Inventory Adjustment Transaction – Dual for SCC change (Quantity or Status Adjustment Reason Code AC (Condition Change) (legacy DIC DAC)) to the owner using the same document number cited in the original receipt transaction.

C7.2.4.2.1. Reclassification Timeframe for SCC K Suspended (Returns). With the exception of ammunition, reclassify materiel reported in SCC K within 10 calendar days after reporting the receipt; reclassify ammunition within 45 calendar days after reporting the receipt.

C7.2.4.2.2. Reclassification Timeframe for SCC R Suspended (Reclaimed Items, Awaiting Condition Determination). When materiel identified as SCC

R is received from reclamation activities, reclassify the materiel within 180 calendar days after reporting the receipt or prior to induction into maintenance facilities for repair/modification, whichever is sooner.

C7.2.4.2.2.1. No Asset Test Capability. When the capability to test/check SCC R assets for actual condition does not exist, the materiel may be forwarded to a maintenance facility for condition determination.

C7.2.4.2.2.2. Property Accountability Records. The actual condition of assets must be recorded on the owner record before the assets may be included in a scheduled maintenance program.

C7.2.5. Automatic Disposal of Reclassified Stock. When materiel is reclassified to SCC H, storage activities may also, based on criteria promulgated by the DoD Components, automatically turn condemned and expired shelf-life materiel in to DLA Disposition Services or take other authorized automatic disposal action. Advise the owner of such simultaneous reclassification and automatic disposal action by entering Management Code M (materiel condemned—excludes expired shelf-life materiel) or Management Code T (materiel condemned—expired shelf-life materiel) in the inventory adjustment transaction.

C7.2.6. Exceptions to Prescribed Timeframes for SCC Reclassification – Request for Reclassification Extension

C7.2.6.1. Requesting Extensions to a Suspense. When additional time is needed to reclassify materiel held in SCC J, K, or R, because of large quantities, lack of facilities, nonavailability of personnel and/or test equipment, or other circumstances considered justified by the storage activity commander, the storage activity shall forward a DLMS 846A Asset Reclassification Extension Request to the owner.

C7.2.6.1.1. Approval of Extension Requests. When appropriate, the owner shall use the Asset Reclassification Extension Response to approve the extension request, notify the storage activity, and establish a suspense to ensure that classification action is taken within the agreed upon timeframe.

C7.2.6.1.2. Disapproval of Extension Requests. If the owner does not approve the request for extension, they shall send an Asset Reclassification Extension Response to the storage activity disapproving the request. The storage activity shall make every effort to comply with the established timeframe.

C7.2.6.2. Reclassification. Owners may submit Asset Reclassification Request Transactions in accordance with C7.2.8. to request hastened reclassification of SCC J, K, and R assets whenever it is deemed necessary based on their stock position and overall management responsibility.

C7.2.7. Monitoring Assets Recorded in Suspended SCCs

C7.2.7.1. SCC J, K, and R. Owners shall review records for all materiel suspended in SCC J, K, and R at least monthly and ensure that storage activities accomplish reclassification actions within prescribed timeframes.

C7.2.7.2. SCC L. Although there is no prescribed timeframe for transferring suspended materiel from SCC L, owners shall review all records for materiel suspended in SCC L at least quarterly and shall take necessary action to ensure expeditious litigation/negotiation with contractors or common carriers.

C7.2.7.3. SCC Q. Although there is no prescribed timeframe for transferring suspended materiel from SCC Q, supply sources shall review all records for materiel suspended in SCC Q at least monthly. Supply sources shall take necessary action to ensure expeditious inspection or technical/engineering analysis of suspect assets and prompt transfer of assets, under C7.2.2., based on the inspection results.

C7.2.8. Asset Reclassification Request, Follow-up and Response Associated with Request for SCC Reclassification

C7.2.8.1. Asset Reclassification Request, Follow-up and Denial Transaction Procedures. This section prescribes standard procedures for use of Asset Reclassification Request, Follow-up, and Denial transactions. Procedures for using Asset Reclassification Extension Request and Asset Reclassification Extension Response transactions are addressed in C7.2.6.

C7.2.8.2. Owner Responsibilities. As discussed in C7.2.7, owners are responsible for monitoring assets in suspended SCCs. Owners use the Asset Reclassification Transaction to request that the storage activity effects reclassification of assets in suspended SCCs. Reasons for sending an DLMS 846A, Asset Reclassification request to the storage activity for SCC reclassification are:

C7.2.8.2.1. Expedite SCC Reclassification. Owner/manager requirement for storage activity to expedite SCC reclassification action. Only the current SCC is identified in the transaction. (Identified by DLMS 846A, ASC X12 beginning segment (1/BIA06/20) Action Code 23.)

C7.2.8.2.2. Resolution of SCC Suspension. Owner/manager resolution of a suspension (e.g., completion of litigation or technical inspection). Both the 'from' and 'to' SCCs are identified in the transaction. (Identified by DLMS 846A, ASC X12 beginning segment (1/BIA06/20), Action Code 62.)

C7.2.8.2.3. SCC Reclassification Timeframe Expired. Owner/manager uses when the storage activity is responsible for the SCC reclassification action, the timeframe has expired, and the owner did not receive a corresponding adjustment, reclassification denial, or request for an extension transaction from the storage activity. Only the current SCC is identified in the transaction. (Identified by DLMS 846A, ASC X12 beginning segment (1/BIA06/20), Action Code 86.)

C7.2.8.3. Storage Activity Actions. In response to an Asset Reclassification Request Transaction, the storage activity shall take action to reclassify the materiel in the timeframe specified and provide an Inventory Adjustment Transaction to the owner. If the storage activity is not able to effect the reclassification action, the storage activity will submit an Asset Reclassification Denial Transaction citing the appropriate Asset Reclassification Denial Code to explain the reason for the denial. If the reclassification action cannot be accomplished in the timeframe specified, the storage activity will submit an Asset Reclassification Extension Request in accordance with C7.2.6.

C7.2.8.4. Owner Use of Asset Reclassification Follow-up. Owners send the Asset Reclassification Follow-up Transaction to the storage activity to obtain status of a previously submitted asset reclassification request when the owner did not receive a corresponding Inventory Adjustment or Asset Reclassification Denial Transaction. In response to a follow-up, when the corresponding inventory adjustment was previously provided, the storage activity will resubmit the inventory adjustment transaction with Advice Code 3P indicating it is a duplicate of a previously submitted transaction sent in response to the follow-up. Caution must be used by recipient to assure the transaction is not processed twice.

C7.3. OWNERSHIP GAINS AND LOSSES

C7.3.1. Change of Ownership. Based on unique requirements of the SMCA and the DoD Components authorized by DoD Directive 5160.65, "Single Manager for Conventional Ammunition", August 1, 2008, separate Inventory Adjustment (Ownership Transfer) transactions have been developed to permit:

C7.3.1.1. Keeping integrity of the document number from the requisitioner's original demand throughout total processing, when payback actions are necessary.

C7.3.1.2. Online recording and reconciliation of materiel debit and credit balances of the SMCA and affected DoD Components.

C7.3.1.3. The DoD Components to have an audit trail when their inventory/financial records are affected.

C7.3.2. Payback of SMCA Items- Dual Inventory Adjustment (Ownership Transfer). The Inventory Adjustment – Dual (Ownership Transfer) transaction (Quantity or Status Adjustment Reason Code AG; legacy DIC DAS) is designed for use as a dual adjustment limited to effecting paybacks of SMCA items from one owning Service to another Service, in accordance with DoD policy and inter-Service agreements. The SMCA shall initiate an Inventory Adjustment - Dual (Ownership Transfer) for processing internal adjustments to custodial/accountable records and for notification of SMCA storage activities. Under legacy MILSTRAP, the use of the M modifier with ammunition, to express thousands when the quantity exceeds 99,999, is an optional feature that can be applied intra-Service and, by agreement, inter-Service.

C7.3.3. Payback of SMCA Items- Single Inventory Adjustment (Ownership Transfer). The Inventory Adjustment – single (Ownership Transfer) transactions

(Quantity or Status Adjustment Reason Code AG; legacy DIC D8S and D9S) are designed for use as a single adjustment transaction limited to effecting paybacks of SMCAs for conventional ammunition items from one owning Service to another Service, in accordance with DoD policy and inter-Service agreements. The SMCA shall initiate the transactions for updating internal custodial/accountable records and for notification to affected Military Services of actions to be accomplished. Under legacy MILSTRAP, the use of the M modifier with ammunition to express thousands when the quantity exceeds 99,999, is an optional feature that can be applied intra-Service and, by agreement, inter-Service.

C7.4. PURPOSE TRANSFERS. Based on authorized programs, materiel may be reserved for specific purposes and kept on inventory control records until requisitioned. To accomplish transfer of assets between purpose codes, the Inventory Adjustment transactions for purpose code (single or dual), shall be processed against the property accountability records. The Inventory Adjustment transaction with Quantity or Status Adjustment Reason Code AD applies (legacy MILSTRAP D8D and D9D, or DAD).

C7.5. PHYSICAL INVENTORY GAINS AND LOSSES. Procedures concerned with inventory adjustments due to physical inventory losses or gains are contained in Chapter 6.

C7.6. REIDENTIFICATION OF STOCK, STOCK NUMBER CHANGES, AND UNIT OF ISSUE CHANGES

C7.6.1. Reidentification of Stock

C7.6.1.1. When inspection shows an item in stock has been misidentified, storage activities shall send an inventory adjustment to the owner. The transaction shall contain the misidentified stock number, the quantity misidentified (Quantity or Status Adjustment Reason Code AE (Reidentification)), and Suffix Code A.

C7.6.1.2. When one new stock number is picked up due to reidentification, the inventory adjustment shall contain the same document number as the original transaction, identified stock number, quantity of the identified stock number using (Quantity or Status Adjustment Reason Code AE (Reidentification)), and Suffix Code B.

C7.6.1.3. When more than one new stock number is picked up due to reidentification, an additional inventory adjustment for each newly identified stock number shall be prepared and sent. The additional inventory adjustment transaction(s) shall be prepared in the same manner as the second transaction except that the suffix codes will progress to C, D, etc., as each transaction is prepared. The suffix codes in the second and ensuing transactions will serve to correlate the transactions to the misidentified stock number.

C7.6.1.4. The owner/manager and storage activity shall process an inventory adjustment against their inventory control records to cause the decrease under the incorrectly identified stock number and increase(s) against the correct stock number(s).

C7.6.2. Stock Number and/or Unit of Issue Changes

C7.6.2.1. When only a stock number change occurs, the owner/IMM prepares and processes an inventory adjustment containing the old and new stock numbers (Quantity or Status Adjustment Reason Code AF (Stock Number Change)) and the associated inventory adjustment increase and decrease.

C7.6.2.2. When only a unit of issue change occurs, the owner/IMM prepares and processes an inventory adjustment containing the old and new units of issue (Quantity or Status Adjustment Reason Code AN (Unit of Issue Change)) and the associated inventory adjustment increase and decrease.

C7.6.2.3. When a simultaneous stock number and unit of issue change occurs, the owner/IMM prepares and processes an inventory adjustment containing the old and new stock numbers and units of issue (Quantity or Status Adjustment Reason Code AF and AN), and the associated inventory adjustment increase and decrease.

C7.7. CONDITION CHANGES FOR ITEMS BEING REPORTED/TURNED IN TO DLA DISPOSITION SERVICES

C7.7.1. When materiel is not identified by an NSN and is actually scrap, the DoD Components may prescribe that it be classified in SCC S for turn in to a DLA Disposition Services Field Office. Otherwise, only materiel recorded on property accountability records in SCC A through H and SCC Q shall be reported or turned in to the DLA Disposition Services Field Office.

C7.7.2. When excess, serviceable or unserviceable materiel is classified in SCC J, K, L, M, N, P, or R, the DoD Components must initiate action to reclassify the materiel to an acceptable SCC (A through H, Q, or S) before preparing the turn-in documentation. Section C7.2 contains the materiel reclassification procedures.

C7.7.3. Activities not reporting or turning in materiel to a DLA Disposition Services Field Office in an appropriate SCC shall risk having the materiel rejected/returned by the DLA Disposition Services Field Office for proper classification.

C7.7.4. DLA Disposition Services Field Offices shall use the disposal condition codes to accurately describe the physical condition of the materiel based on its inspection at time of receipt. DLA Disposition Services Field Offices shall record both supply and the disposal condition codes, and shall show both codes as management data for DLA Disposition Services program screening and review. Within the DLA Disposition Services Field Office process, Disposal Condition Code S is assigned for "property with no value except for its basic materiel content." Consequently, Disposal Condition Code S may be assigned by DLA Disposition Services Field Offices to materiel with or without NSN identification.

C7.8. MAINTAINING ACCOUNTABILITY DURING MAINTENANCE

C7.8.1. Applicability. When responsibility for maintaining the property accountability record for DoD-owned property has been assigned to an activity(s) other than the owner, the responsible activity shall execute the owner's actions set forth in this section.

C7.8.1.1. These procedures apply to transfers of inventory to SCC M for maintenance, assembly, disassembly, reclamation, conversion, modification, repair, and destructive or nondestructive test/evaluation, and transfer to their correct condition classification upon return from maintenance.

C7.8.1.2. These procedures exclude repair and return of materiel owned below the wholesale distribution system. However, storage activities shall keep visibility and the property accountability record for these assets pending transfer to maintenance and upon their return from maintenance.

C7.8.2. Requirements

C7.8.2.1. Organic Maintenance. When materiel is scheduled for organic maintenance by Depot Maintenance Interservice Support Agreement (DMISA) or other inter-DoD Component agreement, the agreement shall specify materiel control requirements to include whether the storage activity will report returns from maintenance to the owner (Principal) as transfers from SCC M under this section, or as receipts in accordance with procedures in Chapter 13.

C7.8.2.2. DoD Component Actions. Each DoD Component shall ensure that:

C7.8.2.2.1. Owned Inventory. The DoD Components shall ensure owned inventory in the hands of DoD, other Government (non-DoD), and commercial activities is properly accounted for under provisions of Chapters 6, 7, 12, 13, and 14 of this volume of the DLMS manual and, for commercial maintenance, the provisions of the Federal Acquisition Regulation (FAR). This includes returns from field activities for repair and reissue as wholesale inventory. The DoD Components shall prescribe use of any required internal codes to meet these requirements (Responsibility of the owner (Principal for maintenance by DMISA).)

C7.8.2.2.2. Total Item Property Records. Total item property records for materiel in the hands of maintenance activities are maintained and adjusted based on the quantity of items actually returned and will support the [DoD 7000.14-R](#), "DoD Financial Management Regulation", financial accounting requirements. (Responsibility of the owner (Principal for maintenance by DMISA).)

C7.8.2.2.3. Commercial Maintenance Contracts. Contracts for commercial maintenance require the reporting of materiel loss or damage to the contracting officer. Contracts may also require the contractor to report the start and completion of maintenance action for each unit of materiel. (Responsibility of the Agent for maintenance by DMISA.)

C7.8.2.2.4. Procurement and Supply Interface. Any needed interface between the procurement and supply operations/functions exists to ensure reported data is sent to the owner. (Responsibility of the agent for maintenance by DMISA.) Arrangements may be made for commercial activities to report directly to these activities using DLMS transactions.

C7.8.2.2.5. Inventory Balances. Reported data affecting inventory balances is recorded on the total item property record. (Responsibility of the owner (Principal for maintenance by DMISA).)

C7.8.2.3. Storage Activity Actions. Storage activities shall report the following actions to the owner of the materiel. In the DoD Component systems not using dual inventory adjustment transactions, use the corresponding single inventory adjustment.

C7.8.2.3.1. When materiel is inducted for maintenance (repair/modification, assembly, etc.), process a dual inventory adjustment to transfer materiel from the SCC on the record to SCC M.

C7.8.2.3.2. When materiel is returned from maintenance (repair/modification, assembly, etc.), process a dual inventory adjustment to transfer materiel from SCC M to the SCC in which the materiel is received (e.g., SCC A for completed materiel, SCC G for materiel awaiting repair parts, or SCC H for condemned materiel). In the DoD Component systems that do not use the dual adjustment, process the equivalent loss and gain transactions to accomplish the transfer.

C8. CHAPTER 8

MATERIEL OBLIGATION VALIDATION

C8.1. SUPPORT OF UNITED STATES FORCES

C8.1.1. General

C8.1.1.1. Purpose. This chapter prescribes policies and procedures for the validation by organizations of the continuing need for over age requisitioned requirements and for the reconciliation of source of supply materiel/obligation records with the due-in records of requisitioning activities. The materiel obligation validation (MOV) process is twofold: (1) validation of need; and (2) reconciliation of records.

C8.1.1.2. Materiel Obligation Definition. A materiel obligation is that unfilled portion of a requisition (for a stocked or nonstocked item) that is not immediately available for issue but is recorded as a commitment for future issue, either by DVD or backordered from stock. This includes both NSN and non-NSN items. MOV pertains to those requisitioned items assigned Status Code BB, BC, BD, BP¹ BV, or BZ. DVD requisitions assigned Status Code BV or BZ are excluded from the automatic MOV cancellation process; however, organizations must submit requisition cancellations for materiel no longer required. See Chapter 4 for the requisition cancellation procedures.

C8.1.1.3. Use of the DLMS 517M. Sources of supply use the DLMS 517M, Materiel Obligation Validation, to generate MOV requests to organizations for a comparison and validation of the continued requirement of outstanding requisitions held as materiel obligations by the source of supply with those carried as due-in by the organization.

C8.1.1.3.1. MOV Response. Organizations use the DLMS 517M, to generate MOV responses to advise the source of supply: (1) to hold a materiel obligation until supplied, or (2) to cancel all or a portion of a materiel obligation.

C8.1.1.3.2. MOV Notification. Sources of supply must provide an MOV notification of nonresponse to organizations for each nonresponse to an MOV cycle for requisitions assigned Status Code BZ. The organization must conduct an item-by-item review and respond with a requisition cancellation if the materiel is not required.

C8.1.1.4. Source of Supply Definition. A source of supply is defined as the DoD Component organization that maintains materiel obligation records, and includes, but is not limited to, those organizations commonly referred to as inventory control points (ICP), integrated materiel managers (IMM), requisition processing points, stock control activities (SCA), and stock points.

¹ Status Code BP may be deferred for inclusion under logistics system modernization.

C8.1.1.5. Organization Definition. An organization is defined as a requisitioner, control office, and/or monitoring activity having the responsibility to validate and/or reconcile materiel obligation records between the requisitioning activity and the source of supply requesting the validation.

C8.1.2. Materiel Obligation Reinstatement Request. This is a request by an organization to reinstate requisition(s) previously canceled due to that organization's nonresponse to an MOV request. Use the DLMS 517M, to reinstate previously canceled requisition(s).

C8.1.3. Exclusions

C8.1.3.1. FMS transactions are excluded from these procedures; however, the DoD Components should reconcile FMS materiel obligation records at the source of supply with those of the organizations required to maintain FMS case control. MOV procedures for Grant Aid (GA) transactions are in C8.2..

C8.1.3.2. Civilian Component activities are excluded unless covered by inter-Component agreements.

C8.1.4. Materiel Obligation Age Criteria

C8.1.4.1. Timeframe. Materiel obligations are over age and subject to these procedures when PD 01-08 requisitions have aged 30 calendar days past the requisition date or PD 09-15 requisitions have aged 75 calendar days past the requisition date.

C8.1.4.2. Special Validations. Sources of supply may order special validations without regard to the age of the materiel obligations involved.

C8.1.4.3. Long Production Lead Time. These procedures also apply to long production lead time items since requirements for such items may also change as a result of unit/force movements, deactivation, and other population changes; however, only item managers may elect to establish longer intervals for the validation of long production lead time items.

C8.1.5. Schedule for Cyclic Validation of Materiel Obligations

C8.1.5.1. Annual Schedule. The annual schedule of cyclic validations in support of U.S. Forces and the prescribed MOV response times is shown in Table C8.T1.

Table C8.T1. Material Obligation Validation Cyclic Validations Schedule

CYCLE NUMBER	SOURCE OF SUPPLY CUTOFF TO PREPARE AND FORWARD VALIDATION REQUESTS	MAXIMUM ENDING DATE BY WHICH REQUISITIONER RESPONSES ARE DUE BACK TO SOURCE OF SUPPLY
1	20 January	5 March
2	20 April	5 June
3	20 July	5 September
4	20 October	5 December

C8.1.5.2. Response Not Within Scheduled Timeframe. Deployed units, afloat units, and CONUS/OCONUS locations that are unable to acknowledge receipt, or respond by the prescribed date, may request DLA Transaction Services to temporarily provide responses to MOV requests. Use a DLMS 517M, with Transaction Type Code AP and Action Code 9 to notify the DAAS of the organizations authorized for the MOV exemption. The theater/fleet commander or major command must approve the MOV exemption request by message to DLA Transaction Services. The exemption request is only authorized for the current MOV cycle. DLA Transaction Services shall not generate MOV responses for any later MOV cycle unless a separate exemption request approval is received.

C8.1.5.3. Quarterly Reporting. Each DoD Component must provide a quarterly consolidated report to the Deputy Assistant Secretary of Defense for Supply Chain Integration (DASD SCI) using the Appendix 1 format. Submit this report within 30 calendar days after the close of each MOV cycle. This report is assigned Report Control Symbol (RCS) DD-AT&L (Q)1064. The source of supply shall review the history file, prior to preparing the report, for those transactions in which the quantity response was different from the quantity requested. This review shall determine if the quantity difference resulted from a shipment, a cancellation, or if the requisitioner actually requested cancellation of the obligation. Only cancellations actually requested by the requisitioner using the MOV response are included in the MOV report. Do not report a difference in quantity resulting from any other cause and/or process.

C8.1.5.4. Special IMM Requests. The IMM may initiate a special validation request. For example, the IMM may need to validate requirements for high dollar value, critical items, or for those NSNs that have the largest number of materiel obligations on record or account for certain percentages of the total materiel obligations. These special validations should be selective in approach and may be made regardless of whether the materiel obligations were previously validated. The IMM may determine and define critical items as those essential items that are in short supply or expected to be in short supply for an extended period.

C8.1.5.5. Determination of Recipient of Validation Requests. MOV requests shall be transmitted to the activities determined under the following rules:

C8.1.5.5.1. The activity designated by the Media and Status (M&S) unless covered by the exceptions listed below.

C8.1.5.5.2. When the M&S is 0, transmit to the activity designated by an alphabetic character or numeric 6, 7, or 8 in the distribution code.

C8.1.5.5.3. When distribution code contains a numeric other than 5, 6, 7, or 8, or is blank, and M&S is 0, transmit requests to the requisitioner.

C8.1.5.5.4. When Distribution Code 5 is identified, transmit requests to DLA (DoDAAC SL4701) regardless of M&S.²

C8.1.5.5.5. When the M&S is F, G, P, or Z, transmit requests to the requisitioner.

C8.1.6. Preparation of Special Validation Requests

C8.1.6.1. Purpose. Use the DLMS 517M, to request a special MOV at times other than the normal MOV cycles indicated in Table C8.T1. Organizations shall validate the special MOV and use a DLMS 517M in response to the special MOV request.

C8.1.6.2. Document Number. The MOV request must identify the document number of the demand that is held as a materiel obligation, the unfilled quantity, and a response due date that is always 15 calendar days from the date of the MOV request.

C8.1.6.3. Urgent Requests. Due to the urgency of demands for critical items, IMMs may determine that supply of current demands should be accomplished from due-in stocks, against which there are materiel obligations of lesser or equal priorities. In these instances, the IMMs shall initiate a special MOV request.

C8.1.7. Performance of the Validation and Reconciliation

C8.1.7.1. Mandatory Request. The recipient of validation requests (either scheduled or special) must conduct an item-by-item review with the user to determine the continued need for each item, the quantity involved, and the priority designator (PD) of the requirement. Routine responses that all materiel obligations are still required are to be avoided. Such cursory reviews do not improve supply support. Items that are identified in the requests, but are not contained on the records of the recipient of the request, shall also be sent to the user for validation. Items that are contained on the records of recipients of the validation requests and meet the over age criteria, but are not covered by a request, shall be validated with the user.

² Refer to ADC 369. Deferred implementation is authorized.

C8.1.7.2. Recipient Response. The recipient of validation requests shall match the items recorded as materiel obligations at the source of supply with the records of unfilled demands to determine and take action to bring the two records into agreement.

C8.1.7.3. Status Request. Organizations may request status of any outstanding items, having met the age criteria, and not included with the scheduled validation requests. When such status is desired, the requisitioning activity shall submit a DLMS 869A, Requisition Inquiry/Supply Assistance, or DLMS 869F, Requisition Follow-Up, to the source of supply. (See Chapter 4 for the requisition inquiry procedures.)

C8.1.8. Responses to Materiel Obligation Requests

C8.1.8.1. Purpose. Use a DLMS 517M, to respond to special MOV requests. MOV responses shall contain the document number of the demand as contained in the MOV request, the quantity required for continuation as a materiel obligation, and the suffix, if applicable. The MOV responses shall advise the source of supply whether materiel obligations should be canceled or the requirements still exist (and the item should be continued as a materiel obligation). Respond to the special MOV requests in time to meet the requested MOV response due date.

C8.1.8.2. Response to Requests for MOV. Upon completing the validation /reconciliation process, organizations must send an MOV response for each MOV request to the source of supply that submitted the MOV request. Submit the MOV response by the MOV response due date cited in the MOV request. Use the MOV response to advise the source of supply of the quantity still required for supply action. If total cancellation is desired, do not include the quantity segment in the MOV response.

C8.1.8.3. Revised Delivery Date. Whenever a requirement is to be retained as a materiel obligation and the PD/required delivery date (RDD)/required delivery period (RDP) changes due to reassessment of requirements, submit a DLMS 511M, Requisition Modification, to indicate the revised PD/RDD/RDP. (See [Chapter 4](#) for the requisition modifier procedures.)

C8.1.8.4. DAAS Initiated Responses

C8.1.8.4.1. Exempted Activities. DAAS uses a DLMS 517M, to provide MOV responses for authorized activities exempted from participating in an MOV cycle.

C8.1.8.4.2. DAAS Response. DAAS provides appropriate MOV responses to the respective source of supply for each MOV exemption received. DAAS shall send the MOV response no earlier than seven calendar days after receipt of the MOV exemption, but no later than the last day of the cycle.

C8.1.8.4.3. MOV History File. DAAS uses the MOV history file to generate appropriate MOV responses for the activity(ies) identified in the MOV exemption.

C8.1.8.5. Receipt of Confirmed Cancellations. Organizations in receipt of confirmed cancellations may request reinstatement of their canceled requisitions for a period not to exceed 60 calendar days after the BS cancellation transaction date. Use a DLMS 517M, to request the reinstatement of canceled requisitions and indicate the quantity required. The reinstated quantity may be equal to or less than, the canceled quantity canceled. The reinstated quantity shall not exceed the canceled quantity.

C8.1.9. Source of Supply Cancellation of Materiel Obligations

C8.1.9.1. Procedures to Stop Cancellation Actions. Sources of supply must use Chapter 4 procedures to stop storage and transportation actions when accomplishing cancellations resulting from the MOV program.

C8.1.9.2. Cancellation Criteria. Sources of supply shall cancel materiel obligations when an organization has not responded to the scheduled MOV request by the MOV response due date, except for requisitions in Status Code BV or BZ. Requisitions being filled by DVD (Status Codes BV and BZ) are excluded from automatic cancellation of the MOV process. When a response to an MOV request has not been received by the response cutoff date for a requisition in BZ status, the source of supply shall send a DLMS 517M, Transaction Type Code AP, and Action Code 9 to the validating organization. The organization must validate the requirement or respond with a requisition cancellation if the materiel is not required. See Chapter 4 for the requisition cancellation procedures.

C8.1.9.3. Cancellation Upon Request. Sources of supply shall cancel materiel obligations upon receipt of requisition cancellation requests. When there is no record of the item as a materiel obligation, match the MOV response with the requisition history file (RHF) to determine the item's status. If the item is being processed, take action to stop the flow of the unneeded materiel. All sources of supply shall try to meet the DoD objective of taking all possible action to prevent shipment from the storage activity, port of embarkation, or vendor (in the instance of purchase actions). Based on action taken, sources of supply shall provide requisitioning organizations with appropriate supply or shipment status.

C8.1.9.4. Cancellation Status. Sources of supply shall send a DLMS 870S, Supply Status, with Status Code BR or BS to the organizations for which MOV requests were submitted for each item canceled as a result of the validation actions.

C8.1.9.5. Verification from Requisitioner. Sources of supply may contact requisitioning organizations to determine desired actions applicable to erroneous response transactions, if time permits. Should time not permit the source of supply to contact the requisitioning activities, the items concerned with the erroneous transactions, shall be retained as a materiel obligation until clarification is obtained.

C8.1.9.6. Response. The DoD Component of the organization initiating a cancellation request, or failing to respond to MOV requests, shall be charged with (1) transportation costs for returning the materiel to the storage activity, and

(2) procurement and termination costs when it is determined that termination is in the best interest of the Government. Specific instructions concerning materiel transportation charges and credit allowances are in [DoD 7000.14-R](#), "Department of Defense Financial Management Regulations (FMRS)," Volume 11B.

C8.1.10. Source of Supply Materiel Obligation Reinstatement

C8.1.10.1. Timeframe. Sources of supply shall reinstate action on requisition(s) when organizations submit MOV reinstatement requests within 60 calendar days of requisition cancellation citing Status Code BS. Reinstatement the requisition for the quantity equal to or less than the original canceled quantity. If the quantity is greater than the quantity canceled by the Status Code BS, only reinstate the quantity in the BS status. Reject the quantity exceeding the BS quantity. Use Status Code BS to prepare the MOV reinstatement request to ensure identification of the correct suffix.

C8.1.10.2. Source of Supply Codes. Sources of supply shall use Status Code DK, DL, and DM to reject MOV reinstatement requests received over 60 calendar days after the BS status transaction date, or when there is no record of the BS status, or when the MOV reinstatement request is for a quantity greater than the canceled quantity.

C8.2. GRANT AID

C8.2.1. General. This section prescribes policies and procedures for the validation of ICP materiel obligation records with the records of the DoD Component ILCO maintaining Security Assistance Organization (SAO) program control and for the validation of the continuing need at the GA country level for over age demands. The purpose is twofold: (1) the reconciliation of records and (2) the validation of need.

C8.2.2. Annual Validation Schedule. The annual schedule of cyclic validation in support of GA materiel obligations is shown in Table C8.T2.

Table C8.T2. Cyclic Schedule for MOV in Support of Grant Aid

CYCLE NUMBER	SOURCE OF SUPPLY CUTOFF TO PREPARE AND FORWARD VALIDATION REQUESTS	MAXIMUM ENDING DATE BY WHICH REQUISITIONER RESPONSES ARE DUE BACK TO SOURCE OF SUPPLY
1	31 January	31 May
2	31 July	30 November

C8.2.3. Aged Materiel Obligation Requests. Sources of supply shall provide the ILCO with MOV requests applicable to aged materiel obligations for GA requirements. MOV requests shall be sent to the ILCO by the sources of supply using schedules for validating aged GA materiel obligations established by the Assistant Secretary of Defense (Logistics & Materiel Readiness)(ASD(L&MR)).

C8.2.4. Materiel Obligation Definition. Materiel obligations are defined as that portion of the requisitioned quantity that is not immediately available for issue to the requisitioner and/or is recorded as a commitment for future issue of stocked items. This includes commitments for DVDs. The source of supply shall produce MOV requests from their records of materiel obligations for which the requisition document number dates are aged to 180 calendar days or more at the time of the established validation cutoff. Materiel obligations selected for validation, meeting the 180-day age criterion, shall be those assigned Status Code BB, BC, BD, or BV. The quantities identified in the MOV requests reflect the unfilled quantities only of items maintained as materiel obligations at the sources of supply. Use the DLMS 517M, to prepare MOV requests.

C8.2.5. Source of Supply Request Timeframe. Sources of supply shall send scheduled MOV requests not later than 10 calendar days after the established cutoff date.

C8.2.6. Accomplishing MOV by the Army and Air Force ILCOs

C8.2.6.1. Item/Request Matching. The ILCO receiving MOV requests shall match the items indicated as being on record at the source of supply with its records of unfilled demands and provide the MOV requests to SAOs that represent quantities/items as follows:

C8.2.6.1.1. In the MOV requests received from the source of supply, (the ILCO shall not attempt to adjust quantity differences between the ILCO record and the source of supply record.)

C8.2.6.1.2. On the ILCO record, having reached the validation age criterion and not included with MOV requests furnished by the source of supply. The ILCO shall adjust its records based upon the MOV responses received from SAOs.

C8.2.6.2. Program Originator Codes. The DoD Components may elect to have their ILCOs identify the program originator code in MOV requests transmitted to SAOs for validation. The identification of this code enables the SAO to determine the specific section to which to direct the MOV requests. In these instances, the codes shown in Table C8.T3 apply. (Do not include these codes in MOV responses that are sent to the source of supply.)

Table C8.T3. Program Originator Codes

CODE	PROGRAM ORIGINATOR
B	SAO (Army)
P	SAO (Navy)
D	SAO (Air Force)
K	SAO (Marine Corps)

C8.2.6.3. Transmitting Requests. Transmit the MOV requests to the appropriate SAO not later than 45 calendar days after the scheduled cutoff date. The time between the cutoff date and the 45 calendar days for transmitting the MOV requests to SAOs allows:

C8.2.6.3.1. Transmission of the MOV requests from the source of supply to the ILCO.

C8.2.6.3.2. ILCO establishment of suspense records of the source of supply request quantities and preparation of MOV requests for transmission to the SAOs. SAOs shall provide MOV response to the ILCO within 90 calendar days after the cutoff date for the validation cycle.

C8.2.7. Accomplishing MOV by the Navy ILCO

C8.2.7.1. Item/Record Matching. The Navy ILCO (NAVILCO) shall match the items indicated as being on record at the source of supply with its records of unfilled demands and effect a file reconciliation. NAVILCO shall send MOV responses for each MOV request received to the source of supply that submitted the validation request. The source of supply shall use the MOV response to determine whether the items should be canceled or requirements still exist and the items should be continued as materiel obligations.

C8.2.7.2. Response Timeframe. Send MOV responses to validation requests to sources of supply by 15 March for the first cycle and 15 September for the second cycle. Indicate the quantity still required in the MOV response. If total cancellation is desired, do not include the quantity segment in the MOV response.

C8.2.7.3. Inquiries. Submit a requisition inquiry, DLMS 869A or DLMS 869F, as appropriate, for items outstanding on NAVILCO records for which no MOV reconciliation request was received from the source of supply. See [Chapter 4](#) for the requisition inquiry procedures.

C8.2.8. NAVILCO Initiation of Reconciliation and/or Validation with SAOs

C8.2.8.1. Annual Request Submission. Annually, on 16 September, the NAVILCO shall prepare MOV reconciliation requests that represent unfilled requisitions with dates of 31 July or earlier.

C8.2.8.2. Program Identification. NAVILCO shall identify the program originator code in the MOV reconciliation requests sent to SAOs for validation. SAO shall use this code to determine the specific section to which to direct the requests. In these instances, the codes in Table C8.T3. apply.

C8.2.8.3. MOV Transmission. NAVICP shall send the MOV reconciliation requests to the appropriate SAO not later than 26 September and indicate 31 October as the response due date.

C8.2.9. Validation of Requirements by the SA Organizations

C8.2.9.1. Verifying Existing Requirements. SAOs receiving MOV requests shall determine whether requirements for the items and quantities still exist. SAOs shall also determine whether requirements exist for items/quantities, having reached the age criteria and not included with the MOV requests. Once validation is completed, SAOs shall adjust their records to show the country's needs for the items/quantities.

C8.2.9.2. Item Status Request. SAO shall request status of any items that are outstanding, have met the age criteria, and are not included in the MOV requests. When such status is required, SAO shall submit a requisition inquiry, DLMS 869A, to the appropriate ILCO. See Chapter 4 for the requisition inquiry procedures.

C8.2.9.3. Response for Each Reconciliation Request. SAO shall provide an MOV response for each MOV reconciliation request, as appropriate, to indicate the remaining quantity of each item is still required. The SAO shall send MOV responses to the appropriate ILCO. For the U.S. Army Security Assistance Command and the Air Force Security Assistance Center, send these responses to arrive no later than the date specified in the transmittal, which is 35 calendar days prior to the response due date contained in the requests. For NAVILCO, these responses must be received no later than 31 October.

C8.2.10. Response to MOV Requests by the Army and Air Force ILCOs

C8.2.10.1. Record Adjustment. Upon receipt of the responses from SAOs, the ILCO shall adjust its records to agree with the country's requirements indicated by the MOV responses. The ILCO shall then send MOV responses for each MOV request received from the source of supply that submitted the validation requests. The source of supply shall use the MOV response to determine whether the items should be canceled or requirements still exist and the items should be continued as materiel obligations. Provide MOV responses to the source of supply by the response due date indicated in the MOV requests. Response due date is established as the 125th calendar day following the cutoff date for validation. MOV requests shall indicate the cutoff date.

C8.2.10.2. Quantity Remaining Required. ILCO shall indicate the quantity still required in the MOV response. If total cancellation is desired, do not include the quantity segment in the MOV response.

C8.2.10.3. Outstanding Items. ILCO shall submit a requisition inquiry, DLMS 869A or DLMS 869F, as appropriate, for items outstanding on the ILCO records, indicated as required by SAO, and for which no MOV request was received from the source of supply. See Chapter 4 for the requisition inquiry procedures.

C8.2.11. NAVILCO Action on SAO Responses

C8.2.11.1. Record Adjustment. Upon receipt of the responses from SAOs, the NAVILCO shall adjust its records to agree with country requirements as indicated by the MOV responses. NAVILCO shall send requisition cancellations to the source of

supply on those unshipped lines for which the SAO indicated a reduced quantity requirement. NAVILCO shall initiate action to resolve the unreconciled lines for which the SAO indicated a requirement. NAVILCO shall send the appropriate supply and shipment status to SAOs.

C8.2.11.2. Requisition Cancellation. By 30 November, NAVILCO shall prepare and send a requisition cancellation to the last known source processing the corresponding requisition. See Chapter 4 for the requisition cancellation procedures.

C8.2.11.3. Record of Confirmed Cancellations. NAVILCO shall keep a record of confirmed cancellations received in response to requisition cancellations submitted as a result of reduced quantity requirements indicated by SAOs.

C8.2.11.4. Quantity Reduction Reconciliation. NAVILCO shall prepare a report of the number of lines reconciled with the SAO, the number and value of SAO requested quantity reductions, and the number and value of confirmations received as of 31 December. NAVILCO shall send two copies of this report to the appropriate Service headquarters for review and submission to Office of the Assistant Secretary of Defense.

C8.2.12. ILCO Cancellation of Materiel Obligations

C8.2.12.1. Source of Supply Action. The source of supply shall cancel materiel obligation items upon receipt of requisition cancellations or the indication of need for lesser quantities from the ILCO. (When there is no record of the item at time of receipt of the MOV responses, the MOV response shall be matched with the RHF to determine the latest status of the item or action taken to accomplish cancellation action. The source of supply shall send the ILCO supply or shipment status as appropriate.) In the event procurement, rebuild, or other expense has been incurred and must be billed to GA for an individual item being canceled, the supplying DoD Component shall take action under [DoD 5105.38-M](#), Part II, Chapter H.

C8.2.12.2. Validation of Cancellations. The source of supply shall send the ILCO, for which validation requests were submitted, Status Code BR for each item and/or quantity canceled as a result of the validation actions. ILCO should not consider any quantity as canceled before receiving the confirming Status Code BR.

C8.2.12.3. When no Response has been Received. The source of supply shall not automatically cancel items for which materiel obligations were established when no MOV response has been received relative to specific items submitted for validation.

C9. CHAPTER 9

LOGISTICS REASSIGNMENT

C9.1. GENERAL

C9.1.1. Purpose. This chapter provides procedures designed to ensure successful Logistics Reassignment (LR) of both consumable and nonconsumable items, provide adequate management control of items in a transitional situation, and ensure uninterrupted supply support of items during the transition period.

C9.1.2. Transactions. This chapter addresses the procedures to the following Accredited Standards Committee (ASC) X12 transaction functions identified by their beginning segment and report type code. Other DLMS formats, such as XML, are also available. See the DLA Logistics Management Standards Website for available formats: www.dla.mil/j-6/dlmsso/elibrary/TransFormats/140_997.asp. The corresponding MILSTRAP legacy 80 record position transaction functionality is identified for information purposes in a mixed DLSS/DLMS environment.

C9.1.2.1. LR Management Data Transaction is identified by the DLMS 536L ASC X12 beginning segment (1/BR02/020) Transaction Type Code LR – Logistics Reassignment. This transaction provides the functionality of MILSTRAP legacy document identifier codes (DIC) DLS, DLT, DLU, DLV, DLW, and DLX.

C9.1.2.2. LR Transfer/Decapitalization Transaction is identified by the DLMS 846D ASC X12 beginning segment (1/BIA/020) Report Type Code TL – Logistics Transfer Advice. This transaction provides MILSTRAP legacy DIC DEE/DEF functionality.

C9.1.2.3. LR Transfer/Decapitalization Inquiry Transaction identified by the DLMS 846D ASC X12 beginning segment (1/BIA/020) Report Type Code TK – Logistics Transfer Inquiry. This transaction provides MILSTRAP legacy DIC DLA functionality.

C9.1.2.4. LR Storage Information Order Transaction is identified by the DLMS 846S ASC X12 beginning segment (1/BIA/020) Report Type Code PK – Storage Information Inquiry. This transaction provides MILSTRAP legacy DIC DZC functionality.

C9.1.2.5. LR Storage Information Reply Transaction is identified by the DLMS 846S ASC X12 beginning segment (1/BIA/020) Report Type Code TQ – Storage Information Advice. This transaction provides MILSTRAP legacy 8 DIC DZD functionality.

C9.1.3. LR Process. To ease understanding of these procedures, the LR process has been divided into three periods of time based upon the effective transfer date (ETD). These periods are identified as pre-ETD, ETD, and post-ETD. The pre-ETD period commences on the date the GIM assignment/ETD is sent to the GIM/LIM and

terminates at ETD. ETD is the date of the LR. Although ETD is a specific point in time, for the purpose of these procedures, any actions involving data requirements that show conditions as of the ETD shall be discussed as if such actions took place on the ETD, even though they may have been taken immediately before or after the actual ETD. The post-ETD period begins immediately following the ETD and includes all actions that do not specifically involve data requirements that show conditions as of the ETD. Specific events required to take place during the LR are set forth under the appropriate period.

C9.1.3.1. The LIM shall use an LR Management Data Transaction to provide the GIM with general management information, backorder and demand data, on hand data, due-in data, contract history data, and product quality deficiency report (PQDR) history data for consumable assets being logistically reassigned.

C9.1.3.2. The LIM shall use an LR Transfer/Decapitalization Transaction to notify the GIM of the transfer and decapitalization quantities for the item being logistically reassigned. The GIM shall use an LR Transfer/Decapitalization Inquiry Transaction to inquire about LR transfer/decapitalization quantities when none was received.

C9.1.3.3. The LIM shall send an LR Storage Information Order Transaction to the storage activity to notify them to transfer ownership of wholesale stocks to the GIM and of the quantity which the LIM is retaining. Storage activities shall send an LR Storage Information Reply Transaction to the LIM to notify the LIM of the quantities the storage activity actually transferred to GIM ownership and those retained in LIM ownership.

C9.2. POLICY. DoD policy for LR of consumable items is contained in [DoD 4140.26-M](#), "Defense Integrated Materiel Management Manual for Consumable Items." DoD policy for LR of nonconsumable items is contained in [AMC-R 700-99/NAVSUPINST 4790.7/AFLCR 400-21/MCO P4410.22](#), "Logistics Wholesale Inventory Management and Logistics Support of Multi-Service Used Nonconsumable Items,".

C9.3. REQUIREMENTS

C9.3.1. General. The LIM, GIM, and storage activities shall accomplish the actions required by this manual to reassign asset accountability to the GIM in a timely manner to ensure uninterrupted supply support. Resolution of problems affecting supply operation requires direct communication, coordination, and assistance.

C9.3.2. GIM. The GIM shall accept, as of the ETD, those items and book balances submitted by the LIM. (The following policy covering transfer of assets for LR is implemented from DoD 4140.26-M and AMC-R 700-99 et al., respectively.) The LIM shall transfer all on-hand wholesale balances, in place, except:

C9.3.2.1. Assets committed to the support of special projects, programs, and/or plans including the International Logistics Program (ILP), e.g., staged shipments,

packaged shipments. On hand wholesale assets in support of the ILP shall not be transferred to the GIM nor shall any ongoing procurement action in support of the ILP be terminated.

C9.3.2.2. Consumable assets in SCCs F, H, J, K, L, M, P, Q, R, and S. (See DoD 4140.26-M for complete criteria.)

C9.3.2.3. Nonconsumable assets in SCCs G, H, J, K, L, M, P, and Q. SCCs H and P materiel shall never be decapitalized. (See AMC-R 700-99 et al., for complete criteria.)

C9.3.3. LIM. On an expedited basis the LIM shall decapitalize to the GIM wholesale assets, other than the SCCs shown above, generated during the first year following ETD. The LIM shall report assets generated after 1 year of ETD under Chapter 11, (Materiel Returns Program Procedures). Except for decapitalization of procurement receipts, the GIM shall reject assets decapitalized more than 1 year after the ETD using Reject Advice Code AW.

C9.4. PRE-EFFECTIVE TRANSFER DATE ACTIONS

C9.4.1. General

C9.4.1.1. The LIM procurement office shall provide the GIM with contractual status on contracts either retained by the LIM or assigned to the Defense Contract Management Agency (DCMA) for contract administration. Contract status includes, but is not limited to, delivery status, acceleration of delivery, follow-up status requests, contract warranty provisions, and executing appropriate modifications to basic contracts.

C9.4.1.2. For nonconsumable items, the LIM shall give the GIM listings of all purchase requests (procurement actions that have not reached the award stage) throughout the pre-ETD period. The GIM shall, within 15 calendar days following receipt of the purchase request listing from the LIM, annotate required changes, and return one copy to the LIM. For consumable items, the LIM shall send listings of all purchase requests to the GIM 45 calendar days prior to the ETD in the format established by DoD 4140.26-M.

C9.4.1.3. The LIM shall reclassify consumable assets, in SCCs Q and R, to the appropriate SCC before the LIM sends the GIM an updated LR Management Data Transaction.

C9.4.1.4. For assets in SCC H, the LIM shall either forward the assets to DRMO or reclassify the item to its true condition as authorized by Chapter 7.

C9.4.2. One hundred and fifty calendar days prior to ETD, or upon notification if less than 150 calendar days, the LIM shall take the following actions:

C9.4.2.1. Advise the GIM of assets being held for litigation.

C9.4.2.2. Perform physical inventories under Chapter 6 procedures, as stated in DoD 4140.26-M for consumable items, and AMC-R 700-99 et al., for nonconsumable items, as follows:

C9.4.2.2.1. For consumables, inventory stock on hand for wholesale assets designated as classified or sensitive.

C9.4.2.2.2. For nonconsumables, inventory on-hand wholesale assets.

C9.4.3. One hundred and twenty calendar days prior to ETD, or upon notification if less than 120 calendar days, for consumable items being transferred, the LIM shall send the GIM an LR Management Data Transaction containing backorder and demand data, on-hand data, due-in data, and contract history data. Do not provide PQDR history data at this time.

C9.4.4. Sixty calendar days prior to ETD the LIM shall process excess reports received for LR items for which disposition action is appropriate, in accordance with Chapter 11 procedures.

C9.4.5. Forty-Five Calendar Days Prior to ETD

C9.4.5.1. By mutual agreement between the GIM and the LIM, the LIM shall initiate action to amend existing LR item contracts/purchase orders not reassigned to the GIM to provide for diversion of stock by quantities into storage activities of the GIM. The GIM shall send addresses of the shipping destinations to the LIM, as appropriate. The LIM shall retain the due-in.

C9.4.5.2. For consumable items, the LIM shall send listings of all purchase requests in accordance with DoD 4140.26-M. The GIM will, within 15 calendar days following receipt of the purchase request listing from the LIM, annotate required changes and return one copy to the LIM.

C9.4.6. Thirty Calendar Days Prior to ETD. The LIM shall take the following actions:

C9.4.6.1. Furnish the GIM a war materiel requirement (WMR) data listing sorted by NSN and the DoD Component (and routing identifier code (RIC)) within the DoD Component when the requirements have been allocated), major to minor, showing the current computed data.

C.9.4.6.1.1. Include the quantity and value of the forecasted reparable return data, if applicable; quantity and value of Balance War Reserves (Other War Materiel Requirement (OWMR); Other War Reserve Materiel Requirement (OWRMR); OWRMR, Protectable (OWRMRP); Pre-Positioned War Reserve Materiel Requirement (PWRMR); PWRMR, Protectable (PWRMRP)); dollar value subtotals for FSC, RIC if allocated, and the DoD Component; and grand total dollar value.

C9.4.6.1.2. Additionally, send the DLMS 830W, War Materiel Requirements, to the GIM to show original input from which the WMR computed data was generated. The GIM shall process the DLMS 830W to recompute the WMR data as described in Chapter 3.

C9.4.6.2. For consumable items, send the GIM an updated LR Management Data Transaction containing backorder and demand data, on-hand data, due-in data, and contract history data. Do not provide PQDR history data at this time. Send the GIM the latest status of assets being held for litigation action.

C9.5. EFFECTIVE TRANSFER DATE PERIOD ACTIONS. The LIM shall do the following at ETD:

C9.5.1. Send an LR Storage Information Order Transaction to the storage activities as a notification that wholesale stocks stored are now under GIM ownership.

C9.5.2. Process inventory adjustments to decrease the inventory control record using DLMS 947I.

C9.5.3. Prepare and send to the GIM LR Transfer/Decapitalization Transaction by SCC and location. Telephone communication between the GIM and LIM is authorized to resolve transactions that reject from the validation process. To preclude inquiries when there are no on-hand assets available for transfer, the LIM shall send a LR Transfer/Decapitalization Transaction to the GIM for a zero quantity as either a transfer or a decapitalization, based on the following:

C9.5.3.1. LR transfers are used for permanent transfers, without reimbursement of cost, of inventory within the same fund division (the LIM has a transfer-out and the GIM has a corresponding transfer-in).

C9.5.3.2. LR decapitalization transactions are used for permanent transfers, without reimbursement of cost, of inventory between different fund divisions, or chartered subdivisions within the fund (the LIM has a decapitalization and the GIM has a corresponding capitalization).

C9.5.4. Give memorandum due-in information to the GIM and advance receipt information (ARI) to the storage activity in accordance with Chapter 12.

C9.5.5. Send the GIM storage activity a DLMS 527D ARI for each due-in from procurement on which the destination has changed to the GIM. In addition, send the LIM storage activity a reversal DLMS 527D ARI to delete the ARI.

C9.5.6. Transfer funded backorders to the GIM in accordance with DoD 4140.26-M. Transfer the funded backorders using referral/passing orders in accordance with MILSTRIP.

C9.5.7. For consumable items, send the LR Management Data Transaction containing PQDR history data. Send data for completed PQDRs only and include all

PQDRs completed up to 3 years prior to the ETD. Do not provide backorder and demand data, on-hand data, due-in data, or contract history data at this time.

C9.5.8. For items with SPR, prepare and send a DLMS 870L, Order Status Report (SPR Status), to the forecasting activity as outlined in [Chapter 2](#).

C9.5.9. Advise the GIM of the latest data available on assets being held for litigation action.

C9.6. POST-EFFECTIVE TRANSFER DATE ACTIONS

C9.6.1. Storage Activity Action. The storage activity shall prepare an LR Storage Information Reply Transaction within 5 working days of receipt of an LR Storage Information Order Transaction advising the LIM of the quantity transferred to GIM ownership. If the storage activity does not receive an LR Storage Information Order Transaction, the storage activity shall prepare and send the LIM an LR Storage Information Reply Transaction showing each balance by SCC.

C9.6.2. GIM Actions

C9.6.2.1. Inventory Adjustment. Convert valid LR Transfer/Decapitalization Transactions received from the LIM to inventory adjustments using DLMS 947I, to establish or increase inventory balances. (This action is not required upon receipt of an LR transfer/decapitalization with a zero quantity.) The GIM may automatically reject invalid LR transfer/decapitalization transactions. Telephone communication between the GIM and LIM is authorized to resolve LR transfer/decapitalization transactions that reject from the validation process.

C9.6.2.2. Memorandum Due-In Transactions. Process valid DLMS 527D memorandum due-in transactions, received from the LIM in accordance with Chapter 12.

C9.6.2.3. Transaction Rejections. If in receipt of an LR Transfer/Decapitalization Transaction or DLMS 527D memorandum due-in for an item not involved in an LR, reject the incorrectly reported transactions back to the initiator using DLMS 824R, Reject Advice, citing Reject Advice Code AY.

C9.6.2.4. Reconsignment Instructions. When appropriate, give reconsignment instructions to the LIM for items due-in from undelivered contracts of the LIM. Report receipts from these contracts following the ETD in accordance with Chapter 13.

C9.6.2.5. LR Transfer/Decapitalization Reversals. Accept and process reversals of LR Transfer/Decapitalization Transactions, adjust their management and financial records, and discontinue processing any other transactions against the LR assets until the GIM processes new LR Transfer/Decapitalization Transactions from the LIM.

C9.6.3. LIM Actions

C9.6.3.1. Updating Due-Ins. The LIM shall update the memorandum due-in and ARI in accordance with Chapter 13, as necessary, to include the following actions:

C9.6.3.1.1. Changing the destination of undelivered purchases upon request of the GIM.

C9.6.3.1.2. Awarding an unawarded purchase request.

C9.6.3.2. Litigation Procedures. The LIM shall enter litigation proceedings on all items in SCC L which are either on hand at ETD or later received by either the GIM or LIM on LIM negotiated contracts. The LIM shall notify the GIM of actions being taken to resolve the litigation actions.

C9.6.3.3. Condition Change. When an item previously transferred to the GIM is restored to an issuable condition, or when inspection of stock on hand reveals a change in condition of the materiel, the GIM shall be notified of the condition transfer using a DLMS 947I.

C9.6.3.4. Preparation of Storage Information. The LIM's storage activity shall send a LR Storage Information Reply Transaction within 5 working days of the ETD advising the LIM of the quantity transferred to GIM ownership. If the LIM's storage activity does not receive a LR Storage Information Order Transaction, the storage activity shall send the LIM a LR Storage Information Reply Transaction showing each balance by SCC.

C9.6.3.5. LIM Processing of a LR Storage Information Reply. Upon receipt of the LR Storage Information Reply Transaction, the LIM will review the quantity. When the transfer quantity in the reply is greater than the transfer quantity shown in the order, the LIM shall transfer/decapitalize the additional quantity to the GIM on a new LR Transfer/Decapitalization Transaction. When the transfer quantity in the reply is less than the transfer quantity in the order, the LIM shall:

C9.6.3.5.1. Within 24 hours of receipt of the reply, initiate action to reverse the LR Transfer/Decapitalization Transaction, previously submitted for that location and SCC.

C9.6.3.5.2. Conduct research, and/or request a special inventory when deemed appropriate.

C9.6.3.5.3. Determine whether the quantity reported by the storage activity is correct (based on the best data available after research/inventory). If research shows the quantity reported was not correct the LIM shall process a reversal, or LR Transfer/Decapitalization Transaction and a LR Storage Information Order Transaction containing new document numbers with the revised quantity.

C9.6.3.5.3.1. Complete these actions within 30 calendar days after the ETD to prevent a long time lag between the ETD and corrective action. If extenuating circumstances prevent a LIM from accomplishing this task within 30 calendar days, notify the GIM of the problem and expected date when the problem should be resolved (not to exceed 60 calendar days past the ETD).

C9.6.3.5.3.2. If a LR Storage Information Reply Transaction contains a transferable quantity on an item the LIM provided a LR Transfer/Decapitalization Transaction with a zero balance, the LIM shall send a new LR Storage Information Order Transaction to the storage activity, and a new LR Transfer/Decapitalization Transaction to the GIM showing the appropriate quantity, SCC, and location; in this situation, the LIM shall not prepare a LR Transfer/Decapitalization Transaction reversal.

C9.6.3.6. Ninety Calendar Days after ETD. For consumable items, the LIM shall send the GIM an updated LR Management Data Transaction containing contract history and PQDR history data. Give data for PQDRs completed between the ETD and the ETD plus 90 calendar days only. Do not give backorder and demand, on hand, or due-in data at this time.

C9.6.3.7. One Hundred and Eighty Calendar Days after ETD. For consumable items, the LIM shall send the GIM an updated LR Management Data Transaction with PQDR history data. Give data for PQDRs completed between the ETD plus 90 calendar days and the ETD plus 180 calendar days only. Do not give backorder and demand, on hand, due-in, or contract history data at this time.

C9.6.3.8. Two-Hundred and Seventy Calendar Days after ETD. For consumable items, the LIM shall send the GIM an updated LR Management Data Transaction containing contract history and PQDR history data. Give data for PQDRs completed between the ETD plus 180 calendar days and the ETD plus 270 calendar days only. Do not give backorder and demand, on-hand, or due-in data at this time.

C9.7. RECEIPT PROCESSING AFTER EFFECTIVE TRANSFER DATE. Storage activities shall process receipts after the ETD in accordance with [Chapter 13](#).

C9.7.1. Receipts from Procurement

C9.7.1.1. Upon receipt of assets from procurement by either the GIM or LIM storage activity, send a DLMS 527R Receipt Transaction to the LIM.

C9.7.1.2. Procurement receipts received after 1 year past the ETD shall be processed by the LIM and GIM in the same manner that procurement receipts would be processed when received during the ETD to 1 year period.

C9.7.1.3. When the LIM receives a receipt transaction from the storage activity for an item that was logistically reassigned, the LIM shall:

C9.7.1.3.1. Process the receipt to reduce the due-in record, record the assets on the LIM owner record.

C9.7.1.3.2. Decrease the LIM owner record using a DLMS 947I, Inventory Adjustment Transaction, in accordance with [Chapter 7](#).

C9.7.1.3.3. Send a DLMS 527R, Memorandum Receipt Transaction, to the GIM.

C9.7.1.3.4. Send a LR Transfer/Decapitalization Transaction, in accordance with C9.5, and include transaction number or contract number (and related data: Contract line item number (CLIN), exhibit line item number (ELIN), and call or order number) from the associated receipt transaction to establish an audit trail between the receipt and its following transfer/decapitalization.

C9.7.1.3.5. Send a LR Storage Information Order Transaction to the storage activity in accordance with C9.5.

C9.7.1.3.6. Process receipts for which litigation is required in accordance with Chapter 13.

C9.7.1.4. If no DLMS 527D ARI is recorded, the storage activity shall report materiel received from procurement sources in accordance with Chapter 13.

C9.7.1.5. The GIM will:

C9.7.1.5.1. Use a LR Transfer/Decapitalization Transaction to record the assets on the GIM owner record and to reduce the memorandum due-in record in accordance with Chapter 13.

C9.7.1.5.2. If a LR Transfer/Decapitalization Transaction is received for an item not involved in an LR, the GIM shall reject the transaction back to the initiator using DLMS 824R citing Reject Advice Code AY.

C9.7.1.5.3. If assets from procurement are received for which there are no ARIs at the receiving storage activity, the receiving activity shall report the receipt to the cognizant IMM. If the GIM does not have a recorded due-in and the item was recently involved in an LR, the GIM should research/contact the LIM to determine proper reporting of the receipt to maintain accountability accuracy. If the procurement receipt is incorrectly reported to the LIM (and the LIM did not initiate the procurement action), the LIM should reject the receipt back to the originator with a DLMS 824R citing Reject Advice Code AB.

C9.7.2. Receipts From Other Than Procurement

C9.7.2.1. The LIM's storage activity, upon receipt of assets from other than procurement, shall send DLMS 527R receipt to the LIM.

C9.7.2.2. The LIM shall:

C9.7.2.2.1. Process the storage activity initiated receipt to reduce the due-in record and record assets on the LIM inventory record for the quantity received.

C9.7.2.2.2. Decrease the inventory control record using DLMS 947I.

C9.7.2.2.3. Send DLMS 527R, Memorandum Receipt Transaction, to the GIM.

C9.7.2.2.4. Send a LR Transfer/Decapitalization Transaction to the GIM.

C9.7.2.3. The GIM shall process the D527R, Memorandum Receipt Transaction, to reduce the memorandum due-in record and shall use the LR Transfer/Decapitalization Transaction to record assets on their inventory record for the quantity received.

C9.7.2.4. If no ARI is recorded, the storage activity will report materiel received from nonprocurement sources following Chapter 13.

C9.8. INQUIRY FOR LOGISTICS REASSIGNMENT ASSET DATA AND RESPONSE

C9.8.1. LR Transfer/Decapitalization Inquiry. The GIM shall send an inquiry to the LIM, using a LR Transfer/Decapitalization Inquiry Transaction, for all assets logistically reassigned for which they received no LR Transfer/Decapitalization Transaction.

C9.8.2. LIM Response. The LIM shall send the necessary LR Transfer/Decapitalization Transaction or a duplicate thereof.

C9.9. LOGISTICS REASSIGNMENT DUE-IN VALIDATION. See [Chapter 12](#), Due-In Inquiry and Reconciliation procedures.

C10. CHAPTER 10

MATERIEL RECEIPT ACKNOWLEDGEMENT

C10.1. GENERAL

C10.1.1. Purpose. This chapter provides the process for a DoD automated, closed-loop system to provide accountability and monitor receipt of shipments of DoD and General Services Administration (GSA) wholesale stocks and DLA Disposition Services stocks issued from on-hand assets or procured for direct vendor delivery (DVD). These procedures provide for the control of due-in records below the wholesale level and the interface among the transportation, quality, supply, and financial operations/systems below the wholesale level and between the supply and purchasing operations/systems at the wholesale level to provide proper control over intransit assets and document receipt in the payment files.

C10.1.2. Transactions. This chapter addresses the procedures applicable to the following Accredited Standards Committee (ASC) X12 transaction functions identified by their beginning segment (1/BR02/020) transaction type code. Other DLMS formats, such as XML, are available from the DLA Logistics Management Standards Website www.dla.mil/j-6/dlms/eLibrary/TransFormats/140_997.asp. The corresponding MILSTRAP legacy 80 record position transaction functionality is identified for information purposes in a mixed DLSS/DLMS environment.

C10.1.2.1. Materiel Receipt Acknowledgement (MRA) Transaction is DLMS 527R, identified by the ASC X12 beginning segment (1BR02/020) Transaction Type Code TH – Receipt Acknowledgement Advice. This transaction provides [MILSTRAP](#) legacy DIC DRA functionality.

C10.1.2.2. MRA Response to Inquiry Transaction is DLMS 527R, identified by Transaction Type Code TH–Receipt Acknowledgement Advice, used in conjunction with 1/BR06/20 Action Code V–Respond. This transaction provides MILSTRAP legacy DIC DRB functionality.¹

C10.1.2.3. MRA Inquiry Transaction is DLMS 527R, identified by Transaction Type Code TG – Receipt Acknowledgement Inquiry. This transaction provides MILSTRAP legacy DIC DRF functionality.

¹ Refer to ADC 313. DOD Components must provide DLA Logistics Management Standards office with their Component implementation date for ADC 313.

C10.1.3. Applicability

C10.1.3.1. These procedures apply to shipments of DoD wholesale stocks and DLA Disposition Services stocks and, in part, to shipments of GSA wholesale stocks--whether pushed or pulled, delivered or picked up, issued from on hand assets or procured for DVD from commercial sources. These procedures apply to:

C10.1.3.1.1. All DoD integrated materiel managers (IMM) and the DLA Disposition Services (for the purposes of MRA, DLA Disposition Services is the DoD manager for shipments from reutilization and marketing).

C10.1.3.1.2. Recipients of DoD and GSA wholesale stocks and DLA Disposition Services stocks—including DoD intermediate/retail level and end-use activities; contractors that receive GFM, as defined under [DoD 4140.1-R](#), “DoD Supply Chain Materiel Management Regulation,” May 23, 2003; DoD ICPs that requisition materiel from GSA, DLA Disposition Services, or other DoD inventory control points (ICP); and DoD maintenance facilities that receive items for maintenance when the maintenance activity accountable officer assumes property accountability for the inducted items--hereafter called reporting activities.

C10.1.3.2. GSA shall not use the MRA to monitor materiel receipt but shall use the data to interface with the discrepancy reporting process. Therefore, GSA shall not follow-up to reporting activities to request an MRA.

C10.1.3.3. The DoD Components may prescribe additional internal follow-up requirements to those identified in this chapter.

C10.1.4. Exclusions. The following are excluded from MRA procedures:

C10.1.4.1. Commodities excluded from requisitioning, except that receipt of requisitioned forms and publications shall be acknowledged.

C10.1.4.2. Shipments to SA customers except when the shipment concerns an unconfirmed materiel release order (MRO).

C10.1.4.3. Inter-Component lateral redistributions of retail stock not directed by the IMM.

C10.1.4.4. Shipments to state, civil, or federal agency activities.

C10.1.4.5. Receipts into DoD wholesale stock controlled under Chapter 13, including relocations/shipments to contractors, commercial or industrial activities which are receipt reported to the owner. However, when IMMs requisition materiel from another IMM or DLA Disposition Services, and the receipt is reported under Chapter 13, the requisitioning IMM shall acknowledge the receipt.

C10.1.4.6. Shipments to defense reutilization and marketing that are covered under the procedures for in-transit control of shipments to DLA Disposition Services Field Offices.

C10.1.4.7. Shipments of fresh fruit and vegetables.

C10.1.4.8. Shipments to Army/Air Force Exchange Service (DoD activity address codes (DoDAAC) HX1_, HX2_, HX3_ , and HX4 _).

C10.2. RESPONSIBILITIES

C10.2.1. Reporting Activity. Reporting activities excluding International Logistics Control Offices (ILCO) shall:

C10.2.1.1. Establish supply due-in records for all requisitions (pulled or pushed) being supplied from wholesale stock. It is not required to establish a due-in record when shipment status is received after the materiel has been received.

C10.2.1.2. Update (or establish, when no previous record of the due-in/materiel receipt exists) due-in records and estimated delivery dates, based on supply and shipment status received. Establish due-in record estimated delivery dates which equal MRA prescribed timeframes (i.e., the shipment status release day plus 30 or 90 calendar days for shipments to continental United States (CONUS) or overseas activities, respectively).

C10.2.1.3. Post receipts from wholesale stock to a stock record/property, or equivalent, account and acknowledge materiel receipt under these procedures.

C10.2.1.4. Post receipts to the appropriate account. Whenever materiel is taken into U.S. Government custody at final destination, whether it has been accepted or not, ensure the receipt is posted to the stock record/property, or equivalent, account. Establish any needed interface among the transportation, quality, and supply operations/processes to meet this requirement.

C10.2.1.5. Monitor due-in records and report nonreceipt under these procedures when materiel is not received within the prescribed timeframes. DLMS requires that 100 percent shipment status be sent to all reporting activities so they can meet this requirement.

C10.2.1.6. Coordinate with the financial operation/function before clearing a due-in record by any action other than materiel receipt. Maintain an auditable record of all due-in records so cleared.

C10.2.1.7. Establish an interface with financial accounting operations/processes to maintain proper financial accounting control for in-transit assets, as prescribed by [DoD 7000.14-R](#), "DoD Financial Management Regulation".

C10.2.2. ILCO History Screening. ILCOs shall screen history records for valid shipment status or coordinate with freight forwarders/customers to determine shipment status/receipt data, for unconfirmed MROs and send an MRA Advice Transaction within prescribed timeframes.

C10.2.3. Integrated Materiel Manager. IMMs shall:

C10.2.3.1. Have a closed-loop system to monitor materiel receipt on all shipments of wholesale stock to DoD activities.

C10.2.3.2. Control MRA data based on quantity within document number. When the MRA does not match a shipped record, use the data only for quality control/management evaluation purposes. Do not reject MRAs to the submitter.

C10.2.3.3. Keep an accessible record of requisitions, by document number and suffix code shipped, until materiel receipt is confirmed, nonreceipt is reported for the quantity shipped, or failure to acknowledge is included in management evaluation reports.

C10.2.3.4. Establish an interface between the supply and disbursing functions/operations to provide receipt acknowledgment data for all DVDs for documentation of payment files.

C10.2.3.5. Consider MRA data in the supply discrepancy report (SDR) validation process.

C10.2.4. DoD Component. The DoD Components:

C10.2.4.1. Shall establish the internal interface among the logistics, financial, and contracting operations/systems necessary to accomplish MRA requirements.

C10.2.4.2. May, for intra-DoD Component shipments, elect to have their shipping activity or consolidation and containerization point create an MRA and send it with the shipment for completion and submission by the reporting activity.

C10.2.4.3. May prescribe, where appropriate, that intermediate levels of supply (i.e., organizations that are not the ultimate materiel recipient but maintain due-in records for referred user requisitions) post receipts to their due-in records and acknowledge materiel receipt for the user.

C10.2.4.4. May record MRA data in requisition history and use to close unconfirmed MROs.

C10.2.5. MRA Submission

C10.2.5.1. Reporting Time Limits. Reporting activities shall meet the time limits identified in this chapter. These requirements and timeframes are independent from prescribed shipment tracing and discrepancy reporting requirements and timeframes to which the receiving facility must also adhere. MRA reporting timeframes are summarized below:

Table C10.T1. Matériel Receipt Acknowledgement Submission Time Limits for Reporting Activities

ACTION	TIME LIMIT
U.S. Forces send MRA	* 5 calendar days from date matériel received and: <ul style="list-style-type: none"> □ 30 calendar days from the DLMS 856S date shipped Field entry (CONUS destination) for nonreceipt. <li style="text-align: center;">or □ 90 calendar days from the DLMS 856S date shipped Field entry (Overseas destination) for nonreceipt.
ILCOs Send MRA	*120 calendar days from the DS 856S date shipped field entry for security assistance shipments.
Send MRA in Reply to Follow-Up	*15 calendar days from transaction preparation date in the MRA Inquiry.
* Take the action before the time limit is reached. □ Take the action when the time limit is reached.	

C10.2.5.2. Submission of MRA Advice Transaction. Reporting activities shall submit an MRA when a matériel receipt is posted to the retail stock record, stock record account, property account, or equivalent record. Also, submit an MRA when due-in dates are reached and matériel has not been received.

C10.2.5.3. U.S. Forces Reporting. U.S. Forces reporting activities shall send an MRA:

C10.2.5.3.1. Within 5 calendar days from date matériel is received.

C10.2.5.3.2. For nonreceipt of matériel with a CONUS destination, within 30 calendar days from date shipped cited in DLMS 856S, Shipment Status.

C10.2.5.3.3. For nonreceipt of matériel with an overseas destination, within 90 calendar days from date shipped cited in DLMS 856S.

C10.2.5.4. SA Shipments. ILCOs in receipt of DLMS 856S pseudo shipment status shall screen history records for valid shipment status. If valid shipment status is

not available, ILCOs may coordinate with freight forwarders/customers to determine shipment status/receipt data. Submit an MRA to show shipment status or receipt data within 120 calendar days from the pseudo shipment status release date.

C10.2.5.5. DAAS MRA Processing. DAAS shall pass the MRA to the designated IMM the reporting activity indicates in the transaction, and provide images to other designated activities based upon the DoD Component rules. Reporting activities shall direct the MRA to one of the following (listed in order of preference):

C10.2.5.5.1. The organization that directed the materiel shipment as shown on DLMS 856S.

C10.2.5.5.2. The last known source of supply to that authorized follow-up action shall be directed as shown on DLMS 870S, Supply Status.

C10.2.5.5.3. The source of supply to which the DLMS 511R, Requisition, was submitted.

C10.2.5.6. MRA For Materiel Provided to Contractors as Government Furnished Materiel and for MRA Associated with Contractor Furnished Materiel Obtained from Government Supply Sources. This business process is applicable when contractors are authorized to receive specific items and quantities of government furnished materiel (GFM) or contractor furnished materiel (CFM) (also known as contractor acquired property (CAP)) from Government sources of supply. Materiel may be issued to the contractor based upon a contract schedule/Bill of Material (BOM) or issued in response to a requisition made by the contractor or a responsible Government representative. Under DLMS, MRA of GFM/CFM requires identification of the DoD contract number and call/order number, when applicable, which authorized the provision of GFM/CFM to establish accountability to the authorizing DoD contract. This contract number is required in addition to the controlling document number for the MRA transaction.

C10.2.5.7. MRA for Tailored Vendor Relationship. DLA, in conjunction with the DoD Components and vendors, has implemented tailored vendor relationship (TVR). TVR is a business process where there is a direct relationship between the customer and the vendor. Under TVR, customers place orders directly with the Prime Vendor, outside the routine supply requisitioning process/systems, using various communication channels such as EDI, phone, fax, email, or via the prime vendor's ordering system. DLA EBS receives copies of transactions in order to maintain line item accountability. MRA of TVR shipments require use of the contract number, call, and line item numbers to uniquely identify lines. This data is necessary because TVR orders can have multiple lines for the same document number and suffix code. DLA receives MRAs for TVR from, Defense Medical Logistics Standard Support (DMLSS), Theater Enterprise-Wide Logistics System (TEWLS), EMALL, or customer systems.

C10.2.6. Acknowledgement of Split or Partial Shipments. When a shipped line item (requisition document number and suffix code) is consigned as a split or partial

shipment, submit an MRA, for the shipment segments as they are received. The split or partial shipment codes are part of the transportation control number (TCN) structure in accordance with [DTR 4500.9-R](#), DoD Transportation Regulation". Accordingly, reporting activities shall include the TCN in the MRA transaction when it is available. If the total quantity for the shipped line item is not received by the due-in date, report the missing quantity, citing Discrepancy Indicator Code F, in accordance with the guidance in the MRA transaction.

C10.2.7. Acknowledgement of a Discrepant/Deficient Shipment. To acknowledge receipt of a discrepant/deficient shipment, submit an MRA, except as noted below, with the appropriate discrepancy indicator code. With the exception of the receipt of multiple stock numbers, use a single MRA transaction to acknowledge the receipt showing both non-discrepant and discrepant quantities. Note that MRA requirements and timeframes are independent from prescribed shipment tracing and discrepancy/deficiency reporting requirements and timeframes to which the receiving facility must also adhere.

C10.2.7.1. If the document number of a receipt cannot be identified, post the receipt using a local document number. Do not submit an MRA.

C10.2.7.2. If stock number/part number cannot be identified, do not include the stock/part number in the MRA and enter Discrepancy Indicator Code A.

C10.2.7.3. For total or partial nonreceipt, enter the quantity not received and Discrepancy Indicator Code F.

C10.2.7.4. Except for shortage and partial or total nonreceipt, addressed above, enter Discrepancy Indicator Code X in the MRA if the discrepancy does not meet discrepancy reporting criteria.

C10.2.7.5. When posting a receipt using more than one transaction because the discrepancy results from the receipt of multiple stock numbers, send an MRA for each transaction posted. If needed, also send a MRA for any quantity not received.

C10.2.8. Correcting or Canceling a MRA

C10.2.8.1. Identification of Erroneous Information. Activities that acknowledge a materiel receipt in error shall not correct the MRA. However, to ensure validation of any SDR for the shipment, the reporting activity must identify the erroneous MRA information in the SDR remarks ([SF364](#), "Report of Discrepancy") or in the ASC X12 note/special instruction segment (2/NTE/2400) of the DLMS 842A/W, SDR Follow-up, Correction, Cancellation, & Reconsideration Request.

C10.2.8.2. Error Documentation. When the IMM receives an MRA that does not match a shipment record, or contains errors, the IMM shall document the error in the management evaluation report or quality control data, as applicable.

C10.2.9. Quality Controls

C10.2.9.1. Evaluation of Internal MRA Processing. To comply with the requirements of Chapter 6, IMMs and reporting activities shall include the evaluation of internal MRA processing in their quality control programs. The following work processes shall be included: accuracy of MRA initiation or inquiry, submission timeliness, and investigative research to determine and correct processing errors.

C10.2.9.2. Designation of Responsible Organization. Command IMMs shall assign to specific organizations the responsibility for directing and monitoring corrective action. The purpose of the program is to assist management in identifying those human, procedural, or system errors adversely affecting the MRA process or indicating potential deficiencies in the control over in-transit assets.

C10.2.9.3. Organizational Interface. Command IMMs must ensure effective organizational interrelationships among the functional operations/processes concerned with MRA, such as: supply, procurement, financial, inventory management, transportation, quality assurance, and storage.

C10.2.10. Management Evaluation

C10.2.10.1. The DoD Components shall:

C10.2.10.1.1. Establish a management evaluation program which monitors and evaluates MRA submission to ensure compliance with MRA requirements.

C10.2.10.1.2. Execute timely processing and perform response rate analyses to identify non-responsive activities and initiate corrective actions.

C10.2.10.2. The evaluation program shall provide for:

C10.2.10.2.1. Review of the MRA Management Information report (Report Control Symbol DD-AT&L(AR)1113 applies). DLA Transaction Services shall prepare the report and provide access by electronic means. The report content is determined by the Supply Process Review Committee. Each Supply Process Review Committee representative is responsible for analysis of the report to identify potential deficiencies in their Service or Agency MRA operations or procedures contributing to breakdowns in internal controls for intransit wholesale stock. Supply Process Review Committee representatives are responsible for initiating corrective action with delinquent and non-reporting activities.

C10.2.10.2.2. The MRA Management information report shall include as a minimum:

C10.2.10.2.2.1. General MRA Management Report Criteria. Documentation of nonresponses for a reporting period to include: the number of qualifying shipments made to an activity (by "ship to" DoDAAC); the number of MRA responses received from that activity; the number of nonresponses. The following

sections identify a common report description, how to do additional analysis of the data, and the types of breakdown to be available for MRA responses/non-responses for several different categories and whether detail by individual DoDAAC is available.

C10.2.10.2.2.2. Capability to do Additional MRA Report Analysis.

Most of the MRA reports contain a “Save” link above the report title. Clicking the “Save” link will launch the applicable MRA report content in a spreadsheet format for additional analysis

C10.2.10.2.2.3. Common Text for Report Descriptions. In general, for each report category, the count of qualified shipments requiring an MRA is matched against MRAs received/not received within the allotted timeframe and a percentage is computed. The reports shows results for Shipments Requiring MRA and MRA Not Received. Some of the reports include a column for MRA Received. Where the report is broken out by Service, click on the Service line hyper link to show the specific report category MRA Service/Agency Detail Report showing all DoDAACs making up the totals within each Service. The detail report shows results for shipments requiring an MRA and MRA received. Some of the detail reports include a column for MRA received. Selecting a DoDAAC from the detail report will show all document numbers associated with that DoDAAC total. Clicking on an individual document number will launch WEBVLIPS for further analysis of the selected document number. Differences from this standard report description are noted in the following descriptions of each specific MRA report type:

C10.2.10.2.3.1. MRA Service/Agency Summary shows shipments for DoD Components/Participating Agencies and all categories by area of the ship-to-DoDAAC and customer. Detail report is available. Summary and Detail Reports include an extra column for MRA received.

C10.2.10.2.3.2. Direct Vendor Delivery (DVD) (Non Stock) MRA Summary shows DVD (Non Stock) shipments for DoD Components/Participating Agencies and all categories by Area and Customer. Detail report is available.

C10.2.10.2.3.3. Stock Shipment Summary, MRA Not Received shows Stock Shipments by area of the ship-to-DoDAAC and DoD Components/Participating Agencies. Detail report is available.

C10.2.10.2.3.4. Direct Vendor Delivery (DVD) and Stock Shipment Summary, MRA Not Received shows DVD and Stock Shipments for all DoD Components/Participating Agencies and all categories by Ship-to DoDAAC. Detail report is available.

C10.2.10.2.3.5. Shipment Discrepancy Report by Depot shows the number of shipments by qualified depot or DVD shipper and the count and percentage of MRAs received from reporting activities with an MRA discrepancy indicator code from the qualifying depots or DVD shippers.

C10.2.10.2.4. Specific Category Reports. The MRA Management Information report provides the capability to access information by specific categories for ammunition, contractor, and Army Total Package Fielding. For these specific category reports, the detail report reflects the same layout as the summary report:

C10.2.10.2.4.1. Ammunition Percent of Delinquents Summary shows shipments for ammunition by area of the ship-to-DoDAAC and DoD Component/Agency. The report shows results for Shipments Requiring an MRA, where an MRA was received within the allotted timeframe and where an MRA was not received within the allotted timeframe. Only the percentage of qualified shipments that received an MRA is shown.

C10.2.10.2.4.2. Contractor Percent of Delinquents Summary shows contractor shipments by area of the ship-to-DoDAAC and DoD Component/Agency. Detail report is available. The report shows results for Shipments Requiring an MRA, where an MRA was received within the allotted timeframe and where an MRA was not received within the allotted timeframe. Only the percentage of qualified shipments that received an MRA is shown.

C10.2.10.2.4.3. Army Total Package Fielding (TPF), Percent of Delinquents Summary shows Army TPF shipments by area of the ship-to-DoDAAC. The report shows results for Shipments Requiring an MRA, where an MRA was received within the allotted timeframe and where an MRA was not received within the allotted timeframe. Only the percentage of qualified shipments that received an MRA is shown.

C10.2.10.2.4.4. Percent of Delinquents General Summary shows general shipments by area of the ship-to-DoDAAC and DoD Component. The report shows results for Shipments Requiring an MRA, where an MRA was received within the allotted timeframe and where an MRA was not received within the allotted timeframe. Only the percentage of qualified shipments that received an MRA is shown. The report excludes the categories for Ammunition, Contractor, and Army Total Package Fielding.

C10.2.10.3. IMM shall keep accessible records of shipments and MRA transactions to support the reporting requirements.

C10.3. INQUIRY FOR DELINQUENT MATERIEL RECEIPT ACKNOWLEDGEMENT

C10.3.1. Timeframe for MRA Inquiry. When materiel shipment is confirmed or when the requisition involves an unconfirmed MRO, the IMM shall monitor for receipt of MRA(s). For U.S. Forces' shipments to CONUS activities, IMM shall receive MRA for the total quantity shipped within 45 calendar days from the date shipped cited in the DLMS 945A, Materiel Release Advice, or DLMS 856S. For U.S. Forces shipments to overseas activities, IMM shall receive MRA within 105 calendar days from the date released to carrier, or within 135 calendar days from the DS 856S shipment status release date for security assistance requisitions. Otherwise, the IMM shall send an MRA Inquiry Transaction for the delinquent MRA to:

C10.3.1.1. The organization that the materiel was shipped to, for U.S. Forces.

C10.3.1.2. The applicable ILCO, for SA requisitions.

C10.3.1.3. Summary of MRA Inquiry Time Limits. Reporting activities shall meet the time limits identified in this chapter. These requirements and timeframes are independent from prescribed shipment tracing and discrepancy reporting requirements and timeframes to which the receiving facility must also adhere. MRA inquiry time limits are summarized below:

Table C10.T2. Materiel Receipt Acknowledgement Inquiry Time Limits for ICPs/DLA Disposition Services

ACTION	TIME LIMIT
Follow-Up for Delinquent MRA	<ul style="list-style-type: none"> ❑ 45 calendar days from the date shipped field entry in the Materiel Release Confirmation (MRC) or Pseudo Shipment Status (DLMS 856S/MILSTRIP legacy DIC ASH) for U.S. Forces shipments (CONUS destination). ❑ 105 calendar days from the date shipped field entry in the MRC or Pseudo Shipment Status (for U.S. Forces shipments (Overseas destination). ❑ 135 calendar days from the date shipped field entry in the Pseudo Shipment Status for security assistance shipments.
<ul style="list-style-type: none"> ❑ Take the action when the time limit is reached. 	

C10.3.2. Delinquent MRA Inquiry Response

C10.3.2.1. To respond to an inquiry on a delinquent MRA, the reporting activity shall prepare a MRA following paragraph C10.2.5., above. Send the MRA to the originator of the inquiry within 15 calendar days from the transaction preparation date cited in the inquiry.

C10.3.2.2. In the event that materiel has not been received because a Navy ship has not yet had the opportunity to physically pick it up (it is awaiting pick up at a Navy Local Logistics Support Center or the Material Processing Center), the Navy ship reporting activity shall respond with a MRA Inquiry Transaction containing Discrepancy Indicator Code G. This will signal the ICP to keep the record open and continue to monitor for receipt of MRA(s), and send another MRA Inquiry Transaction after another 45 calendar days have elapsed (which may be responded to with an additional MRA Response to Inquiry Transaction with Discrepancy Indicator Code G if the ship is unable to pick up their materiel from the Navy Local Logistics Support Center or the Material Processing Center). The Navy ship reporting activity may send up to six MRA

transactions in response to follow-up, using MRA Response to Inquiry Transaction with Discrepancy Indicator Code G. The Navy ship reporting activity shall send an MRA, using DLMS 527R MRA Response to Inquiry Transaction, without the Discrepancy Indicator Code G, once the materiel is received (e.g., picked-up or otherwise delivered directly to the ship), which may include the use of other discrepancy codes as appropriate. If a reply is not received within 45 calendar days from the sixth MRA Response to Inquiry Transaction with Discrepancy Indicator Code G, the ICP shall include the delinquency information in the management evaluation report (C10.2.10). Also, if the requisition involves an unconfirmed MRO (see Chapter 4, (Processing Follow-Ups)), then the ICP shall resolve the record as described in Chapter 4 for force closed materiel release confirmation).

C10.3.2.3. Except as noted in C10.3.2.2., if a reply is not received within 30 calendar days from the MRA inquiry preparation date, the IMM shall include the delinquency information in the MRA Management Information Report. Also, if the requisition involves an unconfirmed MRO, then the IMM shall resolve the record as described in the procedures in Chapter 4 for force-closed materiel release confirmations.

C11. CHAPTER 11

MATERIEL RETURNS, REDISTRIBUTION OF ASSETS, DIRECTED DISCREPANT/DEFICIENT MATERIEL RETURNS, AND RETROGRADE RETURNS

C11.1. GENERAL

C11.1.1. Purpose. This chapter provides procedures for the interchange of information between the owning organization and the integrated materiel manager (IMM) on the reporting and distribution of assets. This chapter provides procedures for inventory control point (ICP)/IMM directed lateral redistribution of retail assets identified by an inter- or intra-Component retail asset visibility system. In addition, this chapter provides special procedures for returns to DLA from selected sites in support of base realignment and closure (BRAC) retail supply, storage and distribution (SS&D)/inventory management and stock positioning (IMSP) and national inventory management strategy (NIMS). These procedures also establish the necessary controls to ensure timely processing of related transactions and provide for the automatic return of materiel under specified conditions.

C11.1.2. Reporting Policy. Policy regarding the reporting of assets, the transfer of assets, the lateral redistribution of assets, and the use of assets as an alternative to procurement (also known as the procurement offset portion of total asset visibility (TAV)), is contained in [DoD 4140.1-R](#), "DoD Supply Chain Materiel Management Regulation," May 23, 2003.

C11.1.3. Customer Asset Reports. Customer Asset Reports (DLMS 180M, Materiel Returns Reporting (Customer Asset Report)) and follow-on documentation sent by Defense data network (DDN) shall always be routed through the Defense Automatic Addressing System.

C11.1.4. Materiel Return Credit. Credit for materiel returns is granted on the basis of receipt and classification by the consignee. Policy for granting credit is covered under DoD 4140.1-R¹. Procedures for the timeframes and transactions for providing credit for materiel returns, lateral redistributions, and materiel provided for the procurement offset portion of TAV are contained in the MILSBILLS procedures identified in DLM 4000.25, Volume 4, Finance. MILSBILLS covers credit procedures for packing, crating, and handling (PC&H) and transaction formats for DLMS 812R, Adjustment Request (Follow-up for Materiel Returns Program (MRP) Credit), and DLMS 812L, Adjustment Request Reply (Reply to Follow-up for Materiel Returns Program (MRP) Credit).

¹ DLA is required to request approval of new procedures supporting BRAC/NIMS allowing full materiel credit for returns regardless of asset position with no credit for packing, crating, handling and transportation (PCH&T).

C11.1.5. Responsibility for Costs Incurred for Returned Materiel. U.S. Government activities returning materiel are cautioned that the returning activity may be held responsible for costs incurred by the receiving activity when discrepancies are reported and validated in accordance with [Chapter 17](#). This includes returns made in violation of prescribed materiel returns procedures, returns showing packaging discrepancies, and returns of reparable items unaccompanied by required technical data. Recoupment action by the ICP against the initiator may include all cost reimbursable actions performed by the receiving activity such as repackaging, marking, and disposal.

C11.2. APPLICABILITY AND SCOPE. The provisions of this chapter are applicable as follows:

C11.2.1. To all activities offering or returning materiel to the DoD Component ICP/ IMM, or the General Services Administration (GSA).

C11.2.2. To activities receiving and processing lateral redistribution orders of retail assets.

C11.2.3. To the processing of Grant Aid. Policy regarding utilization and redistribution of Grant Aid materiel is contained in [DoD 5105.38-M](#), "Security Assistance Management Manual," Chapter 11, Section II.

C11.2.4. To the processing of non-consumable items.

C11.2.5. To Base Realignment and Closure; Supply, Storage and Distribution; Inventory Management and Stock Positioning; and National Inventory Management Strategy

C11.2.5.1. Background. Under NIMS, DLA's consumable item supply chain management extends from the wholesale level to the point of consumption, replacing the Service-managed retail inventory level. Subsequent to the 2005 BRAC decision, retail SS&D functions and associated infrastructure supporting Military Service selected industrial sites transfers to DLA. As a result, selected industrial and NIMS sites can no longer maintain retail stock balances; once the customer has determined it has no use for the materiel, it is returned to DLA.

C11.2.5.2. A variation of the MRP is used for processing materiel returns to DLA from selected sites in support of the BRAC SS&D/IMSP and NIMS. Standard MRP transactions (e.g., DLMS 180M, Material Returns Reporting ([MILSTRIP](#) Customer Asset Reports (Document Identifier Code (DIC) FTE)), DLMS 870M, Material Returns Supply Status (MILSTRIP Reply to Customer Asset Report (DIC FTR) and ICP/IMM Materiel Receipt Status (DIC FTZ)), do not apply; only those logistics transactions specified in the detailed procedures under Paragraph C11.18. are used. Under the NIMS/BRAC returns program, DLA accepts returned DLA-managed materiel back into DLA ownership regardless of the current stock asset position. Based upon specified business rules, DLA provides zero, partial, or full credit for the materiel to the customer. No credit for packaging, crating, handling, or transportation is provided.

C11.2.5.3. Unlike MRP, under the BRAC SS&D/NIMS return procedures it is the returning DoD Component's responsibility to provide a Prepositioned Materiel Receipt (PMR) transaction to the applicable storage activity if that activity is a collocated DLA storage activity using the Distribution Standard System (DSS). The only transaction exchange with DLA prior to financial processing is the DLMS receipt transaction (DLMS 527R, Receipt, Inquiry, Response and Materiel Receipt Acknowledgement (MILSTRIP Materiel Receipt – Other Than Procurement Instrument Source (DIC D6B)), which is reported by the storage activity to the DLA ICP.

C11.3. EXCLUSIONS. The following categories are excluded from these procedures:

C11.3.1. Customer asset reports identified by part numbers exceeding a field length of 15 in the stock or part number field are excluded from DAAS processing of DLMS 180M for customer asset report transactions. Other customer asset reports for items not identified by a national stock number (NSN) (e.g., locally assigned stock numbers) are excluded from these procedures on an inter-DoD Component basis.

C11.3.2. Perishable subsistence items, with the exception of perishable subsistence returns (other than fresh fruit and vegetables (FF&V)) from Navy mobile logistics support fleet ships in the Pacific area.

C11.3.3. Industrial plant equipment (IPE) identified only by a plant equipment code/manufacture's part number. These items shall be reported to DLA Aviation on [DD Form 1342](#), "DoD Property Record."

C11.3.4. Class V (W) ground (surface) ammunition.

C11.3.5. Lumber products (with the exception of lumber product items stocked by GSA).

C11.3.6. Items under Defense Threat Reduction Agency (DTRA) management; such as Federal Supply Group 11 and all Department of Energy (DoE) special design and quality controlled items (identified by contractor and Government entity (CAGE) 87991 in the Federal Logistics Information System (FLIS) master item file) and all DoD items designed specifically for use on or with special weapons (identified by CAGE 57991, 67991, or 77991 in the FLIS master item file). (These items shall be processed under DoE-DNA TP 100-1, et al.)

C11.3.7. Automatic data processing equipment under [DoD 4160.21-M](#), "Defense Materiel Disposition Manual."

C11.4. REPORTING CRITERIA FOR CUSTOMER ASSET REPORTS

C11.4.1. Determination of Reporting Requirements. Reporting of assets shall be determined by the existing retention and reporting policy under DoD 4140.1-R. This includes the reporting policy for the procurement offset portion of TAV as described in DoD 4140.1-R. In response to the Asset Status/Transaction Reporting Request (DLMS 846I, Asset Status Inquiry/Report), submit Customer Asset Reports (DLMS 180M,

Materiel Returns Reporting (Report of Available Assets to ICP/IMM)/Customer Asset Report)) using appropriate project codes identified in Paragraph C11.5.4.

C11.4.2. Reporting Activity Actions. The reporting activity shall forward customer asset reports to the ICP/IMM. Direct all GSA customer asset reports to routing identifier code (RIC) GG0. Forward all part-numbered Customer Asset Reports (DLMS 180M) directly to DAAS for possible conversion to an NSN using information in the FLIS files. Customer Asset Reports (DLMS 180M) transmitted by electronic means shall always be routed through DAAS.

C11.5. PREPARATION OF CUSTOMER ASSET REPORTS

C11.5.1. Customer Asset Reports. Use DLMS 180M to offer or report materiel that is no longer needed.

C11.5.2. Reports of Serviceable Items. Reports of serviceable non-consumable item materiel support code (NIMSC) 5 items from secondary inventory control activity (SICA) reporting activities to the appropriate DoD Component SICA shall be submitted under the DoD Component implementing instructions. Quantities that are not required by the SICA shall be forwarded to the primary inventory control activity (PICA) using DLMS 180M. If appropriate, the SICA shall provide DS 870M, Materiel Returns Supply Status (ICP/IMM Status to Customer) delay status to the materiel holder for the quantity referred to the PICA under section C11.11.5. The expected reply date of the DLMS 870M, if used, shall be 35 calendar days after the date the report was forwarded to the PICA. The PICA shall provide disposition instructions to the SICA. The SICA, in turn, shall provide disposition instructions to the reporting activity under the DoD Component implementing instructions.

C11.5.3. NIMSC 5 Stocks Exceeding Retention Limit. When the SICA has NIMSC 5 serviceable stocks that exceed the retention limit, the SICA shall prepare DLMS 180M, Materiel Returns Reporting, to report available assets to ICP/IMM using the guidelines above, but with the SICA's own document number.

C11.5.4. Use of Project Codes. The DoD Components shall use one of the following project codes for the procurement offset portion of TAV of their Customer Asset Report (DLMS 180M):

C11.5.4.1. RBB for consumables,

C11.5.4.2. 3AG for reparable, or

C11.5.4.3. 3AU for DLA Disposition Service Field Office assets.

C11.6. CANCELLATION OF CUSTOMER ASSET REPORTS

C11.6.1. Use of DLMS 180M. Use DLMS 180M to prepare cancellation of asset reports, in total or partial quantities, and submit to the ICP/IMM under the following conditions:

C11.6.1.1. When a determination is made that materiel is not available in the quantity reported on the asset report.

C11.6.1.2. Upon determination that materiel directed for return shall not be returned.

C11.6.2. Timely and Accurate Cancellations. The need for timely and accurate cancellation actions under the above conditions is emphasized to avoid unnecessary follow-up actions and to ensure that ICP/IMM records or expected returns reflect proper quantities.

C11.7. PROCESSING REPLIES TO CUSTOMER ASSET REPORTS

C11.7.1. Reporting Activity Processing. DLMS 870M is used by the ICP/IMM to respond to all customer asset reports and can be used (intra-Army only) to notify customers of the amount of credit granted and/or reversed for materiel received. The reporting activity shall process the DLMS 870M, reply using the appropriate status code and take the following actions:

C11.7.1.1. Use Paragraph C11.6. to submit a cancellation, DLMS 180M, when it is determined that the materiel directed for return shall not be returned.

C11.7.1.2. Use DLMS to 856R, Shipment Status Materiel Returns, to prepare a shipment status and promptly submit to the IMM/ICP after materiel directed for return is released to the carrier. Prepare a separate DLMS 856R for each shipment. Exercise care to ensure that appropriate data content, including suffix of the individual DLMS 870M document, is perpetuated in the DLMS 856R.

C11.7.2. Response to Transaction Receipt. When DLMS 870M is transmitted to the SICA, the SICA shall forward disposition instructions to the materiel holder under the DoD Component implementing instructions. The materiel holder shall provide advice to the SICA regarding shipment or cancellation as appropriate, under the DoD Component implementing instructions, and the SICA shall provide DLMS 856R, or DLMS 180M cancellation, to the PICA. If the SICA receives DLMS 870M ICP/IMM Follow-Up from the PICA and has no record of shipment, the SICA shall follow up to the materiel holder and submit an interim DLMS 870M supply status to the PICA containing a future estimated shipping date (ESD) to preserve PICA's due-in record pending a firm reply to the DLMS 870M follow-up.

C11.7.3. Replies to DLMS 180M Customer Asset Reports. DLMS 870M replies to Customer Asset Reports (DLMS 180M) containing Project Code RBB, 3AG, or 3AU denoting the procurement offset portion of TAV and Status Code TC require reevaluation prior to disposal since these assets may not be above an activity's retention limit. Assets required and offered using either Project Code RBB or 3AG shall always be directed for return with credit; however, assets required and offered using Project Code 3AU shall only be directed for return without credit.

C11.8. FOLLOW-UPS ON REPORTED ASSETS

C11.8.1. Reporting Activity Follow-Ups. Reporting activity follow-ups consist of three types:

C11.8.1.1. Follow-Up for ICP/IMM Reply to Asset Report (DLMS 180M). This type of follow-up shall be used to obtain intelligence regarding status of the original asset report (DLMS 180M (Report of Available Assets to ICP/IMM)). DLMS 180M follow-up to ICP/IMM shall be submitted no earlier than 30 calendar days from date of submission of DLMS 180M (Report of Available Assets to ICP/IMM), and shall contain the same data as shown in the DLMS 180M (Report of Available Assets to ICP/IMM). If DLMS 870M (Disposition Instructions Delay Status) has been received, DLMS 180M Follow-Up shall be submitted at the expiration of the expected reply date and DLMS 870M (From ICP/IMM) has not been received.

C11.8.1.2. Follow-up for ICP/IMM Materiel Receipt Status (DLMS 180M). This type follow-up shall be used when materiel to be returned has been shipped as directed by a reply to asset report (From ICP/IMM)(DLMS 870M) but an ICP/IMM Materiel Receipt Status (DLMS 870M) has not been received. DLMS 180M, follow-up for ICP/IMM Materiel Receipt Status, shall be submitted no earlier than 70 calendar days for continental U.S. (CONUS) or 130 calendar days for outside-the-continental U.S. (OCONUS) after shipment. The data for the DLMS 180M, follow-up shall be the same as shown in the DLMS 856R (Customer Status to ICP/IMM).

C11.8.1.3. Follow-Up for Credit (DLMS 812R, Adjustment Request) Follow-Up for Materiel Returns Program Credit. This type of follow-up shall be used when materiel to be returned has been shipped and credit allowance was indicated by ICP/IMM Materiel Receipt Status (DLMS 870M) but no credit billing has been received. This follow-up shall be prepared in accordance with MILSBILLS procedures.

C11.8.2. Follow-Ups to ICP/IMM. Follow-ups shall be submitted to the ICP/IMM to whom the original asset report (DLMS 180M) was submitted, except when information has been received in DLMS 870M (DAAS Customer Asset Report Information Status) status document that DAAS has rerouted the asset report to the correct ICP/IMM. In this case, the follow-up shall be submitted to the activity identified in the DS 870M DAAS Customer Asset Report Information status document received from DAAS.

C11.8.3. ICP/IMM Follow-Ups on Directed Returns (DLMS 870M). Upon receipt of DLMS 870M, ICP/IMM Follow-Up, from the ICP/IMM, the reporting activity shall review records to determine whether a DLMS 870M, Reply to Customer Excess Report, had been received. If there is no record of having received DLMS 870M reply to the customer excess report, the 870M ICP/IMM Follow-Up transaction shall be converted to DLMS 870M, Reply to Customer Excess Report, and processed. If shipment has not occurred, DLMS 870M, Materiel Returns Program Supply Status, citing the ESD shall be submitted. If records indicate that shipment has occurred, the transportation activity shall be queried to ensure that the materiel has been shipped. If the materiel has been shipped, a new DLMS 856R, shall be created. If materiel has not been shipped,

determine when the shipment will be made and follow the above procedures. When less than the total quantity contained in the original DLMS 870M is to be shipped, the reporting activity shall respond to the DLMS 870M, ICP/IMM Follow-Up, with DLMS 870M, Materiel Returns Supply Status, for the quantity to be shipped and DLMS 180M for the quantity that will not be shipped. If any of the shipment has already occurred, the reporting activity shall respond to DLMS 870M (ICP/IMM Follow-up), with DLMS 856R for the quantity that has been shipped and with DLMS 870M supply status and/or DLMS 180M cancellation for the remaining portions of the originally reported quantity, as appropriate.

C11.9. AUTOMATIC RETURNS

C11.9.1. Items Designated by a Supply Source for Automatic Return. DLMS 180M Automatic Return Notification is used for items by a source of supply for automatic return. Supply sources shall notify reporting activities of the location to which items so designated are to be shipped.

C11.9.2. Nonconsumable Item Materiel Support Code (Items Designated for Automatic Return). All NIMSC 5 unserviceable (SCC E or F) items are designated for automatic return on an inter-DoD Component basis. PICAs shall notify SICAs of the NSN and the storage organization to which such items are to be shipped. PICAs shall also notify the receiving storage activity of the NSN of such items to be returned. The SICAs shall perpetuate this information to the SICA activities using the intra-DoD Component procedures. If there is no DoD Component SICA for the items identified for automatic return by a PICA (e.g., Coast Guard), the PICA shall provide the information to the appropriate DoD Component designated activity.

C11.9.3. Automatic Return of Unserviceable Items. When an unserviceable NIMSC 5 item is automatically returned or a replacement item will be requisitioned, DLMS 180M and later documentation shall include Project Code 3AL. If a replacement for the unserviceable NIMSC 5 automatic return item will not be requisitioned (e.g., the returned item exceeds the returning activity's authorization or requirement), DLMS 180M Automatic Return Notification and related documentation shall not contain Project Code 3AL. The DLMS 180M to the PICA shall contain the data elements specified for DLMS 180M (Report of Available Assets to ICP/IMM). After generation of the DLMS 180M Automatic Return Notification, processing shall occur as though there has been a DLMS 180M (Report of Available Assets to ICP/IMM) report and a DLMS 870M (From ICP/IMM), reply, along with other provisions of this chapter, excluding DLMS 180M (For Reply to Asset Report) and DLMS 870M (ICP/IMM Status to Customer).

C11.9.4. Restrictions. No other inter-DoD Component use of DLMS 180M Automatic Return Notification is currently authorized.

C11.9.5. Internal DoD Component Use. The DoD Components may use DLMS 180M Automatic Return Notification internally for intra-DoD Component programs that do not conflict with other provisions of this manual.

C11.9.6. Source of Supply Processing of Automatic Return Notification. Upon receipt of DLMS 180M Automatic Return Notification, the SICA shall establish a due-in and generate a PMR transaction to the receiving activity for the quantity in the DLMS 180M Automatic Return Notification transaction. The due-in and the PMR transaction shall be created under Chapter 12 procedures. Note: For unserviceable NIMSC 5 items, the SICA shall send a DLMS 180M Automatic Return Notification, with data elements specified in C11.9.3, to the PICA. The PICA shall establish the due-in and send the PMR transaction to the receiving depot.

C11.10. DEFENSE AUTOMATIC ADDRESSING SYSTEM. DAAS shall do the following:

C11.10.1. Route Using the RIC To. DLMS 870M, Materiel Returns Supply Status; DLMS 856R, Materiel Returns Shipment Status; DLMS 812R, Adjustment Request (Follow-Up for Materiel Returns Program Credit); DLMS 180M, (Follow-Up for ICP/IMM Materiel Receipt Status); and DLMS 180M, Automatic Return Notification, shall be passed to the activity represented by the RIC To.

C11.10.2. Route Using the M&S Code. DLMS 812L, Reply to Follow-Up for Credit Status; DLMS 870M, ICP/IMM Status Advising of Delay; DLMS 870M DAAS Customer Asset Report Status; DLMS 870M ICP/IMM Reply to Customer Asset Report; DLMS 870M, ICP/IMM Advice of Receipt or Non-Receipt of Materiel; and DLMS 870M, ICP/IMM Follow-Up, shall be passed using the M&S code.

C11.10.3. Route Using the RIC To when M&S Code is 9. DLMS 180M, Cancellation; DLMS 180M, Customer Asset Report; and DLMS 180M, Customer Follow-Up to ICP/IMM, shall be passed to the RIC To if the M&S code is 9.

C11.10.4. Perform NSN/NIIN Validation when M&S Code is not 9. For DLMS 180M, Cancellation; DLMS 180M, Customer Asset Report; and DLMS 180M, Customer Follow-Up to ICP/IMM, DAAS shall perform NSN/national item identification number (NIIN) validation and source of supply edit as follows:

C11.10.4.1. Correct NSN and Managed by ICP/IMM. If the NSN is correct and managed by the ICP/IMM identified by the RIC To, Advice Code 3T shall be entered in the advice segment and the document shall be transmitted to that ICP/IMM.

C11.10.4.2. Correct NSN but Not Managed by ICP/IMM. If the NSN is correct, but is not managed by the ICP/IMM identified in the RIC To, the correct ICP/IMM RIC shall be entered, along with Advice Code 3T, and the transaction transmitted to the correct ICP/IMM. DAAS shall send the reporting activity a DLMS 870M, Materiel Returns Supply Status with Status Code TZ.

C11.10.4.3. Incorrect Federal Supply Classification. If the Federal supply classification (FSC)/NIIN/NSN validation indicates that the FSC is incorrect, the FSC shall be changed and the RIC of the ICP/IMM shall be changed where applicable. Advice Code 3T shall be entered and the transaction transmitted to the managing

ICP/IMM. DAAS shall send the reporting activity a DLMS 870M, Materiel Returns Supply Status, with Status Code TZ.

C11.10.4.4. Routing Cannot be Accomplished. If routing to an ICP/IMM cannot be done by DAAS, the document shall be passed to the activity identified by the RIC To.

C11.10.5. Validation by Signal Code. DAAS shall validate DLMS180M, Materiel Returns Reporting (Automatic Return Notification From Customer to Supply Source), (Customer Asset Report (Report of Available Assets to ICP/IMM)), and (Customer Follow-Up to ICP/IMM (For Reply to Asset Report)), transactions for valid ship-from and credit-to addresses as designated by the signal code. If DAAS cannot identify the ship-from or credit-to address, the transactions shall be rejected to the originating activity using DLMS 870M, Materiel Return Supply Status, with Status Code SK.

C11.10.6. Editing Part-Numbered Asset Reports. DLA shall not accept DLMS180M, Materiel Returns Reporting, part-numbered asset reports. DAAS shall reject all such reports with Status Code T9. DAAS shall pass all part-numbered asset reports to the RIC present in the incoming transaction. The DoD Components may reject (Status Code T9) part-numbered assets not acceptable or recognized under internal procedures. Non-mechanical part-numbered transactions shall not be processed by DAAS, but shall be rejected for processing under intra-DoD Component procedures.

C11.10.7. Edit Rejects Containing Status Code SC. DAAS shall edit DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), rejects containing Status Code SC or SD for correct ICP/IMM and FSC as follows:

C11.10.7.1. Correct NSN and ICP/IMM. If the NSN is correct and belongs to the rejecting ICP/IMM, the DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), shall be converted to DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), with Advice Code 3T and sent to the ICP/IMM.

C11.10.7.2. Correct NSN But Wrong ICP/IMM. If the NSN is correct but not managed by the ICP/IMM, the DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), shall be converted to DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), with Advice Code 3T and sent to the correct ICP/IMM. DAAS shall send the reporting activity a DLMS 870M, DAAS Customer Excess Report Information Status, with Status Code TZ.

C11.10.7.3. Incorrect Federal Supply Classification. If the FSC is incorrect, DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), shall be converted to DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), with the correct FSC, with Advice Code 3T, and the document returned to the rejecting ICP/IMM or transmitted to the correct ICP/IMM. DAAS shall send the reporting activity a DLMS 870M, DAAS Customer Excess Report Information Status, with Status Code TZ.

C11.10.7.4. Inactivated DLA/GSA/Navy Item in DAAS. If a DLA/GSA/Navy IMM has coded the item inactivated in DAAS records and a DLA, GSA, or Navy activity originated the reject document, DAAS shall change the status code to TC and forward the DLMS 870M, Materiel Returns Supply Status from ICP/IMM to the reporting activity.

C11.10.8. Edit Rejects from the GSA. DAAS shall edit DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), rejects from GSA with Status Code SC as follows:

C11.10.8.1. Correct NSN Managed by GSA. If the NSN is correct and it is managed by GSA, DAAS shall change the status code to TC and forward the DLMS 870M, Materiel Returns Supply Status from ICP/IMM to the reporting activity.

C11.10.8.2. Correct NSN, Not Managed by GSA. If the NSN is correct but not managed by GSA, DAAS shall convert the DLMS 870M, Materiel Returns Supply Status from ICP/IMM to DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), enter Advice Code 3T and transmit to the appropriate ICP/IMM. In addition, DAAS shall send the reporting activity DLMS 870M with Status Code TZ.

C11.10.8.3. Valid NIIN/Incorrect FSC. If the NIIN is valid and the FSC is incorrect, DAAS shall convert the DLMS 870M, Materiel Returns Supply Status (from ICP/IMM), to DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), with the correct FSC; enter Advice Code 3T and transmit the DLMS 180M back to GSA or to the managing ICP/IMM. DAAS shall send the reporting activity DLMS 870M, DAAS Customer Excess Report Information Status, with Status Code TZ.

C11.10.8.4. NSN Cannot be Identified. If the NSN cannot be identified, DAAS shall change the Status Code to SD and transmit DLMS 870M, Reply to Customer Asset Report (From ICP/IMM), to the reporting activity.

C11.10.9. Automatically Route Transactions to GSA. DAAS shall automatically route all DLMS 180M, Customer Asset Report (Report of Available Assets to ICP/IMM) for GSA managed items to RIC GG0.

C11.11. INVENTORY CONTROL POINT/INTEGRATED MATERIEL MANAGER PROCESSING OF CUSTOMER ASSET REPORTS

C11.11.1. Disposition Determination. ICP/IMM shall process asset reports to determine disposition. Asset reports containing project codes assigned for specific returns program purposes (such as rollbacks and automatic returns) shall be processed under the assigned controls. Assets required and offered using either Project Code RBB or 3AG shall always be directed for return with credit; however, assets required and offered using Project Code 3AU shall only be directed for return without credit.

C11.11.1.1. Response Timeframe. DLMS 870M, Materiel Returns Supply Status (From ICP/IMM) shall be prepared to respond to asset reports no later than 30 calendar days from date of receipt of the DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM) transaction.

C11.11.1.2. Response After 30 Calendar Days. If a DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), cannot be provided within 30 calendar days, send DLMS 870M, Delay Status, with Status Code TR and enter an expected reply date when final disposition instructions are expected to be provided.

C11.11.1.3. Suffix Codes. Suffixes shall be used to identify partial actions.

C11.11.2. Materiel Required. If it is determined that the materiel is required, forward DLMS 870M, Materiel Returns Supply Status (From ICP/IMM) citing Status Code TA, TB, TH, or TJ to the reporting activity. The ICP/IMM shall establish a due-in for the quantity of materiel to be returned and generate DLMS 527D, PMR, transaction to the receiving depot.

C11.11.2.1. Shipment Time Allowed. Time allowed for shipment and return of materiel is 120 (CONUS) and 180 (OCONUS) days, and the counting starts with the day of posting of DLMS 856R, or the estimated shipping date cited in DLMS 870M. The due-in estimated delivery date (EDD) shall be updated upon receipt of a DLMS 856R or DLMS 870M Status to equal the time allowed for shipment and return of materiel.

C11.11.2.2. Materiel Not Received Within 120 or 180 Calendar Days. If the materiel is not received by the due-in EDD, or 30 days have elapsed since the transmission of DLMS 870M, ICP/IMM Follow-Up, without receiving a response, the ICP/IMM shall take action to cancel the due-in and delete DLMS 527D transaction. DLMS 527D shall also be canceled when DLMS 180M, Materiel Returns Reporting, is received from the customer activity. The EDD required for the due-in shall be 120 calendar days (CONUS) and 180 calendar days (OCONUS) from the processing date of DLMS 870M Materiel Returns Supply Status (From ICP/IMM). The due-in estimated delivery date shall be updated upon receipt of DLMS 870M, Materiel Returns Supply Status, or DLMS 856R, Shipment Status Materiel Returns (Customer Status to ICP/IMM).

C11.11.2.3. Cancellation of Due-In Not Precluding Other Requirements. Action taken to cancel the due-in and delete DLMS 527D, Due-in Advance Receipt, transaction does not preclude requirements prescribed in other DoD manuals and joint regulations to initiate tracer action and file discrepancy reports such as a Transportation Discrepancy Report (TDR) or Supply Discrepancy Report (SDR) on shipments not received, but for which shipment status has been received.

C11.11.3. Entering Priority Designators in DLMS. Enter priority designators (PD) in DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), documents as follows:

C11.11.3.1. PD 03. PD 03 shall be used in the return of critical items and approved intensive management items (including serviceable local stocks).

C11.11.3.2. PD 06. PD 06 shall be used in the return of materiel identified by the materiel manager as qualified for automatic return to the DoD distribution system.

C11.11.3.3. PD 13. PD 13 shall be used in the routine return of materiel not covered above (except surplus and scrap) such as the return of local stocks to sources of supply.

C11.11.4. Non-processable Customer Asset Reports. DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), received by the ICP/IMM that cannot be processed shall be rejected to the reporting activity using DLMS 870M, Materiel Return Supply Status (From ICP/IMM), status with the appropriate S_ series reject status code.

C11.11.5. Customer Asset Reports for Items Requiring Screening/Review. DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), received for items requiring extended screening/review shall be suspended. The reporting activity shall be sent a DLMS 870M, Materiel Returns Supply Status (ICP/IMM Status to Customer), with Status Code TR containing an estimated date of reply in the ESD field.

C11.11.6. FSC Change Required. If the determination has been made that an FSC change is required on a customer asset report (DLMS 180M, Materiel Returns Reporting), the correct FSC shall be entered, the RIC To of the ICP/IMM shall be changed, where applicable, and the DLMS 180M, Customer Asset Report, shall be forwarded to the responsible ICP/IMM for processing. The reporting activity shall be sent a DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), containing Status Code T7. The RIC of the forwarding ICP/IMM shall be entered in the RIC field of the ICP/IMM representing the last known holder and shall be entered as the RIC of the activity preparing the document.

C11.12. INVENTORY CONTROL POINT/INTEGRATED MATERIEL MANAGER MATERIEL RECEIPT STATUS

C11.12.1. Notification of Receipt/Nonreceipt. The ICP/IMM shall prepare DLMS 870M, Materiel Returns Supply Status, to provide reporting activities with notification of materiel receipt or non-receipt on returns. DLMS 870M Materiel Returns Supply Status shall be provided upon processing of the receipt for other than suspended condition materiel, or upon processing of inventory adjustment action moving assets from suspended condition to correct condition, or not less than 30 calendar days after DLMS 870M, Materiel Returns Supply Status (ICP/IMM Follow-Up), when no receipt or DLMS 856R, Shipment Status Materiel Returns, has been processed. Multiple DLMS 870M, Materiel Returns Supply Status, documents shall be provided when a single shipment is received in more than one materiel condition. Use status codes in the DLMS 870M as follows:

C11.12.1.1. Status Code TN. Enter Status Code TN when credit is granted for the condition and quantity of materiel received.

C11.12.1.2. Status Code TM. Enter Status Code TM when reduced or no credit is allowed because the condition of materiel received is less than that authorized for return.

C11.12.1.3. Status Code TL. Enter Status Code TL when the materiel received is other than authorized for return and no credit is allowed.

C11.12.1.4. Status Code TP. Enter Status Code TP when the materiel is not received within prescribed timeframes, follow-up action has been unsuccessful, and the credit authorization is canceled.

C11.12.1.5. Status Code TQ. Enter Status Code TQ when the materiel has been received for an authorized non-creditable return.

C11.12.2. Multiple DLMS 870Ms Required. DLMS 870M, Materiel Returns Supply Status, shall always show the document number, including suffix code, contained in the DLMS 180M, Materiel Returns Reporting, or DLMS 870M, Materiel Returns Supply Status (From ICP/IMM). When multiple DLMS 870M, Materiel Returns Supply Status, transactions are required for materiel received in different conditions, each DLMS 870M produced shall retain the document number and suffix of the DLMS 180M, Materiel Returns Reporting/DLMS 870M, Materiel Returns Supply Status (From ICP/IMM).

C11.13. PROCESSING OF SHIPMENT STATUS

C11.13.1. Preparation of Documentation. Shipment status provides information and normally requires no subsequent documentation. ICPs/IMMs shall receive shipment status transactions and update appropriate ICP/IMM records. The shipment date indicated in DLMS 856R, Shipment Status Materiel Returns, is available to ICPs/IMMs to verify in-transit status and provide information on expected receipts. DLMS 856R received for items not under control of the ICP/IMM shall be rejected to the reporting activity using DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), with reject Status Code SC. DLMS 856Rs that do not pass data field validity checks shall be rejected to the reporting activity using DLMS 870M, with the appropriated S_ series status code.

C11.13.2. Shipment Advice. In the event that the ICP/IMM requires an advice of shipment to support related supply decisions and a DLMS 856R, Shipment Status Materiel Returns, has not been received, an ICP/IMM follow-up (DLMS 870M, Materiel Returns Supply Status) shall be prepared and forwarded to the reporting activity. DLMS 870M shall not be generated until at least five calendar days have elapsed from the transmission of DLMS 870M (from ICP/IMM) for PD 03 or 50 calendar days for PD 13 and no DLMS 856R, Shipment Status Materiel Returns, or receipt has been posted. DLMS 870M with Status Code T3 may be generated upon expiration of the due-in timeframe when DLMS 856R has been received, but receipt has not been posted. The ICP/IMM is authorized to follow up without regard to the established timeframe when the need arises to satisfy PD 01-08 requirements.

C11.14. PROCESSING FOLLOW-UPS FROM REPORTING ACTIVITIES

C11.14.1. Types. Follow-ups submitted by reporting activities consist of three types:

C11.14.1.1. Follow-up for ICP/IMM Reply to Customer Asset Report (DLMS 180M, Materiel Returns Reporting (For Reply to Asset Report)).

C11.14.1.2. Follow-up for ICP/IMM Materiel Receipt Status (DLMS 180M, Materiel Returns Reporting (Follow-Up for ICP/IMM Materiel Receipt Status)).

C11.14.1.3. Follow-up for credit (DLMS 812R, Adjustment Request (Follow-Up for Materiel Returns Program Credit)).

C11.14.2. Determining Whether Original DLMS 180M was Received. On receipt of DLMS 180M, Materiel Returns Reporting (For Reply to Asset Report), the ICP/IMM shall determine whether there is a record indicating that the original DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), was received.

C11.14.2.1. Record Established. If a record is established and DLMS 870M, Materiel Returns Supply Status (ICP/IMM Status to Customer), indicating delayed response was sent to the customer, a duplicate DLMS 870M shall be provided. If a record is established and a DLMS 870M was not provided, one of the following actions shall be initiated:

C11.14.2.1.1. In Process. If DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), transaction is in process, DLMS 870M, Materiel Returns Supply Status (ICP/IMM's Status to Customer), shall be sent to the customer with Status Code TR indicating the DLMS 180M is in process and DLMS 870M shall be provided at a later date.

C11.14.2.1.2. Rejection. If DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), was rejected by the ICP/IMM as invalid, DLMS 180M shall produce DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), to the reporting activity with the same status code used in the original DLMS 870M.

C11.14.2.2. No Record of Receipt. If no record of receipt exists for DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), the ICP shall process the DLMS 180M as a new DLMS 180M and provide DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), as appropriate, to the reporting activity.

C11.14.3. Receipt of DS 180M, Follow-Up for ICP/IMM Materiel Receipt Status. On receipt of a DLMS 180M, Materiel Returns Reporting, ICP/IMM shall review records and take action as follows:

C11.14.3.1. Received Materiel. If the records indicate that the materiel has been received and classified, transmit a DLMS 870M, Materiel Returns Supply Status, to the customer.

C11.14.3.2. Received Materiel Not Classified. If records indicate that the materiel has been received but not classified, the ICP/IMM shall provide DLMS 870M, Materiel Returns Supply Status (From ICP/IMM) with Status Code TT to the customer.

C11.14.3.3. Materiel Not Located. If records indicate that the materiel has not been received, and if the materiel is not located after investigation, the reporting activity shall be sent DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), with Status Code TU.

C11.14.4. Receipt of DLMS 812R. On receipt of DLMS 812R, Adjustment Request (Follow-Up for Materiel Returns Program Credit), ICP/IMM shall take action under MILSBILLS procedures.

C11.14.5. Items Not Under Cognizance of the ICP/IMM. DLMS 180M, Materiel Returns Reporting (For Reply to Asset Report), received for items not under awareness of the ICP/IMM shall be rejected to the reporting activity using DLMS 870M, Materiel Returns Supply Status (From ICP/IMM), with Status Code SC. DLMS 180M, Follow-up for ICP/IMM Reply to Customer Asset Report, that does not pass data field validity edits shall be rejected to the reporting activity using DLMS 870M Status with the appropriate reject status code.

C11.15. CANCELLATION OF CUSTOMER ASSET REPORTS

C11.15.1. Reducing Quantity in All Applicable Cancellation Requests. Upon receipt of a customer cancellation (DLMS 180M, Materiel Returns Reporting), ICP/IMM shall cancel or reduce the quantity in all applicable documents affected by DLMS 180M, including the decision to return, due-in record, PMR, and credit suspense, if applicable.

C11.15.2. Materiel Not Received by Due-In Estimate. The ICP/IMM shall initiate cancellation (DLMS 870M, Materiel Returns Supply Status) action when materiel is not received by the due-in EDD or when materiel is not received and no response has been received within 30 calendar days after its DLMS 870M, ICP/IMM Follow-Up. ICP/IMM shall also initiate cancellation when DLMS 856R, Shipment Status Materiel Returns, is not received within 120 calendar days (CONUS) or 180 calendar days (OCONUS) after receipt of DLMS 870M, Materiel Returns Supply Status.

C11.15.3. Cancellations Initiated by ICP/IMM. Cancellations started by the ICP/IMM or in response to DLMS 180M, Materiel Returns Reporting, shall be done as follows:

C11.15.3.1. Creditable Returns. For creditable returns, notification of cancellation to the reporting activity shall be made using DLMS 870M, Materiel Returns Supply Status, with Status Code TP.

C11.15.3.2. Non-creditable Returns. For non-creditable returns, notification of cancellation to the reporting activity shall be made using DLMS 870M, Materiel Returns Supply Status, with Status Code TV.

C11.15.4. Receipt of Shipment Status. When DLMS 856R has been received, but material has not been received within the timeframe allotted under C11.11.2.1., action to cancel the due-in and PMR shall be accomplished under Chapter 12 procedures.

C11.16. INVENTORY CONTROL POINT/INTEGRATED MATERIEL MANAGER
PROCESSING OF DLMS 180M CUSTOMER ASSET REPORTS, CANCELLATIONS,
AND FOLLOW-UPS WHEN THE SUPPLY SOURCE HAS CHANGED

C11.16.1. Advice Code 3T. Upon receipt of DLMS 180M, Materiel Returns Reporting, Cancellation of Customer Asset Report, or Customer Follow-Up to ICP/IMM (For Reply to Asset Report), transaction from DAAS with Advice Code 3T when the SOS has been changed, the losing ICP/IMM shall arrange to change the FLIS and DAAS SOS files.

C11.16.2. Losing Supply Source. The losing ICP/IMM shall prepare and transmit through DAAS DLMS 180M, Materiel Returns Reporting (Report of Available Assets to ICP/IMM), Cancellation of Customer Asset Report, and/or Customer Follow-Up to ICP/IMM (For Reply to Asset Report)), transactions containing Advice Code 3U to the gaining SOS.

C11.16.3. DAAS Action. DAAS shall pass DLMS 180M transactions, above, to the gaining SOS.

C11.17. INVENTORY CONTROL POINT/INTEGRATED MATERIEL MANAGER
LATERAL REDISTRIBUTION OF RETAIL ASSETS

C11.17.1. Purpose. This paragraph outlines procedures for filling back orders by generating lateral redistribution orders for retail materiel that has been identified through an inter- or intra-DoD Component retail asset visibility system. The DoD Components may elect to exclude government furnished materiel (GFM), security assistance, and contractor furnished materiel (CFM) backorders from these procedures under DoD 4140.1-R procedures.

C11.17.2. Backorder Supplied by Lateral Redistribution. If a backorder is to be supplied by lateral redistribution of materiel identified by an inter- or intra-DoD Component retail asset visibility system, the lateral redistribution order (LRO) shall contain appropriate data from the requisition, DLMS 940R, (Referral Order (For Domestic Shipment/With NSN/North Atlantic Treaty Organization (NATO) Stock Number)) in the document identifier, the RIC of the reporting activity, Distribution Code 2 for consumable materiel or Distribution Code 3 for repairable materiel, and the RIC of the receiving ICP/IMM. The LRO shall be forwarded through DAAS to the reporting activity. DLMS 945A, Materiel Release Advice (to ICP/IMM From Storage Activity) with Status Code BA shall be provided to eligible status recipients.

C11.17.3. Reporting Activity Actions. The reporting activity shall:

C11.17.3.1. Process the Lateral Redistribution Order on a Fill/Kill basis. Provide Status Code BA using DLMS 945A, Materiel Release Advice (to ICP From Storage Activity), for the quantity being filled and/or Status Code CB status for the quantity not being filled (killed) to the receiving activity, and include Distribution Code 2 or 3.

C11.17.3.2. Supply Substitutions. Substitutions are allowed if the requiring activity/requisitioning activity and the supplying/holding activity are the same DoD Component. Do not substitute if the requiring/requisitioning activity and the supplying/holding activity are different DoD Components.

C11.17.3.3. Ensure Shipment. Ensure materiel is shipped, using [DD Form 1348-1A](#), to the activity identified in the LRO as the “ship-to” addressee. When the materiel is shipped, send DLMS 856S, Shipment Status (To ICP/IMM From Reporting Activities for LRO Shipments of Retail Assets), to the activity identified as the receiving activity in the LRO. The DLMS 856S shall include the DoDAAC and fund code of the activity to which the credit for the materiel and reimbursement for the packing, crating, handling, and transportation (PCH&T) costs is to be provided; and Signal Code B and Distribution Code 2 or 3. Retail activities shall use Uniform Materiel Movement and Issue Priority System (UMMIPS) time standards for processing LROs directed by the ICP/IMM.

C11.17.3.4. Establish Internal Records. Establish internal records to receive credit for the materiel and reimbursement for PCH&T costs and not generate billing instructions.

C11.17.4. Inventory Manager Actions. ICP/IMM shall:

C11.17.4.1. Update Estimated Ship Dates. Use DLMS 945A, Materiel Release Advice (To ICP From Storage Activity), with Status Code BA and Distribution Code 2 or 3 to update ESDs.

C11.17.4.2. Generate Follow-Ups. Generate DLMS 940R, Materiel Release (From ICP/IMM to Reporting Activity or Storage Activity), follow-ups with Distribution Code 2 or 3 to the reporting activity as follows:

C11.17.4.2.1. When the initial Status Code BA or CB is not received on LROs within 10 calendar days.

C11.17.4.2.2. Upon receipt of Supply Status Code BA without an ESD and 10 calendar days have elapsed since the transaction date of the DLMS 945A, Materiel Release Advice (To ICP From Storage Activity), Supply Status Code BA.

C11.17.4.2.3. Upon Receipt of Supply Status Code BA with an ESD and the ESD has expired.

C11.17.4.2.4. When no response is received to the previous follow-up and 10 calendar days have elapsed. Continue to follow up until status is received, backorder is re-established, or final disposition.

C11.17.4.3. Provide Reinstatement and Status Notification. Reinstatement the requisition and send appropriate status to eligible status recipients upon receipt of DLMS 945A, Materiel Release Advice (To ICP From Storage Activity)/Status Code CB with Distribution Code 2 or 3.

C11.17.4.4. Generate Billing. Upon receipt of DLMS 856S, Shipment Status (To ICP/IMM from reporting activities for LRO shipments of retail assets), with Distribution Code 2 or 3, generate billing transactions to the requisitioner and provide crediting transactions for the materiel and PCH&T under the procedures of MILSBILLS procedures, to the credit-to activity identified in DLMS 856S, Shipment Status. In addition, ICP/IMM shall send DLMS 856S, Shipment Status (To DAAS From Service/Agency for Distribution), shipment status transaction to DAAS.

C11.17.4.5. Create Customer Supply/Status Transactions. When creating customer supply and status transactions as a result of processing DLMS 945A, Materiel Release Advice or DLMS 856S, Shipment Status Materiel Returns, transactions with Distribution Code 2 or 3, always use the distribution code that was in the original requisition.

C11.18. RETURNS TO DLA FROM INDUSTRIAL SITES UNDER BASE REALIGNMENT AND CLOSURE SUPPLY, STORAGE AND DISTRIBUTION AND NATIONAL INVENTORY MANAGEMENT STRATEGY SITE CUSTOMERS

C11.18.1. Industrial Sites Procedures

C11.18.1.1. The return of DLA-managed material shall be accomplished without processing the standard MRP program transactions. The individual maintenance customer shall determine when it has no immediate requirement for the materiel and shall initiate the return process. The materiel shall be physically returned to the DLA storage activity with the applicable documentation. The returning activity shall provide a DLMS 527D, Due-In/Advance Receipt/Due Verification ([MILSTRAP](#) PMR (DIC DW_)), transaction to the storage activity identifying the DoD Component activity to which the receipt shall be reported. Upon notification of receipt by the storage activity by a DLMS 527R (MILSTRAP Materiel Receipt - Other Than Procurement Instrument Source (DIC D6A)), the Military Service activity shall determine whether there is a need for the materiel by another maintenance user (backorder). If so, an issue document shall be forwarded to the storage activity for action. If not, a materiel release order (MRO) shall be initiated, directing shipment-in-place (citing the ship-to/supplemental address of the storage activity), authorizing a change of ownership to DLA. The receipt of the returned materiel from the Military Service ownership to DLA shall be accomplished with a DLMS 527R Receipt (MILSTRAP DIC D6B).

C11.18.1.2. Upon notification of receipt, the DLA ICP shall determine whether a corresponding sale to Service maintenance (identified by DoDAAC series/internal customer group) has occurred for the same materiel and condition code within a 60 day time frame. If there is a matching sale, the customer shall receive credit equal to the original sale. The Service's financial system shall be notified of a credit via a DLMS 810L, Logistics Bill (MILSBILLS Billing for Issue from Stock (Credit) (DIC FA2)).

C11.18.1.3. If no sale has occurred or the condition code differs from that on the original sale, DLA shall provide credit based upon stock position. If the return quantity exceeds that of previous sales, credit shall be provided equal to the original

sale quantity and credit on the remaining quantity shall be based upon stock position. DLA ICP business rules for determining whether to provide credit/credit amount are equivalent to the MRP program and policy contained in DoD 4140.1-R. The Service's financial system shall be notified of a credit via a DLMS 810L (MILSBILLS DIC FA2).

C11.18.2. National Inventory Management Strategy Procedures. Materiel returns from a NIMS site customer shall be processed as per C11.18.1.1. through C11.18.1.3. including use of the PMR, receipt to the Military Service, followed by the MRO directing shipment-in-place triggering receipt to the DLA ICP. The DLA ICP shall process the receipt and determine whether a sale has occurred for the same materiel, condition code, and customer within a 60 day time frame reflecting the exact same document number as the receipt (return) document. If there is an exact matching sale, the customer shall receive credit equal to the original sale. Credit for any quantity returned over the original amount, in a different condition code from the original sale, or unmatched is subject to DLA ICP business rules equivalent to the MRP for determining whether to provide credit/credit amount.

C11.19. DIRECTED DISCREPANT/DEFICIENT MATERIEL RETURNS AND RETROGRADE RETURNS

C11.19.1. General Requirements. The DoD supply chain may require the return of supply items for a variety of reasons beyond the usual excesses turned in for credit under the materiel returns program (MRP) described earlier in this chapter. These can include the exchange of depot level repairable (DLR) Class IX repair parts as required by Military Services' Exchange Pricing programs, the retrograde of forward-positioned retail stock back to a home location, and discrepant/deficient materiel returns directed by SDRs, Product Quality Deficiency Reports (PQDRs), or TDRs. In many cases, logistics business rules require that the return shall use the same document number as the related order/sale. The use of a combination of enhanced return transactions and the addition of specific indicators to other transactions allows for the specific reporting of the transactions without confusion about the nature of the return and enable enhanced in-transit visibility (ITV) of these returns. The procedures also support recent process improvement initiatives related to requirements for directed returns.

C11.19.2. Associated Transactions. There are three DLMS transactions that contain specific content that support the procedures for retrograde and directed discrepant/deficient returns. They are the DLMS 527D, Pre-Positioned Materiel Receipt, DLMS 856R, Materiel Returns Shipment Status, and DLMS 842A/R Standard Supply Discrepancy Report Reply.

C11.19.2.1. A Pre-Positioned Materiel Receipt, DLMS 527D/MILSTRAP DW_, is required for all returns to a Defense Distribution Depot/Storage Activity. This requirement is applicable to DLMS-capable applications and legacy MILS applications. Detailed procedures associated with the PMR are listed in paragraph C11.19.3.

C11.19.2.2. A Materiel Returns Shipment Status, DLMS 856R with enhanced data content, is required from DLMS-capable customers to report directed returns to

both the storage activity and the ICP/Integrated Materiel Manager (IMM) (or other Component designated activity). Detailed procedures associated with the materiel returns shipment status are listed in paragraph of C11.19.3.

C11.19.2.3. Passive Radio Frequency Identification (pRFID) and Item Unique Identification (IUID) shall be included in the DLMS materiel returns shipment status transactions as required by DoD or DoD Component policy.

C11.19.3. Detailed Procedures. The following paragraphs contain detailed procedures for return of supply items related to discrepant/deficient materiel as directed by an SDR, PQDR, or TDR response. This section also addresses retrograde of forward-positioned retail stock back to a home location.

C11.19.3.1. Supply Discrepancy Report

C11.19.3.1.1. When directing return of discrepant materiel, the SDR reply shall include the number of days by which the customer shall return the materiel to the designated location. Expedited time standards under DoD or DoD Component policy shall be applied to wrong item/misdirected/misidentified classified/sensitive item returns. ICP/IMs may also apply expedited time standards to overage returns for backordered materiel not available within another customer's required delivery date. The return-to location shall be identified by DoDAAC or CAGE. Clear text addresses may be included to facilitate the return since not all customers have ready access to an authoritative source for address information.

C11.19.3.1.2. The organization responsible for the SDR reply shall take action to establish a due-in and generate a PMR transaction to the receiving activity. The PMR shall include the return quantity and the appropriate supply condition code. Action to establish the due-in and create the PMR transaction shall be accomplished under MILSTRAP/DLMS. The PMR shall perpetuate the document number associated with the SDR, normally the document number of the original shipment. The DLMS PMR shall include a [Return Type Code](#) indicating the reason for return for which the PMR is established and shall perpetuate the DoD WebSDR control number associated with the SDR.

C11.19.3.1.3. The PMR Due-in EDD indicating the time allowed for shipment and return of discrepant materiel shall be based upon the date of the SDR reply directing the return. The EDD shall be calculated based upon the date of the initial SDR reply directing return. (This may be a reply from the storage activity when action activity responsibility has been delegated by the ICP/IM.) The EDD is a "not to exceed" time standard established for system processing and does not necessarily equal the number of days identified in the SDR reply. The return-by date may be dictated by policy or by need. PMR time standards are shown in Table C11.T1., PMR Due-In Estimated Delivery Date for SDRs.

Table C11.T1. Pre-Positioned Materiel Receipt Due-In Estimated Delivery Date for Supply Discrepancy Reports

EDD	USAGE
30 calendar days	Wrong item/misdirected/misidentified classified/sensitive items (U.S.)
45 calendar days	Returns within Combatant Command/geographic area Wrong item/misdirected/misidentified classified/sensitive items (SA)
90 calendar days	Returns between Combatant Commands/geographic areas (e.g., between CONUS and OCONUS locations (U.S.))
195 calendar days	Returns for other than classified/sensitive (SA)

C11.19.3.1.4. The returning activity shall prepare the DLMS 856R, materiel returns shipment status citing the Return Type Code, identifying the reason for return for which the materiel returns shipment status is provided. If the controlling document number for the directed return is the same as the customer's requisition, a unique transportation control number (TCN) (not derived from the original document number) shall be identified. The shipment status shall perpetuate the DoD WebSDR control number (required where electronic interface is available to facilitate inclusion of this data content). The materiel returns shipment status shall include pRFID and IUID in accordance with DoD/Component policy. The shipment status shall be directed to the ICP/IMM (or other organization that directed the return). The shipment status shall also be directed to the return-to activity when identified by DoDAAC. DAAS shall transmit to DLMS capable activities as identified.

C11.19.3.1.5. Upon receipt of materiel returns shipment status, the ICP/IMM shall recalculate the EDD to equal the original time allowed for shipment and return of materiel (i.e., reset the EDD using the date of the shipment status as the starting date, comparable to MILSTRIP MRP EDD procedures) and provide a replacement PMR to the receiving location. This action will ensure that both records have the same EDD date.

C11.19.3.1.6. The ICP/IMM and the International Logistics Control Office (ILCO) shall monitor for directed returns. Follow-up action is required where classified/sensitive materiel has not been returned by the EDD. The ICP/IMM shall use automated research tools to determine status where applicable: query for materiel returns shipment status in WEB Visual Logistics Information Processing System (WEBVLIPS), transportation shipment status in Integrated Data Environment (IDE)-Global Transportation Network (GTN) Convergence (IGC), and Report of Shipment (REPSHIP) in Intelligent Road/Rail Information Server (IRRIS). Offline communication with the shipper may be necessary to determine the status of the materiel. The ICP shall verify that proper discrepancy procedures are followed for materiel reported as in-transit and not received. If shipment was delayed an updated EDD shall be identified

and disseminated.

C11.19.3.1.7. For nonclassified/sensitive returns, in the event that the ICP/IMM requires advice of shipment to support related supply decisions and neither the materiel nor shipment status has been received, the ICP/IMM may follow-up with the customer. Follow-up for nonclassified/sensitive returns is optional except when return shipment status was provided and materiel was not received. If the nonclassified/sensitive returns are not received by the EDD and no transportation shipment status in IGC exists and no materiel returns shipment status was provided or the customer is non-responsive to ICP/IMM follow-up, the ICP/IMM shall initiate cancellation of the due-in/PMR and take appropriate financial action (e.g., reversal of credit previously provided or billing for materiel not returned). If the EDD was reset based upon shipment status and the materiel is not received by the new EDD, the ICP/IMM shall follow-up with the shipper to determine the status of the return. The ICP shall initiate cancellation of the PMR and establishment of a new PMR if the originally planned receiving location is changed. Offline communication with the shipper may be necessary to determine the status of the materiel. The ICP shall verify that proper discrepancy procedures are followed for materiel reported as in-transit and not received.

C.11.19.3.2. Product Quality Discrepancy Report

C.11.19.3.2.1. When directing return of deficient materiel/exhibits to storage activities, the PQDR reply shall include the date by which the customer shall return the materiel to the designated location. The responsible activity may apply an expedited time standard to Type I PQDRs or as appropriate. The return-to location shall be identified by DoDAAC or CAGE. Clear text addresses may be included to facilitate the return since not all customers have ready access to an authoritative source for address information.

C.11.19.3.2.2. When directing return of deficient materiel/PQDR exhibit, the ICP/IMM shall establish a due-in and generate a PMR transaction to the receiving activity for the materiel return/exhibit quantity using SCC Q. Action to establish the due-in and create the PMR transaction shall be accomplished under MILSTRAP/DLMS by the activity directing the return. The PMR shall perpetuate the document number associated with the PQDR, normally the document number of the original shipment. If not available, a constructed document number shall be employed for the PMR, the return shipment, and future financial actions. The DLMS PMR shall include the Return Type Code indicating the reason for the PMR as return of quality deficient materiel and shall perpetuate the PQDR report control number (RCN).

C.11.19.3.2.3. The PMR due-in EDD indicating the time allowed for shipment and return of deficient materiel shall be based upon the date of the PQDR reply directing the return. The EDD is a "not to exceed" time standard established for system processing and does not necessarily correlate to the PQDR reply return-by date which may be dictated by other criteria. See Table C11.T2., PMR Estimated Delivery Date Days for Product Quality Deficiency Reports, to establish the EDD.

Table C11.T2. Pre-Positioned Materiel Receipt Estimated Delivery Date Days for Product Quality Deficiency Reports

EDD	USAGE
45 calendar days	Returns within Combatant Command/geographic area
90 calendar days	Returns between Combatant Commands/geographic areas (e.g., between CONUS and OCONUS locations)
195 calendar days	Security Assistance returns

C.11.19.3.2.4. The returning activity shall prepare DLMS 856R, materiel returns shipment status citing the Return Type Code indicating the reason for the shipment status as deficient materiel returns. If the controlling document number for the directed return is the same as the customer's requisition, a unique TCN (not derived from the original document number) shall be identified. The materiel returns shipment status shall perpetuate the PQDR RCN. The materiel returns shipment status shall include pRFID and IUID in accordance with DoD/Component policy. The shipment status shall be directed to the ICP/IMM (or other organization that directed the return). The shipment status shall also be directed to the return-to activity when identified by DoDAAC. DAAS shall transmit to DLMS capable activities as identified.

C.11.19.3.2.5. Upon receipt of materiel returns shipment status, the ICP/IMM shall recalculate the EDD to equal the original time allowed for shipment and return of materiel (i.e., reset the EDD using the date of the shipment status as the starting date, comparable to MILSTRIP MRP EDD procedures) and provide a replacement PMR to the receiving location. This action ensures that both records have the same EDD.

C.11.19.3.2.6. The ICP/IMM and the ILCO shall monitor for directed returns. Follow-up with customers is required where materiel/PQDR exhibit has not been returned by the EDD. The ICP/IMM shall use automated research tools to determine status where applicable: query for materiel returns shipment status in WEBVLIPS, transportation shipment status in IGC, and REPSHIP in IRRIS. The ICP shall verify that proper discrepancy procedures are followed for materiel reported as in-transit and not received. The originator of the PMR shall cancel the PMR if circumstances have changed and materiel will not be returned as directed. The PMR shall be cancelled and a new PMR established if the originally planned receiving location is changed.

C.11.19.3.3. Transportation Discrepancy Report

C.11.19.3.3.1. When directing return of materiel associated with a TDR, the TDR reply shall include the date by which the reporting activity shall return the materiel to the designated location. The responsible activity may apply an expedited

time standard as appropriate. The return-to location shall be identified by DoDAAC or CAGE. Clear text addresses may be included to facilitate the return since not all customers have ready access to an authoritative source for address information.

C.11.19.3.3.2. When directing return of discrepant materiel, the ICP/IMM responsible for the TDR reply shall take action to establish a due-in and generate a PMR transaction to the receiving activity for the quantity in the TDR reply. Action to establish the due-in and create the PMR transaction shall be accomplished under MILSTRAP/DLMS. The PMR shall perpetuate the return document number associated with the document number of the original shipment or as assigned by the ICP/IMM. The DLMS PMR shall include a Return Type Code indicating the reason for the PMR as return of transportation-related discrepant materiel and shall perpetuate the control number associated with the TDR.

C.11.19.3.3.3. The PMR due-in EDD indicating the time allowed for shipment and return of deficient materiel shall be based upon the date of the TDR response directing the return. The EDD is a “not to exceed” time standard established for system processing and does not necessarily correlate to the TDR reply return-by date, which may be dictated by other criteria. See Table C11.T3., Due-In Estimated Delivery Date for Transportation Discrepancy Report, to establish the EDD.

Table C11.T3. Due-In Estimated Delivery Date for Transportation Discrepancy Report

EDD	USAGE
45 calendar days	Returns within Combatant Command/geographic area
90 calendar days	Returns between Combatant Commands/geographic areas (e.g., between CONUS and OCONUS locations)
195 calendar days	Security Assistance returns

C.11.19.3.3.4. The returning activity shall prepare DLMS 856R materiel returns shipment status citing a Return Type Code indicating the reason for the shipment status is applicable to a TDR directed return. If the controlling document number for the directed return is the same as the original shipment, a unique TCN (not derived from the original document number) shall be identified. The materiel returns shipment status shall perpetuate the TDR control number. The materiel returns shipment status shall include pRFID in accordance with DoD/Component policy. The shipment status shall be directed to the ICP/IMM (or other organization that directed the return). The shipment status shall also be directed to the return-to activity. DAAS shall transmit to DLMS capable activities as identified.

C.11.19.3.3.5. Upon receipt of materiel returns shipment status, the ICP/IMM shall recalculate the EDD to equal the original time allowed for shipment and return of materiel (i.e., reset the EDD using the date of the shipment status as the starting date, comparable to MILSTRIP MRP EDD procedures) and provide a

replacement PMR to the receiving location. This action will ensure that both records have the same EDD date.

C.11.19.3.3.6. The ICP/IMM and ILCO shall monitor for receipt. Follow-up with customers is required where materiel has not been returned by the EDD. The ICP/IMM shall use automated research tools to determine status where applicable: query for materiel returns shipment status in WEBVLIPS, transportation shipment status in IGC, and REPSHIP in IRRIS. The ICP shall verify that proper discrepancy procedures are followed for materiel reported as in-transit and not received. The originator of the PMR shall cancel the PMR if circumstances have changed and materiel will not be returned as directed. The PMR shall be cancelled and a new PMR established if the originally planned receiving location is changed.

C.11.19.3.4. Retrograde Returns. These procedures apply to returns for which materiel returns shipment status (DLMS 856R/DIC FTM) is not provided under the above MILSTRIP Materiel Returns Program.

C.11.19.3.4.1. When directing return of materiel (for return, replacement, or other reason), the ICP/IMM shall include the date by which the reporting activity shall return the materiel to the designated location and the applicable PD. The return-to location shall be identified by DoDAAC or CAGE. Clear text addresses may be included to facilitate the return since not all customers have ready access to an authoritative source for address information. Retrograde returns that are not subject to ICP/IMM direction shall be returned in accordance with DoD Component procedures.

C.11.19.3.4.2. When directing return of materiel the ICP/IMM shall establish a due-in and generate a PMR transaction to the receiving activity for the applicable quantity. Action to establish the due-in and create the PMR transaction shall be accomplished under MILSTRAP/DLMS. Where the returning activity self-initiates the return, the returning activity shall be responsible for preparation of the PMR. The PMR shall perpetuate the return document number. The DLMS PMR shall include a Return Type Code indicating the reason for the PMR as return of materiel for repair (including exchange price returns)/retrograde movement.

C.11.19.3.4.3. The PMR EDD indicating the time allowed for shipment and return of deficient materiel shall be based upon the date of the directed return or generation of PMR where the return is initiated by the returning activity. The EDD is a "not to exceed" time standard established for system processing and does not necessarily correlate to the reply return-by date when applicable since that date may be dictated by other criteria. See Table C11.T4., PMR EDD Time Standard for Retrograde Returns, to establish the EDD.

Table C11.T4. Pre-Positioned Materiel Receipt Estimated Delivery Date Time Standard for Retrograde Returns

EDD	USAGE
45 calendar days	Returns within Combatant Command/geographic area
90 calendar days	Returns between Combatant Commands/geographic areas (e.g., between CONUS and OCONUS locations)
195 calendar days	Security Assistance returns

C.11.19.3.4.4. The returning activity shall prepare DLMS 856R materiel returns shipment status citing a Return Type Code indicating the reason for the shipment status is applicable to return/retrograde movement. The materiel returns shipment status shall perpetuate the associated document number. A unique TCN (not derived from the original document number) shall be identified. A customer reference number may be included when applicable to identify the original requisition document number. The materiel returns shipment status shall include pRFID and IUID in accordance with DoD/Component policy. The shipment status shall be directed to the ICP/IMM (or other organization that directed the return). The shipment status shall also be directed to the return-to activity when identified by DoDAAC. DAAS shall transmit to DLMS capable activities as identified.

C.11.19.3.4.5. Upon receipt of materiel returns shipment status, the ICP/IMM shall recalculate the EDD to equal the original time allowed for shipment and return of materiel (i.e., reset the EDD using the date of the shipment status as the starting date, comparable to MILSTRIP MRP EDD procedures) and provide a replacement PMR to the receiving location. This action ensures that both records have the same EDD date.

C.11.19.3.4.6. The ICP/IMM shall monitor for receipt. Follow-up with the returning activity is required where materiel has not been returned by the EDD. The ICP/IMM shall use automated research tools to determine status where applicable: query for materiel returns shipment status in WEBVLIPS, transportation shipment status in IGC, and REPSHIP in IRRIS. The ICP shall verify that proper discrepancy procedures are followed for materiel reported as in-transit and not received. The originator of the PMR shall cancel the PMR if circumstances have changed and materiel will not be returned as directed. The PMR shall be cancelled and a new PMR established if the originally planned receiving location is changed.

C12. CHAPTER 12

DUE-IN AND ADVANCE RECEIPT INFORMATION

C12.1. GENERAL

C12.1.1. Standard Procedures. This chapter prescribes standard procedures for sending information about incoming materiel between wholesale managers and storage activities and between owner/managers and maintenance activities, and between losing inventory managers (LIM) and gaining inventory managers (GIM). The procedures require timely establishment of due-in information for all anticipated receipts of materiel, and requires that managers provide receiving storage activities with information for anticipated receipts.

C12.1.2. Control of Due-In Records for Materiel Receipt Acknowledgement. The control of due-in records below the wholesale level to accommodate the DoD closed-loop materiel receipt acknowledgment (MRA) process is addressed in [Chapter 10](#).

C12.1.3. Consignment of Materiel to Storage Activities. Documentation covering consignment of materiel to storage activities is prescribed in the DoD Component publications. These documents are used, together with information developed by inspection and classification procedures, as source data for documenting transactions in terms of this manual. The distribution of disbursement, procurement, and transportation documentation by storage activities is also governed by existing publications and is, therefore, not a consideration here.

C12.1.4. Transactions. This chapter addresses the procedures applicable to the following Accredited Standards Committee (ASC) X12 transaction functions identified by their beginning segment and transaction type code. Other DLMS formats, such as extensible markup language (XML), are also available. See the DLA Logistics Management Standards Website for available formats www.dla.mil/j-6/dlms/elibrary/TransFormats/140_997.asp.

The corresponding MILSTRAP legacy 80 record position functionality is identified for information purposes in a mixed DLSS/DLMS environment.

C12.1.4.1. Due-in Transaction is identified by the DLMS 527D ASC X12 beginning segment (1/BR02/020) Transaction Type Code DA – Due-in. This transaction provides [MILSTRAP](#) legacy DIC DD_/DF_ functionality.

C12.1.4.2. Advance Receipt Information Transaction identified by the DLMS 527D ASC X12 beginning segment (1/BR02/020) Transaction Type Code DE – Advance Receipt. This transaction provides MILSTRAP legacy DIC DU_/DW_ functionality.

C12.1.4.3. Delinquent Due-in Inquiry Transaction is identified by the DLMS 527D ASC X12 beginning segment (1/BR02/020) Transaction Type Code TJ –

Delinquent Due-in Inquiry. This transaction provides MILSTRAP legacy DIC DLC functionality.

C12.1.4.4. Delinquent Due-in Advice Transaction is identified by the DLMS 527D ASC X12 beginning segment 91/BR02/020) Transaction Type Code TI – Delinquent Due-in Advice. This transaction provides MILSTRAP legacy DIC DLD functionality.

C12.1.4.5. Due-in Reconciliation Inquiry Transaction is identified by the DLMS 527D ASC X12 beginning segment (1/BR02/020) Transaction Type Code LC – Due-in Reconciliation Inquiry. This transaction provides MILSTRAP legacy DIC DLE functionality.

C12.1.4.6. Due-in Reconciliation Advice Transaction is identified by the DLMS 527D ASC X12 beginning segment (1/BR02/020) Transaction Type Code TK – Due-in Reconciliation Advice. This transaction provides MILSTRAP legacy DIC DLF functionality.

C12.1.5. Use of DLMS 527D. Use the DLMS 527D functionality as follows:

C12.1.5.1. Owners/integrated material managers (IMM) use to establish advance receipt information (ARI) at the storage activity. ARI is known also known as Prepositioned Materiel Receipt (PMR).

C12.1.5.2. GIMs use for due-in reconciliation and to inquire about delinquent due-in transactions

C12.1.5.3. LIMs use to provide the GIM with memorandum due-in information, to respond to GIM due-in reconciliations and inquiries, and to provide the GIM revised due-in estimated delivery dates (EDD) as changes occur.

C12.2. CONTROL OF MATERIEL DUE-IN

C12.2.1. Establishing Due-In Records. IMMs shall establish due-in records for all anticipated receipts of materiel to maintain property accountability or visibility of materiel due-in to inventory, as required under Chapter 6.

C12.2.2. Keep Current Status. IMMs shall keep due-in records in a current status. Use revised delivery schedules, notification of shipment or delayed shipment, repair schedules and repair schedule changes, contracts and contract changes, customer and manager cancellations, materiel receipts, and completion of shipment tracer/discrepancy reporting actions to establish, revise, and delete due-in records and maintain appropriate delivery dates. Refer to [Chapter 11, C11.19](#) for specific content and estimated delivery date requirements for ARI associated with directed discrepant/deficient materiel returns and retrograde returns.

C12.2.3. Audit Trail. IMMs shall establish an audit trail when deleting or reversing due-in quantities. All due-in deletions and reversals shall interface with the financial

system. Due-in deletions and reversals are prohibited without advance coordination between the supply and financial functions, and with the procurement function for dues-in from procurement instrument sources, unless the supply, financial, and procurement systems are fully integrated. When deleting or reversing due-in quantities, managers shall initiate action to correct the receiving storage activity's ARI file under C12.3.3.

C12.2.4. Supply and Financial Interface. The DoD Components shall establish the necessary interface between supply and financial operations/functions to account for materiel in-transit as required under [DoD 7000.14-R](#), "Department of Defense Financial Management Regulation".

C12.2.5. In-Transit Due-In Procedures. IMMs shall monitor due-in records and inquire to storage activities for information on in-transit dues-in under the procedures in Chapter 13.

C12.2.6. Product Quality Deficiency Materiel. When IMMs direct materiel for return based on a reported product quality deficiency, they shall prescribe use of Supply Condition Code (SCC) Q in the disposition instructions to the returning activity. IMMs shall establish and monitor due-ins for all returns of potential/confirmed product quality deficiency related materiel, citing the document number included in the report. Provide ARIs for the returns to receiving storage activities, under C12.3, citing the due-in document number and SCC.

C12.3. PROVIDING THE STORAGE ACTIVITY WITH ADVANCE RECEIPT INFORMATION

C12.3.1. Due-In Information Requirements. IMMs shall provide maintenance and storage activities with due-in information for scheduled materiel receipts by providing them with ARI transactions. For due-ins from procurement instrument sources, IMMs shall include applicable contract information and packaging data, to facilitate the receiving process and reduce the need for hard copy contracts at the receiving activity. As part of the contract information, the IMM shall include indicators identifying whether the contract required unique identification (UID) or passive Radio Frequency Identification (pRFID).¹

C12.3.2. Storage Activity Requirements. Storage activities receiving DLMS 527D shall keep them in an ARI file pending receipt of the materiel or the receipt of updates to the ARI from the IMM. Storage activities may use the ARI contract information and packaging data to facilitate the receiving process.

C12.3.2.1. Passive RFID. ARI notice that a shipment contractually requires passive RFID shall allow preplanning so that the incoming shipment may be directed for offloading at the RFID reader location and provides a basis for submission of a Supply Discrepancy Report (SDR) in accordance with SDR procedures should the vendor fail to employ the required RFID.

¹ DLA DSS will implement these new procedures IAW Approved DLMS Change (ADC) 172 in January 2007, enabling DSS to use the indicator when the IMM provides it in the 527D ARI transaction.

C12.3.2.1.1. Upon request of the IMM, Defense Automatic Addressing System (DAAS) is authorized to support DLMS implementation of this process by inserting the pRFID indicator in the ARI as the transaction processes through the DAAS. IMMs shall provide specific criteria for use by the DAAS to prevent improper assignment of the indicator. This DLA Transaction Services procedure is an interim “work-around” pending IMM implementation of integrated logistics and contract administration processes so that the contractual requirement for pRFID can be programmatically identified and positioned in the ARI transaction.²

C12.3.2.1.2. DLA Transaction Services shall maintain a table containing criteria to be used in determination of applicable ARIs. Criteria may specify excluded contract numbers, excluded commodities (by FSG or FSC), Service/Agency originating the ARI, specific characters within the contract number, and location of the storage activity (e.g. CONUS).

C12.3.2.2. Item Unique Identification. ARI notice that a shipment contractually requires item unique identification (IUID) provides a basis for submission of supply discrepancy reports (SDR) in accordance with SDR procedures, should the vendor fail to employ the required IUID.

C12.3.3. ARI. IMMs shall send ARI transactions and ARI transaction reversals as due-in records are revised so that receiving storage activities can maintain the records to show status equivalent to IMM due-in records. IMMs shall send ARI reversals to the storage activities when deleting due-in records. IMMs shall also send ARI reversals when revising due-in records (e.g., dates, quantities, destinations) and simultaneously send replacement ARI transactions showing revised due-in record data.

C12.3.4. Optional National Inventory Management Strategy (NIMS) Advanced Receipt Notification. Under the NIMS concept of operation, the IMM may own materiel for managed NSNs down to the retail level. Such arrangements shall be based on agreements between participating DoD Components. Replenishment of IMM owned retail shall be accomplished under a push scenario. When assets are available to push, ARI shall be sent to the NIMS site using standard ARI procedures. Optionally, the DoD Component agreements may authorize the use of ARI for the IMM to notify the NIMS site that materiel to support their replenishment requirement is delayed. In this instance, ARI shall contain the quantity not available for push replenishment, the Delay Notification Code BD and an estimated shipping date. If at the time push replenishment is required, only a partial quantity is available, then two ARI transactions shall be generated; one for the quantity pushed and one for quantity delayed. These transactions shall have different document numbers and the delayed one shall have the BD Delay Notification Code. Later, if only a partial amount of the quantity previously delayed becomes available to push, two ARI transactions shall be generated. The one for the quantity pushed shall maintain the document number of the original delayed

² Refer to ADC 297, DLA Transaction Services Passive Radio Frequency Identification (pRFID)-Required Exclusion Table for DLMS 527D ARI/Prepositioned Materiel Receipt (PMR). At the time of implementation, DLA is the only participating Component.

notification with the "BD" indicator eliminated. The ARI for the quantity still delayed must be assigned a new document number and a BD Delay Notification Code. If the total quantity is initially delayed and later the total quantity is shipped, ARI must have the same document number throughout the process. The IMM shall update/replace the ARI delayed notification anytime either the replenishment quantity or the estimated shipping date changes. New delayed notification must maintain the same document number unless a partial push occurs. Replacement delayed notification under the same or new document number shall not require the reversal of the previous ARI transaction. Reversal logic for ARI transactions indicating that a push shipment has been initiated shall follow the requirement in C12.3.3.

C12.3.5. ARI for Materiel Returns under NIMS and Base Realignment and Closure (BRAC) Retail Supply, Storage and Distribution (SS&D)/Inventory Management and Stock Positioning (IMSP). The ARI is used in a variation of the materiel returns program for processing DLA-managed materiel returns to DLA from selected sites in support of the BRAC SS&D/IMSP and NIMS. The returning activity shall be responsible for submission of an ARI to the storage site identifying the Military Service activity to which the receipt shall be reported for these returns of DLA-managed items. Because the Military Service sites shall no longer retain retail stock balances under these programs, DLA shall assume ownership of all materials regardless of asset position. Upon notification of receipt of returned materiel by the storage activity via a Receipt Transaction (DLMS 527R Receipt with 2/LIN01/10 Code I; MILSTRAP DIC D6A), the Military Service activity shall determine if there is a need for the material by another maintenance user (backorder). If so, an issue document shall be forwarded to the storage activity for action. If not, a materiel release order shall be initiated, directing shipment-in-place (citing the ship-to/supplemental address of the storage activity), authorizing a change of ownership to DLA. The receipt of the returned materiel from the Military Service ownership to DLA shall be accomplished with a receipt (DLMS 527R Receipt with 2/LIN01/10 Code J; MILSTRAP DIC D6B).

C12.4. LOAN MATERIEL

C12.4.1. Use appropriate adjustment and/or receipt/due-in transactions to show the on-hand/due-in and later receipts. Show materiel on loan on owner records in the appropriate purpose code (as prescribed by the DoD Component procedures) or as a nonprocurement source due-in citing Reason for Materiel Receipt/Return Code H depending on the method/system applied.

C12.4.2. Owners/IMMs may use ARI transactions to provide advance notification to activities scheduled to receive returned loaned materiel.

C12.5. LOGISTICS REASSIGNMENT MEMORANDUM DUE-IN AND ADVANCE RECEIPT INFORMATION

C12.5.1. Memorandum Due-In. The LIM shall send a memorandum due-in information transactions as of the effective transfer date (ETD) to the GIM, for both awarded contracts and unawarded purchase requests. Quantities shall show only what

is available for transfer. The GIM shall process valid memorandum due-in transactions to establish memorandum due-in records. If the GIM receives a memorandum due-in transaction for an item not involved in a logistics reassignment, the GIM shall reject the transaction back to the initiator using DLMS 824R, Reject Advice, citing Reject Advice Code AY.

C12.5.2. Destination Change. Under [DoD 4140.26-M](#), "Defense Integrated Materiel Management for Consumable Items", September 24, 2010 policy, the LIM shall take action to change the destination of undelivered purchases upon request of the GIM. Upon changing the quantity due-in/destination, the LIM shall prepare and send a memorandum due-in reversal and a new memorandum due-in to the GIM. Additionally, when an award is made for an unawarded purchase request, the LIM shall prepare and send a memorandum due-in reversal and a new memorandum due-in transaction to the GIM and a ARI transaction to the applicable storage activity.

C12.6. LOGISTICS REASSIGNMENT DUE-IN VALIDATION

C12.6.1. Due-In Inquiry

C12.6.1.1. Inquiry for Due-In with Expired EDD. The GIM shall initiate a DLMS 527D due-in inquiry when the EDD for delivery of materiel is delinquent by more than 30 calendar days. Compute the delinquent date from the memorandum due-in that the LIM provided on the ETD. The GIM shall also initiate DLMS 527D when a revised due-in date later becomes delinquent by 30 calendar days.

C12.6.1.2. Inquiry for Due-In with Invalid EDD. The GIM shall initiate DLMS 527D due-in inquiry 30 calendar days after the ETD when the memorandum due-in, the LIM provided on the ETD, contains an invalid EDD (e.g., for materiel pending procurement/contract action by the LIM). The GIM shall initiate a second inquiry 60 calendar days after the ETD for all due-ins with invalid EDDs. If the LIM does not reply to the second inquiry, the GIM must intervene off-line. The GIM shall include all due-ins with invalid EDDs 90 calendar days after the ETD in the reconciliation. Based on the response, the GIM shall determine if additional inquiry/reconciliation action is required.

C12.6.2. Delinquent Due-In Advice

C12.6.2.1. The LIM shall provide the GIM with due-in information in response to an inquiry using a delinquent due-in advice transaction citing the appropriate asset transfer status code.

C12.6.2.2. Revision of Estimates. To preclude the need for due-in inquiry transactions by the GIM, the LIM shall provide revised EDDs as changes occur using a delinquent due-in transaction with Asset Transfer Status Code AF.

C12.6.3. Due-In Reconciliation

C12.6.3.1. Due-In Verification. The DoD Components shall use the due-in reconciliation process to verify that the GIM is in receipt of all procurement/contract

award data for assets due-in and the most current EDDs available. This process shall also ensure that all items still pending procurement/contract award on the ETD are still valid.

C12.6.3.2. Due-In Reconciliation. The GIM shall initiate a due-in reconciliation inquiry for reconciliation of dues-in for logistically reassigned materiel 90 calendar days after the ETD and semiannually thereafter for all materiel that has not been received. The GIM shall include all items with materiel still due in to the LIM, regardless of the presence of a current EDD, in the reconciliation request.

C12.6.3.3. Due-In Reconciliation Response. The LIM shall respond to due-in reconciliation requests using a due-in reconciliation advice containing the appropriate asset transfer status code. The LIM shall ensure that due-in information for all items still pending procurement/contract action, pending delivery, or in litigation is readily available to respond to the reconciliation request.

C13. CHAPTER 13

MATERIEL RECEIPT

C13.1. GENERAL

C13.1.1. Purpose. This chapter prescribes standard procedures for processing materiel receipt information between and storage activities and between losing inventory managers (LIM) and gaining inventory managers (GIM). The procedures require expeditious showing of assets in the property accountability records and related financial accounts. Documentation covering consignment of materiel to storage activities is prescribed in other DoD and DoD Component regulations. These documents are used, together with information developed by inspection and classification procedures, as source data for documenting transactions in terms of this manual. The distribution of disbursement, procurement, and transportation documentation by storage activities is also governed by existing regulations and is, therefore, not a consideration here.

C13.1.2. Transactions. This chapter addresses the procedures applicable to the following Accredited Standards Committee (ASC) X12 transaction functions identified by their beginning segment transaction type code. Other DLMS formats, such as XML, are also available. See the DLA Logistics Management Standards Website for available formats www.dla.mil/j-6/dlms/eLibrary/TransFormats/140_997.asp. The corresponding MILSTRAP legacy 80 record position transaction is identified for information purposes in a mixed DLSS/DLMS environment.

C13.1.2.1. Receipt Transaction is identified by the DLMS 527R ASC X12 beginning segment (1/BR02/020) Transaction Type Code D4 – Receipt. This transaction provides MILSTRAP legacy DIC D4_/D6_ functionality.

C13.1.2.2. Receipt Inquiry Transaction is identified by the DLMS 527R ASC X12 beginning segment (1/BR02/020) Transaction Type Code IN – Inquiry. This transaction provides MILSTRAP legacy DIC DXA/DXB functionality.

C13.1.2.3. Response to Inquiry Transaction is identified by the DLMS 527R ASC X12 beginning segment (1/BR02/020) Transaction Type Code DG – Response. This transaction provides MILSTRAP legacy DIC DXC/DXD functionality.

C13.1.3. Materiel Receipt/Return Code Definitions. For materiel receipt/return code definitions, see DLMS 527R, Receipt, Inquiry, and Response, or the DLA Logistics Management Standards Website www.dla.mil/j-6/dlms/eApplications/LOG.NET/UI/Log_Qualifiers/lqvqcDetails.aspx?code=MRR

C13.1.4. Use of DLMS 527R for Receipt. DLMS 527R shall be used by receiving activities to report both receipts and historical receipt information to owners and other management control activities.

C13.2. MATERIEL RECEIPT PROCESSING

C13.2.1. Receiving Activity Actions. Receiving activities shall:

C13.2.1.1. Post receipts to the total item property record by changing or adding to data in the advance receipt information (ARI) file established under Chapter 12, (Due-In and Advance Receipt Information) procedures, or by extracting data from the consignment documentation.

C13.2.1.2. For discrepant shipments, follow the guidelines provided in C13.2.8.

C13.2.2. Reversal of Incorrect Receipt Transactions. Receiving activities may use the Receipt Transaction to reverse incorrect Receipt Transactions.

C13.2.3. Central Procurement Receipts. Receipts from procurement can originate from central procurement or local procurement actions. Authorized procurement delivery documents should accompany each shipment as prescribed in the Federal Acquisition Regulation.

C13.2.4. Materiel Receipt Inspection Procedures. When shipments of materiel received from procurement instrument sources require inspection and/or acceptance at destination, receiving storage activities must do the inspection and/or acceptance and the in check operations as concurrent actions. Receiving activities shall:

C13.2.4.1. Inspect shelf-life materiel for appropriate condition and type of shelf-life code in accordance with applicable DoD Component procedures based on [DoD 4140.27-M](#), "Shelf-Life Item Management Manual", May 5, 2003.

C13.2.4.1.1. Mark materiel, as appropriate, for shelf-life code and supply condition code (SCC) upon receipt.

C13.2.4.1.2. Package markings shall be in accordance with [MIL-STD-129](#).

C13.2.4.2. Based on inspection, prepare a materiel Receipt Transaction indicating the date inspected and the actual condition(s), by quantity, of the materiel received. Wholesale owners shall make this date available to the office responsible for contractor payment for use in determining if an interest penalty applies.

C13.2.5. Army Medical Materiel Agreement Receipts. DLA, in coordination with Defense Medical Logistics Standard Support (DMLSS) and Theater Enterprise-Wide Logistics System (TEWLS), has implemented the Army Medical Materiel Agreement (AMMA). Under the AMMA program, DLA funds are used by the Army to purchase via

DMLSS/TEWLS. The DLA Enterprise Business System (EBS) receives a Receipt Transaction from DMLSS/TEWLS to receipt purchased items into stock for inventory accountability. DLA owns the materiel until items are issued at the retail level and inventory is decremented in DLA's EBS.

C13.2.5.1. Purchase card receipts from AMMA sites must contain a purchase card account number and purchase card call number in order to uniquely identify transactions. A vendor reference number should also be included which is the Customer Automation and Reporting Environment invoice number. This value will help with issue resolution and reconciliation.

C13.2.6. Time Standards for Processing Receipts

C13.2.6.1. Purpose. The Department of Defense measures wholesale activity receipt processing performance in terms of the goal to process receipts and show them with minimal delay as on hand assets available for issue. Recording asset receipts and making asset records visible from the point of inspection and/or acceptance normally shall be done within 24-hours (holidays and weekends excepted) as prescribed in [DoD 4140.1-R](#), "DoD Supply Chain Materiel Management Regulation," May 23, 2003. The accounting and finance office shall be notified of item receipt within the 24-hour period. One objective of the DLMS is to process receipts through the receiving activity, irrespective of geographical location, and show them on both the accountable and locator records with least delay. For this objective, there are two segments of receipt processing:

C13.2.6.1.1. Date materiel is turned over by the carrier to the designated receiving activity to date when storage location/proof of storage is posted in the receiving activity's records. Materiel is considered to be in storage when it reaches the first location (either temporary or permanent) where actual storage control exists through locator data and the materiel can be issued in response to materiel release documentation.

C13.2.6.1.2. Date materiel is turned over by the carrier to the designated receiving activity to date of posting to the total item property record.

C13.2.6.2. Processing Standards. Performance standards for processing receipts through these time segments are as follows:

C13.2.6.2.1. New Procurement. Process receipts from new procurement through segments one and two within 7 calendar days.

C13.2.6.2.2. Others. Process all other receipts through segments one and two within 10 calendar days.

C13.2.6.3. Wholesale Receipt Effectiveness. Report wholesale activity receipt processing effectiveness as prescribed by Chapter 6, C6.11.1.2.1. When computing the overall performance against the time standard, include Receipt Transactions frustrated for a long period of time prior to posting, storing, or reporting.

C13.2.7. Control of Receipt Requirements. Receiving storage activities shall comply with the following requirements:

C13.2.7.1. Establish Procedures. Establish receipt control procedures for posting information relating to the status of materiel in the storing cycle. The cycle begins when the carrier offers materiel to the receiving activity for custody and control. Receiving activities shall record the carrier's date offered when different than the date the carrier released the materiel. The DoD Components should use the carrier's date offered to measure carrier performance.

C13.2.7.2. Actions after Materiel Receipt. Do the following actions after the materiel has been physically received but prior to or concurrent with movement to storage:

C13.2.7.2.1. Establish a transaction suspense record to record the materiel as an in-process receipt.

C13.2.7.2.2. Prepare and send a Receipt Transaction to the owner within 24-hours (holidays and weekends excepted) from the point of inspection and/or acceptance.

C13.2.7.3. Using In-Process Receipts to Satisfy Requirement. When the on-hand balance of the stock record (physically stored) is not enough to fill materiel release orders, use in-process receipts to fully or partially satisfy the requirement. When in-process receipts are recorded, fill priority 01-08 requirements from these receipts. Defer filling of priority 09-15 requirements from in-process receipts until proof of storage is recorded.

C13.2.7.4. Expediting Materiel Storage. Periodically refer to the in-process receipt suspense file to hasten storage of materiel delayed beyond authorized receipt processing timeframes and to hasten storing of materiel for issues deferred pending storage.

C13.2.7.5. Clearing Suspense Record. After receiving proof of storage, clear the suspense record, update the storage locator record, and release any deferred issues.

C13.2.7.6 Updating Storage Activity Record. As an additional aid in control of receipts, ensure that appropriate storage activity records (e.g., stock locator) show the date of the last receipt of an item and the storage information (i.e., date of storage or some other code indicating that storage has been reported).

C13.2.8. Discrepant/Deficient Receipts

C13.2.8.1. Discrepant/Deficient Reports. In addition to processing and reporting materiel receipts, receiving storage activities shall submit reports for all discrepant/deficient receipts in accordance with the procedures and forms prescribed by the following:

C13.2.8.1.1. Chapter 17 of this manual, Supply Discrepancy Reporting procedures.

C13.2.8.1.2. [DTR 4500.9-R](#), "Defense Transportation Regulation," Part II, Cargo Movement.

C13.2.8.1.3. Joint Regulation [DLAR 4155.24/AR 702-7/SECNAVINST 4855.5/AFR 74-6](#), "Reporting of Product Quality Deficiencies Report Program."

C13.2.8.1.4. Joint Regulation [DLAR 4155.3/AR 30-12/NAVSUPINST 4355.2/AFR 74-5/MCO 10110.21](#), "Inspection of Subsistence Supplies and Services."

C13.2.8.1.5. Other DoD and joint or intra-DoD Component regulations governing discrepancies/deficiencies not covered by the above.

C13.2.8.2. Exceptions. Neither the dollar value nor the timeframes for submitting discrepancy/deficiency reports apply for reporting the materiel receipt to the owner. The receipt reporting timeframes are prescribed by C13.2.6. The procedures for reporting receipt of discrepant/deficient shipments to the owner are prescribed by C13.2.8.2.

C13.2.8.2. Processing Discrepant/Deficient Receipts

C13.2.8.2.1. Discrepancy Determination. Upon receipt of all incoming materiel shipments, from procurement instrument and non-procurement instrument sources, receiving activities shall research all available documentation and item markings (i.e., transaction or contract number, national stock number (NSN), or other, item identification number, ARI file, quantity, condition, inspection/acceptance requirements, etc.) to determine the receipt data. Using this data, receiving activities shall determine if a discrepancy/deficiency (hereafter referred to as discrepancy or discrepant) exists and shall identify its nature.

C13.2.8.2.2. Unusual Circumstances. If unusual circumstances prevent normal receipt reporting of discrepant shipments, the receiving activity shall communicate with the manager or Contract Administration Office (CAO)/Purchasing Office (PO) to determine how to submit the discrepancy report and report the receipt. When the owner delays receipt reporting, the receiving activity must control the receipt by physically segregating and monitoring the status of the materiel until they report the receipt, or the owner directs other disposition (e.g., reshipment, return to shipper, etc.). This paragraph applies only when circumstances exist that prevents normal receipt reporting. For non-procurement receipts with no ARI, see C13.2.8.2.10.11.

C13.2.8.2.3. Discrepancy Report Determination. Not all discrepant receipts require submission of discrepancy reports. Receiving activities shall follow the procedures in C13.2.8.1. to determine whether a discrepancy report must be submitted. Use Receipt Transactions Management Codes R, S, and U to identify discrepant receipts that require submission of a discrepancy report. The purpose of the discrepant receipt management codes is to notify the owner in advance that a receipt was

discrepant and that a discrepancy report is being submitted to give additional information relating to the reported item. Never process Receipt Transactions with Management Codes R, S, or U for a discrepant quantity when submission of a discrepancy report is not required. Use Management Codes S and U only for procurement instrument source receipts to identify vendor caused misdirected shipments and contract over shipments. Separate codes apply to these discrepancies, which occur more frequently and are more easily resolved than others, so owners can initiate immediate corrective action before the formal report of discrepancy is received.

C13.2.8.2.4. Receipts Lacking Documentation. When materiel arrives without accompanying documentation, or with inadequate documentation to process the receipt, receiving activities shall use one of the following data sources to develop materiel Receipt Transactions:

C13.2.8.2.4.1. ARI files.

C13.2.8.2.4.2. Authorized procurement delivery documents and vendor packing lists.

C13.2.8.2.4.3. Advance copies of [DD Forms 1348-1A](#) or [1348-2](#), or [DD Form 1149](#)," Requisition and Invoice/Shipping Document."

C13.2.8.2.4.4. Transportation and fiscal records.

C13.2.8.2.4.5. Container markings.

C13.2.8.2.4.6. Advice provided by the owner, the shipper, or the U.S. Customs Inspector's Office upon request of the receiving activity if receipt documentation cannot otherwise be developed.

C13.2.8.2.5. Discrepant Receipt Posting. Normally when receiving activities keep a discrepant receipt in U.S. Government custody, whether or not it is U.S. Government-owned, they shall post the receipt to the total item property record, store the materiel, and update the locator record, and hold the materiel pending receipt of disposition from the owner.

C13.2.8.2.6. Receipts from Outside the Normal Distribution System. When storage activities report receipts outside the normal distribution system for the NSN, the owner shall record the receipt so assets are issued from that site first. Owners shall make disposition of such materiel as quickly as possible. If the materiel is not issuable, the owner shall direct repair induction, reclassification, relocation, or disposal using the appropriate DLMS transaction.

C13.2.8.2.7. Discrepant Receipt - Procurement Instrument Source - General

C13.2.8.2.7.1. Protective Measures. Procurement discrepancies imposing a health/safety hazard, classified risk, etc., may require separate and/or

secure storage. When these situations exist, receiving activities shall take protective measures in accordance with established DoD or DoD Component procedures.

C13.2.8.2.7.2. Receiving Activity Inspection. When acceptance is accomplished at a point other than destination, receiving activities may not re-inspect supplies at destination for acceptance purposes. However, receiving activities shall examine such supplies at destination for identity, damage in transit, quantity, condition (including proper packing/packaging and labeling) and, for subsistence materiel, date packed and expiration date. The U.S. Government's right to litigate a discrepant receipt is not affected by the point of acceptance. Consequently, receiving activities shall report discrepancies detected during the destination examination in accordance with the regulations cited in C13.2.8.1.

C13.2.8.2.7.3. Shipping Procurement Instrument Source Receipts to Reutilization and Marketing. Shipment of procurement instrument source receipts directly to reutilization and marketing is not authorized unless unusual circumstances (e.g., health or safety hazard, etc.) exist and separate/secure storage facilities are not available. When unusual circumstances require the receiving activity to ship materiel directly to the DLA Disposition Services activity (or take other disposal actions as prescribed by the DoD Components), the receiving activity shall first report the receipt using a Receipt Transaction citing SCC L and Management Code R. (Navigate to the link below and enter "management code", then click submit. www.dla.mil/j-6/dlms/eApplications/LOG.NET/UI/Log_Qualifiers/LQHome.aspx). The disposal action shall then be reported using a dual Inventory Adjustment Transaction, DLMS 947I citing SCC H and Management Code M or T.

C13.2.8.2.8. Reporting Discrepant Receipts from Procurement Instrument Source. Receiving activities shall follow these procedures to report receipt of discrepant shipments from procurement instrument sources. Unless otherwise allowed by these procedures, report discrepant shipments from a procurement instrument source to the owner with a Receipt Transaction, citing SCC L for the discrepant quantity. With the exception of the receipt of incorrect items, use a single transaction to report the receipt showing both non-discrepant and discrepant quantities exclusive; multiple discrepancy conditions may exist for a single Receipt Transaction:

C13.2.8.2.8.1. Condition of Materiel. Report the actual discrepant quantity in SCC L.

C13.2.8.2.8.2. Supply Documentation. Absence of the supply documentation should not prevent receipt processing and reporting or later issue of the materiel. Research in accordance with C13.2.8.2.4., to report the receipt. The discrepancy reporting requirements in C13.2.8.1 still apply.

C13.2.8.2.8.3. Misdirected Shipments (improperly addressed by the procurement instrument source). Contact the owner to ensure compliance with the procurement requirements (i.e., inspection, acceptance, etc.). Report the total quantity in the actual condition received (normally SCC A) with a Receipt Transaction citing

Management Code S. Upon receipt of the Receipt Transaction, and prior to posting the receipt as available for issue, owners shall initiate immediate action to resolve the discrepancy. If the owner or CAO/PO directs reshipment/return of a reported receipt without issuing materiel release documentation, the receiving activity shall submit a reversal of the previously submitted materiel Receipt Transaction.

C13.2.8.2.8.4. Overage/Duplicate Shipment. Research the ARI file, receipt, and contract documentation to determine the discrepant quantity. Report confirmed duplicate shipments as discrepant with a Receipt Transaction citing SCC L. When overages are valued above the contract variance clause, or above the excess delivery clause (after considering any allowable variance), report the overage above the allowable variance as discrepant with a Receipt Transaction citing SCC L and Management Code U. Owners shall initiate immediate action to resolve the discrepancy upon receipt of the Receipt Transaction. Overages within the allowable variance or within the excess delivery clause (after considering any allowable variance) are not discrepant. Report the total quantity in the applicable condition, and do not cite a management code for that quantity.

C13.2.8.2.8.5. Packaging Discrepancy. Report the total discrepant quantity as a SCC L receipt. The owner and/or the CAO/PO shall determine whether litigation is required. If litigation is not required the owner shall initiate a DLMS 846A, Asset Reclassification Transaction, to request the transfer of the suspended assets to the appropriate condition.

C13.2.8.2.8.6. Shortages/Nonreceipt of Materiel. Research the ARI file, receipt, and contract documentation to determine the discrepant quantity. For shortages, report the total quantity in the condition received. Except for shortages attributed to transportation discrepancies, the receipt is discrepant only if the shortage exceeds the allowable contract variance. When the receipt is discrepant, cite the management code in the Receipt Transaction. Non-receipts are addressed under C13.3.

C13.2.8.2.8.7. Item Technical Data Marking (includes nameplates, logbooks, operating handbooks, special instructions, etc.). Report the discrepant quantity citing SCC L, and identify and describe the specific technical data discrepancy in the [SF364](#) or DLMS 842A/W, Standard SDR, Follow-up, Correction, Cancellation, & Reconsideration Request. If the owner determines the assets can be issued, the owner shall initiate a DLMS 846A to transfer the suspended assets to the appropriate condition.

C13.2.8.2.8.8. Wrong Item. Report any assets in the shipment that are the correct item in the applicable condition and do not cite the discrepant receipt management code for that quantity. Report the total quantity of the incorrect item received in the Receipt Transaction citing SCC L using a separate Receipt Transaction. If the majority of the assets are the incorrect item, the receiving activity may report the total quantity in SCC L based on internal DoD Component procedure.

C13.2.8.2.8.9. Product Quality Deficiency. It is normally preferable to keep custody of the materiel, whether or not it has been accepted. Report the deficient quantity citing SCC Q in the Receipt Transaction. The owner or CAO/PO shall determine if litigation or informal action with the procurement instrument source should be initiated. The owner shall take action to transfer the assets.

C13.2.8.2.8.10. Transportation Discrepancy. When materiel is accepted by the Transportation Officer, process and report the Receipt Transaction in accordance with procedures cited above for the type of discrepancy that exists (e.g., condition of materiel for damage, etc.).

C13.2.8.2.8.11. Receipts Not Due-In (no ARI file exists).

C13.2.8.2.8.11.1. Receipt Processing. Except for receipt of logistically reassigned items, see guidance in this section for processing receipts of misdirected shipments and overages/duplicate shipments, for which an ARI file is not normally available.

C13.2.8.2.8.11.2. Logistically Reassigned Items. For logistically reassigned items, research all available documentation and item markings to determine proper routing of the receipt. If unable to determine the correct routing, contact the integrated materiel manager (IMM) who shall direct the appropriate routing of the receipt. If the IMM (e.g., the GIM) does not have a recorded due-in, did not initiate the procurement action and/or has a record of a memorandum due-in, and the item was involved in an LR, the GIM should instruct the storage activity to report the receipt to the LIM.

C13.2.8.2.8.12. Other Discrepancies. Receipt reporting shall depend upon the type of discrepancy involved. When unusual circumstances exist, the receiving activity may need to get guidance from the appropriate authority before reporting the receipt or submitting the discrepancy report. See C13.2.8.2., above, for storage and accountability requirements.

C13.2.8.2.9. Discrepant Receipt - Other than Procurement Instrument Source – General

C13.2.8.2.9.1. Identifying the NSN. When a receipt cannot be identified to an NSN, the receiving activity shall attempt to identify the NSN or usage by following the procedures in C13.2.8.2.1., and report the receipt to the owner.

C13.2.8.2.9.1.1. Value Under \$100. If the NSN cannot be identified and the estimated value of the item is under \$100, receiving activities shall not report the receipt to an owner. Ship the materiel directly to reutilization and marketing using a local document number. Keep an accessible record of the transaction document and its backup for 2 years.

C13.2.8.2.9.1.2. Value Over \$100. If the NSN cannot be identified and the estimated value of the item is \$100 or more, the receiving activity shall

contact the manager of like-items to determine disposition. If GSA is the manager of like items, process in accordance with the procedures for receipts not due-in. If the manager of like-items can identify the NSN, the manager shall direct the receiving activity to submit the receipt and SDR to the owner. If the IMM of like-items cannot identify the NSN, the IMM shall give disposition instructions to the reporting activity. These instructions shall include an item identification number (part number, etc.) for reporting the receipt and submitting the SDR. If the owner directs shipment to reutilization and marketing, the owner shall keep an accessible record of the transaction and its backup for 2 years.

C13.2.8.2.9.2. Discrepancy Reporting. Unless otherwise allowed by these procedures, receiving activities shall report receipts of discrepant shipments from a non-procurement instrument source to the owner. For discrepant quantities, cite the SCC that most accurately describes the condition of the materiel in the Receipt Transaction. Classify and report the materiel using SCC K when the actual condition cannot be determined. Include Management Code R when a discrepancy report is required unless prescribed otherwise in this chapter.

C13.2.8.2.10. Reporting Discrepant Receipts - Other than Procurement Instrument Source. Receiving activities shall follow these procedures to report receipt of discrepant shipments from non-procurement instrument source. With the exception of the receipt of wrong items, use a single Receipt Transaction to report the receipt showing both non-discrepant and discrepant quantities in their appropriate SCC. The following discrepancy categories are not mutually exclusive; multiple discrepancy conditions may exist for a single receipt:

C13.2.8.2.10.1. Condition of Materiel

C13.2.8.2.10.1.1. No ARI File Exists. When inspection of inter-DoD Component receipts reveals materiel to be SCC H and no ARI file exists, automatically ship discrepant materiel valued at less than \$100 per item direct to the reutilization and marketing activity or take other automatic disposal action based on criteria issued by the DoD Components. This includes expired Type I shelf-life materiel which has passed the expiration date regardless of value. When taking automatic disposal action, cite SCC H and Management Code M or T in the Receipt Transaction, in addition to the discrepant receipt management code, for the discrepant quantity. To establish an audit trail when materiel is condemned upon receipt and shipped directly to reutilization and marketing, cite the disposal turn-in transaction number in the Receipt Transaction in addition to the original transaction number.

C13.2.8.2.10.1.2. Discrepancy Reporting. Report discrepant quantities other than those mentioned above citing the applicable SCC in the receipt, or SCC K when the condition cannot be determined.

C13.2.7.8.10.2. Supply Documentation. Absence of the supply documentation should not preclude receipt processing and reporting or later issue of the

materiel. Research in accordance with C13.2.8.2.4. to report the receipt. Discrepancy reporting requirements still apply.

C13.2.8.2.10.3. Misdirected Shipments (improperly addressed by the supply activity). Report misdirected shipments as receipts to the cognizant IMM. The IMM shall make disposition using DLMS 940R, Materiel Release.

C13.2.8.2.10.4. Overage. Report the total quantity received in the applicable condition.

C13.2.8.2.10.5. Packaging Discrepancy. Report the total quantity received in the applicable condition and schedule the discrepant quantity for preservation/packaging in accordance with the DoD Component criteria.

C13.2.8.2.10.6. Shortages/Nonreceipt of Materiel. For shortages, report the total quantity received in the applicable condition. The owner shall initiate any necessary financial adjustment action. Non-receipts are addressed under C13.3.

C13.2.8.2.10.7. Item Technical Data Marking (includes nameplates, logbooks, operating handbooks, special instructions, etc.). Report the discrepant quantity using a receipt citing SCC D. Identify and describe the specific technical data discrepancy in the SDR for owner evaluation. If the owner determines the asset can be issued, the owner shall initiate action to transfer the asset to the appropriate condition using DLMS 846A.

C13.2.8.2.10.8. Wrong Item. Report receipt of the total quantity of the incorrect item in the applicable condition citing the NSN of the incorrect item received and the discrepant receipt management code for the quantity. If both correct and incorrect items are received in the same shipment, submit a separate Receipt Transaction for the correct item.

C13.2.8.2.10.9. Product Quality Deficiency. An SCC Q entered in an ARI file shows that the receipt is related to a reported product quality deficiency. Report receipt of this materiel in SCC Q and do not cite a management code. Based on the results of the inspection or technical/engineering analysis, owners shall direct the appropriate materiel disposition.

C13.2.8.2.10.10. Transportation Discrepancy. When the Transportation Officer turns the materiel over, report the receipt in accordance with the procedures cited above for the type of discrepancy which exists (e.g., condition of materiel for damage etc.).

C13.2.8.2.10.11. Receipts Not Due-In (no ARI file)

C13.2.8.2.10.11.1. GSA Managed Items. GSA does not normally authorize return of assets to DoD storage activities. Receipts not due-in are, therefore, considered DoD-owned assets that have not been reported to GSA under the materiel returns program. The DoD Components shall establish internal procedures for

recording these assets on a storage activity record and an owner record within the DoD Component for later issue, excess reporting under the materiel returns program, or release for reutilization and marketing. In the absence of guidance from the DoD Components for reporting receipt of unauthorized return of GSA assets to their Component, DLA storage activities shall receipt the assets to the local Base Operating Supply System (BOSS) for use by the depot. If the materiel cannot be used locally send it to disposal. This procedure ensures the assets are recorded on a DoD record.

C13.2.8.2.10.11.2. DoD-Managed Repairable Items. Report the Receipt Transaction to the manager of the shipping DoD Component. Do not include a discrepant receipt management code in the transaction. For materiel shipped between wholesale storage activities, report the receipt citing Reason for Materiel Receipt/Return Code N. IMMs receiving transactions reporting returns not-due-in of phase II repairables, for which they are not the IMM, shall follow the materiel returns program procedures to report/ship the materiel as prescribed by the IMM.

C13.2.8.2.10.11.3. DoD-Managed Consumable Items. Report receipt to the IMM in the applicable condition and do not include a discrepant receipt management code in the transaction. However, the DoD Components may prescribe reporting to their own item manager for returns from their own Component activities.

C13.2.8.2.10.12. Other Discrepancies. Receipt reporting shall depend upon the type of discrepancy involved. When unusual circumstances exist, the receiving activity may need to get guidance from the owner before reporting the receipt or submitting the discrepancy report.

C13.2.8.3. Resolution of Reported Receipt Discrepancies.

C13.2.8.3.1. Owner Accountability Records. Owners shall maintain accurate materiel accountability records and audit trails for reported receipts with evidence of a supply discrepancy. Resolution of these discrepancies requires the establishment of interfaces among the materiel accountability, procurement, financial accounting, and discrepancy reporting systems.

C13.2.8.3.2. Owner Processing Discrepant Transactions. When discrepant receipts are reported, owners shall process the transactions and complete the research required to resolve the discrepancy. When materiel received from a procurement instrument source shall be kept in the wholesale inventory, coordinate with the CAO/PO for a contract modification that shall recoup any administrative costs and any additional second destination transportation costs or onward shipment (redistribution) costs incurred by the U.S. Government as a result of the discrepancy. For all receipt discrepancies, ensure that procurement/supply due-in records and related financial accounts (including in-transit) are corrected to show any new receipt status and transmit updates to ARI to the storage activities involved, as required. Care must be taken to suppress ARI transaction output if the corresponding receipt has already been reported (e.g., for overages or misdirected shipments being kept where delivered).

C13.2.8.3.3. Owner Evaluation Data. Owners shall develop management evaluation data for contract overages and vendor caused misdirected shipments for use in identifying trends or indications of system problems and in initiating corrective action. When the same discrepancy is repeatedly reported on shipments from a given procurement instrument source, the owner, through the CAO/PO, shall advise the source of the error and request action be taken to correct its repeated occurrence. When a procurement instrument source continues to commit the same error, initiate action to consider inclusion on the Awards Review List or other disciplinary action.

C13.2.9. Maintaining Accountability During Maintenance Actions

C13.2.9.1. Responsible Activity Actions. When responsibility for keeping the property accountability record for DoD-owned property has been assigned to an activity other than the owner, the responsible activity shall execute the owner's actions set forth in this section.

C13.2.9.2 Applicability. These procedures apply for returns to inventory including unused materiel, relocations of materiel for maintenance, and receipts from assembly, disassembly, reclamation, conversion, modification, repair and destructive or nondestructive test/evaluation consigned by the Department of Defense, other U.S. Government (non-DoD) agency, or commercial activities.

C13.2.9.3 Exclusions. These procedures exclude repair and return materiel owned below the wholesale distribution system; however, storage activities shall maintain visibility and the property accountability record for these assets pending issue to maintenance and upon their return from maintenance.

C13.2.9.4. Requirements

C13.2.9.4.1. Dues-In and ARI. Owners (principals for maintenance by DMISA) shall establish a DLMS 527D (Due-In) when materiel is being returned from field activities to wholesale storage activities or to commercial activities for maintenance. Also, send a DLMS 527D (ARI) to receiving Government storage activities. These actions shall be done upon receipt of MRP transactions, or equivalent intra-service documents, reporting return of materiel. The DoD Components may delegate the ARI requirement to intermediate level or transshipment activities.

C13.2.9.4.2. Materiel Relocation. When owners direct relocation of materiel from a remote storage activity to the storage activity collocated with the maintenance activity, they shall establish a DLMS 527D (Due-In) for the intransit materiel and send a DLMS 527D (ARI) to the receiving storage activity following Chapter 12.

C13.2.9.4.2.1. Receiving Storage Activity Reporting. Receiving storage activities shall report receipt of reparable materiel based on the information contained in the ARI file. If an ARI file is not available, report the receipt in accordance with C13.2.8.2.7.10.1. for processing receipts not-due-in for reparable items.

C13.2.9.4.2.2. Inter-DoD Component Agreements. When materiel is scheduled for organic maintenance by DMISA or other inter-DoD Component agreement, the agreement shall specify the materiel control requirements. The agreement shall also specify to include whether the storage activity shall report returns from maintenance to the owner (Principal) as receipts under this chapter, or as transfers from SCC M under the Chapter 7.

C13.2.9.5. DoD Component Actions. Each DoD Component shall ensure that:

C13.2.9.5.1. Owned Inventory Accounting. Owned inventory in the hands of the Department of Defense, other Government (non-DoD), and commercial activities, is properly accounted for under the provisions of Chapters 6, 7, 13, and 14 of this volume and, for commercial maintenance, the provisions of the Federal Acquisition Regulation. This includes returns from field activities for repair and reissue as wholesale inventory. The DoD Components shall prescribe use of any required internal codes to meet this requirement (Responsibility of the owner (Principal for maintenance by DMISA)).

C13.2.9.5.2. Property Accountability Records. Total item property records for materiel in the hands of maintenance activities are maintained and adjusted based on the quantity of materiel actually returned and shall support the [DoD 7000.14-R](#), "Department of Defense Financial Management Regulation", accounting and reconciliation requirements (Responsibility of the owner (Principal for maintenance by DMISA)).

C13.2.9.5.3. Commercial Maintenance Contracts. Contracts for commercial maintenance require the commercial activity to report or acknowledge receipt and report shipment or condemnation of materiel to the contracting officer (Responsibility of the agent for maintenance by DMISA).

C13.2.9.5.4. Procurement/Supply Interface. Any needed interface between the procurement and supply operations/functions exists to ensure that reported data is sent to the owner (Responsibility of the agent for maintenance by DMISA). Arrangements may be made for commercial activities to report directly to the contracting officer and/or the owner using DLMS transactions. Reported data affecting inventory balances is recorded in the total item property record (Responsibility of the owner (Principal for maintenance by DMISA)).

C13.2.9.6. Item Owner Actions. Owners shall establish due-in records for expected returns from commercial and Government maintenance activities and provide ARI to the storage activities to receive the materiel under Chapter 12. Storage activities shall report receipts under this section.

C13.2.9.7. Issue from Commercial Activity. When materiel is issued to a customer directly from a commercial activity, ensure that appropriate supply transactions are processed to establish the property accountability and financial

accounting audit trails. Depending on the Component system business rules, this may require either a receipt and issue, or a condition code change and issue.

C13.2.9.8. Condemned Materiel. When materiel is condemned by maintenance activities, ensure the condemnation action is recorded (inventory adjustment-decrease) to adjust the DoD inventory and financial accounts.

C13.2.9.9. Reclaimed Items

C13.2.9.9.1. Identification of Serviceability. When reclamation activities do not have adequate facilities to test and classify the serviceability condition of reclaimed assets, activities shall identify such assets as SCC R (Suspended Reclaimed Items Awaiting Condition Determination). When receiving storage activities determine that immediate classification of such SCC R assets is not possible, they shall ensure assets are checked/tested and classified to actual condition within established parameters.

C13.2.9.9.2. Assigning Condition Code. When reclamation activities cite an actual SCC (i.e., other than R) for returned materiel, storage activities shall cite that condition code when recording and reporting the receipt. However, if inspection upon receipt reveals that the condition assigned by the reclamation activity is incorrect, the storage activity shall record and report the receipt citing the actual condition to which the item is classified or SCC K if the actual condition cannot be determined. Classify materiel reported in SCC K to the actual condition within established parameters.

C13.2.10. Loaned Materiel

C13.2.10.1. Materiel Inspection. Receiving activities shall inspect loaned materiel upon receipt. Submit a Receipt Transaction in accordance with C13.2., citing Reason for Materiel Receipt/Return Code H, to provide information about the condition and quantity of the returned loaned materiel.

C13.2.10.2. Resolution of Loaned Materiel. The owner is responsible for final determination and resolution of returned U.S. Government property from loan. Establish controls to ensure the materiel is returned in an appropriate condition, i.e., as good as or better than the condition of the original loan issue. Take appropriate action to resolve any discrepancies and ensure reimbursement to the loaning activity.

C13.2.11. Logistics Reassignment Receipt Processing after Effective Transfer Date

C13.2.11.1. Procurement Instrument Processing. The storage activity shall process procurement instrument source receipts for LR materiel received after 1 year past the effective transfer date (ETD), in the same manner that they process procurement instrument source receipts received during the ETD to 1-year period.

C13.2.11.2. Storage Activity Actions. For receipt of materiel that has been logistically reassigned, after the ETD, the receiving storage activity shall perform the following:

C13.2.11.2.1. Report Receipts. Report receipts of items having ARI files, in accordance with C13.2.

C13.2.11.2.2. Report Procurement Instrument Source Receipt. Report procurement instrument source receipts for which there is no ARI file in accordance with the guidance in C13.2.8.2.4 for processing receipts not-due-in.

C13.2.11.2.3. Report Non-procurement Instrument Receipt. Report non-procurement instrument receipts for which there is no ARI file in accordance with the guidance in C13.2.8.2.4 for processing receipts not-due-in.

C13.2.11.3. LIM Actions. The LIM shall do the following actions:

C13.2.11.3.1. Process Storage Activity. Process the storage activity initiated Receipt Transactions to reduce the due-in record and record assets on the LIM record for the quantity received.

C13.2.11.3.2. Process Logistics Transfer Transaction. Process the associated logistics transfer/decapitalization transaction, adjustment transaction, and LR storage ownership transfer transaction in accordance with Chapter 9.

C13.2.11.3.3. Record Litigation Assets. For materiel received for which litigation is required, record assets on the LIM owner record in SCC L and reduce the due-in record.

C13.2.11.3.3.1. At this time, no action shall be taken by the LIM to remove or change the GIM's memorandum due-in.

C13.2.11.3.3.2. When litigation is completed and the materiel is reclassified to an issue condition, process the associated adjustment transaction and LR transfer/decapitalization transactions in accordance with Chapter 9.

C13.2.11.3.3.3. If materiel is returned to the contractor due to litigation proceedings notify the GIM in accordance with Chapter 9.

C13.2.11.3.3.4. The LIM must take appropriate action to reestablish a due-in, in accordance with Chapter 12 if the materiel being returned to the contractor for deficiency correction shall eventually be returned to the LIM.

C13.2.11.4. Reject Receipt as Appropriate. If a procurement instrument source receipt for an LR item is incorrectly reported to the LIM or the GIM, and the LIM or GIM does not have a recorded due-in, did not initiate the procurement action, and/or has a record of a due-in or memorandum due-in and is able to determine the appropriate reporting for the receipt, the LIM or GIM should reject the receipt back to the

initiator using DLMS 824R, Reject Advice, and citing Reject Advice Code AB (Navigate to the link below and enter advice code AB in the “Enter a Specific Data Code to Search for” text box, click “Search”).

www.dla.mil/j-6/dlms/eApplications/LOG.NET/UI/Log_Qualifiers/LQHome.aspx

C13.3. INQUIRY ON IN-TRANSIT DUE-INS

C13.3.1. Submission Timeframe. When a maximum of 45 calendar days have elapsed since the shipping date shown in shipment notification, and receipt of the total quantity has not been reported, the owner shall submit a Receipt Inquiry Transaction for information on the in-transit quantities to the storage activities designated to receive the materiel. (Extension of the 45 calendar day timeframe is authorized when long in-transit times are involved.)

C13.3.2. Tracer Action. When the storage activity response shows that the materiel has not been received, initiate any shipment tracer and/or discrepancy reports required under the procedures cited in C13.2.8. Coordinate with the CAO/PO for in-transit contract receipts. Storage activities shall submit shipment tracers and discrepancy reports for materiel not received as shown in the DoD Component implementing procedures or when directed to do so by the owner.

C13.4. STORAGE ACTIVITY RESPONSE TO INQUIRY ON MATERIEL RECEIPT¹

C13.4.1. Materiel Receipt Previously Processed. When materiel has been received, and a receipt was previously submitted, storage activities shall submit a duplicate Receipt Transaction citing Advice Code 3P.

C13.4.2. Receipt in Process. When the storage activity has the receipt in process, storage activities shall reply using the Response to Inquiry Transaction citing Advice Code 3K

C13.4.3. No Receipt but Record of Due-In. When the storage activity has no receipt in process but there is an ARI file, the storage activity shall reply using the Response to Inquiry Transaction citing Advice Code 3M.

C13.4.4. No Receipt and No Record of Due-in. When the storage activity has no receipt in process and no record of a ARI file, the storage activity shall reply using the Response to Inquiry Transaction citing Advice Code 3N.

C13.5. ARMY EXCHANGE PRICING PROCESS

C13.5.1. The Army approach to the Exchange Pricing (EP) interim approach is a multi-system functionality implementation. EP employs a dual pricing system for repairable NSN items based upon Standard Price (latest acquisition cost plus cost recovery rate) and Exchange Price (latest repair cost plus cost recovery rate) and a

¹ Refer to ADC 313. DoD components must provide DLA Logistics Management Standards office with their Component implementation date for ADC 313.

“buy one – return one” relationship with the customer. That is, a qualified exchange pricing customer buys at the Exchange Price and pays a penalty if a reparable is not turned-in within a specified period of time from the issue date. This process is applicable to the Army customers and Army-managed materiel only; other Services shall continue to pay Standard Price and receive 65 percent credit exchange upon receipt of carcass by the Army primary inventory control activity (PICA).

C13.5.2. Once an item of supply is identified for a national repair program and the national item identification number (NIIN) has an established Exchange Price, all requisitions for the item shall be priced at the Exchange Price if the customer is an authorized EP customer.

C13.5.3. When a requisition submitted to the Supply Support Activity (SSA) is processed by the Standard Army Retail Supply System (SARSS), SARSS shall determine if both the customer DOD activity address code (DoDAAC) is an EP customer, and the NIIN has an established Exchange Price. If the customer is an EP customer the requisition shall be updated to include the EP Indicator. As this transaction is processed through the Army supply system, middleware, Funds Control Module (including EP Tracking) DAAS, Commodity Control Supply System (CCSS), and Army Logistics Modernization Program (LMP), the EP Indicator shall be used to identify the transaction as EP related. All the legacy systems shall continue processing the MILS transactions, LMP shall process DLMS transactions that are converted by DLA Transaction Services.

C.13.5.4. All related supply transactions prepared by the Army shall carry and perpetuate the EP Indicator. As a result of the EP implementation the following transactions shall be impacted, Requisition, Requisition Modifier, Requisition Follow-Up, Materiel Release Order and Supply Status. The returns process shall also process EP related transactions. The Materiel Receipt transaction shall be generated by SARSS for all returns of EP NIINs, and shall include an EP Type of Credit indicator for Unserviceable credit when applicable, as well as an EP Conversion Indicator to identify the need to provide credit according the pre-EP credit policy, which shall last for 60 calendar days following the implementation of Exchange Pricing.

C.13.5.5. If the return is in an un-repairable condition code or the item is not returned within the established timeframe (Delta Delay Days), the national level systems (LMP, CCSS) shall create an obligation adjustment based on the receipt from Middleware Funds Control Module of a materiel returns supply status (Delta Bill Trigger) transaction. As a result of processing the delta bill trigger the national systems shall create the logistics/interfund bill transaction with an EP Indicator and Type Bill code to identify the specific type of Exchange Pricing bill to the Army financial systems.

C13.6. OPTIONAL INTRA-SERVICE USE OF RECEIPT FOR MATERIEL PROVIDED TO CONTRACTORS AS GOVERNMENT FURNISHED MATERIEL.

Under the Government Furnished Materiel (GFM) business process contractors are authorized to receive specific items and quantities of GFM from Government supply sources. Materiel may be issued to the contractor based upon a contract schedule/bill of material

(BOM) or issued in response to a requisition made by the contractor or a responsible Government representative. It is normally required that the contractor (or authorized Government representative) submit a materiel receipt acknowledgment (MRA) Transaction to the ICP under MRA procedures (refer to Chapter 10, C10.2.5.6). However, on an intra-Service basis, if the Service requires the contractor to send a Receipt Transaction to their issuing ICP rather than an MRA, the contractor must cite the DoD contract number which authorized the provision of GFM. This establishes GFM accountability to the contract. The GFM contract number, and call/order number, when applicable, is required in addition to the controlling document number for the Receipt Transaction. Under the MRA exclusions, MRA is not required for shipments to contractors, commercial, or industrial activities which are receipt reported to the owning ICP.

C14. CHAPTER 14

ISSUE, LOAN, DEMAND, AND SINGLE MANAGER FOR CONVENTIONAL AMMUNITION FREEZE/UNFREEZE ACTION

C14.1. GENERAL

C14.1.1. This chapter provides a standard procedure for processing Issue, Demand, and Single Manager for Conventional Ammunition (SMCA) Freeze/ Unfreeze Action. This chapter also addresses the materiel loan process.

C14.1.2. Transactions. This chapter addresses the procedures applicable to the following Defense Logistics Management System (DLMS) transactions, identified by their Accredited Standards Committee (ASC) X12 beginning segment report type code. Other DLMS formats, such as extensible markup language (XML), are also available. See the DLA Logistics Management Standards Website for available formats www.dla.mil/j-6/dlmsso/elibrary/Transformats/140_997.asp. The corresponding Military Standard Transaction Reporting and Accountability Procedures (MILSTRAP) legacy 80 record position transaction functionality is identified for information purposes in a mixed Defense Logistics Standard System (DLSS)/DLMS environment.

C14.1.2.1. Issue Transaction. Issue Transaction is DLMS 867I Issue, identified by ASC X12 beginning segment (1/BPT04/20) Report Type Code 01 – Product Transfer. This transaction provides MILSTRAP legacy Document Identifier Code (DIC) D7_ functionality. The Issue Transaction function is further broken down by the 2/PTD01/10 Product Transfer Type Code which provides the functionality of the third position or the MILSTRAP legacy DIC. Table C14.T1 shows the specific product transfer type code corresponding to the MILSTRAP legacy DICs.

Table C14.T1. Product Transfer Type Codes

MILSTRAP Legacy DIC	MILSTRAP Title	DLMS 867I PTD01 PRODUCT TRANSFER TYPE CODE
D7A	Issue (Own Service/Agency)	SS
D7B	Issue (DoD Activities)	BD
D7C	Issue (Non-DoD Activities)	BC
D7D	Issue (Grant Aid)	BE
D7E	Issue (Foreign Military Sales)	BF
D7G	Issue (Destructive Test/Evaluation)	BG

Table C14.T1. Product Transfer Type Codes

MILSTRAP Legacy DIC	MILSTRAP Title	DLMS 867I PTD01 PRODUCT TRANSFER TYPE CODE
D7H	Issue (Furnished Materiel for Consumption)	BH
D7J	Issue (Reutilization and Marketing)	BI
D7K	Issue (Relocation)	BJ
D7L	Issue (Assembly/Disassembly/Reclamation/Conversion/Modification)	BK
D7M	Issue (Repair or Nondestructive Test/Evaluation)	BL
D7N	Issue (Loan)	BM
D7P	Issue (Returned Purchases)	BN
D7P	Issue (Designated Items)	BO
D7R	Issue (Exchange Items)	BR
D7Z	Issue (Other)	BQ

C14.1.2.2. Demand Transaction. Demand Transaction is DLMS 867D Demand Reporting identified by beginning segment (1/BPT04/20) Report Type Code TO – Demand Report. This transaction provides MILSTRAP legacy DIC DHA functionality.

C14.1.2.3. Single Manager for Conventional Ammunition Freeze/Unfreeze Action Transaction. SMCA Freeze/Unfreeze Action Transaction is DLMS 846F SMCA Freeze/Unfreeze Action, identified by beginning segment (1/BIA02/20) Report Type Code ZB – Conventional Ammunition Suspension Report. This transaction provides MILSTRAP legacy DIC DA1/DA2 functionality.

C14.2. ISSUE

C14.2.1. General

C14.2.1.1. This section provides a standard procedure for processing Issue information to owner/inventory control point (ICP) for the purpose of:

C14.2.1.1.1. Updating the owner/ICP record.

C14.2.1.1.2. Recording the appropriate financial transaction.

C14.2.1.1.3. Providing a basis for billing the customer.

C14.2.1.2. Processing points receiving requisitions, passing actions, follow-ups and cancellations, irrespective of format or method of transmission, shall process such transactions in accordance with their respective internal procedures.

C14.2.1.3. Internal processing methods may vary due to automated capability and related procedures; however, the formats for output from processing point to requisitioner and between processing points will use the formats prescribed in this manual.

C14.2.1.4. Issue transactions are used to convey issue data to the ICP. Issue Transactions resulting from a backorder release are identified by Issue Transaction related Management Code M.

C14.2.1.5. Materiel from an Army Medical Materiel Agreement (AMMA) site may be issued using local catalog identification numbers.

C14.2.2. Maintaining Accountability During Maintenance Actions

C14.2.2.1. Applicability. When responsibility for maintaining the property accountability record for DoD-owned property has been assigned to an activity other than the owner, the responsible activity shall execute the owner's actions set forth in this section.

C14.2.2.1.1 These procedures apply to issues from inventory for assembly, disassembly, reclamation, conversion, modification, repair, and destructive or nondestructive test/evaluation consigned by the Department of Defense, other Government (non-DoD) Agencies, and commercial activities. Transfers to Supply Condition Code (SCC) M are covered under Chapter 7.

C14.2.2.1.2. These procedures exclude repair and return of materiel owned below the wholesale distribution system. However, storage activities shall maintain visibility and the property accountability record for these assets pending issue to maintenance and upon their return from maintenance.

C14.2.2.2. Requirements

C14.2.2.2.1. Collocated Storage Activity. When the maintenance activity is collocated with a DoD storage activity, owners shall direct materiel into maintenance only from the collocated storage activity. When necessary, owners shall relocate materiel from remote storage activities to the storage activity collocated with the maintenance activity using DLMS 940R, Materiel Release. The action shall be posted to the property accountability record using either the Issue Transaction (Issue Relocation) or DLMS 945A, Materiel Release Advice, showing relocation between storage activities without change in ownership. The due-in and Advance Receipt Information (ARI) for controlling such relocations, which are processed under [Chapter 13](#), may include Management Code V to identify materiel for immediate issue to transfer to maintenance. The DoD Components may apply processing techniques triggered by

Management Code V to preclude physical storage of the materiel pending its release to the maintenance activity.

C14.2.2.2.2. Organic Maintenance. When materiel is scheduled for organic maintenance by Depot Maintenance Inter-Service Support Agreement (DMISA) or other inter-DoD Component agreement, the agreement shall specify property accountability and materiel control requirements. The agreement shall also indicate whether the owner (Principal) will direct the issue of materiel to the maintenance activity under this section or the storage activity will transfer the materiel to the maintenance activity based on the repair schedule and report the transfer to SCC M under Chapter 7.

C14.2.2.2.3. DoD Component Actions. Each DoD Component shall ensure that:

C14.2.2.2.3.1. Owned inventory in the hands of the Department of Defense, other Government (non-DoD), and commercial activities is properly accounted for under the provisions of [Chapter 6](#), Chapter 7, Chapter 12, Chapter 13 and, for commercial maintenance, the provisions of the Federal Acquisition Regulation. This includes returns from field activities for repair and reissue as wholesale inventory. The DoD Components shall prescribe use of any required internal codes to meet this requirement. (Responsibility of the owner (Principal for maintenance by DMISA).)

C14.2.2.2.3.2. Total item property records for materiel in the hands of maintenance activities are maintained and adjusted based on the quantity of returned materiel and shall support the [DoD 7000.14-R](#) "Department of Defense Financial Management Regulation" accounting and reconciliation requirements. (Responsibility of the owner (Principal for maintenance by DMISA).)

C14.2.2.2.3.3. Contracts for commercial maintenance require the commercial activity to report or acknowledge receipt and report shipment or condemnation of materiel to the contracting officer. (Responsibility of the agent for maintenance by DMISA.)

C14.2.2.2.3.4. Any needed interface between the procurement and supply operations/functions exists to ensure that reported data is sent to the owner. (Responsibility of the agent for maintenance by DMISA.) Arrangements may be made for commercial activities to report directly to the contracting officer and/or the owner using DLMS transactions.

C14.2.2.2.3.5. Reported data affecting inventory balances is recorded in the total item property record. (Responsibility of the owner (Principal for maintenance by DMISA).)

C14.2.2.2.4. Owners (Principals for maintenance by DMISA) shall issue materiel from storage for maintenance action using the process in subparagraph C14.2.2.1. Issues should be posted to the property accountability record using either the Issue Transaction, or an image of DLMS 945A. Include any internal coding needed for proper financial accounting in the transaction.

C14.2.3. Issue Supply Condition Code Q Materiel to DLA Disposition Services Field Office. When an inspection or technical/engineering analysis reveals a product quality deficiency that prohibits further DoD use of the materiel, the ICP will direct the transfer of the materiel to the DLA Disposition Services Field Office in SCC Q. Disposal release orders and related issue transactions for this materiel must cite either Management Code O (alpha) to identify deficient materiel that does not require mutilation or Management Code S to identify deficient materiel that requires mutilation. DLA Disposition Services will perform mutilation in accordance with existing guidance for the national stock number (NSN)/type of materiel. The ICP should identify to DLA Disposition Services any unique instructions for disposal requiring specific methods or information regarding hazardous contents contained in the item.

C14.2.4. Issue Transactions for Relocation Between DLA Disposition Services Field Offices. Refer to chapter 16 for procedures for relocation between disposition services field offices.

C14.3. BACKORDER TRANSACTIONS. Backorder transactions are not considered essential to supply operations under DLMS (consensus reached by the DLMS Supply Process Review Committee (PRC)). Accordingly there is no DLMS backorder transaction. Under legacy MILSTRAP, Backorder transactions may be used to report establishment or cancellation of a backorder to ICPs¹. MILSTRAP legacy Backorder transactions are identified by the DIC DG series transactions.

C14.4. DEMAND TRANSACTIONS. The Demand Transaction may be used between supported activities and ICPs to report the establishment or cancellation of supply system demands, or may be used by ICPs as a technique for recording and accumulating demands for NSN items resulting from processing DLMS requisitions, passing orders, or other forms of supply system demands.

C14.5. LOAN TRANSACTIONS

C14.5.1. When authority is given to loan Government-owned materiel, supporting documentation pertaining to the terms and conditions of the loan shall be maintained in a manual jacket file. As a minimum, the file should contain appropriate records to provide information on the purpose of the loan/authorization; location(s) of the materiel; condition of materiel at time of loan; loan duration; quantity; and value of loaned materiel.

C14.5.2. If accountability is dropped, the Issue Transaction (Loan) shall be used to loan materiel from depot inventory to authorized recipients. Some centralized systems do not use Issue Transactions for effecting issues; however, the applied method should show the issue of loan materiel for audit and accountability purposes. For a decentralized system, the Issue Transaction, if created by other than the ICP, may be used.

¹ Backorder transactions were eliminated from DLMS by intent after coordination with the DoD Supply Process Review Committee (SPRC).

**C14.6. SINGLE MANAGER FOR CONVENTIONAL AMMUNITION
FREEZE/UNFREEZE ACTIONS**

C14.6.1. Processing of DLMS 846R, Location Reconciliation Request transactions such as mismatched record reconciliation requests or materiel release denials (DLMS 945A, Materiel Release Advice) may require the SMCA to freeze and, when resolved, to unfreeze wholesale assets at a specific storage activity for a given stock or part number, ownership/purpose code, and SCC.

C14.6.2. When freeze or unfreeze actions are taken based on C14.6.1, the SMCA shall provide the SMCA Freeze/Unfreeze Action Transaction to the owning DoD Component ICP for update of the ICP wholesale financial accountable records.

C15. CHAPTER 15

INSTALLATION CLOSURE PROCEDURES

C15.1. GENERAL. This chapter provides procedures and specifies timeframes for installation closures. They are intended to systematically curtail supply support, transfer mission-essential materiel, transfer excess materiel, and redirect mission-essential requisitions for or from activities affected by installation closures. Included are procedures for reporting all installation-owned property not to be transferred with the mission to new location(s).

C15.2. APPLICABILITY AND SCOPE. These procedures and timeframes apply to all DoD installations, both CONUS and OCONUS; DoD tenant and satellite activities; DoD inventory control points (ICP); DoD integrated materiel managers (IMM); and to GSA activities processing reports for materiel no longer required as a result of an installation closure.

C15.3. EXCLUSIONS. In addition to exclusions cited in Chapter 11, the procedures in this chapter do not apply to the following:

C15.3.1. Inter-departmental and intra-departmental purchasing operations.

C15.3.2. Forms and publications. (However, use the DLMS 511R, Requisition when submitting requirements for these items to GSA and Navy. See Chapter 4 for requisitioning procedures.)

C15.3.3. Communications security (COMSEC) equipment, COMSEC aids (keying materiel), and all items including classified components, individual elements, and repair parts that are classified and designated "crypto", or that are normally handled through crypto channels.

C15.3.4. Related personal property reportable to GSA as a part of a real estate package. Related personal property is classified as any property that is:

C15.3.4.1. An integral part of real property or is related to, designed for, or specially adapted to functional or productive capacity of real property and removal of this personal property would significantly diminish the economic value of real property. Normally, common use items, including, but not limited to, general purpose furniture, utensils, office machines, office supplies, or general purpose vehicles are not considered related personal property.

C15.3.4.2. Determined by GSA to be related to real property.

C15.3.4.3. Installed property (Class II Plant Property).

C15.3.4.4. Real property.

C15.4. INSTALLATION CLOSING PROCEDURES

C15.4.1. Stratification of Inventory

C15.4.1.1. Installation Procedures. Do an inventory of all installation-owned property upon receipt of a confirmed closure date. The inventory shall include, but not be limited to, nonconsumable items (recoverable/capitalized assets and assets on table of allowances) and consumable items (assets on working capital fund records). Each designated account shall maintain its identity. Stratify an inventory applicable to each designated account into three classes of property:

C15.4.1.1.1. Mission-essential – to be transferred to a new location with the mission.

C15.4.1.1.2. Not mission-essential – required for local operations during the period prior to closure.

C15.4.1.1.3. Excess to operational needs.

C15.4.1.2. Tenant and Satellite Activities. Each tenant and/or satellite activity having custody of installation-owned property shall return that property to the installation. Accountable records shall show the returns. Use procedures in subparagraph C15.4.1.1 to inventory and stratify tenant-owned and satellite-owned property.

C15.4.1.3. Working Capital Fund. Relocate the DoD Component managed working capital fund items with the mission, if mission-essential, or redistribute within the DoD Component working capital funds. Relocate IMM items with the mission, if mission-essential, or report to the IMM for disposition instructions.

C15.4.2. In-Process Requisitions

C15.4.2.1. Requisition Review. Simultaneously with doing the inventory, do a review of the installation requisitions. Identify requisitions that shall be:

C15.4.2.1.1. Continued for shipment to the unit's relocation site.

C15.4.2.1.2. Continued for operational requirements until closure.

C15.4.2.1.3. Canceled as excess to operational needs. Do cancellation by single-line cancellation if time permits. See [Chapter 4](#) for requisition cancellation procedures.

C15.4.2.2. Sixty-Day Review. Sixty calendar days prior to closure date, review all requisitions again for need. If required, identify requisitions for shipment to the relocation site. Use single-line requisition cancellation procedures to cancel requisitions not required. When time is insufficient to effect single-line cancellations, use the mass or universal cancellation procedures under Chapter 4.

C15.4.3. Disposition of Inventory

C15.4.3.1. Time-Phased Closing Schedule. The activity being closed shall develop a time-phased schedule to transfer mission-essential property to the new mission location(s). The schedule shall plan movement of property at the earliest date without impeding the mission prior to transfer. Transfer mission-essential property to new location(s) after transfer of the mission only in those circumstances where mission-essential items are required, up to and including the last day prior to mission transfer.

C15.4.3.2. Review of Non-Mission-Essential Items. In actions involving an installation closure, review and process all items not mission-essential under provisions of [DoD Directive 5410.12](#), Economic Adjustment Assistance to Defense-Impacted Communities. Begin initial review of installation-owned items immediately upon completion of the inventory, including items identified as excess and items identified as being necessary for operation of the installation prior to closure. Using these item lists as the basis, make preliminary identification of related personal property as defined by the DoDD 5410.12.

C15.4.3.3. Review of Host Country Agreements. In actions involving closure of OCONUS installations, review and process all items that are not mission-essential and/or items that will not be transferred with the activity under agreements between the United States and host country. Begin the review immediately upon completion of the inventory, including those items identified as necessary for operations of the installation prior to closure.

C15.4.3.4. Reporting Excess Materiel. Immediately upon completion of the inventory and, if time permits, not less than six months prior to the announced date of closure, report all property identified as excess to needs of the installation and not included in the preliminary list of related personal property to the appropriate ICP/IMM under Chapter 11 procedures.

C15.4.3.5. Property Stratification for Installation Operations. Stratify all property that is not mission-essential, but is required to operate the installation for all or a portion of the time remaining until closure and is not included in the preliminary list of related personal property. Stratify items in date order they will become excess to operational needs. Sixty calendar days prior to the date that each item will become excess, report the item to the ICP/IMM under [Chapter 11](#) procedures.

C15.4.3.6. Reporting Personal Property Items. Report items identified as related personal property (see C15.3.4.) to the ICP/IMM using the DLMS 180M Customer Asset Report, and indicate Project Code 3QQ. Project Code 3QQ informs the ICP/IMM that the item has been placed on the preliminary inventory of related personal property designated to be transferred to the local community at the time of installation closure. If there is a DoD requirement, delete the item(s) from the inventory of related personal property. Do not report related personal property to GSA under [Chapter 11](#) procedures.

C15.4.3.7. Processing Excess Materiel. When items have been reported to ICPs/IMMs as excess under the above guidance and [Chapter 11](#) procedures, and the ICPs/IMMs have indicated a requirement, those items shall be processed using ICP/IMM materiel returns instructions.

C15.4.3.8. Excess Item Disposal. Dispose of all items reported to the ICPs/IMMs as excess, and items ICPs/IMMs have provided DLMS 870M with Status Code TC, plus items not reportable to ICPs/IMMs (e.g., locally purchased non-NSN items) under DoD Component procedures. All items identified as related personal property (see C15.3.4.) and for which there is no DoD requirement, shall remain with the installation.

C15.4.3.9. Inactive NSNs. Distribution centers having obsolete or inactive coded NSNs on record, that are without an accompanying item manager record, shall locally prepare a disposal release order (DRO), DLMS 940R citing Utilization Code M.

C15.5. PROCEDURES FOR THE INVENTORY CONTROL POINT/INTEGRATED MATERIEL MANAGER

C15.5.1. ICPs/IMMs shall process a DLMS 180M customer asset report received for property resulting from installation closure using Chapter 11 procedures. ICPs/IMMs shall not direct the return of related personal property identified by Project Code 3QQ unless the item is required to meet an approved force acquisition objective and/or approved pre-positioned war reserve requirement.

C15.5.2. When appropriate, ICPs/IMMs shall direct disposal of materiel resulting from base realignment and closure (BRAC) under Chapter 4 procedures for directing materiel to DLA Disposition Services. The resulting DRO, DLMS 940R, shall contain Utilization Code M.

C16. CHAPTER 16

DISPOSITION SERVICES

C16.1. REQUISITIONING DOD EXCESS PERSONAL PROPERTY FROM THE DISPOSITION SERVICES

C16.1.1. General

C16.1.1.1. Excess Property Requisition. DoD activities and, under certain circumstances, authorized Federal civil agencies, requisition excess personal property through the DLA Disposition Services or directly from a DLA Disposition Services Field Office. Activities will request, through an accountable supply officer, only that property authorized by parent headquarters or command and will not request quantities of property that exceed authorized retention quantities. The DoD Component will give DLA Disposition Services the Federal condition codes that are acceptable in relation to the supply condition code (SCC) being requisitioned. DLA Disposition Services maintains a standardized and centralized control and accounting system for all excess and surplus personal property located in DLA Disposition Services Field Offices, and provides visibility of such property through a variety of utilization screening procedures. (see [DoD 4160.21-M](#), "Defense Materiel Disposition Manual," August 1997 for utilization policy and procedures.)

C16.1.1.2. Use of Defense Logistics Management System 511R. DoD activities will send requisitions using the Defense Logistics Management System (DLMS) 511R Requisition, for excess personal property to DLA Disposition Services. The requisition may be hand carried to DLA Disposition Services Field Offices for property previously selected, scheduled for pickup, or required as a result of screening at DLA Disposition Services Field Offices. Always cite the DoD activity address code (DoDAAC) of the DLA Disposition Services Field Office in requisitions hand carried to a DLA Disposition Services Field Office. Activities or units unable to send requisitions electronically may forward them directly to DLA Disposition Services by mail or by narrative message, but will consider this a nonstandard procedure and discontinue its use as soon as the ability to use an electronic method is realized.

C16.1.2. Submission of Requisitions to DLA Disposition Services

C16.1.2.1. General. When DLA Disposition Services is notified of a turn-in to a DLA Disposition Services Field Office, via a DLMS 527R Receipt transaction containing Disposition Category Code RU Reutilization (see C16.1.2.1.2) the disposal turn-in document (DTID) and/or property is considered eligible for requisitioning and placed in a reutilization cycle that determines eligibility to requisition the item. There are four different continental United States (CONUS) screening periods within the reutilization/transfer/donation (RTD) formal screening cycle: DoD Formal and Special Programs (Screening Cycle Code = DOD), General Services Administration (Screening Cycle Code = GSA), Donation (Screening Cycle Code = DON), and a second RTD

screening cycle for items eligible to RTD customers (Screening Cycle Code = RTD2). Outside continental United States (OCONUS) Screening Cycle Codes are FEPP (for Department of Defense, DoD Special Programs and federal Civil Agencies); FEPD (for Donation); and RTD2 for all others. DoD customers can requisition an item at any time during the cycle; however, non DoD agencies and groups only have access to the item once it reaches a certain day within that cycle.

C16.1.2.1.1. Reutilization/Transfer/Donation Property. All customers will have a valid DoDAAC in order to requisition DLA Disposition Services' RTD property. Requisitions may be generated for DLA Disposition Services' property via the DLA Disposition Services RTD Web, GSA Web, or from Service/Agency supply systems. However, RTD Web will be the single interface by which DLA Disposition Services receives requisitions. GSA Web and Service supply system orders will be routed by DLA Transactions Services to RTD Web prior to DLA Disposition Services. Once processed by RTD Web, any additional information/data elements that are maintained within RTD to facilitate processing will be added to the requisition documents and transmitted to DLA Disposition Services.

C16.1.2.1.2. DTID Requisitions of Reutilization Property. All requisitions sent to DLA Disposition Services for property assigned Disposition Category Code RU are considered free-issue, except requisitions from foreign military sales (FMS) customers, which generate transportation costs. These transportation costs will be identified on the requisition transaction identified by a funds appropriation, (e.g., fund cite or line of accounting). These costs are determined by the RTD Web based on the FMS customer's profile and passed to DLA Disposition Services on the Requisition. This funds appropriation/funds cite will be perpetuated to the field office on the DLMS 940R Materiel Release Order (MRO) at the time the item is issued.

C16.1.2.1.3. DTID Number and Suffix Code on Requisitions. Service system generated requisitions for DLA Disposition Services' owned property are routed by DLA Transaction Services to RTD Web and are not required to cite a DTID number, or DTID number and suffix, unless a specific property turn-in is being requested to fill the order. All customer requisitions originating via the RTD Web and GSA requisitions submitted to RTD Web are required to cite a specific DTID number, or DTID number and suffix, as applicable. All requisitions forwarded from RTD Web to DLA Disposition Services for fulfillment, including Service system requisitions initially submitted without a DTID number, will cite a DTID number, or DTID number and suffix, as applicable.

C16.1.2.1.4. Want Lists. RTD Web customers are able to set up customized want lists within RTD Web. Want lists enable an automatic search of inventory and provide e-mail notification if the specific property becomes available. Customers will log in to RTD Web to initiate the requisition request, or generate a requisition from the Service supply system.

C16.1.2.2. Submission of Service System Generated Requisitions. RTD Web will provide a daily asset inventory file to DLA Transaction Services to enable the Services to generate DLMS or legacy 80-record position format requisitions originating

from their own supply systems based on the asset inventory file. DLA Transaction Services has a documented agreement with each customer to provide the asset inventory file under the Integrated Data Environment (IDE) initiative. Military Service/Agency supply systems, external to the DLA Disposition Services RTD Web, may direct requisitions to DLA Disposition Services Routing Identifier Code (RIC) S9D without regard to specific DTID numbers contained within DLA Disposition Services' inventory. These requisitions will be forwarded by DLA Transaction Services to the RTD Web for processing.

C16.1.2.3. RTD Web Generated Requisitions. Items that are within the reutilization cycles are reported daily by DLA Disposition Services via a property characteristic flat file to RTD Web when the Screening Cycle Code is either DOD or RTD2. This daily file to the RTD Web notifies the Web application of the available items. RTD Web maintains rules that determine eligibility to requisition specific items. For all requisitions prepared/generated within RTD Web, the document numbers will be constructed using the customer's DoDAAC, the current ordinal date, and a serial number. The serial number may begin with a specific letter value based upon the applicable business process as directed below.

C16.1.2.3.1. Submission of Requisitions for Items Identified to a Container. To facilitate RTD, DLA Disposition Services employs a containerization process whereby the DTID number or DTID number and suffix, of similar turned-in items is associated to a container and made visible to customers. Using this visibility, customers have the option of requisitioning either the whole container (through RTD Web only) or specific items from within the container. A separate requisition identifying the disposition services container identification (ID) is sent for each item ordered by the customer. If the customer selects the entire container, a separate requisition is still generated for each item within the container. Where multiple document numbers are needed to support customers ordering containerized property, the RTD Web-generated document number will assign serial numbers beginning with utilization code R. The generation of a distinct document number for each item ordered allows the customer to have visibility and status relative to the processing of each requisition, maintains container synchronization, and facilitates inventory control. In addition to the disposition services container ID mentioned above, when the customer selects the entire container, each individual DLMS 511R Requisition (Transaction Type Code A0) will include an indicator (i.e., Container Issued in Full) to communicate that the whole container is being requisitioned and total of the DTID numbers within the container.

C16.1.2.3.2. Local Stock Number Requisitioning. Local stock number (LSN) requisitioning will be available only via RTD Web. All property marketed via RTD Web will be by DLA Disposition Services' LSN or NSN. In cases where an item is available for requisitioning in less than the standard unit of issue, the resulting requisition transaction sent to DLA Disposition Services will include the 'unit of use' indicator to define the quantity and unit of measure as applicable to unit of use. The LSN will be identified as the primary identification and the NSN will be provided for cross reference.

C16.1.2.4. General Services Administration (GSA) Web Requisitioning.

Items that are within the reutilization cycles are reported daily by DLA Disposition Services via a property characteristic flat file to the GSA Web when the Screening Cycle Code is GSA or DON for CONUS, and FEPP or FEPP for OCONUS. This daily file to GSA notifies the GSA Web of the available items. GSA Web maintains rules that determine who is eligible to requisition specific items. GSA customers are then able to requisition these items by generating a requisition. A daily batch file will be sent to DLA Transaction Services. Legacy 80-record position requisitions will be converted by DLA Transaction Services into DLMS 511R Requisition transactions and sent to RTD Web for processing. GSA will use the DTID number as the item control number which, along with a document number for each requisition, will be sent to RTD Web.

C16.1.2.5. Special Programs for Non-DoD/Non-Federal Agency Requisitioners. DLA Disposition Services provides support to federally authorized Special Programs, including organizations that are neither a Federal agency nor a DoD entity. Under policies set forth within the Department of Defense, these organizations are authorized to requisition materiel from DLA Disposition Services. Non-DoD and non-Federal programs requiring DoDAACs are controlled under unique series DoDAACs beginning with a numeric followed by alpha characters in the first two positions. See DLMS Volume 6, (C2.1.2.1.).

C16.1.2.5.1. DLA Disposition Services 2Y Series DoDAACs.

DLA Disposition Services' Special Program DoDAACs will be reserved under the 2Y series. See DLMS Volume 2, Appendix 7, Service and Agency Codes). The 2Y Series DoDAACs will be populated with DoDAAC Authority Code 04, Authorized to Requisition DLA Disposition Services' Materiel Only (see DLMS Volume 2, (C4.7.11, Table C4.T3) and the DoDAAC authority codes link in Volume 6, C2.5.4). DLA Disposition Services will submit a letter to the DoD activity address directory (DoDAAD) Administrator (via the DLA DoDAAC central service points) designating the DLA DoDAAC monitor(s) responsible for establishing and maintaining the 2Y series DoDAACs.

C16.1.2.5.2. DoDAAC Assignments. DLA Disposition Services will ensure DoDAACs are only issued to authorized entities for authorized materiel for each special program. Initial DoDAAC assignments are as follows:

C16.1.2.5.2.1. DoD Computers for Learning Program - 2YC.

Allows for the transfer of excess DoD computer hardware/information technology (IT equipment) to eligible elementary and secondary schools within the United States.

C16.1.2.5.2.2. Veterans Industries - 2YD. This vocational rehabilitation program, which provides temporary and permanent staffing for manufacturing, warehouse construction and office support, as well as outsourced support in assembly, packaging, sorting, grading, reclaiming, and recycling, is authorized to requisition excess property from DLA Disposition Services.

C16.1.2.5.2.3. DoD Firefighter Program - 2YF. Allows the transfer of excess property to firefighting agencies for use in fire protection and emergency service activities.

C16.1.2.5.2.4. Law Enforcement Support - 2YT. Allows the transfer of excess DoD property to Federal and State law enforcement agencies.

C16.1.2.5.2.5. Civil Air Patrol - 2YX. Allows the Civil Air Patrol (CAP), as the official auxiliary of the United States Air Force, to receive excess and Federal excess personal property (FEPP) without reimbursement.

C16.1.3. Receipt of Requisitions by DLA Disposition Services. Upon receipt of the requisition, DLA Disposition Services will select the requested item for issue or provide appropriate supply status if not available. If requested materiel is not available, DLA Disposition Services will keep the requisition in the requisition retention file for 60 calendar days and send a DLMS 870S Supply Status with Status Code B1 to the requisitioner. If all of the requested materiel does not become available during the 60 calendar day retention period, DLA Disposition Services will cancel the remaining unfilled quantity and send a DLMS 870S with Status Code D1 to the requisitioner.

C16.1.4. Processing Requisitions by DLA Disposition Services and the RTD Website

C16.1.4.1. Materiel Release. The MRO (Transaction Type Code NA) will be used to direct the release of property from a DLA Disposition Services Field Office. The MRO will be sent from DLA Disposition Services to the field office when materiel is being issued as a result of sales, reutilization, transfer, or donation. The materiel release process will be accomplished at the DTID number or DTID number and suffix, level of detail. The rules in DLMS Volume 2, Chapter 4 apply to the MRO process; however, the transaction may contain the following additional data to support disposal processing as described below: DTID number, or DTID number and suffix, disposition services container ID, container issued in full indicator, minimum/maximum ship quantity, sales order reference number, complete container count, transportation mode or method, cancellation mandatory/optional flag, customer type, DEMIL code, DEMIL integrity code, and/or funds appropriation number. Upon shipment of the materiel for each MRO, the DLA Disposition Services Field Office will send the DLMS 856S Shipment Status (Type Transaction Code AS_) transaction to the customer. The transaction will contain the DTID number or DTID number and suffix of the original document number, and associated disposition services container ID.

C16.1.4.1.1. Disposal Turn in Document Number. The DTID number or DTID number and suffix will be passed to DLA Disposition Services Field Offices on every MRO sent to DLA Disposition Services Field Offices for a usable property. This will allow materiel to be released at a more detailed level of inventory.

C16.1.4.1.2. Customer Pick Up. Information contained in the MRO will indicate whether the materiel will be picked up by the customer or shipped. DoD

Transportation Mode Code X will be used to indicate customer pick up; otherwise, the data element will be left blank.

C16.1.4.1.3. Minimum/Maximum Ship Quantity. These quantities will identify allowable over and under release quantities.

C16.1.4.1.4. Disposition Services Customer Type. This data element is used by the DLA Disposition Services Field Office to prioritize the workload of MROs. The codes used are: R (Reutilization) – DoD agencies and programs that are provided for by regulation; T (Transfer) - Customers that are Federal agencies that may receive property from other Federal agencies; D (Donation) - Customers that are non-profit organizations that work with the State Agencies for Surplus Property (SASPs) to withdraw DoD property; and S (Sales).

C16.1.4.1.5. Processing Requisitions Identified to a Container. When DLA Disposition Services receives a requisition with the container issued in full indicator, the information will be used to insure all requisitions for that container are received and processed appropriately. MROs generated by DLA Disposition Services for requisitioned items associated with a container will identify the disposition services container ID. In addition to the disposition services container ID, MRO transactions generated based on the customer ordering the entire container will contain a container issued in full indicator and the count of total of DTID numbers or DTID numbers and suffix within the container. This allows DLA Disposition Services field offices to insure that an MRO for each item/DTID number or DTID number and suffix associated with a container is received and processed. Upon shipment of the materiel for each MRO, the DLA Disposition Services field offices will send the DLMS 856S Shipment Status (Type Transaction Code AS) transaction to the customer, containing the DTID number or DTID number and suffix, the customer's original requisition number, and the associated disposition services container ID.

C16.1.4.1.6. Demilitarization Code and Demilitarization Integrity Code. DLA Disposition Services passes these data elements to the DLA Disposition Services field offices in order to validate that property is still eligible for requisition by a particular customer prior to the physical release of property. Based upon frequency and timing of updates, the DEMIL and DEMIL integrity codes resident in DLA Disposition Services Field Office records may be more current than the data passed in the MRO by DLA Disposition Services. Therefore, if the DEMIL code sent on the MRO does not match the DLA Disposition Services field office record, the field office will hold the property for a period of time to allow DLA Disposition Services records to be updated, and send an MRO cancellation if necessary. Additionally, if the DEMIL Code is Q, the field office will also validate the DEMIL integrity codes prior to release. If, at the end of an established waiting period, DLA Disposition Services has not sent the MRO cancellation, the field office will resume processing.

C16.1.4.1.7. Local Stock Number/Unit of Use. The MRO will carry the unit of use LSN and the cross-reference NSN. The unit of use indicator will define the

quantity and unit of measure as applicable to unit of use. See C16.6.9. for assignment and use of LSNs, including unit of use LSNs.

C16.1.4.1.8. Funds Appropriation Number. This number will be used on the MRO to calculate transportation costs that may be associated with certain orders that are shipped to RTD customers. For FMS orders, it is required by the Traffic Management Office (TMO) in order to correctly charge shipping costs.

C16.1.4.1.9. Materiel Release Orders in Support of Public Sales. In support of public sales, the DLMS 940R, MRO sent to DLA Disposition Services Field Offices to direct release of a sales order line item will contain an original document number (ODN), constructed using a valid DLA Disposition Services DoDAAC as the primary document number in the transaction. The DTID number or DTID number and suffix identifying the property will be carried as a secondary reference number. The sales order reference number will be passed in each transaction as secondary to the DTID number. This will enable the field office to identify all associated MROs into a single pick order. The supplementary address will contain the valid DLA Disposition Services public sales DoDAAC, along with Signal Code K indicating ship to and bill to supplementary address. Public sales MROs will contain a DoD Transportation Mode Code of X to indicate customer pick up. Additionally, these MROs will contain the public customer's first and last name as exception data, which will be used by field office personnel responsible for supervising customer removals to verify the correct customer is removing the property. Once property is removed, the field office will send a DLMS 945A Materiel Release Confirmation transaction, containing the associated ODN and DTID number or DTID number and suffix, to DLA Disposition Services.

C16.1.4.2. Materiel Release Order Denial. The DLA Disposition Services Field Office will send DLA Disposition Services the DLMS 945A, Materiel Release Order Denial (Transaction Type Code NK), with the appropriate management code, to communicate a denial for materiel when materiel no longer exists or when materiel has been damaged prior to customer pickup. This will include the use of denial Management Code Q for instances where there is enough on-hand materiel to fill the order, but not enough materiel on the DTID number or DTID number and suffix specified on the MRO.

C16.1.4.3. Materiel Release Confirmation. When confirming MROs, the DLA Disposition Services Field Office will provide the DLMS 945A, Materiel Release Confirmation (Transaction Type Code NJ) to the DLA Disposition Services following the prescribed rules in DLMS Volume 2, Chapter 4. However, in addition, this transaction will always contain the DTID number or DTID number and suffix or a unique control number (UCN) assigned by DLA Disposition Services during receipt and carried as a DTID number allowing release at a more detailed level of inventory.

C16.1.4.4. Follow-up for Materiel Release Order Status. The DLMS 940R, MRO Follow-Up (Transaction Type Code NB) will be used to communicate the follow-up request for status on open MROs. The DLA Disposition Services Field Office will

provide MRO status using the DLMS 945A, Materiel Release Order Status (Transaction Type Code NL), as prescribed in DLMS Volume 2, Chapter 4.

C16.1.4.5. Requisition and Materiel Release Cancellation

C16.1.4.5.1. Customer Requisition Cancellations

C16.1.4.5.1.1. Customer Requisition Cancellations Based on RTD Preparation of the DLMS 869C (DIC AC), Customer Cancellation Request. Service system customers and RTD Web customers have the option to cancel a submitted requisition prior to receiving the inventory from DLA Disposition Services.

C16.1.4.5.1.2. RTD and GSA Web Customer Cancellations. RTD and GSA Web customers may access the RTD or GSA Web application to view existing requisitions and choose to cancel. As a result, a separate DLMS 869C, Customer Cancellation Request, will be sent to DLA Disposition Services along with the DTID number or DTID number and suffix for the item that is being cancelled. When the cancellation involves a unit of use LSN, the DLMS 869C will carry the unit of use LSN and the cross-reference NSN. The unit of use indicator will define the quantity and unit of measure as applicable to unit of use. See C16.6.9 for assignment and use of LSNs, including unit of use LSNs. DLA Disposition Services will use the DTID number or DTID number and suffix as well as the requisition document number and suffix when applicable, to identify and attempt to cancel the order. If no MRO has been generated, the DLA Disposition Services can cancel immediately and adjust available inventory accordingly. If an MRO has been generated to the DLA Disposition Services Field Office and is open, then DLA Disposition Services will attempt to cancel the MRO.

C16.1.4.5.1.3. Customer Submission of DLMS 869C Cancellations Subsequent to Transmission of DLMS Supply Status. In certain instances, the RTD Web will be required to generate document number suffix codes as needed to fill the requisitioned quantity using property associated with multiple DTID number or DTID number and suffixes (see C16.1.4.5.1.2.). Supply status will be provided under the requisitioned document number/suffix code combination citing the DTID number or DTID number and suffix value associated with each suffix. Therefore, customer cancellations submitted via the DLMS 869C from Service/Agency supply systems may be prepared using the document number and applicable suffix code from the supply status when applicable. Component supply systems may also cancel requisitions by document number and quantity alone, requiring the RTD Web to determine the appropriate suffix/DTID number or DTID number and suffix combinations to cancel. The RTD Web would then construct the individual DLMS 869C transactions and forward to DLA Disposition Services.

C16.1.4.5.2. MRO Cancellations Requiring an MRO Cancellation Request Transaction. The DLMS 940R, MRO Cancellation Request (Transaction Type Code ND) will be used to request cancellation of an MRO, and to follow-up on cancellation requests for which there has been no response. The MRO cancellation request can be triggered either by the customer's submission of a DLMS 869C,

Cancellation (Transaction Type Code AC) as described above, or systemically by DLA Disposition Services if required payment is not received or when an item property characteristics change affects the customer's eligibility to receive the property, (e.g., DEMIL code change). The MRO cancellation request will contain the DTID number or DTID number and suffix of the materiel to be cancelled and may contain a Disposition Services Indicator for Cancellation Action Mandatory. Normally systemic cancellations requested by DLA Disposition Services will carry the mandatory cancellation indicator. The field office will reply to the MRO Cancellation Request with a DLMS 945A, Materiel Release Cancellation Advice (Transaction Type Code NR) or Materiel Release Status (Transaction Type Code NL). Upon receipt of the DLMS 945A, the DLA Disposition Services will adjust inventory as appropriate. For unit of use LSNs, the DLMS 945A will carry the unit of use LSN and the cross-reference NSN. The unit of use indicator will define the quantity and unit of measure as applicable to unit of use. See C16.6.9 for assignment and use of LSNs, including unit of use LSNs.

C16.1.4.5.3. Customer Requisition Cancellation without Submission of a DLMS 869C, Customer Cancellation Request (Transaction Type Code AC) or the Subsequent DLMS 940R, Materiel Release Order Cancellation Request (Transaction Type Code ND). DLA Disposition Services allows cancellation of submitted requisitions based upon the customer declining the ordered materiel available for pick up at the DLA Disposition Services Field Office. In these instances, the DLA Disposition Services Field Office will notify DLA Disposition Services of the cancellation by providing the DLMS 945A, Materiel Release Order Cancellation Confirmation (Transaction Type Code NR), that will contain DLMS Cancellation Reason Code YD (DLA Disposition Services Customer No-Show), YE (DLA Disposition Services Sales Customer Refused – Penalty May Apply), YF (DLA Disposition Services Sales Customer Refused – No Penalty), YG (DLA Disposition Services Sales Reutilization/Transfer/Donation (RTD) Customer Declined with Prior Notice), YH (DLA Disposition Services RTD Customer Refused Without Prior Notice), or YI (DLA Disposition Services Commercial Venture (CV) Rejected by Government Liquidators (GL)), as appropriate. Subsequently, DLA Disposition Services will communicate requisition status to their RTD Web in order to make the cancellation visible to the customer.

C16.1.4.5.4. Mass Cancellation Request. DLA Disposition Services will not process mass cancellation requests.

C16.1.4.6. Generation of DD Form 1348-1A/1348-2 for Issues of DLA Disposition Services Owned Property by the DLA Disposition Services Field Office Subsequent to Receipt of the DLMS 940R, Materiel Release Order (Transaction Type Code NA). Shipments of DLA Disposition Services owned property will follow all instructions regarding the data requirement(s) contained in DLM 4000.25-1 MILSTRIP, Chapter 5, Release and Receipt of Materiel, relative to the DD Form 1348-1A/1348-2 (and the continuation sheet, if required) including those instructions relative to items requiring serial number tracking and/or tracking under DoD Item Unique Identification (IUID) business rules (inclusive of barcodes).

C16.1.4.6.1 Issue Process. The DLA Disposition Services issue process will also include the use of printed data in Block 27 of the DD Form 1348-1A or 1348-2 (and the continuation sheet, if needed) to support issues of DLA Disposition Services owned property. The printed data will support the issue process by providing additional warehouse/shipping instructions and property information such as:

C16.1.4.6.1.1 Exception Shipping Addresses

C16.1.4.6.1.2 Special Shipping Instructions

C16.1.4.6.1.3 Fund Citations

C16.1.4.6.1.4 Foreign Military Sales Proceeds Information

C16.1.4.6.1.5 Type of Property Being Shipped

C16.1.4.6.2. Printed Data. The printed data will also provide information/instructions to the requisitioning customer regarding the property, such as instructions for return of unneeded property requiring demilitarization and/or reimbursement indicator instructions.

C16.1.4.6.3 Additional Printed Data. Additional data to be printed in Block 27, is not communicated to the DLA Disposition Services Field Office(s) via the DLMS 940R MRO, rather the field office system will have resident logic and data that allows this data to be derived based upon current information provided in the release transaction. Business rules and criteria for entering the instructions identified will be determined by DLA Disposition Services and loaded/maintained in tables within the field office's distribution system.

C16.1.4.7. Military Service/Agency Supply System Generated Requisitions. Once the RTD Web receives Military Service/Agency supply system generated requisitions, if a DTID number or DTID number and suffix is not identified, the DLA Disposition Services' inventory will be searched regardless of property location.

C16.1.4.7.1. Absence of a Cited DTID Number or DTID Number and Suffix. When a DTID number or DTID number and suffix is not cited on a requisition transaction, the RTD Web will determine the applicable DTID numbers or DTID number and suffixes necessary to fill the requisition, since DLA Disposition Services' property is managed by LSN/NSN and DTID number or DTID number and suffix. Each LSN/NSN and DTID number combination will be associated with a separate transaction. Therefore, in instances where property is physically located in multiple locations, or multiple DTID numbers or DTID number and suffixes are required to satisfy the requisition quantity, the RTD Web will be required to generate separate requisitions to DLA Disposition Services including the customer-assigned document number and sequentially assigned suffixes as needed to fill the requested quantity.

C16.1.4.7.2. Identification of Partial Fill Action. When the above occurs, the first partial fill action will be identified by the original document number submitted by

the customer and will cite Suffix Code A. For the open quantity remaining on the requisition, RTD Web will select the next available DTID number or DTID number and suffix and generate additional document number suffix codes as needed.

C16.1.4.7.3. Processing Status. RTD Web will provide processing status via the DLMS 870S Supply Status transactions for the original customer document number including any suffix codes assigned by RTD Web.

C16.1.4.8. RTD Web Requisitioning

C16.1.4.8.1. Prioritization Logic in RTD Web. When RTD Web receives the property characteristics file from DLA Disposition Services for items applicable to Screening Cycle Codes DOD or RTD2, these items will be visible on the web to all eligible customers. RTD Web uses prioritization logic to assign precedence to requisitions based on the type of customer requisitioning the item. The prioritization logic will be applied in a 24-hour cycle. As requisitions are generated in RTD Web, they are sent to DLA Disposition Services via DLA Transaction Services. At the end of the 24-hour cycle, depending upon the timing of the request and the highest priority for the requisitioned item, RTD Web will determine which requisition(s) to fill. All other requisitions for the property/DTID number will be cancelled via notification from DLA Disposition Services to RTD Web. If the requisition originated from the RTD Web, RTD Web will cancel the requisition. When the user logs on, the cancellation(s) will be visible in their account. If the requisition originated from a Service/Agency supply system, RTD web will generate the DLMS 870S Supply Status with Status Code BQ to the Service's supply system indicating cancellation.

C16.1.4.8.2. Prioritization. Prioritization will be applied to customers based on the following criteria:

- U.S. DoD Military Customers, Priority Designator (PD) 1-15 (based upon Force/Activity Designator (F/AD) and Urgency of Need Designator (UND)).
- Law Enforcement Support Office (LESO), PD 15
- Senior Reserve Officers Training Corps (SROTC), PD 12-15
- National Guard Units, PD 12-15
- Deploying National Guard Units, PD varies based upon DoDAAC and/or F/AD assignment.
- All Special Programs and walk-ins, PD 15
- Humanitarian Assistance Program (HAP), PD 15
- DoD or Service Museums, PD 15
- Computers for Learning (CFL), PD 15
- Morale, Welfare, Recreation Activities (MWRA), PD 15
- Military Affiliated Radio System (MARS), PD 15

- Civil Air Patrol (CAP), PD 15
- DoD Contractors, PD 15
- Foreign Military Sales (FMS), PD 15

C16.1.4.8.3. Exceptions to 24-Hour Processing Cycle. The two exceptions that can alter the 24-hour processing cycle are customer walk-in requisitions and FMS requisitions.

C16.1.4.8.3.1. Customer Walk-ins. Customers who walk-in to a DLA Disposition Services Field Office and wish to requisition property will do so via RTD Web. These requisitions will be identified on the DLMS 511R Requisition transaction sent to DLA Disposition Services by the entry of disposition services indicator and unique document number with serial number beginning with L. These walk-in requisitions will be processed immediately. DLA Disposition Services will verify any pending requisitions for this item by DTID number or DTID number and suffix and fill all, part, or none of the walk-in requisition quantity, based upon the presence or absence of higher priority orders.

C16.1.4.8.3.2. Foreign Military Sales Customers. FMS customers with access to RTD Web have the option of freezing property by DTID number. The capability to freeze items is provided to facilitate the State Department approval process for FMS customer eligibility. During the approval process, the items are flagged as frozen both in DLA Disposition Services and at the field office, and are not advertised on the RTD Web to other customers. Once the FMS customer receives approval to acquire the item, a requisition will be sent to DLA Disposition Services from RTD Web, and the item will be issued. Using RTD Web, field offices will be able to view a list of all items that are currently frozen and print out a placard to place on the frozen items to insure walk-in customers know the item is not available. If an FMS freeze is in place, the property will not be available for screening for any other customer.

C16.1.4.9. Providing Status to Customers

C16.1.4.9.1. Processing Status for Service/Agency and GSA Web Requisitions. For Service/Agency supply system generated requisitions and GSA Web submitted requisitions, RTD Web will provide processing status via the DLMS 870S Supply Status transaction, citing the applicable status code found in [DLM 4000.25-1, Appendix 2.16](#). As supply status on these requisitions is updated, RTD Web will provide supply status updates to ensure customers have the most current information available on their requisitions.

C16.1.4.9.2. Requisition Visibility in RTD Web. For requisitions originated within RTD Web, customers will have the ability to view current status of all their submitted requisitions on their account at the RTD Web Website. No DLMS 870S Supply Status transaction will be generated for these requisitions.

C16.1.4.9.3. Shipment Status to Customer. Regardless of method of submission, when shipment occurs against a requisition, the DLA Disposition Services Field Office will generate a DLMS 856S Shipment Status to the customer.

C16.1.4.10. Post-Issue Tracking. DLA Disposition Services will use disposition services indicator(s) to identify post-issue tracking requirements on the DLMS 511R requisition provided by RTD Web to DLA Disposition Services. Rules regarding requirements for post-issue tracking will be maintained in RTD Web, which will send the appropriate post-issue tracking indicator to DLA Disposition Services to indicate which particular transaction requires post-issue tracking. If post-issue tracking is required, DLA Disposition Services will compile and store the requirement to facilitate future tracking. Record of the post-issue tracking requirement is maintained for the entire life of the item while being used by that particular customer. Post-issue tracking requirements are essential at time of disposal to ensure appropriate procedures have been followed, (e.g., DEMIL Certificate turned in with the item). Post-issue tracking categories are described below.

C16.1.4.10.1. Materiel Receipt Acknowledgement Required. This indicator will be applied to requisitions for DLA Disposition Services' property falling outside standard MRA requirements under MILSTRAP/DLMS. DoD activities requisitioning from DLA Disposition Services are required to provide the DLMS 527R MRA (MILSTRAP legacy DRA functionality) under current procedures.¹

C16.1.4.10.2. Demilitarization Certification Required. Providing DEMIL documentation confirms when demilitarization was performed on property. Before this item can be turned in or disposed of by the customer, proof will be provided to DLA Disposition Services.

C16.1.4.10.3. Mutilation Certification Required. Providing mutilation certification when the item is no longer needed prevents reuse or reconstruction if the item. Documentation must be received by DLA Disposition Services to verify that mutilation was completed.

C16.1.4.10.4. Certificate of Recycling. The customer will provide proof via documentation that the item was recycled when no longer needed.

C16.1.5. Processing Requisitions Identified to a Container. When DLA Disposition Services receives a requisition with the container issued in full indicator, the information will be used to insure all requisitions for that container are received and processed appropriately. MROs generated by the DLA Disposition Services for requisitioned items associated with a container will have the disposition services container ID identified on the DLMS 940R Materiel Release. In addition to the disposition services container ID, DLMS 940R Materiel Release transactions generated based on the customer ordering the entire container will contain a container issued in full indicator and the count of total DTID numbers within the container. This will allow DLA Disposition Services Field

¹ DLA Disposition Services must define the expanded requirements for materiel receipt acknowledgment by DLA Disposition Services' non-DoD customers, via a future DLMS Change Proposal.

Offices to insure that an MRO for each item/DTID number or DTID number and suffix associated with a container is received and processed. Upon shipment of the materiel for each MRO, the DLA Disposition Services Field Offices will send the DLMS 856S Shipment Status transaction to the customer, containing DTID number or DTID number and suffix, original requisition number, and associated disposition services container ID.

C16.1.6. Defense Automatic Addressing System Editing. Defense Automatic Addressing System (DAAS) will edit requisitions to determine if the requisition is for excess personal property as follows:

C16.1.6.1. Utilization Code and SCC. If the requisition contains Utilization Code K, L, R, S or T and a (SCC), DAAS will route the requisition to DLA Disposition Services. If the requisition does not contain a SCC, but does contain a DTID number or DTID number and suffix, DAAS will route the requisition to DLA Disposition Services.

C16.1.6.2. No SCC or Disposal Turn In Document. If the requisition does not contain an SCC and does not contain a DTID number or DTID number and suffix, but is directed to the DLA Disposition Services, DAAS will reject the requisition back to the message originator with a clear-text message stating, INVALID FORMAT FOR DLA DISPOSITION SERVICES REQUISITION.

C16.1.6.3. Exceptions. If conditions in the previous two sections are false, DAAS will continue the requisition processing.

C16.1.6.4. Requisitions Directed to DLA Disposition Services. If the requisition is directed to DLA Disposition Services and there is an SCC that does not contain Utilization Code K, L, R, S, or T, DAAS will route the requisition to DLA Disposition Services.

C16.1.6.5. No SCC or Utilization Code. If the requisition does not contain an SCC or Utilization Code K, L, R, S, or T, but has a DTID number or DTID number and suffix, DAAS will route the requisition to DLA Disposition Services.

C16.1.6.6. No SCC, Utilization Code, or DTID. If the requisition does not contain an SCC, Utilization Code K, L, R, S, or T nor a DTID number, but does contain DLA Disposition Services DoDAAC SC4400, DAAS will reject the requisition back to the message originator with a clear-text message stating, INVALID FORMAT FOR DLA DISPOSITION SERVICES REQUISITION.

C16.1.6.7. Requisition Status. DAAS will provide a DLMS 870S, Supply Status, with Status Code BM to the requisitioner for validated excess personal property requisitions. DAAS will also process DLA Disposition Services requisitions with part numbers to obtain an NSN. DAAS will change a part number to an NSN, as appropriate, pass the requisition to DLA Disposition Services, and provide a DLMS 870S, with Status Code BG to the requisitioner. If an NSN is not found, DAAS will reject the requisition with a DLMS 870S.

C16.2. REQUISITIONING AND OTHER MATERIEL MOVEMENT OF CONVENTIONAL SMALL ARMS/LIGHT WEAPONS FROM DISPOSITION SERVICES

C16.2.1 Applicability. Refer to this manual's Definitions and Terms for the definition of applicable SA/LW

C16.2.2. Federal Supply Classification. Conventional small arms generally fall into one of the following Federal supply classifications (FSC): 1005, 1010, 1015, 1025, 1040, 1055, 1090, and 1095; however, this list will not be considered all inclusive. DLA Disposition Services will treat any weapon meeting the general guidelines of a SA/LW accordingly, regardless of FSC.

C16.2.3. Small Arms/Light Weapons Requisitioning. Customer generated DLMS 511R Requisitions for SA/LW will be by NSN and quantity, and may specify a DTID number. Neither the customer requisition to DLA Disposition Services nor the resulting DLMS 940R MRO to the DLA Disposition Services Field Office will specify a serial number. However, any serial number of the weapon(s) selected for issue will be carried on the DLMS 140A, with Transaction Code S, Small Arms Shipment transaction (one copy to the requisitioning activity and another copy to the DLA SA/LW registry. The serial numbers included in the shipment may also be included in the DLMS 945A Materiel Release Order Confirmation response from DLA Disposition Services Field Offices back to DLA Disposition Services for verification of the specific weapons issued and records update.

C16.2.4. Serial Number and Unique Item Identifier Reporting. Any SA/LW unique transactions (DLMS 140A/888A) required by the current business process will be generated separately.

C16.2.5. Redistribution or Disposal. When the DLA Disposition Services takes redistribution or disposal action, the resulting DLMS 940R redistribution order or disposal release order will pass the weapons serial number to the DLA Disposition Services Field Office directing specific weapons for release. This serial number will be included in the DLMS 945A Redistribution Order (RDO)/Disposal Release Order (DRO) Confirmation response from DLA Disposition Services Field Offices back to DLA Disposition Services for verification that the correct weapon was issued.

C16.3. SOURCE OF SUPPLY AND STORAGE ACTIVITY INTERFACE FOR DISPOSAL RELEASE ORDERS

C16.3.1. General. Sources of supply use the DLMS 940R Disposal Release Order (DRO) to direct and control issue of supply system stocks on their records to disposal. Sources of supply will send DROs to the storage site having custody of the stock and result in the preparation of DD Form 1348-1A (or DD Form 1348-2). If the item is classified in SCC Q and is being sent to a DLA Disposition Services Field Offices, the DRO will contain Management Code O (alpha) or S, as appropriate, to

indicate if materiel is hazardous to public health and/or safety and whether mutilation² is required. The retention quantity in the DRO will determine the quantity of materiel to be turned in to disposal by the storage site. The retention quantity cited in the DRO will be kept and all remaining stocks transferred to disposal, or, if the quantity on hand is less than the quantity indicated, the storage site will answer with DLMS 945A Disposal Release Denial with Status Code BY.

C16.3.2. Release Confirmation. A DLMS 945A Disposal Release Confirmation (DRC) gives advice from the storage activity to the source of supply that initiated the DRO of supply action taken. The storage site will send the DRC when quantity shipped is the same quantity, when quantity shipped is greater than requested, or when quantity shipped is less than the quantity requested in the DRO. The source of supply will use the DRC to make adjustments to inventory records. A DRC will be prepared and sent on the day materiel is delivered to the carrier for shipment to DLA Disposition Services Field Offices. The DRC will, if appropriate, contain Code 2I in the N9 segment if the shipped materiel line item value is \$800 or more or the item is recorded as pilferable/sensitive. Do not wait for receipt of a driver's control copy or return of a signed receipt copy of the DTID before preparing the DRC. When not using DLMS 945A DRC to confirm a shipment of materiel to DLA Disposition Services Field Offices, send DLMS 856S to DLA Disposition Services, with Code 2I in the REF segment if shipped materiel line item value is \$800 or more or the item is recorded as pilferable/sensitive, simultaneously with the DRO, DLMS 870M ICP/IMM Reply to Customer Asset Report (DIC FTR), or other transaction authorizing/directing shipment to disposal. This procedure is authorized when circumstances (such as local transfers, use of available organic transportation, or other substantiating conditions) make use of the DRC unnecessary.

C16.3.3. Release Follow-Up. The source of supply will use a DLMS 940R Disposal Release Inquiry to follow-up on storage facilities for unconfirmed DROs 10 calendar days after the date the DRO was created. If the DRO has been complied with, the storage facility will respond with a DRC (see C16.3.2). If the DRO has not been complied with and shipment is anticipated, the storage facility will send supply status, a DLMS 945A, with an estimated shipping date. If there is no record of the DRO, the storage facility will send a status message DLMS 945A with Status Code BF. If the DRO has been denied, the storage activity will send a DLMS 945A Disposal Release Denial with Status Code BY.

C16.3.4. Release Denial. The storage site will send a DLMS 945A Disposal Release Denial to the source of supply that prepared the DRO as a notification of no action taken. Sources of supply will use the DLMS 945A to adjust inventory records.

C16.3.5. Release Cancellation. Disposal release cancellations, a DLMS 940R, are prepared by sources of supply having initiated DROs and sent to storage sites when

² Material requiring mutilation may not be consigned to DLA Disposition Services Field Offices unless the DoD Component of the activity directing the shipment has made prior official arrangements with the DLA Disposition Services. If mutilation is required, provide specific instructions to the DLA Disposition Services Field Offices by separate correspondence, citing the DTID number.

determined disposal actions should be stopped. Source of supply cancellation requests will be sent only when DROs are unconfirmed. Storage activities will respond to the cancellation request using a DLMS 945A Disposal Release Cancellation Advice with appropriate transaction type code, and RIC of the source of supply to which the transaction will be sent and the activity preparing the transaction.

C16.3.6. Release Cancellation Follow-Up. A DLMS 940R Disposal Release Cancellation Follow-up, may be sent by the source of supply to get latest status of a disposal release cancellation. The disposal release cancellation follow-up transaction will be in the same format as the original disposal release cancellation and will be processed by the storage site as a cancellation request if the original request was not received. If the original request was received and all required actions have been completed, the storage site will respond to the disposal release cancellation follow-up by duplicating previously submitted documentation, a DLMS 945A.

C16.3.7. Reporting Excess Quantity. The source of supply will send replies to excess reports, a DLMS 870M, to notify the reporting activity that the quantity reported is in excess to source of supply requirements and further action is authorized under appropriate DoD Component procedures. Refer to Chapter 11 Materiel Returns.

C16.3.8. Defense Automatic Addressing System Processing of Release Confirmations. DAAS will use data in a DLMS 945A, with Transaction Type Code NM in the WO6 segment, to create shipment status using a DLMS 856S. Upon completion of this process, DAAS will send the DRC to the appropriate organization(s) as indicated in the N1 segment and a DLMS 856S to DLA Disposition Services.

C16.4. DOCUMENTATION REQUIRED FOR SHIPMENTS TO DLA DISPOSITION SERVICES

C16.4.1. General Requirement

C16.4.1.1. Disposal Turn-in Document or Disposal Turn In Document and Suffix. Activities will direct/process all accountable materiel to disposal using a DTID. Some categories of non-accountable property may be transferred to a DLA Disposition Services Field Office without documentation. Guidance will be provided by the servicing DLA Disposition Services Field Office. Sources of supply will send a DTID (DD Form 1348-1A or DD Form 1348-2), (see [DLM 4000.25-1, Appendix 3.49](#) for data requirements) and documentation for in-transit control of property identified by an NSN or local stock number (excluding scrap [SCC S], waste, non-appropriated fund activity, and lost, abandoned, or unclaimed privately owned personal property) shipped or transferred to a DLA Disposition Services Field Office. Shipment/transfer of materiel to a DLA Disposition Services Field Office via DTID number requires authority for disposal, which will be indicated in the DTID by appropriate disposal authority code, along with the reason for disposal code. Ensure property is reported to the integrated material manager (IMM) prior to preparing the DTID, as required, per [DoD 4140.1-R](#), "DoD Supply Chain Materiel Management Regulation," May 23, 2003. DTID and

documentation will control the shipment from the time of release by a shipping activity until receipt of the property by DLA Disposition Services Field Office.

C16.4.1.2. Shipment Status. For shipments/transfers to DLA Disposition Services Field Offices, shipping activities will send a DLMS 856S, Shipment Status (Transaction Type Code AS), for each DTID number or DTID number and suffix regardless of dollar value. The DLMS 856S will contain Distribution Code 9 identifying DLA Disposition Services, the unit price of the materiel, the actual quantity shipped, and the date delivered to the carrier for shipment.

C16.4.1.2.1. Shipment Status Visibility/Transactions with Distribution Code 9. DLA Transaction Services will route shipment status transactions with Distribution Code 9 to the DLA Disposition Services Field Office global record, making the shipment status information visible and available to all DLA Disposition Services Field Offices, as required. DLA Transaction Services will edit the DLMS 856S Shipment Status for the following criteria before routing the transaction to the DLA Disposition Services Field Office global record:

C16.4.1.2.1.1. Invalid DoDAAC, Federal supply classification, or Quantity. Reject, to the generating activity, for invalid DoDAACs, FSC (FSC does not exist), and quantity of zero or blank. The rejected transaction will be returned to the generating activity with a narrative explanation of the reason for return and instructions not to resubmit.

C16.4.1.2.1.2. Edit Unit Price. If the transaction contains an LSN with a blank or zero unit price, reject; if the transaction contains an NSN and blank or zero unit price, insert the Federal Logistics Information System (FLIS) price.

C16.4.1.2.2. Information Capture and Validation. The DLA Disposition Services Field Offices use the shipment status to electronically capture and validate information about incoming property from an activity that is shipping property to a DLA Disposition Services Field Office prior to physical receipt. Additionally, a subset of shipment transactions meeting the Intransit Control System (ICS) criteria is used to initiate the DLA Disposition Services ICS tracking process.

C16.4.1.3. Fund Citation for Scrap Proceeds Reimbursement. For shipments involving the turn-in of scrap materiel to DLA Disposition Services Field Offices, the turn-in shipping activity will add the data element, 'Scrap Reimbursement', to the instructions in Block 27 (and its continuation page or in available white space on the paper that the form is printed, if needed) of the DD Form 1348-1A or DD 1348-2. The value in this field will be the fund citation for reimbursement of scrap proceeds minus disposition processing costs. For receipt of property, DLA Disposition Services will sign the DD Form 1348-1A, DD 1348-2 and provide a signed digital image of the turn-in document via [eDOCs](#) to confirm receipt in the in-transit system.

C16.4.1.4. Receipt in Place Documentation Processing at the DLA Disposition Services Field Office. For receipt in place excess property where the DoD

generator has provided a DLMS 856S Shipment Status (and DLMS 996H for Hazardous Waste), the Distribution Standard System (DSS) due-in report is authorized to be used by DLA Disposition Services without a hard copy DD Form 1348-1A or DD Form 1348-2 for receipt, so long as all required information for turn-in is included in the automated file.

C16.4.2. Requirements for Shipments of Hazardous Materiel and Hazardous Waste. The following guidance outlines basic documentation requirements for turn-in of Hazardous Materiel (HM), Hazardous Waste (HW), and other types of wastes (e.g., Polychlorinated Biphenyl (PCBs), Friable Asbestos, etc.). The turn-in activity will enter the bill-to fund code for reimbursable actions associated with the disposal, (e.g., HW contractor costs, in the DD Form 1348-1A or DD Form 1348-2), in order to provide reimbursement to DLA Disposition Services. To ensure compliance with federal, state, DoD and host nation regulations, turn-in activities will obtain and become familiar with applicable Code of Federal Regulations (CFR), state regulations, DoD regulations, and Overseas Environmental Baseline Guidance Documents (OEBGD), or the Final Governing Standards (FGS) for the host nation.

C16.4.2.1. Shipment Status. The DLA Disposition Services Field Offices will use the DLMS 856S to electronically capture and validate information about inbound HM/HW property from a customer that is shipping property to a DLA Disposition Services field office prior to physical receipt. The information contained within the transaction is used by DLA Disposition Services field offices to schedule inbound shipments and to match the inbound shipment to a Hazardous Waste Profile Sheet (HWPS). In addition to data requirements for shipment status of non-hazardous materiel, shipment status for HW/HM will add the following: DTID number or DTID number and suffix number, HWPS number, disposal authority code, disposition services indicator code, item nomenclature, SCC, special materiel identification code, materiel management aggregation code, and DEMIL code. This additional information will assist the DLA Disposition Services Field Offices with the receipt, inspection, and materiel identification of the HM/HW turn-ins. See DLA Disposition Services [I 4160.14](#), "Operating Instructions for Disposition Management," for appropriate code value lists.

C16.4.2.2. Hazardous Waste Profile Sheet (DLMS 996H Hazardous Waste Profile Transaction). The HWPS provides detailed information/analysis relative to the waste stream being turned in to the DLA Disposition Field Office. This information will be provided prior to receipt to allow for compatible storage arrangements and will facilitate DLA Disposition Services' ability to plan, manage, schedule, and report on inbound shipments to maximize the efficiency of the receiving process.

C16.4.2.2.1. Required Documents for Hazardous Waste/Hazardous Materiel Turn-ins. Turn-in activities are required to provide an HWPS, DLA Disposition Services Form 1930, or backup documents indicating lab or manufacturer's chemical analysis with the turn-in of each initial waste stream, and once a year thereafter. An HWPS is required with turn-ins of HW and used and/or opened HM that meets the definition of HW when discarded via disposal service contract. Used and/or opened HM is considered contaminated and may not be the same property described on a Materiel

Safety Data Sheet (MSDS). See [DoD 4160.21-M](#), Chapter 10, Paragraph D. Generators will complete the HWPS by providing information based upon user's knowledge or laboratory analysis of the waste. Supporting documentation, consisting of lab or manufacturer's chemical analysis, description of waste production processes including raw materials, end products, and other sources documenting how the waste was generated, may be required if user's knowledge does not identify or characterize the waste sufficiently or correctly. All supporting documentation should accompany the physical shipment. A DLMS 996H transaction can be used in lieu of a hard copy Form 1930 for HW received in place, however, hard copy Form 1930s will be required if HW is physically received at the Disposition Services Field Office or if a hard copy HWPS is required by Federal, State, or Local regulation.

C16.4.2.2.2. Initial Hazardous Waste Profile Sheet and Follow-on Turn-in Documents. After the initial turn-in of the waste, turn-ins of identical waste will not require a HWPS for one year; instead, generators will enter a DLA Disposition Services-assigned HWPS reference number in Block 27 (Clear Text Statement) of the DD Form 1348-1A, DTID. The turn-in activity will certify each HWPS annually by providing to DLA Disposition Services Field Office one of the following: a new, signed, and dated HWPS, an electronically transmitted HWPS for each waste turn-in that will be generated during the following year, or a letter listing the HWPS reference number(s) and the name of the corresponding waste stream for each profile which the generator wishes to remain active for another year. If the turn-in activity chooses to provide a letter, that letter will be signed and dated and include the following statement: "The undersigned certifies that the hazardous waste profiles listed in this letter have been carefully reviewed. Any changes to the processes generating these wastes have been considered. New regulations affecting hazardous waste identification and disposal have been applied. Neither the waste streams nor the identification of the waste streams has changed in a manner that would warrant a change in the data previously provided on these waste profiles."

C16.4.2.2.3. Overseas Hazardous Waste/Hazardous Materiel Shipment Requirements. For overseas shipments of HM/HW, the turn-in activity will include the host nation and International Maritime Dangerous Goods (IMDG) shipping description. The IMDG shipping description includes both the United Nations, and United States Department of Transportation (DOT) requirements and is virtually the same. Any place that a Proper Shipping Name (PSN), container information, state waste code, etc., are required, the respective country codes, container information, etc., will be filled in.

C16.4.2.2.4. Exemption of Hazardous Waste Profile Sheet Requirements. Laboratory chemicals are exempt from HWPS requirements, but will be processed according to DoD 4160.21-M, Chapter 10.

C16.4.2.3. Material Safety Data Sheet Requirement

C16.4.2.3.1. Material Safety Data Sheet Hard Copy Requirement. Turn-in activities will provide a hard copy MSDS for hazardous materiel in the absence of a Hazardous Material Information Repository System (HMIRS) Number. If there is a valid

MSDS in HMIRS, then indicate the MSDS five digit alpha code from the HMIRS on the DTID (DD Form 1348-1A). This requirement applies to turn-ins of both used and unused HM, as well as opened or unopened HM. The MSDS requirement does not apply to exclusions listed in 29 CFR 1910.1200(b)(6).

C16.4.2.3.2. Hazardous Materiel Information/Documentation Requirements. The MSDS will match the specific manufacturer of the hazardous materiel and should include the manufacturer's name or contractor and Government entity (CAGE) code. In addition to an MSDS, used and/or opened HM requires that the chemical name of any hazardous contaminants and the noun name of any non-hazardous contaminants will be identified on the DTID. This is required because used and/or opened HM may have become contaminated with constituents not reflected on the MSDS. A HWPS may also be required for used/opened HM going directly to waste disposal contract.

C16.4.2.4. Methods of Document Generation for Hazardous Waste/Hazardous Materiel Turn-ins. There are three methods available for automated turn in of HM/HW: Generator Communication (GenComm), Electronic Turn-In Document (ETID), and direct interface via DLA Transaction Services.

C16.4.2.4.1. Generator Communication Method. Use of the GenComm Server for automated turn-in of documentation to the DLA Disposition Services Field Office allows the military generator, using its HW disposal system, to electronically send email or upload the DTID, DD 1348-1A and the related HWPS. The GenComm server will transmit the HWPS and any correlating supply shipment status information to DLA Transaction Services using the standard XML-schema. DLA Transaction Services will convert the information into a DLMS 996H transaction and route to the appropriate DLA Disposition Services Field Office using a RIC plus suffix to site identification (ID) to valid RIC crosswalk table. This table will be maintained by DLA Disposition Services and provided to DLA Transactions Services as required. DLA Transaction Services will also generate the DLMS 856S shipment status transaction from the information in the XML schema and send to the appropriate field office.

C16.4.2.4.2. Electronic Turn-In Document. Use of ETID for automated turn-in of documentation to the DLA Disposition Services Field Office allows those military generators lacking an automated system to login to ETID via the web and manually generate their DTID and HWPS documentation. ETID will have a direct interface with the DLA Disposition Services Field Office system, which will receive the information for processing of the HM/HW turn-in.

C16.4.2.4.3. Direct Communication with DLA Transaction Services. Those military generators with a Performance Based Agreement (PBA) with DLA Transaction Services can bypass the GenComm server. The PBA should identify the military generator's DoDAAC to be used in the HWPS transaction, as well as confirmation of capability of producing the DLMS 856S shipment status, along with the DTID number and HWPS number and all other data required for HM/HW shipment status (see C16.4.2.1.). The generator has the option of providing the DLA Transaction

Services with the identical transactions currently provided to GenComm, the XML schema, or the actual DLMS 996H and 856S transactions. For generators not DLMS compliant, the DLA Transaction Services will map the 856S based on the inbound feed from the military generator.

C16.4.2.5. DLA Transaction Services mapping to 996H

C16.4.2.5.1. DLMS 996H. The DLMS 996H will serve as a file transfer message for conveying the GenComm standard and XML schema transactions to the receiving DLA Disposition Services Field Office.

C16.4.2.5.2. File Transfer Segments. The beginning segment for file transfer information will be used to convey the GenComm interface standard version number. The file information segments will be used to pass the XML tag name and content information associated with that tag name. In order to assist a receiving system with consuming the DLMS 996H transaction, each file information segment needs to include contextual information for the content being passed. This will be accomplished by pairing the file information segments. The first file information segment in a pair will provide the context for the pair (i.e., the GenComm data element name), while the subsequent file information segment(s) provide the content (i.e., the values associated with the data element name). The file transfer segments will continue to be paired until all the data elements associated with the GenComm inbound transaction have been successfully mapped to the DLMS 996H transaction.

C16.4.3. Receipt of Hazardous Materiel/Hazardous Waste and Processing Related Hazardous Waste Profile Sheet. Upon receipt by DLA Disposition Services Field Office of the DLMS 996H HM/HW Profile Sheet from DLA Transaction Services, the supporting system will parse the information into its database and store the individual HWPS records by HWPS reference number and DTID number. When HM/HW is turned in to the DLA Disposition Services field office, the system will search for a DLMS 527D Pre-positioned Materiel Receipt (PMR) to facilitate automated check-in. In the absence of the PMR, a search for the matching DLMS 856S shipment status will be conducted. Once the matching record is found, the system will use the DTID number or DTID number and suffix, and the HWPS reference number from the shipment status to pull the matching HWPS for the shipment to be receipted. If no electronic records are on file for the DTID number or DTID number and suffix, and the HWPS, the DLA Disposition Services Field Office personnel will be manually prompted to enter the information into their system based on the hard copy documentation accompanying the shipment.

C16.5. INTRANSIT CONTROL SYSTEMS PROCESSING OF SHIPMENTS TO DLA DISPOSITION SERVICES

C16.5.1. General.

C16.5.1.1. ICS is an automated DoD process that provides a central capability to monitor and/or investigate discrepancies in shipments of materiel to DLA

Disposition Services field offices that meet ICS rules. Property qualifying for ICS processing have a line item value over \$800 or a pilferable/sensitive controlled inventory item code (CIIC) regardless of dollar value, and the property is being turned in to the field office. Pilferable CIICs are equal to: J, I, M, N, P, V, W, X, Y and Z. Sensitive CIICs are equal to: 1, 2, 3, 4, 5, 6, 8, Q, R, \$.

C16.5.1.2. Electronic Turn-In Document Process. Use of ETID for automated turn-ins to the DLA Disposition Services Field Office allows those military generators lacking an automated system to log in to ETID via the web and manually generate their DTID number or DTID number and suffix. ETID will have a direct interface into the ICS global record and will enter property qualified for Intransit tracking into the ICS on the generators behalf. For identification purposes, ETID will have the option to construct the DTID number or DTID number and suffix, document number using a unique value in the first position of the serial number. This will facilitate routing of follow-ups through DLA Transaction Services' DAAS to the supply system of the DoDAAC of the generator and provide the capability to monitor shipments/transfers to DLA Distribution Services Field Offices. When follow-up notifications on in-transit property are required, in addition to the systemic follow-up generated by the field office, the ETID application will provide notification to the generating activity responsible for the property via email.

C16.5.2. Intransit Control System Suspense File. The ETID interface described above, shipment status transactions, or any receipts processed prior to shipment status meeting ICS criteria (see C16.5.1.1.), will initiate the ICS suspense file maintained as part of the DLA Disposition Services Field Office global record. This global record will be visible and available to all DLA Disposition Services Field Offices as required. At a minimum, the suspense file will contain the following data shown in Table C16.T1:

Table C16.T1. Turn-In Processing Data Requirements

DATA ELEMENT	SOURCE
Document Number	ETID/Shipment Status/Receipt
NSN/FSC/FSG (if available)	ETID/Shipment Status/Receipt
Unit of Issue	ETID/Shipment Status/Receipt
Extended \$ Value of Shipment (if available)	Calculated from FLIS unit price
Controlled Inventory Item Code	FLIS
Quantity Shipped	ETID/Shipment Status
Date of Shipment	ETID/Shipment Status
Quantity Received	Receipt
Date of Receipt	Receipt
Extended Dollar Value of Receipt	Receipt
\$ Value of Quantity Variance Between Shipment and Receipt (if any)	(Internal Computation)

C16.5.3. Intransit to DLA Disposition Services Field Office Report. ICS provides a capability for DLA Disposition Services to furnish management information to Service/Agency headquarters concerning the transfer of property to DLA Disposition Services Field Offices. DLA Disposition Services will provide a quarterly Intransit to DLA Disposition Services Field Office Report upon request. DLA Disposition Services will provide tailored special extract reports as requested (Appendix 2).

C16.5.4. Intransit Control System Tracking and Associated Actions

C16.5.4.1. DLA Disposition Services Field Office Processing against the Global Intransit Control System Suspense File

C16.5.4.1.1. Suspense File Comparison. When a receipt is processed at any of the DLA Disposition Services Field Offices, it will be compared with the suspense file. The receipt will open the ICS transaction suspense file if no previous shipment status created a suspense record and the receipt value is \$800 or more, or the item is recorded as pilferable or sensitive. The suspense file will remain open for a period of one year from the date it is initiated, unless closed by one of the actions below.

C16.5.4.1.2. Intransit Control System Follow-up Transactions. All follow-up transactions generated as a result of ICS processing will be sent through DLA Transaction Services. The field office will prepare the DLMS 940R, Transaction Type Code NH (MILSTRIP DIC AFX/AFZ functionality) Disposal Shipment Confirmation Follow-up identifying the originating activity as DLA Disposition Services (RIC S9D). The follow-up will be directed to the RIC of the shipping activity. If the shipping activity RIC is not known, the DoDAAC identified in the document number may be used for transaction routing. The DoDAAC in the document number may be the shipping activity itself or the activity directing the disposal action; (e.g., inventory control point (ICP)/IMM). ICPs/IMMs receiving the follow-up will enter the shipping activity RIC as the intended recipient and resend the follow-up through DLA Transaction Services, to the shipping activity to answer directly and to perform research in order to provide either the ICP/IMM or storage activity response.

C16.5.4.1.3. Research Guidance (Critical Flag). When the field office prepares the DLMS 940R follow-up, the transaction will include research guidance (critical flag) to aid the DoD Components to prioritize research and resolution of problems. The critical flag will identify turn-ins of sensitive items (1, 2, 3, 4, 5, 6, 7, 8, Q, R, or \$), demilitarization required items (C, D, E, or F), and items identified to critical classes of supply (DoD 4160.21-M). The DLMS 940R follow-up will also include the DoDAAC of the field office that has received or is intended to receive the turn-in.

C16.5.4.1.4. Closure of Suspense Files. The suspense file will be closed if the receipt matches a shipment status transaction previously recorded in the suspense file. A match is based on DTID number and FSC.

C16.5.4.1.5. Internal Receipt Refusal. If the field office is unable to receive the property and must reject the property back to the generator, an internal Receipt Refusal transaction will be processed and matched to the record in ICS. If the internal transaction matches a shipment transaction previously recorded in the suspense file, the suspense file record will be closed.

C16.5.4.1.5.1. DLMS 940R Disposal Shipment Confirmation Follow-Up with Advice Code 36. If after 90 calendar days from the date of posting the receipt to the ICS there is no matching shipment status transaction and the extended value is \$800 or more, or the item is recorded as pilferable or sensitive, the field office will forward the 940R Disposal Shipment Confirmation Follow-up transaction with Advice Code 36 (MILSTRIP DIC AFX functionality). No response is required and this notification closes the ICS suspense.

C16.5.4.1.5.2. DLMS 940R Disposal Shipment Confirmation Follow-up with Advice Code 37. If after 90 calendar days from the date of posting shipment status to the ICS there is no matching receipt transaction, the extended value is \$800 or more, or the item is recorded as pilferable or sensitive, the field office will forward the 940R Disposal Shipment Confirmation Follow-up transaction with Advice Code 37 (MILSTRIP DIC AFX functionality). The ICS remains open awaiting response.

C16.5.4.1.6. Second Follow-up. If the DLMS 870S Supply Status or the DLMS 945A (Type Transaction Code AZ) Disposal Shipment Confirmation transaction is not received within 30 calendar days of sending the DLMS 940R Disposal Shipment Confirmation Follow-up with Advice Code 37, the field office will send a second follow-up (MILSTRIP DIC AFZ functionality). The record will remain open for a period of 1 year from the date it was originated unless closed by a response to the 940R. When moved from the active suspense file, records will be placed on an accessible history file for an additional two years.

C16.5.4.1.7. Terminating In-Transit Control System Processing. Receipt of 870S Supply Status will direct further ICS processing as follows:

C16.5.4.1.7.1. DLMS 870S Supply Status with Status Code DE. Receipt of 870S Supply Status with Status Code DE will terminate ICS processing for the document number in question. Status Code DE indicates no shipment was made.

C16.5.4.1.7.2. DLMS 870S Supply Status with Status Code DF. Receipt of a DLMS 870S Supply Status with Status Code DF will terminate ICS processing and indicates property was removed from the storage area and cannot be located. Further research is being conducted within Service/Agency channels. The record will be removed from the active suspense file and placed in an accessible history file for two years.

C16.5.4.1.7.3. DLMS 870S Supply Status with Status Code DG. Receipt of a DLMS 870S Supply Status with Status Code DG indicates shipment is confirmed and a signed copy of the DTID number or DTID number and suffix from the

field office is on file for the quantity shipped. This closes the record in ICS for the document number in question. DLA Disposition Services will use its own procedures to determine why notification of receipt of materiel was not sent by the field office. DLA Disposition Services will keep an accessible history file record for two years.

C16.5.4.1.7.4. DLMS 870S Supply Status with Status Code DH.

Receipt of a DLMS 870S Supply Status with Status Code DH indicates shipment is confirmed and a signed copy of the DTID from the field office is on file, however the quantity on the DTID is different than the quantity on the shipment status. Further research on the quantity discrepancy is being conducted within Service/Agency channels. This will close the record in ICS for the document number in question. DLA Disposition Services will keep an accessible history file record for two years.

C16.5.4.1.7.5. DLMS 870S Supply Status with Status Code BF.

Receipt of a DLMS 870S Supply Status with Status Code BF indicates that the shipping activity has no record of the document number in question. This will close the record in ICS and removes the record from the active suspense file. DLA Disposition Services will place the record in an accessible history file for two years.

C16.5.4.1.8. Receipt of a DLMS 945A, Disposal Shipment Confirmation, Type Transaction Code AZ. When the DLMS 945A (Type Transaction Code AZ) Disposal Shipment Confirmation transaction is received, ICS processing for the document number in question is considered complete. Accessible history file records will contain NSNs, quantities, document numbers, dollar value of variances (if any), and the identity of applicable shipping activities and DLA Disposition Services Field Offices.

C16.5.4.1.9. Shipping Activity Actions

C16.5.4.1.9.1. Documentation Review. Supply organizations in receipt of the DLMS 940R Disposal Shipment Confirmation Follow-up will ensure that applicable shipping activities review signed documentation (DTID), investigate discrepancies, and provide timely responses within 30 working days of receipt of the inquiry. Disposal Shipment Confirmation Follow-ups with Advice Code 36 do not require a response.

C16.5.4.1.9.2. Filing Disposal Turn In Documents. To ensure required copies of the DTID number or DTID number and suffix are available, shipping activities will file all signed receipt copies when received from the field office. Copies will be kept for a minimum of two years after date of the shipment.

C16.5.4.1.9.3. Quantity Received Verification. Upon receipt of a disposal shipment confirmation follow-up, the shipping activity will verify the actual quantity shipped, and will respond with supply or shipment status as follows:

C16.5.4.1.9.4. No Shipment Record/Status. If there is no record of the shipment, nor of generating the shipment status, and no record of a signed copy of the DTID, the DLMS 870S Supply Status with Status Code BF will be sent in response to the DLMS 940R Disposal Shipment Confirmation Follow-up.

C16.5.4.1.9.5. Shipment Status Sent But No Record. If it is determined that although shipment status had been sent, no shipment had been made or no record of shipment, other than the shipment status transaction can be located, the DLMS 870S Supply Status with Status Code DE will be sent in response to the DLMS 940R Disposal Shipment Confirmation Follow-up.

C16.5.4.1.9.6. Signed DTID Receipt Not Available. If a signed copy of the DTID number or DTID number and suffix receipt is not available, but investigation indicates that property was removed from the storage area and cannot be located, the shipping activity will do additional research as determined by the DoD Component procedures, including, if necessary, referral to the appropriate criminal investigative activity. The DLMS 870S Supply Status with Status Code DF will be sent in response to the DLMS 940R Disposal Shipment Confirmation Follow-up.

C16.5.4.1.9.7. No Shipping Activity Record. If the shipping activity has no record of generating a DLMS 856S Shipment Status transaction, but has received a signed copy of the DTID from the Disposition Services Field Office, a DLMS 945A Disposal Shipment Confirmation (Transaction Type Code AZ) (MILSTRIP DIC ASZ functionality) showing the quantity receipted for the DTID number or DTID number and suffix will be sent in response to the DLMS 940R Disposal Shipment Confirmation Follow-up.

C16.5.4.1.9.8. Use of Distribution Code 9. The DLMS 870S Supply Status and the DLMS 945A Disposal Shipment Confirmation transactions generated by the shipping activity in response to the DLMS 940R Disposal Shipment Confirmation Follow-up will contain Distribution Code 9 to enable DLA Transaction Services to route copies of these transactions to the ICS Global Record.

C16.5.4.1.9.9. Extended Value Determination. The extended value of the shipment will be determined by document number, quality, and unit price.

C16.5.4.1.9.10. Shipment/Transfer Monitoring. ICS provides a means to monitor shipments/transfers to DLA Disposition Services Field Offices. This system also provides a capability for DLA Disposition Services to give information to the DoD Component concerning the shipment/transfer of property to DLA Disposition Services Field Offices.

C16.6. PROCESSING MATERIEL AND MAINTAINING ACCOUNTABILITY BY THE DLA DISPOSITION SERVICES AND THE DISPOSITION SERVICES FIELD OFFICES

C16.6.1 Materiel Acceptability. These procedures do not negate the authority of DLA Disposition Services Field Offices to refuse acceptance of accountability and physical receipt of certain types and classes of materiel as prescribed by DoD 4160.21-M. If materiel is not acceptable for these reasons, and the shipment is rejected/returned to the shipper, DLA Disposition Services Field Office will provide notice of rejection to DLA Disposition Services under existing procedures, thus purging the ICS file.

Guidance on shipment notices and ICS processing is applicable only to useable items being shipped/transferred to DLA Disposition Services Field Office.

C16.6.1.1 Document Receipt. DLA Disposition Services Field Offices will give documentation of receipt of the DTID number upon request by the shipping activity. NOTE: The DLA Disposition Services Field Offices will always supply a copy of the signed DTID, or DTID and suffix for all shipments containing quantity discrepancies. DLA Disposition Services Field Offices will note the difference in quantity received and quantity shipped on the DTID number or DTID number and suffix.

C16.6.1.2 Notify Shipping Activity of Quantity Error. If an error exists because the quantity received is less than or greater than quantity entered on the DTID number or DTID number and suffix, DLA Disposition Services Field Offices will notify the shipping activity and submit a supply discrepancy report. See DoD 4160.21-M, Chapter 3; and Chapter 17.

C16.6.2. Maintaining Property Accountability. The accountable property record for inventory owned by the DLA Disposition Services will be maintained by the DLA Disposition Services Field Office system. DLA Disposition Services system will maintain the owner's total item property record and financial accounting for DLA Disposition Services Owned property. End of day processing and an annual reconciliation will occur to ensure that the two inventory records are kept in sync at the DTID number or DTID number and suffix level.

C16.6.2.1. Maintaining Owner Compliance Table. The field office system will maintain an owner compliance table to ensure daily (end of day) and annual (total reconciliation) requirements are executed based on pre-established business rules in compliance with DLM 4000.25, DLMS Manual, Chapter 6. (Physical Inventory Control)

C16.6.2.2. Daily System Reconciliation. The DLA Disposition Services (owner) system and the DLA Disposition Field Office (storage activity) system will match all active records daily (i.e. DTID numbers or DTID number and suffixes that had any transaction affecting record balances) on-hand balances.

C16.6.2.2.1. DLMS 846R Transaction for End-of-Day Processing. The field office system (storage activity) will send the daily closing balance for each affected DTID number or DTID number and suffix using the DLMS 846R, Location Reconciliation Request transaction, Report Type Code LC and the type of reconciliation code for end of day processing. The DLMS 846R will contain the demilitarization code (DEMIL code) that corresponds to the stock number for that DTID number or DTID number and suffix. The DEMIL code will be included in the match of item data characteristics (unit of issue, condition code, CIIC, and DEMIL code) to ensure compatibility between storage activity and owner systems.

C16.6.2.2.2. Additional Use of DLMS 846R. The field office system (storage activity) will also send a DLMS 846R, Location Reconciliation Notification, Report Type Code X4, to advise DLA Disposition Services of the total number of daily

DTID number or DTID number and suffix closing balance transactions (number of DLMS 846R, Report Type Code LC transactions) being forwarded and the associated cut-off date. Imbalances will be programmatically researched to assure consideration of in-float documents, delayed transactions, and duplicate transactions.

C16.6.2.3. Annual Record Total Reconciliation. All DLA Disposition Services owner and field office storage activity records (active and inactive, including zero balances) will be reconciled at least once each fiscal year (total reconciliation).

C16.6.2.3.1. DLMS 846R Location Reconciliation by DTID or DTID and Suffix. The field office will prepare location reconciliation requests by line item (DTID number or DTID number and suffix) for each DTID regardless of the balance (including zero balances), using the DLMS 846R, Location Reconciliation Request transaction, Report Type Code LC and the type of reconciliation code for annual location reconciliation. The location reconciliation request will contain the DEMIL code that corresponds to the stock number for that DTID. The DEMIL code will be included in the match of item data characteristics (unit of issue, condition code, CIIC, and DEMIL code) to ensure compatibility between storage activity and owner systems.

C16.6.2.3.2. DTID or DTID and Suffix Closing Balance Transactions. The field office (storage activity) system will also send a DLMS 846R, Location Reconciliation Notification, Report Type Code X4, to advise DLA Disposition Services of the number of annual DTID number or DTID number and suffix closing balance transactions (DLMS 846R Type Code LC transactions) being forwarded and the associated cut-off date. Imbalances will be programmatically researched to assure consideration of in-float documents, delayed transactions, and duplicate transactions.

C16.6.2.4 Mismatches. For any mismatches found, the DLA Disposition Services personnel will ensure that potential or actual inventory accounting adjustments are researched and corrected in accordance with the value of the adjustment and type of item involved. Emails will be sent to the appropriate Disposition Services Field Office personnel requesting assistance to isolate errors in data transmission.

C16.6.3. Disposition Services Containerization Processing

C16.6.3.1. Identifying Items. To enhance potential marketing, the DLA Disposition Services Field Office has the discretion to “containerize” items turned in by DTID number or DTID number and suffixes that can be reutilized/sold together. Rules regarding items that can be grouped in containers are governed by the DLA Disposition Services. For instance, items that share the same or similar item characteristics such as demilitarization (DEMIL) code or CIIC can be placed in the same container.

C16.6.3.1.1 Use of DLA Disposition Services Container Identification Number. When the decision is made to market items via containerization processing, the DLA Disposition Services Field Office will generate a disposition services container Identification (ID) number for the items identified by DTID number or DTID number and suffixes placed in the container. For each DTID number or DTID number and suffix

coded receipt, the disposition services container ID number will also be identified in the DLMS 527R Receipt transaction (Transaction Type Code D4) generated by the field office to DLA Disposition Service, along with the disposition services complete container count and disposition services current container count.

C16.6.3.1.2 Container Tracking. DLA Disposition Services will track each DTID number or DTID number and suffix in the container. The disposition services container ID number and the DTID number will be sent to the RTD Web so the items can be marketed as part of the disposition services container.

C16.6.3.2. Container Transfer. In cases where items are eliminated or moved from one container to another based upon DEMIL code challenges, downgrade to scrap or re-marketing decisions, the DLA Disposition Services Field Office will generate the DLMS 846A, Asset Reclassification Response (Type Transaction Code TD) to DLA Disposition Services to maintain container synchronization and inventory accuracy. This container identification change process applies to NSNs, LSNs, and unit of use LSNs. When unit of use LSNs are involved, the DLMS 846A will also contain the cross reference NSN. The DLMS 846A will identify the controlling document number generated by the DLA Disposition Field Office, the DTID number or DTID number and suffix as a primary reference, the existing disposition services container ID number (FROM Container ID), as well as the new disposition services container ID number (TO Container ID). In the case of an item being removed from a container and not being placed in a new container, the TO disposition services container ID will not be cited in the transaction. Disposition services container ID changes always originate from the Field Office to the DLA Disposition Services. Accordingly, there is no corresponding asset reclassification request transaction for container ID changes.

C16.6.4 Scrap Downgrade

C16.6.4.1. Downgrade to Scrap. The downgrade to scrap process is used by the DLA Disposition Services and its field offices when an item is no longer needed and the property has no commercial value other than for basic materiel content. Policy and authority for downgrading materiel to scrap can be found in DoD 4160.21-M, "Defense Materiel Disposition Manual".

C16.6.4.2. Downgrade Items Upon Receipt (at Time of Turn-in): During the receiving process, if the DLA Disposition Services Field Office determines the item has only scrap value, the item may be downgraded to scrap upon receipt. The field office will assign a Disposition Services Scrap LSN to replace the existing NSN or LSN found on the original DTID number or DTID number and suffix generated by the customer.

C16.6.4.2.1. Assignment of 'Disposition Category' for Items Downgraded Upon Receipt. During the pre-receipt process, the field office will request a 'Disposition Category' from DLA Disposition Services (C16.6.9 - DLA Disposition Category Assignment and Associated Actions). Once the Disposition Category assignment response is provided, the field office will submit the receipt for scrap to the DLA Disposition Services, using the DLMS 527R Receipt (Transaction Type Code D4) using

a Scrap LSN. The DLMS 527R Receipt for material downgraded to scrap at time of receipt will reflect the source of the materiel received/returned code, (e.g., J = Return to inventory from other DoD activity users), (see the reason for materiel receipt/return ([MRR](#)) code list).

C16.6.4.2.2. Downgrade (Upon Receipt) of Entire Quantity on Disposal Turn In Document or Disposal Turn In Document and Suffix. If the entire quantity on the DTID number or DTID number and suffix is being downgraded to scrap, the original DTID number or DTID number and suffix number will remain and the original NSN/LSN will be referenced in the Receipt for audit purposes, to link to the newly assigned Scrap LSN. If the DTID number or DTID number and suffix is a duplicate number, then a UCN will be generated for the downgrade to scrap.

C16.6.4.2.3. Downgrade (Upon Receipt) of Partial Quantity on Disposal Turn In Document or Disposal Turn In Document and Suffix. If only part of the DTID is being downgraded to scrap, then a UCN will be generated and the Receipt will contain the original DTID number or DTID number and suffix as a secondary reference number.

C16.6.4.3. Downgrade Items After Turn-in (After Receipt). Any time after receipt, DLA Disposition Services may notify the Disposition Services Field Office via a DLMS 846C, Disposition Status Update (Report Type Code PC), to change the disposition status of the DTID number or DTID number and suffix to DS (Disposal). When the field office receives a disposal recommendation, the disposition of the property at the field office is determined by pre-defined ultimate disposal process business rules.

C16.6.4.3.1 Downgrade Items to Scrap (After Receipt). If the business rule decision is to downgrade to scrap, the field office will send a DLMS 947I, Inventory Adjustment (Type Transaction Code NU) with Quantity or Status Adjustment Reason Code BS – Downgrade (Loss), and associated with the original DTID number or DTID number and suffix.

C16.6.4.3.2. Creation of New Receipt for Items Downgraded to Scrap Subsequent to Initial Turn-in. A new receipt is created for the scrap using the DLMS 527R Receipt with the source of Materiel Received/Returned Code W - Receipt as a result of DLA Disposition Services process to downgrade to scrap, subsequent to the initial receipt of materiel. A DLA Disposition Services scrap LSN will be assigned in compliance with the scrap classification listing for use in the new Receipt. A UCN will be assigned and associated with the original DTID number or DTID number and suffix to avoid duplication in DLA Disposition Services. This UCN will become the controlling document number in the DLMS 527R. The new receipt will contain the original DTID number or DTID number and suffix as a secondary reference number, and will reference the original materiel identification (NSN or LSN).

C16.6.4.3.3. Materiel Downgraded to Scrap When Materiel Is Part of a Container. If the materiel/DTID number or DTID number and suffix downgraded to scrap is part of a container, the field office will generate a DLMS 846A, Asset

Reclassification Response (Report Type Code TD), to delete the DTID number or DTID number and suffix/container ID association in order to maintain container synchronization and inventory accuracy (see C16.6.3.2., Container Transfer).

C16.6.5. Relocation Between DLA Disposition Services Field Offices

C16.6.5.1. Use of DLMS 940R, DLMS 856S and DLMS 945A When Relocating Materiel Between Field Offices. In all instances when relocation of materiel between DLA Disposition Services field offices is necessary, the DLA Disposition Services will direct this action by using the DLMS 940R, Redistribution Order (Transaction Type Code NI), and sending it to the shipping field office, except when the Disposal Category Code for the DTID number or DTID number and suffix is DS Disposal. The shipping field office will always provide a DLMS 856S, Shipment Status (Transaction Type Code AS) to the receiving field office and the DLMS 945A, Redistribution Order Shipment Confirmation (Transaction Type Code NJ) to DLA Disposition Services upon shipment.

C16.6.5.2. Prepositioned Materiel Receipt for Relocations Between Field Offices. For all relocation actions between field offices, DLA Disposition Services will generate a DLMS 527D, PMR (Transaction Type Code DE), to the field office designated to receive the relocated materiel. The PMR will contain 2/LIN01/10 Code N (return to inventory of materiel relocated between storage activities without change in ownership (MILSTRAP DIC DWK functionality)). DLA Disposition Services will include the DTID number or DTID number and suffix in the PMR in order for DTID number or DTID number and suffix accountability to be maintained across multiple locations. The DTID number or DTID number and suffix value may be the original turn-in document number or may be a UCN assigned by the field office during receipt processing when the original DTID number or DTID number and suffix is not adequate to uniquely identify the property. Additionally, when an entire container is identified for transfer between field offices, the PMR will contain the disposition services container ID. ***Along with the Disposition Services Container ID, DLA Disposition Services will pass a Disposition Services Complete Container Count to indicate how many different DTID number, or DTID numbers and suffixes are within the container; this is how many different receipts are expected for a particular container.*** Upon receipt of the materiel, the receiving field office will provide the DTID number or DTID number and suffix or UCN and the disposition services container ID provided in the PMR to DLA Disposition Services using a DLMS 527R, Receipt, (Transaction Type Code D4) identified by 2/LIN01/10 Code N, ***and sequentially assign the Disposition Services Current Container Count number for each DTID number or DTID number and Suffix that is in the container.***

C16.6.5.3. Relocation of Disposal Category Code DS (Disposal) Items Between DLA Disposition Services Field Offices

C16.6.5.3.1. Field Office Responsibility for DS Category Code on Turn-in Materiel. Turn-in materiel to a DLA Disposition Services Field Office under a DTID number or DTID number and suffix may be assigned Disposal Category Code of DS

(Disposal) (see C16.6.9.). DLA Disposition Services Field Offices are responsible to manage the issue of property assigned Disposition Category Code DS and to update DLA Disposition Services' owner record for all property managed by DLA Disposition Services field offices, to include disposal category property.

C16.6.5.3.2. Tracking Materiel Issues for Materiel Required to be Relocated Between Field Offices. The DLMS 867I, Issue (Relocation) transaction (2/PTD01/10, Product Transfer Type Code BJ), will be used to track materiel issues between DLA Disposition Services Field Offices for disposal items required to be relocated to another DLA Disposition Services Field Office; (e.g., DEMIL Field Office). In these cases, the DLA Disposition Services Field Office shipping the materiel will send DLA Disposition Services the DLMS 867I Issue transaction for each DTID number or DTID number and suffix or Scrap (UCN) LSN quantity being relocated. DLA Disposition Services uses the Issue transaction to update the owner record.

C16.6.5.3.2.1. Additional Field Office Responsibilities for Relocation of DS Coded Materiel Requiring Redistribution. For these issues, the field office will create an internal DLMS 940R Redistribution Order using a UCN constructed using the field office DoDAAC and current ordinal date, followed by a unique 4-digit serial number, (e.g., SY205411390001, SY205411390002, etc). The field office will then decrement the owner balance, create and exit the DLMS 867I Issue, position the Redistribution Order for release, and once released, generate the DLMS 945A Redistribution Order Shipment Confirmation to the owner and the DLMS 856S Shipment Status to the receiving field office using DAAS.

C16.6.5.3.2.2. Citing Document Identifier Codes on Redistribution Orders. The MILSTRIP DIC cited in the internal DLMS 940R will be A2_, Redistribution Release Order since the materiel is being shipped to another field office.

C16.6.5.3.2.3. Requirement for Posting to the Defense Automatic Addressing System. Since these transactions are internal to the field office, a copy will be passed to DLA Transaction Services to be posted in the DAAS so that the complete issue, confirmation, and status history are maintained.

C16.6.5.3.3. Disposal Consolidation Number. DLA Disposition Services requires the use of a unique disposal consolidation number (DCN) to support the grouping of property relocated during the disposal process. A unique DCN will be generated for each group of items that are issued (relocated) in a single shipment. Each DLMS 867I Issue, will contain the DTID number or DTID number and suffix, or UCN as a secondary number in the transaction to support identifying inventory at a level lower than the document number or DCN. DLA Disposition Services will compile each individually received Issue (Relocation) transaction with the same DCN into one redistribution order (RDO) document, thus reducing the volume of RDO documents created. The DCN is a unique 10-digit number with positions 1-3 equal to the DLA Disposition Services Field Office RIC and positions 4-10 equal to a unique alphanumeric serial number. There is only one DCN per RDO.

C16.6.5.3.4. Documenting the On-hand Balance Record for Relocations.

Upon receipt of the DLMS 867I Issue transaction, DLA Disposition Services will decrement the on-hand balance record for the submitting DLA Disposition Services Field Office and generate an internal RDO or modify an existing internal RDO. For these relocations no RDO (DLMS 940R, Type Transaction Code NI) will exit the DLA Disposition Services system.

C16.6.5.3.5. Checking the Disposal Consolidation Number.

DLA Disposition Services will check the DCN on the DLMS 867I Issue transaction against previously created internal RDOs. If the DCN is present on an existing RDO, the DTID number or DTID number and suffix will be added as a new RDO. If the DCN is not present on an existing RDO, the DLA Disposition Services system will create a new internal RDO.

C16.6.5.3.6. Redistribution Orders Quantity.

The quantity on the DLMS 867I Issue transaction will be used to populate the RDO quantity field and will be reflected as in-transit until the DLMS 527R Receipt transaction is processed from the receiving DLA Disposition Services Field Office.

C16.6.5.3.7. Partial Shipments, First Shipment Requirements.

If property that requires DEMIL needs to go to a different field office (DEMIL facility) and the size and/or weight limits the use of one conveyance, partial shipments may occur. The first partial shipment will include two document numbers - the RDO document number (i.e., the controlling document number) and the original DTID number or DTID number and suffix from the issuing/losing field office as a secondary reference number. This document number will be reported by the DLA Disposition Services Field Office on the DLMS 527R Receipt transaction submitted to DLA Disposition Services.

C16.6.5.3.8. Partial Shipments, Second Shipment Requirements.

When the second partial shipment arrives at the DEMIL facility, the RDO document number cannot identify the receipt by itself due to the disposition services duplicate DTID number or DTID number and suffix business rule. Therefore, a UCN will be created by field office personnel to receipt the remainder of the property, causing three document numbers to be associated with the shipment/receipt transaction: (1) the original RDO document number serving as the primary document number for the new receipt, (2) the original DTID number or DTID number and suffix from the issuing/losing field office (secondary reference number), which is perpetuated from the RDO, and (3) the UCN generated to prevent DTID number or DTID number and suffix re-use. These document numbers are all linked and all three will be reported on the DLMS 527R Receipt transaction submitted to DLA Disposition Services.

C16.6.6 DLA Disposition Services Public Sales

C16.6.6.1. Public Sales Contracts.

Contracts for public sales are maintained at DLA Disposition Services. The DLMS 832N, Catalog Data Support transaction (Catalog Purpose Code SC) will be used to communicate sales contract catalog data to the field offices. This pre-positioned information will be used by the field office to

facilitate the receipt process for turned-in property/DTIDs or DTIDs and suffixes initially assigned Disposition Category Code SL–Sales. A separate transaction will be used for each field office, since specific site data and materiel contract information is maintained at the line item level. A detail line is required for each combination of property, sales contract, and sales contract line item. Each transaction may contain one or more detail lines. The following detail level data will be included: sales contract number, sales contract line item number, generic name/description, DLA Disposition Services Field Office, remaining authorized quantity, unit of measure, and the catalog transaction purpose code used to indicate whether the line item record will be added, changed, or deleted.

C16.6.6.2. Comparison of Customer Turn-in Property to Prepositioned Sales Contract Data. The DLA Disposition Services Field Office will match the property received from customer turn-in to the pre-positioned sales contract data. When a match is found, the sales contract number and associated sales contract line item number will be provided on the receipt transaction provided to DLA Disposition Services. See C16.6.8.3. - Disposition Category Code SL–Sales

C16.6.6.3. WEB Auction for Public Sale of Excess Property. Subsequent to receipt, excess property eligible for public sale will be published to DLA Disposition Services web auctions, which are required to be accessible to the general public without any form of user registration. While published web auctions will be viewable by the general public, users will be restricted from submitting bids until a self-registration process is completed. The completion of the self-registration process will result in the creation of a DLA Disposition Services business partner record, enabling the registered user to submit bids against published web auctions.

C16.6.6.3.1. End Use Certificate. Upon determination of an auction winner, the customer will be required to submit an end use certificate (EUC). The information on the EUC will be used to authenticate the customer's self-registration credentials and verify eligibility to receive the auction property. Upon completion of the eligibility process, DLA Disposition Services will create a supporting internal sales order document.

C16.6.6.3.2. Materiel Release Order for Public Sale Property. Once the Defense Finance Accounting Service (DFAS) posts customer payment against the sales order, then DLMS 940R Materiel Release Orders will be generated by DLA Disposition Services to the DLA Disposition Services Field Office authorizing release of the materiel. The MRO transaction will serve as the indicator to DLA Disposition Services Field Office personnel responsible for managing property removals, that customer payment was received and removal is permitted. See C16.1.4.1.9. - Materiel Release Orders in Support of Public Sales

C16.6.7. Receipts of Turn-ins to DLA Disposition Services Field Offices: For receipt of items that have been turned in, the field office will provide DLA Disposition Services a DLMS 527R Receipt, (Transaction Type Code D4 with 2/LIN01/10 code I) (MILSTRAP D6A functionality) or J (D6B functionality), as appropriate. The DTID

number or DTID number and suffix, which represent specific property in the same condition turned in to a specific DLA Disposition Services Field Office, will be passed on all field office generated receipt transactions and provides the level of traceability DLA Disposition Services requires. Because property is often turned in used, simply representing property by materiel number (e.g., NSN or LSN) is insufficient and the DTID number or DTID number and suffix provides the capability to identify and track property at a more granular level of detail. For receipt of property, the field offices will sign the DD Form 1348-1A/1348-2 and provide a signed digital image of the turn-in document via eDOCs, to confirm receipt in ICS.

C16.6.7.1. Assignment of Disposition Category Code. When property identified to a DTID number or DTID number and suffix is turned in, it is assigned an initial disposition category at pre-receipt (i.e., physical examination of property), which is provided in the DLMS 527R Receipt to DLA Disposition Services (see C16.6.9.). This disposition category is used to determine how the property is to be processed subsequent to receipt; (e.g. reutilization, disposal, etc). When the receipt transaction is received, DLA Disposition Services will confirm that the correct disposition category has been assigned using property characteristics provided in the DLMS 527R; (e.g. DEMIL Code, HM/HW indicator, etc.).

C16.6.7.2. DLMS 527R Required Data Elements. The DLMS 527R Receipt transaction includes the following data elements as applicable to support the disposition category code assignment process and to subsequently track other disposal processes: Bill to DoDAAC, DEMIL code, demilitarization integrity code, demilitarization performed code, disposition services accumulation number, disposition category code, disposition services container ID, disposition services complete container count, disposition services current container count, disposition services indicator (e.g., Abandoned Property (AP) Indicator, Certificate Availability (CA) Indicator, **Controlled Property Branch Verified as Not controlled (CPBV)**, DEMIL Instructions (DI) Indicator, HM Indicator, HW Indicator, or HWPS Indicator, Receipt-In-Place (RIP) Indicator, SA/LW Indicator, Wash Post (WP) Indicator), disposition services reimbursement code, disposition services UCN, DTID number or DTID number and suffix, DTID materiel description, hazardous materiel indicator code, Industrial Plant Equipment (IPE) report number, MSDS Number, model number (used only in conjunction with IPE Report Number), Sales Contract Number, Sales Contract Line Item Number, Service LSN, year of manufacturer (used only in conjunction with IPE Report Number).

C16.6.7.3. Disposition Category Code SL–Sales. The DLA Disposition Services Office will return a Disposition Category Code SL to notify the field office that the item will be held for sale. When pre-existing sales contract data is available, DLA Disposition Services will pre-position contract data using the DLMS 832N transaction (see C16.6.6.) to facilitate receipt processing. At time of receipt, the field office receiver will match the property received from customer turn-in to the pre-positioned sales contract data. When a match is found, the sales contract number and associated sales contract line item number will be provided on the DLMS 527R Receipt transaction sent to DLA Disposition Services.

C16.6.7.4. Turn-in of Small Arms/Light Weapons. During the pre-receipt process, the field office will sight verify the serial number(s) received. At time of receipt, the field office will include those serial numbers in the DLMS 527R Receipt transaction sent to DLA Disposition Services and also send a DLMS 140A, Transaction Code R, Receipt, to the DLA SA/LW registry and the generating activity. There is a “many-to-one” relationship between a weapon serial number and DTID number or DTID number and suffix; therefore, the weapon serial number will be looped on the DLMS 527R Receipt transaction. The DLMS 140A transaction has a “one-to-one” relationship for weapon serial numbers. The system produces two DLMS 140A transactions to each generating activity. For example, each DLMS 527R Receipt transaction for SA/LW will contain the DTID number or DTID number and suffix and a specific weapon serial number for each individual weapon; (e.g., if ten weapons make up the DTID number or DTID number and suffix quantity), DLA Disposition Services will receive one Receipt transaction for that DTID number or DTID number and suffix, with ten unique serial numbers. Additionally, that same receipt transaction produces 20 DLMS 140A transactions (e.g., ten outbound to the DLA SA/LW registry and ten outbound to the generating activity) ³

C16.6.7.5. Turn-in of Industrial Plant Equipment. During the pre-receipt process, the field office will verify the serial number received and include that serial number in the DLMS 527R Receipt transaction sent to DLA Disposition Services (one-to-one relationship between DTID number or DTID number and suffix and serial number for IPE).

C16.6.7.6. Disposition Services Indicator. The field office will assign a disposition services indicator in the DLMS 527R Receipt transaction to communicate unique property and/or materiel location information as follows:

C16.6.7.6.1. AP – Abandoned Property

C16.6.7.6.2. CA – Certificate Available to Document Property Condition

C16.6.7.6.3. CPBV – Controlled Property Branch Verified as Not Controlled

C16.6.7.6.4. DI – DEMIL Instructions Available at Time of Receipt

C16.6.7.6.5. HM – Hazardous Materiel

C16.6.7.6.6. HW – Hazardous Waste

C16.6.7.6.7. HWPS – Hazardous Waste Profile Sheet Available at Time of Turn-in

³ DLA has advised that use of the SA/LW serial number will not be implemented initially in the 527R Receipt transaction at the field offices. DLA must provide DLA Logistics Management Standards with their planned Distribution Standard System (DSS) implementation date when known.

C16.6.7.6.8. RIP – Receipt-In-Place. Property not physically located at the field office. The generator retains custody and accountability (ownership) until property is ready for sale, reutilization, transfer and/or donation.

C16.6.7.6.9. SA/LW – Small Arms and Light Weapons

C16.6.7.6.10. WP – Wash Post. Property may have previously processed as RIP pending sale, reutilization, transfer, or donation. Once the customer is available to remove the property from generator's location, the field office will send a DLMS 527R Receipt, with Disposition Services Indicator WP, and the appropriate Disposition Category Code of SL or RU. The receipt quantity will be added to the field office and DLA Disposition Services' inventory records, then immediately dropped. The field office will use the WP indicator to generate an internal DLMS 940R MRO to drop the DTID number or DTID number and suffix (requisitioned quantity) from its inventory balance.

C16.6.7.7. Hazardous Materiel Indicator Code, Demilitarization code, and Controlled Inventory Item Code. The Hazardous Materials Indicator Code, DEMIL Code and CIIC will be included on all DLMS 527R Receipt transactions generated from Recycling Control Points (RCP) for transfers to DLA Disposition Services (RIC S9W) and from DLA Disposition Services Field Offices for receipts of generator turn-ins to DLA Disposition Services (RIC S9D).

C16.6.8. Disposition Category Code Assignment and Associated Action. When generators turn-in materiel under a DTID number or DTID number and suffix to a DLA Disposition Services Field Office, the field office will send DLA Disposition Services a non-DLMS synchronous real-time transaction to request disposition category assignment. Depending upon the characteristics of the DTID number or DTID number and suffix property, DLA Disposition Services' response will assign one of the following five Disposition Category Codes: Reject (RJ), Research (RS), Reutilization (RU), Sales (SL), or Disposal (DS). After the DLA Disposition Services Field Office receiver verifies the receipt disposition category assignment from DLA Disposition Services, the field office will send a DLMS 527R Receipt transaction with the appropriate disposition category code (see C16.6.8.1. and C16.6.8.2.).

C16.6.8.1. Assignment of Disposition Category Code. The Disposition Category Code assigned to a DTID number or DTID number and suffix determines how the property is processed subsequent to receipt; (e.g. reutilization, disposal, etc). In addition, the category will determine the field office stow process, and which activity will be responsible for the issue of DTID number or DTID number and suffix property. The DLA Disposition Services will be responsible for issuing DTID number or DTID number and suffix records with Disposition Category Codes of RU or SL, except when the SL Disposition Category Sub-Category Code is CV (Commercial Venture) or SV (Scrap Venture). The Disposition Services Field Office will be responsible for issuing

DTID number or DTID number and suffix records with a disposition category of Disposal (DS), or Sales (SL) with a Disposition Category Sub-Category Code CV or SV.

C16.6.8.2. DTID, or DTID and Suffix Property Issued by DLA Disposition Services Field Offices. The DLA Disposition Services Field Office will issue DTID number or DTID number and suffix property based on the Disposition Category Code and additional data reflected in the DLMS 846C. For these issues, the field office will create an internal DLMS 940R (either Redistribution Order or Materiel Release Order, as appropriate). For materiel release to customers of Disposition Category Code DS materiel, or Disposition Category Code SL materiel with subcategory CV or SV, see C16.6.9.4. For relocation/redistribution of Disposition Category Code DS materiel to another DLA Disposition Services Field Office, (see C16.6.5).

C16.6.8.3. Validation/Change of Initial Disposition Category Code. There are multiple situations when DLA Disposition Services and the DLA Disposition Services Field Office validate or change the disposition category code assigned to a DTID number or DTID number and suffix in the initial DLMS 527R Receipt transaction. The DLMS 846C Disposition Category Update transaction (Report Type Code PC–Update), will be used by DLA Disposition Services for these communications. For instances where a response is warranted, the DLMS 846C, Disposition Category Update Response transaction (Report Type Code 09–Response), will be used by DLA Disposition Services Field Offices. A summary of when the DLMS 846C is used to validate/change initially assigned disposition category codes is as follows:

C16.6.8.3.1. Using 846C Disposition Category Update Transaction. Upon receiving the Receipt transaction from the field office, DLA Disposition Services will validate the disposition category code of the receipted DTID number or DTID number and suffix. If Disposition Category Code DS is assigned, and DLA Disposition Services agrees, a DLMS 846C Disposition Category Update transaction will be generated to the field office citing Disposition Category Code DS. This transaction will notify the field office that the item will be sent to ultimate disposal and will contain data required by the DLA Disposition Field Office to construct internal MROs or RDOs as required to issue the property. Upon receipt of the DLMS 846C Disposition Category Update transaction indicating ultimate disposal, the field office will generate a DLMS 846C Disposition Category Update Response to DLA Disposition Services confirming, changing, or denying the assigned DS Category Code. If confirmed, the field office will subsequently generate the DLMS 867I Issue transaction to DLA Disposition Services if the property is issued to another DLA Disposition Services Field Office (DEMIL or Controlled Property Center) (see C16.6.5.3.2.) or the DLMS 511R (post-post Directed MRO (DIC C0_)) if the property is issued to a disposal customer (see C16.6.9.4.).

C16.6.8.3.2. Update/Changes to a Controlled Property Rule. If DLA Disposition Services updates/changes a controlled property rule, the Disposition Category Code of the DTID numbers, or DTID numbers and suffixes affected by this change may be updated. This can occur prior to or during the RTD screening cycle. DLA disposition category codes can be changed among DS (Disposal), RU (Reutilization) or SL (Sales). If the property goes through the complete RTD cycle and is not requisitioned, it will be assigned Disposal Category Code DS or Disposition Category Code SL-Sales via generation of the DLMS 846C update transaction by DLA Disposition Services. This transaction will contain data required by the DLA Disposition

Field Office to construct internal MROs. Items assigned a disposal category are processed as described above. Some DTID number or DTID number and suffix property assigned Disposition Category Code SL–Sales are further identified by a disposition sub-category code in the DLMS 846C as being eligible for CV or SV contracts and are processed as described below.

C16.6.8.3.2.1. Sales Category Sub-Category Commercial Venture.

DLA Disposition Services has a partnership with a commercial venture firm to sell DoD surplus property following the RTD screening cycle. DLA Disposition Services will identify property categorized for CV and send the DLMS 846C Disposition Category Update transaction to the field office to initiate processing. Upon receipt of the DLMS 846C indicating CV, the field office will generate the DLMS 846C Disposition Category Update Response transaction to DLA Disposition Services confirming or changing the assigned disposition category codes.

C16.6.8.3.2.1.1. Change of CV Code Due to Ineligibility.

When the Controlled Property Verification Officer at the field office determines materiel is not CV eligible, the Disposition Category Update Response transaction will contain disposition category code DS instead of SL, as well as a disposition category change reject reason code, as published in DLA Disposition Services -I 4160.14, reflecting the data characteristic or reason the item will not be released to the CV contract. DLA Disposition Services will in turn send the update DLMS 846C to the field office. The reject reason code will cause the field office to remove the property from the CV holding area at the warehouse and allow the item to be processed through ultimate disposal.

C16.6.8.3.2.1.2. Use of DLMS 511R for Eligible CV Materiel.

When the field office determines the materiel is CV eligible, the field office will send the DLMS 511R (post-post directed MRO) transaction to DLA Disposition Services for inventory issued to the CV customer (see C16.6.9.4.).

C16.6.8.3.2.2. Sales Category (SL) Sub-Category Scrap Venture (SV). DLA Disposition Services has a partnership with a scrap venture firm to manage the receipt, marketing and sale of surplus scrap property generated by DoD installations. DLA Disposition Services will identify property categorized for SV and send the DLA Disposition Services Field Office a DLMS 846C Disposition Category Update to initiate SV processing. The field office will send DLMS 511R (post-post directed MRO) transactions to DLA Disposition Services for all inventory issued to the SV customer (see C16.6.9.4.).

C16.6.8.4. Directed Release of Disposal and Sales DTID Number, or DTID Number and suffix, Property (Post-Post Action). DLA Disposition Services Field Offices will send the DLMS 511R, DLA-Directed MRO (DIC C0_) Type Transaction Code A0/Action Code J, to DLA Disposition Services after property has been issued. Upon receipt, DLA Disposition Services will drop its inventory balance. In this instance, no MRO is sent to the field office, as this 511R is for inventory reduction vice shipping (the materiel has already been delivered or picked up).

C16.6.8.4.1. Use of Internal DLMS 940R MRO. For these issues, the field office will create an internal DLMS 940R MRO using a unique document number constructed by using the field office DoDAAC and current ordinal date, followed by a unique 4-digit serial number, (e.g., SY205411390001, SY205411390002, etc). The field office will then decrement the owner balance, create and exit the DLMS 511R directed MRO, position the MRO for release, and once released, generate the DLMS 945A materiel release confirmation to the owner and DLMS 856S Shipment Status to the customer. Materiel release confirmations for both scrap and commercial venture property will use the transportation mode code for “Bearer, Walk-Thru (Customer Pickup of Materiel)” to indicate no physical shipment is involved.

C16.6.8.4.2. DIC for Internal MRO. The DIC cited in the internal DLMS 940R will be A5_, MRO since the property is being shipped or picked up by a customer.

C16.6.8.4.3. Updating DAAS on Internal MROs. Since these transactions are internal to the field office, a copy will be passed to DLA Transaction Services to be posted in the DAAS so that the complete issue, confirmation, and status history are maintained.

C16.6.8.5. Post-post Requisitions. Post-post requisitions from the DLA Disposition Services Field Office will be identified by disposition category code and disposition sub-category code. A Disposition Category Code DS indicates the materiel has already been issued. As discussed above, Disposition Category Code SL (Sales) with the Disposition Sub-Category Code CV (Commercial Venture) indicates the property was issued to the commercial venture customer. Use of Disposition Category Code SL with Disposition Sub-Category Code SV indicates the property was issued to a scrap venture customer.

C16.6.8.6. Routing Identifier Code-To S9W or S9D on DLA Disposition Services Directed Materiel Release Orders. DLA Disposition Services specific DLMS 511R DLA-Directed MRO transactions will always display a RIC-To S9W or S9D. RIC-To S9W will be used to indicate property issued from a RCP; RIC-To S9D will be used to indicate property issued from a DLA Distribution Services Field Office.

C16.6.8.7. Disposition Category Code DS/Disposition Sub-Category Code. Upon receipt of these types of DLMS 511R transactions, DLA Disposition Services will determine the type of post-post order that should be generated based upon the disposition category code/disposition sub-category code. Disposition Category Code DS will indicate a DLA Disposition Services post-post disposal order and will prompt a search for the DCN.

C16.6.8.7.1. Use of Disposal Consolidation Number on DLMS 511R Transactions. The field office will include the DCN on the 511R. It is used by DLA Disposition Services to tie multiple post-post disposal order transactions to a common sales document. The DCN is used to facilitate item grouping in a common shipment and to reduce the amount of sales documents required.

C16.6.8.7.2. DLMS 511R to Existing Sales Document Matches. DLA Disposition Services will include the inventory on the DLMS 511R to an existing sales document when a match is found. If no match is found, a new internal disposal post-post sales order will be created.

C16.6.8.8. DLA Disposition Services Post-Post SV Orders. The DLA Disposition Services Field Office will send DLMS 511R post-post requisitions using Disposition Sub-Category Code SV to DLA Disposition Services each time SV customers remove property for a scrap UCN, DTID number or DTID number and suffix from a DLA Disposition Services Field Office. DLA Disposition Services will create a post-post sales order for each DLMS 511R DLA-Directed MRO transaction received from the Field Office. DLA Disposition Services will assign DTID number or DTID number and suffix, associated with the materiel on the post-post order based on First In-First Out (FIFO) order, limiting selection to DTID numbers with an available quantity on the DTID Table. DLA Disposition Services will first add a new record to the Sales Order DTID Table and include: DTID number or DTID number and suffix, post-post order number, quantity, date, and order type; and then update the inventory record by decreasing the available quantity for the DTID.

C16.6.8.9. DLA Disposition Services Post-Post CV Orders. The DLA Disposition Services Field Office will send DLMS 511R post-post requisitions using Disposition Sub-Category Code CV to DLA Disposition Services each time CV customers remove property for a commercial venture DTID number or DTID number and suffix, from a DLA Disposition Services Field Office. DLA Disposition Services will create a post-post order for each 511R DLA-Directed MRO transaction received from the field office and add a record to the Sales Order DTID Table to include: DTID number or DTID number and suffix, post-post order number, quantity, date, and order type; and then update the inventory record by decreasing the available quantity for the DTID.

C16.6.8.10. Billing for Materiel. The DLMS 511R transactions for scrap and commercial venture will indicate non-Interfund billing to the contractor (Fund Code XP) and the customer will be billed prior to removal of the materiel. The DoDAAC of the commercial or scrap venture firm will be identified as both the ordered-by and ship-to activity. For DLMS 511R transactions, the Signal Code M indicates there will be no billing. In addition, the DoDAAC of the disposal customer will be identified as both the ordered-by and ship-to activity. When a unit of use LSN is being issued, the DLMS 511R will carry both the unit of use LSN and the cross-reference NSN. The unit of use Indicator defines the quantity and unit of measure applicable to the Unit of Use.

C16.6.8.11. Disposal of SA/LW: For DLMS 511R directed MROs with Disposition Category Code DS involving the disposal of SA/LW, the serial number/unique item identifier (UII) will not be populated on the transaction. The serial number/UII will only be present on the 945A confirmation.

C16.6.9 Local Stock Numbers (LSN) and Unit of Use.

C16.6.9.1. Local Stock Numbers (LSN) and Unit of Use. There are several instances that an LSN will be used by the DLA Disposition Services Field Office and supported activities:

C16.6.9.1.1. Useable Local Stock Numbers (LSN). When materiel is turned in to the Disposition Services Field Office identified by an LSN assigned by the generator, and it cannot be further identified to an NSN, and is determined to be useable, a Disposition Services LSN will be assigned (if one does not already exist) and will be used as identification of the property throughout the disposition services process. Useable LSNs will be identified by valid FSC as part of the numbering convention, (e.g., 1035-DS-GUN-GT3M). The original LSN used by a generator to turn in materiel, will be included as a reference on the receipt and will serve as reference information for the item when it is marketed on the RTD website.

C16.6.9.1.2. Scrap LSN. Materiel downgraded to scrap during or subsequent to receipt will be assigned a Scrap LSN. Scrap LSNs will be identified by using a materiel group of SCRP. All scrap LSNs will use this materiel group identification as well as containing a Scrap Classification Code (SCL). The SCL is a three-character DLA Disposition Services code to identify different types of scrap and appears in positions 11-13 of the Scrap LSN, e.g., SCRP-DS-000-A01A.

C16.6.9.1.3. Unit of Use. When the materiel turned in to the Disposition Services Field Office can be identified to a NSN but the quantity is less than the FLIS unit of use, the DLA Disposition Services Field Office will create a new LSN by replacing the first character of the NIIN, (e.g., 5965-R1-123-4567, with an "R"). DLA Disposition Services and field offices use of DLMS transactions, including the DLMS 945A Release Confirmation, will carry the unit of use LSN, the cross-reference NSN, and the unit of use indicator. When the unit of use Indicator is present in the transaction, the quantity and unit of measure values associated with this transaction are applicable to the unit of use. However, the property will be identified to its NSN for RTD. This form of LSN for unit of use will not be visible to the customer as its use will only be between DLA Disposition Services and their field offices.

C16.6.9.2. Catalog Data Support Transaction (DLMS 832N). DLA Disposition Services will be the source for all Disposition Services LSNs (useable and scrap LSNs) and will notify DLA Disposition Services Field Offices via a DLMS 832N, Catalog Data Support transaction when it creates, changes or deletes an LSN. The DLA Disposition Services will use the DLMS 832N to create or update their LSN records.

C16.6.9.3. Creation/Update of Unit of Use LSNs. The DLMS 832N will not be used between DLA Disposition Services and their field offices for creation or update of unit of use LSNs, rather both will maintain tables which contain agreed upon conversion factors for what will be the lowest possible assigned unit of measure for each valid Federal Logistics Information System (FLIS) unit of use. When receipts for Unit of Use LSN materiel are processed by DLA Disposition Services, internal logic will link the materiel back to the NSN.

C16.7. SUPPLY DISCREPANCY REPORTING. Supply discrepancy reports (SDRs) and associated responses will be reported via the Disposition Services Field Office system or DoD WebSDR, using the DLMS 842A/W, Standard Supply Discrepancy Report (SDR), Follow-up, Correction, Cancellation, & Reconsideration Request, for the initial SDR and the 842A/R, Standard Supply Discrepancy Report (SDR) Reply, for the reply. Discrepancies may be identified in shipments between the DLA Distribution Depot and the DLA Disposition Services field office, between two DLA Disposition Services Field Offices, and between the field office and the generating customer, as well as between Distribution Depots and customers for RCP directed shipments. The SDR may be reported by the receiving field office or by the receiving customer.

C16.7.1. Outgoing SDR. During the receiving process, if the DLA Disposition Services Field Office identifies a supply discrepancy, an SDR will be generated via the field office system using Document Type Code D in conjunction with the appropriate SDR Disposition Services type code to distinguish the source of discrepant shipment (generating activity turn-In = T, DLA Distribution Depot = B, and Redistribution between field offices = E).

C16.7.1.1. Discrepancy Codes. The Disposition Services Field Office will describe the type of discrepant condition, in most instances using unique discrepancy codes within their internal system. For external DoD processing, these unique codes trigger specific remarks for the outgoing SDR, but the code itself will not be perpetuated. Instead, the associated standard DoD discrepancy code value will be used for distribution of the SDR thus allowing the internal codes to remain available in the field office system for metrics and managements reports. Unique DLA Disposition Services discrepant conditions-, such as the turn-in of unauthorized property-or lack of specific documentation for hazardous materiel/hazardous waste may be identified by the applicable shipping, packaging, and storage discrepancy code.

C16.7.1.2. Action Codes. The DLA Disposition Services Field Office will indicate the applicable action taken or requested on the SDR. When the generator turns in property that cannot be accepted by the field office, the field office will prepare an SDR using SDR Requested Action Code 3C, indicating pick-up of unauthorized or unacceptable property is required.

C16.7.1.3. Primary/Secondary Document Numbers. The outgoing SDR may require communication of two document numbers. The following rules apply:

C16.7.1.3.1. Property Turned in by Generating Activity. The value used for the DTID/Suffix by the customer will be the primary document number identified in the SDR. If a UCN was established by the field office upon receipt, it will not be perpetuated on the SDR.

C16.7.1.3.2. Property Shipped by the DLA Distribution Depot to the DLA Disposition Services Field Office. The document number used to ship the property will be the primary document number identified in the SDR. No secondary document number is applicable.

C16.7.1.3.3. Redistribution of Property Between Disposition Services Field Offices. The redistribution document number will be the primary document number identified in the SDR. The DTID used by DLA Disposition Services to track materiel will be perpetuated in the SDR and will be available to the receiving field office in both the DLMS 856S, Shipment Status and the DLMS 527D, PMR.

C16.7.2. RCP SDRs Prepared via DoD Web SDR. DLA Disposition Services RCP personnel will receive and process discrepancies for property shipped by the DLA Distribution Depots to various customers. RCP personnel will log in to WebSDR to create and submit SDRs on behalf of the customer using Document Type Code 7 and the related DLA Disposition Services SDR type code to distinguish customer type, as follows:

C16.7.2.1. D = DLA Disposition Services Donated Materiel. D Identifies discrepant property staged at the depot and released to a state agency customer.

C16.7.2.2. F = DLA Disposition Services Transferred Materiel. F Identifies discrepant property shipped to a non-DoD federal agency customer by a distribution depot.

C16.7.2.3. O = Other DLA Disposition Services Shipment. O Identifies any other discrepant DLA Disposition Services Field Office property shipment not applicable for identification by any other designated Disposition Services Type Code.

C16.7.2.4. R = DLA Disposition Services Reutilization. R Identifies discrepant property shipped to a DoD customer by a distribution depot (applicable to RCP receipt).

C16.7.2.5. S = DLA Disposition Services Sale. S Identifies discrepant property sold to a DLA Disposition Services sales contractor and shipped by a distribution depot.

C16.7.3. Incoming Customer SDRs. SDRs addressed to DLA Disposition Services (RIC S9D) or RCP (RIC S9W) will be supported by conversion to email via DoD WebSDR. RCP SDRs will be processed in accordance with paragraph C16.7.2. The generic email address for S9D will be associated with all the DLA Disposition Services Field Offices for Document Type 7 SDR only, allowing customer generated SDRs to be forwarded to DLA Disposition Services. Replies will be created in DoD WebSDR. Incoming Customer SDRs will not be sent to the DLA Disposition Services ICP system.

C16.7.4. Distribution of Document Type Code D SDRs Generated During the Receiving Process at the DLA Disposition Services Field Office.

C16.7.4.1. Discrepant Turn-ins. SDRs resulting from discrepant turn-ins will be directed to the shipping activity DoDAAC (also known as the generator) identified on the turn-in document (DD 1348-1A, Block 2).

C16.7.4.2. SDRs with Type Code T. SDRs citing DLA Disposition Services SDR Type Code T will be sent directly to the activity responsible for the turn-in of property whenever possible. In order to ensure electronic notification to the generating activity, DLA Disposition Services will provide the generator's email address to DoD WebSDR. This email address will be used by WebSDR for dissemination of the SDR.

C16.7.4.2.1. Generator Email Address. The Disposition Services Field Office system will establish a global table to store generator email addresses. The generator's email address will be captured from automated turn-in web-based tools maintained by DLA Disposition Services. The field office system will map the generator email address as indicated by the DLMS 842A/W. DoD WebSDR will use this email address for distribution to the identified address in addition to any other applicable distribution business rules.

C16.7.4.2.2. DoD Component Distribution. The SDR will automatically be sent to SDR applications based upon the existing DoD WebSDR or the Military Service of the customer either by transaction or via the email address associated with the DoDAAC in WebSDR. DLA Disposition Services will monitor for SDRs that never reached the intended recipient when so notified by rejected SDR or failed SDR transmission and pursue manual off-line follow-up if needed.

C16.7.4.3. SDRs Citing the DLA Disposition Services SDR Type Code B or E. SDRs with Type Code = B or E will be directed to the shipping activity and no information copies required.

C16.7.5. Property Requiring Customer Pick-Up. When unauthorized or unacceptable property is turned in to the field office, property will be placed in a frustrated property research area and an SDR prepared with the Discrepancy Code Z7 and Action Code 3C to notify the generator to pick-up the property. If the field office received property where the owner is not known or if the generator fails to respond to the SDR within 55 days or fails to pick up the property, the property may be mutilated and/or destroyed, consistent with Demilitarization Code requirements, local policies, laws, and regulations. As appropriate based upon the security and classification requirements of specific property, DLA Disposition Services may contact the generator in advance of the 55 day SDR time standard (which is consistent with all host nation, Federal, State, and local laws and regulations including DoD disposal policies).

C17. CHAPTER 17

SUPPLY DISCREPANCY REPORTING¹

C17.1 GENERAL

C17.1.1. Purpose. This chapter establishes information requirements for reporting and processing of discrepancy reports under the supply discrepancy report (SDR) Program. The SDR is a tool used to report shipping or packaging discrepancies attributable to the responsibility of the shipper, (including U.S. Government sources and contractors/manufacturers/vendors) and to provide appropriate responses and resolution, including financial action when appropriate. The purpose of the SDR exchange is to determine the cause of such discrepancies, effect corrective action, and prevent recurrence.

C17.1.2. Standard SDR Transactions. Under DLMS, the SDR shall be considered a common logistics information exchange to be integrated with transaction processing through DAAS. The DoD approved standard for electronic transmission of SDR transactions is prescribed by the DLMS Supplement using an ASC X12-compliant variable-length transaction format. Multiple DLMS Supplements are provided to support different SDR related functions. The DLMS 842A/W, Standard SDR, shall be employed for transactional exchange of initial reports and associated follow-on actions. The DLMS 842A/R, DoD SDR Reply, shall be employed for transactional exchange of the SDR reply by the action point. The DLMS Supplements for SDRs are available via the Implementation Convention/DLMS Supplement page of the DLA Logistics Management Standards Website.

C17.1.3. DoD WebSDR. The DoD WebSDR supports DLMS implementation via a DLA Transaction Services-maintained application, that enables SDR transaction exchange; provides a web-based entry method to assist users who are not supported by a Component DLMS-compliant SDR application; and provides visibility of SDRs for research and trend analysis via management report/query capability. The term “DoD WebSDR” (or “WebSDR”) refers to both the overall business process and supporting automation, including both direct web-input and transaction exchange.

C17.1.3.1. The DoD WebSDR application automates the Standard Form (SF) 364 SDR paper form facilitating the DoD standard transactional exchange described above. It brings the SDR into an integrated transactional environment, supporting both direct input (under Component business rules) and transaction exchange originating within Component applications. The WebSDR system facilitates communication and interoperability between U.S. Military and Federal Agencies and the International

¹ Chapter 17 supersedes and replaces Joint Publication DLAI 4140.55/AR 735-11-2/SECNAVINST 4355.18A/AFJMAN 23-215, Reporting of Supply Discrepancies, August 6, 2001.

Logistics Control Office (ILCO) on behalf of the Security Assistance customer. It controls routing of web submissions and logistics transactions according to business rules. It supports information exchange between the customer, the Inventory Control Point (ICP)/Integrated Material Manager (IMM), the shipper, and other interested parties. It encompasses new report submission, correction/modification, cancellation, follow-up, requests for reconsideration, and SDR replies (including interim responses, additional information requests, and resolution responses), in addition to the capture of report and response management statistics.

C17.1.3.2. DoD WebSDR shall provide an automated process for tracking SDR response information. Data collected shall enable the Department of Defense to identify trends, establish volume and dollar values of SDRs, bring management attention to problems with shipping activities as necessary, and improve the requisitioning and distribution process within logistics operations. This provides an effective means to report, resolve, and measure discrepancies related to pipeline performance. Ultimately, the goal is to incorporate SDR metrics into other logistics response measurements in support of perfect order fulfillment.

C17.1.3.3. The DoD WebSDR process reduces manual SDR form creation and eliminates dual entry where multiple Component systems are used. The DoD requirement is that paper submission of SDRs and non-DLMS compliant SDR applications shall be phased out with migration to DLMS. By exception, until electronic reporting under DLMS is universally available, SDRs and associated responses may be reported via hard-copy SF 364, email, through customer service help lines (e.g. the DLA Customer Interaction Center, dlacontactcenter@dla.mil) 1-877-352-2255 (1-877-DLA-CALL)), or any other manner acceptable to the submitter and recipient. All manner of reporting must meet the criteria described in this publication.

C17.1.3.4. Access for DoD WebSDR input and management reports requires submission of a System Access Request (SAR) available from the DAAS home page at: <https://www.transactionservices.dla.mil/daashome/homepage.asp>. DoD WebSDR training is available on the DLA Logistics Management Standards Website.

C17.1.3.5. DoD Components with an established interface with DoD WebSDR shall designate primary and alternate representatives for the Component SDR application to DLA Transaction Services. These representatives will be notified via email when transactions fail during WebSDR processing due to failure to meet minimum format/content requirements for processing. Components shall provide name, telephone, and email address to the DoD SDR System Administrator and DLA Transaction Services WebSDR Program Manager.

C17.1.4. DLMS Subcommittees. The DoD Component members of the SDR Subcommittees (U.S. and Security Assistance) of the DoD Supply Process Review Committee are identified on the SDR Subcommittee page of the DLA Logistics Management Standards Website.

C17.1.5. Applicability. These SDR procedures are applicable to the DoD Components, participating Federal Agencies, and other external organization elements as defined in Volume 1, Chapter 1. This includes shipments made from working capital funds (WCF) and non-WCF funded activities, Security Assistance shipments made under the International Logistics Program, and shipments received from commercial sources. By agreement, contractors receiving U.S. Government furnished property (GFP) under MILSTRIP procedures shall comply with U.S. Government SDR procedures provided herein. Discrepancies related to GFP that do not meet minimum dollar value criteria in paragraph C17.3.2., may be reported for information only, as a means of notifying the shipper or ICP/IMM of the discrepant condition.

C17.1.6. Exclusions. The following types of discrepancies are excluded from the provisions of this publication:

C17.1.6.1. Discrepancies found while materiel is in storage. Two exceptions to this exclusion are: 1) short shipment and wrong item discrepancies discovered upon opening a sealed vendor pack may be reported by U.S. Government customers only, and 2) materiel in storage in a sealed vendor's pack that is later discovered to have been shipped with discrepancies relating to Item unique item identification (IUID) data. These may be reported as SDRs and are not subject to submission timeframes. Refer to IUID discrepancies below.

C17.1.6.2. Discrepancies involving local deliveries to, or returns from, internal or satellite activities. This exclusion is not applicable to on-site distribution depot shipments.

C17.1.6.3. Discrepancies involving shipments of privately-owned vehicles.

C17.1.6.4. Discrepancies involving shipments on requisitions or purchase orders from personnel services activities citing non-appropriated funds.

C17.1.6.5. Transportation discrepancies covered by DTR 4500.9-R, Defense Transportation Regulation, Part II, Cargo Movement, Chapter 210, Transportation Discrepancy Report (TDR), except as specifically permitted under Security Assistance procedures in this chapter.

C17.1.6.6. Product quality deficiencies to the extent covered by Joint DLAR 4155.24 /AR 702-7/SECNAVINST 4855.5B/ AFR 74-6, except as specifically permitted under Security Assistance procedures in this chapter.

C17.1.6.7. Discrepancies involving personal property shipments.

C17.1.6.8. Billing discrepancies, except as specifically permitted under Security Assistance procedures in this chapter. Price verifications and/or challenges are not reportable on an SDR.

C17.1.7. Types of Discrepancies

C17.1.7.1. Supply Discrepancy. Supply discrepancy is a general term used to describe any variation in goods received from data shown on any authorized shipping document that is not the result of a transportation discrepancy or product quality deficiency. Supply discrepancies include both shipping and packaging discrepancies.

C17.1.7.1.1. Shipping (Item) Discrepancy. A shipping discrepancy is any variation in quantity or condition of goods received from what is shown on the authorized shipping documents, to include incorrect or misdirected materiel, receipts of cancelled requirements, and/or improper or inadequate technical or supply/shipping documentation, that is not the result of a transportation error or product quality deficiency. Discrepancies involving IUID are reportable under shipping discrepancy criteria.

C17.1.7.1.2. Packaging Discrepancy. A packaging discrepancy is any unsatisfactory condition due to improper or inadequate packaging (including preservation, packing, marking, or utilization) that causes the item, shipment, or package to become vulnerable to loss, delay, damage, or unnecessary expense to the U. S. Government, such as excessive packing. Discrepancies involving passive radio frequency identification (pRFID) are reportable under packaging discrepancy criteria.

C17.1.7.2. Transportation Discrepancy. A transportation discrepancy is any variation in quantity or condition of materiel received from that shown in the piece count by type of pack on the bill of lading or governing transportation document and other deficiencies in transportation when discrepant materiel is not involved. These discrepancies involve motor, air, water, rail, and small package commercial carriers (excludes USPS shipments that are lost or damaged). Follow TDR policy found in the Defense Transportation Regulation, Part II, Cargo Movement (DTR 4500.9-R). TDRs are entered and distributed under the Electronic Transportation Acquisition (ETA) system at <https://eta.sddc.army.mil/>.

C17.1.7.3. Product Quality Deficiency. A product quality deficiency is a defective or non-conforming condition that limits or prohibits the item from fulfilling its intended purpose. These include deficiencies in design, specification, materiel, manufacturing, and workmanship. These are reportable on an SDR only by a Security Assistance customer. All others follow PQDR policy found in DLAR 4155.24/AR 702-7/SECNAVINST 4855.5B, AFR 74-6 Product Quality Deficiency Report Program. Quality deficiencies reported via SDR shall be investigated within the ICP/IMM under procedures associated with Product Quality Deficiency Reports. PQDR resolution provided via SDR reply to the submitting ILCO shall identify the associated PQDR record control number (RCN) as a cross-reference to the PQDR identification used by the ICP/IMM.

C17.1.7.4. Billing Discrepancy. Billing discrepancies are those discrepancies related to duplicate or multiple billing per individual shipment, or a single billing with no ship line, which are reportable to the ILCO on an SDR by Security Assistance

customers only. Within U.S. Government channels, the billing discrepancy shall be processed in accordance with MILSBILLS procedures in DLM 4000.25, Volume 4, Finance, Chapter 4. This means the ILCO shall convert the discrepancy to the appropriate DLMS 812R, Request for Adjustment of Non-Fuel Billing, MILSBILLS DIC FAE with appropriate Billing Advice Code.

C17.1.7.5. Financial Discrepancies. Financial discrepancies are those discrepancies related to administrative and accessorial charges. The ILCO, ICP/IMM, or GSA shall forward to Defense Finance & Accounting Service Indianapolis (DFAS-IN), Security Assistance Accounting Customer Accounting Branch for processing all financial discrepancies received directly from a Security Assistance purchaser. Responses to these will be returned to the ILCO. Only financial discrepancies related to Security Assistance purchases are reportable on an SDR.

C17.1.7.6. Military Personal Property Shipments. This category includes both shipping and packaging discrepancies associated with the movement/storage of household goods under the DoD Personal Property Shipment and Storage Program. Any discrepancies related to personal property shipment shall be referred to Military Surface Deployment and Distribution Command (SDDC) Personal Property at: USARMY.Scott.SDDC.mbx.omb-for-pp-ops@mail.mil or USARMY.Scott.SDDC.mbx.omb-for-pp-quality@mail.mil.

C17.2. POLICY

C17.2.1. Use of SDR. The DoD Components shall use the SDR to report shipping or packaging discrepancies attributable to the responsibility of the shipper (including contractors/manufacturers or vendors) and to provide appropriate responses. The purposes of this exchange are to determine the cause of such discrepancies, effect corrective action, and prevent recurrence.

C17.2.2. Operations Security (OPSEC) Applicability. Due to an identified OPSEC requirement, SDRs have been designated as controlled unclassified information (CUI) by the DLA Headquarters, and must be identified as "For Official Use Only (FOUO)." Handling and electronic transmission of SDRs must comply with DoD rules for this level of sensitive unclassified information, to include proper labeling and protection. DLA has further directed encryption of all SDR email transmissions. This requirement has been levied on the DoD WebSDR and impacts all participating DoD Components.

C17.2.2.1. In order to receive encrypted e-mail, individual and group e-mail accounts must have their associated e-mail certificate registered at DLA Transaction Services. SDRs directed to e-mail accounts that do not have a registered certificate will be significantly abridged to display minimal information, thereby allowing the SDR to be transmitted in an unprotected environment.

C17.2.2.2. All action activities using e-mail SDRs must register their certificate, so that all information is available for SDR resolution. For low volume customers relying on e-mail SDRs, especially those supported by third party direct

WebSDR input, registration is encouraged, but not required. These users will receive an abridged SDR reply that shall provide disposition instructions and financial action, without the accompanying shipment detail.

C17.2.2.3. Unencrypted e-mails with minimal shipment information shall include instructions for certificate registration and access to DoD WebSDR. Full WebSDR data content will be available to authorized users of DoD WebSDR. Refer to DAAS SDR processing for further details in the abridged SDR procedures and content.

C17.2.2.4. SDR management reports shall be distributed only via e-mail if the corresponding certificate has been signed.

C17.2.3. Documentation Maintenance. The SF364 (or the electronic version DLMS 842A/W) and the action activity's response (or electronic DLMS 842A/R) shall be used to support adjustments to inventory and financial accounting records and shall be maintained as required.

C17.2.4. Receivers of discrepant materiel shall use the SDR to:

C17.2.4.1. Report shipping discrepancies, packaging discrepancies, and discrepancies or non-receipt of United States Postal Service (USPS) shipments.

C17.2.4.2. Modify, cancel, or follow-up on a previously submitted report.

C17.2.4.3. Request reconsideration of a response.

C17.2.4.4. Security Assistance customers may use SDRs to contest the decision stated in a reconsideration response.

C17.2.4.5. Provide information copies of the report to interested parties.

C17.2.5. Responsible action activities as identified in this chapter shall use SDRs to:

C17.2.5.1. Notify the report initiator of interim status or resolution of the SDR.

C17.2.5.2. Request additional information on incomplete submissions.

C17.2.5.3. Reroute/forward the SDR to the appropriate party.

C17.2.5.4. Forward recommendations to the source of supply or other designated activity for determination of financial resolution or materiel disposition.

C17.2.5.5. Provide information copies of the response to interested parties.

C17.2.6. Non-Receipt of Shipments. Non-receipts, shipped by traceable means such as Government or Commercial Bill of Lading, shall not be reported using the SDR, unless the non-receipt is for other than a transportation discrepancy, or for damaged items shipped via modes other than USPS. SDRs shall not be submitted for non-receipt

of shipments made by traceable USPS registered, insured, or certified mail until appropriate tracer action has been completed. If tracer action results confirm non-receipt, then submit an SDR and include results of the tracer action. Customers without automated access to in transit visibility information should contact the ICP/storage activity to determine which shipments are traceable. (Not applicable to Security Assistance customers.)

C17.2.7. Interface with Other Materiel Management Functions. Under DLMS, discrepancy processing may be used to trigger other standard materiel management functions.

C17.2.7.1. IMMs shall use the SDR response to establish a due-in record for return of discrepant materiel under Chapter 12 of this volume. ICPs/IMMs shall use the prepositioned materiel receipt (PMR) to advise storage activities to which a return is directed using MILSTRAP procedures for the DLMS 527D, Due-In/Advance Receipt/Due Verification. Refer to paragraph C11.19., this volume, for additional guidance.

C17.2.7.2. DLMS capable activities returning discrepant materiel shall prepare shipment status for materiel returns using the DLMS 856R, Shipment Status Materiel Returns, under paragraph C11.19.

C17.2.8. Discrepancy Reports Relating to Interchangeability/Substitutability (I&S) or Quantity Unit Pack (QUP) Issues. Incorrect item SDRs shall not be submitted for authorized substitution. The DoD Components and participating Agencies (e.g., GSA), shall follow the policy of automatic shipment of an item, unless the requisition contains an appropriate requisition advice code in accordance with Chapter 4, limiting the request to a specific item. Therefore, incorrect item SDRs shall not be submitted for authorized substitutions. Similarly, quantities may be adjusted to the quantity unit pack, unless restricted by the appropriate advice code in the customer requisition. Such adjustments resulting in quantity variance are not reportable as discrepant.

C17.2.9. Responsibility for Costs Incurred Due to Discrepancies in Returned Materiel. U.S. Government activities returning materiel are cautioned that the returning activity may be held responsible for costs incurred by the receiving activity when discrepancies are reported and validated in accordance with this publication. This includes returns made in violation of prescribed procedures, returns exhibiting packaging discrepancies, and returns of reparable items unaccompanied by required technical data. Recoupment action by the ICP against the initiator may include all cost reimbursable actions performed by the receiving activity such as repackaging, marking, and disposal.

C17.2.10. Multiple Requisitions. Multiple requisitions received under a consolidated shipment cannot be combined for discrepancy reporting purposes. Individual SDRs must be submitted for each discrepant requisition received in the shipment. An exception to this is authorized for consolidation and containerization points (CCP)/transshippers. Refer to guidance for CCP/transshipper-originated SDRs

below. When both item discrepancies and packaging discrepancies are noted on the same shipment, both types of discrepancy shall be included on the same report.

C17.3. PROCEDURES

C17.3.1. Original Submission of SDR

C17.3.1.1. Discrepancy Identification. The receiving activity, or transshipment activity noting packaging deficiencies on shipments in transit, shall prepare an SDR when one or more of the conditions described under reporting criteria exist.

C17.3.1.1.1. Pending improved processing techniques, it is required that DLMS SDRs identify the type of SDR using the Discrepancy Report Document Type Code (Appendix 3). Within the context of SDR processing, this data element is known as the SDR Document Type Code. This is a one position code used to describe the type of discrepant report and the type of shipment involved, e.g., depot shipment to the customer = Type 7; direct vendor shipment to the customer = Type 6.

C17.3.1.1.2. Identify the discrepancy using the Shipping, Packaging, and Storage Discrepancy Code (Appendix 3). Within the context of SDRs this data element is known as the SDR Discrepancy Code. Use up to three different codes to describe the discrepancy. If no code exists to adequately describe the discrepancy, select Code Z1 and use a clear-text description. The goal of the initial SDR submission is to provide as much relevant information as possible to the action activity, including clarifying remarks to supplement discrepancy codes, so that they can take timely action to correct the problem and provide a timely response and disposition to the customer.

C17.3.1.2. Shipment Information. SDRs must contain a document number. Identify the original requisition document number when known; otherwise a constructed document number is required. DoD requisitioners reporting discrepant shipments may only use a constructed document number for selected discrepancies as discussed below. A constructed document number identifying the receiving distribution depot is required for depot receipts reported electronically, including new procurement receipts. A constructed document number may also be prepared by a transshipper based upon the CCP or port DoDAAC. Additional information, such as transportation numbers (TCN, bill of lading number, etc.) or procurement information (procurement instrument number, line item number, vendor shipment number) shall be provided in accordance with the DLMS transaction format/SF 364. When reporting new procurement receipts, the distribution depot shall cite a "pseudo shipment number," equivalent to that cited on the receipt, when the actual vendor shipment number is not available from shipping documentation. The pseudo shipment number shall be constructed to identify the receiving depot and a constant 01 (that is, the serial number will not be incremented; therefore, the pseudo shipment number will not be unique). In order to systematically identify pseudo shipment numbers the third position must be numeric (vendor assigned shipments use a three digit alpha prefix to identify the vendor). For example, pseudo shipment numbers prepared by Distribution Depot San Joaquin, California (DDJC), shall be reported as DD1JC01.

C17.3.1.3. Requested Action

C17.3.1.3.1. The SDR originator must indicate what action has been taken concerning the discrepant materiel and/or the desired response from the responsible action activity. Identify the action code using the SDR Requested Action Code (Appendix 3). Within the context of SDR processing, this data element is known as the Action Code. If no code exists to adequately describe the action taken or requested disposition, select Code 1Z and use a clear-text description.

C17.3.1.3.2. When an SDR is submitted using Action Code 1H, "No Action Required, Information Only," the SDR must be processed to verify the discrepancy does not require further action. SDRs with Action Code 3B, "Discrepancy Reported for Corrective Action and Trend Analysis. No Reply Required." must be reviewed to determine the appropriate corrective action to prevent recurrence. A reply transaction from the action activity is not required, for Action Codes 1H or 3B, but when provided, it shall be accepted by the customer application. Systematically, this may be interpreted to mean that customer applications may auto-close these SDRs, but must allow them to re-open automatically to process a reply transaction if one is provided. A non-significant reply e.g. indicating acknowledgment of the SDR, may be dropped or posted, but shall not require further attention.

C17.3.1.4. Shipping Documentation. Retain shipping and associated documentation to provide a copy if requested. Do not mail hard-copy documentation if data is otherwise accessible to the responsible action activity. Where relevant to the discrepancy, shipping documentation may be provided electronically as an SDR attachment.

C17.3.2. Reporting Criteria

C17.3.2.1. U.S. Forces and participating non-Security Assistance fall under the reporting criteria based upon dollar value and/or condition as follows:

C17.3.2.1.1. GSA and DLA Directed Shipments Dollar Value Criteria. Optionally, recipients of DLA and GSA directed shipments may submit an SDR for all types of shipments regardless of dollar value. Otherwise, report discrepant shipments when they meet the conditions and value criteria cited in the paragraphs below.

C17.3.2.1.2. Contractor/Manufacturer or Vendor Shipments. Report discrepant shipments from contractors/manufactures or vendors that meet conditions cited under reporting criteria regardless of dollar value.

C17.3.2.2. DoD action activities shall recognize the ILCO's determination whether SDRs fall within submission time standards and dollar limitation contained in the United States of America Department of State Letter of Offer and Acceptance controlling the case, or any other sales agreement with a Security Assistance purchaser. Once accepted by the ILCO and forwarded to the responsible action activity, further evaluation for time standard and dollar criteria is not appropriate.

C17.3.2.3. Condition of Materiel

C17.3.2.3.1. Condition Misrepresented. Report when the condition of an item valued in excess of \$100 per line-item is found to be other than shown on the shipping document, or, in the case of subsistence, on supporting inspection/test certificates or records. Use the hazardous materiel discrepancy code when applicable.

C17.3.2.3.2. Hazardous Materiel. Report discrepant receipt of hazardous materiel under the appropriate H-series discrepancy code. Use in place of the C-series codes for condition/shelf-life discrepancies when a hazardous item is received in a condition other than shown on the supply document or on the supporting inspection/test certificate. Report receipt of hazardous item requiring repair and lack of a material safety data sheet (MSDS) in Hazardous Material Information Resource System (HMIRS). Also use to report receipt of a non-radioactive item classified as radioactive, or non-hazardous item classified as hazardous.

C17.3.2.3.3. Missing Part. Report materiel received for repair that has been cannibalized of nonexpendable parts or components (including cannibalization of nonexpendable basic issue item (BII) or nonexpendable supply system responsibility item (SSRI) without the authorization of the inventory manager when the total value of the missing item(s) is in excess of \$100). Expendable BII and SSRI are not subject to these procedures.

C17.3.2.3.4. Expired Shelf Life. Report receipt of materiel for which the shelf life either has expired (Type I non-extendible item) or the inspect/test date has lapsed (Type II extendible item), regardless of dollar value. Use the hazardous materiel discrepancy code when applicable.

C17.3.2.3.4.1. For Type I DoD and GSA managed items: submit an SDR.

C17.3.2.3.4.2. For Type II DoD-managed items: prior to submitting an SDR, access the DoD Shelf-Life Extension System (SLES) through the DoD Shelf-Life Program Website at: <https://www.shelflife.hq.dla.mil/default.aspx> or through the shelf life program secure site if you have a .mil address.

C17.3.2.3.4.2.1. Type II items requiring laboratory test: query the DoD Quality Status Listing (QSL) to determine if the specified Type II item is listed as having passed the required laboratory testing and has been extended. Items that are listed on the QSL as passed may be extended and remarked accordingly if the item has been stored in accordance with its storage standard. For items not on the QSL, prior to submitting an SDR, contact the DLA call center at 1-877-DLA-CALL if the shipment originated from a DLA storage activity.

C17.3.2.3.4.2.2. Type II items requiring visual inspection: query the Materiel Quality Control Storage Standards for the specified Type II item, perform visual inspection in accordance with the items storage standard, and extend

and remark if the item has been stored in accordance with its storage standard. If the item fails the visual inspection, dispose of as required by local procedures.

C17.3.2.3.4.3. For Type II GSA-managed shelf-life-items: prior to submitting an SDR, contact the GSA Shelf-Life Hotline at 1-209-547-8634 to determine if the inspect/test date has been extended.

C17.3.2.4. Canceled Requisitions. An SDR is required when materiel received is valued in excess of \$100 per line-item for canceled requisitions. Confirmation of the cancellation must be on file. The submitter should request disposition instructions for unwanted materiel. Exception: an SDR must be submitted when controlled inventory items are received on previously canceled requisitions regardless of dollar value.

C17.3.2.5. Documentation. Report when supply documentation is missing, incomplete, or improperly prepared regardless of dollar value.

C17.3.2.6. Overage/Shortage, Nonreceipt, or Duplicate Discrepancies

C17.3.2.6.1. Overage/Shortage. An item overage or shortage discrepancy occurs when the quantity received is greater or less than that shown on the shipping document. This type of variance is not evident on delivery but is discovered when the article of freight, as described on the transportation document, is opened and the contents are checked. Report DoD shipper overages or shortages valued in excess of \$100 per line item, except for controlled inventory items, that are reported regardless of dollar value. Customers may use a clear text description to indicate that erroneous or conflicting Materiel Receipt Acknowledgement information was previously submitted.

C17.3.2.6.2. Concealed Overage/Shortage. U.S. Government customers shall report overages or shortages discovered while opening a sealed vendor pack regardless of dollar value or shipper. These reports must contain, if available, the contract number from the packaging, the lot number, and original document number. A constructed document number should be provided when the original number is not known. When using a constructed document number in an SDR coordinate with the applicable Component finance office and follow MILSBILLS procedures citing Code U in the first position of the constructed document number serial number (DLMS Utilization Code U), include fund code and credit-to/bill-to DoDAAC, to ensure that credit/billing is appropriate.

C17.3.2.6.3. Quantity Variances. Quantity variances on receipts from procurement authorized by the terms of the contract are not reportable as discrepant.

C17.3.2.6.4. Quantity Unit Pack (QUP) Variances. Report quantity variance due to incompatibility of unit of issue (U/I) between documentation and materiel received. Automatic adjustment for unit pack is allowable by policy, unless the requisition contains an appropriate advice code, in accordance with Chapter 4, restricting the quantity.

C17.3.2.6.5. Exceptions to Reporting Overage/Shortage. For U.S. Government customers, this does not include transportation discrepancies as follows:

C17.3.2.6.5.1. Overages or shortages of boxes, packages, or loose articles of freight in a commercial/Government-owned/leased shipping container (commonly called SEAVAN), Military SEAVAN (MILVAN), a Military Sealift Command SEAVAN (MSCVAN or MILVAN), roll-on/roll-off (RORO) trailer, or CONEX.

C17.3.2.6.5.2. Overages or shortages of freight (packaged or loose), upon delivery by a carrier, found to be in excess of the quantity of articles recorded on the bill of lading or transportation document covering the shipment.

C17.3.2.6.5.3. Average Net Weight Lotting System. DLA's subsistence commodity will use the average net weight lotting system when shipping perishable specification freeze and chill items. Actual weight received may differ from actual weight requisitioned or shown on the supply documentation. Do not submit a discrepancy report if the number of cases/containers received agrees with the number shown on supply documentation, and actual weight received is within weight range variation.

C17.3.2.6.6. Total Nonreceipts

C17.3.2.6.6.1. Report non-receipt of items shipped via traceable means, e.g., GBL or CBL, registered, insured, certified USPS, or small package carrier shipments, regardless of dollar value only when it has been determined that non-receipt is not the result of a transportation discrepancy. In all cases, U.S. Government customers must have received supply/shipment status and employed materiel follow-up procedures. It is strongly recommended that the customer check for requisition status on Web Visual Logistics Information Processing system (WebVLIPS), for proof of shipment data on DLA Distribution Standard System (DSS) Materiel Release Order (MRO) Tracker or on the Integrated Data Environment/Global Transportation Network (IGC/IDE), or use the DoD WebSDR hyperlink to WebVLIPS to check requisition status before creating an SDR for total non-receipt. This may preclude the need for an SDR or may enable the action activity to resolve the problem more quickly.

C17.3.2.6.6.2. Security Assistance customers reporting non-receipt are required to provide documentation from the freight forwarder indicating that no materiel has been received on the requisition and transportation control numbers that apply. The ILCO shall deny and return as incomplete any SDRs that do not have the documentation attached.

C17.3.2.6.6.3. An SDR is required when items valued in excess of \$100 dollars per line-item, reported shipped by non-traceable USPS (i.e., not shipped registered, insured, certified mail) are not received or are received in a damaged condition.

C17.3.2.6.7. Duplicate Shipments. Report duplicate shipments regardless of dollar value.

C17.3.2.6.8. SDRs for Air Force Maintenance Denials Under BRAC Supply, Storage and Distribution (SS&D) Agreement. SDRs resulting from distribution depot denial of an Air Force-directed release order for inventory previously requisitioned from DLA and receipted into Air Force ownership as the result of a “wash” (issue/receipt in-place), shall be reported to the depot for initial action. This is an automatic SDR generation triggered by a warehouse refusal citing Denial Management Code 1 (stock exhausted) or 2 (materiel not available in condition requested). The SDR shall identify the original requisition document number (under which the materiel was purchased from DLA) and the maintenance denial document number (identified by the Air Force maintenance site M-series identifier in the first six characters of the document number). The maintenance denial document number shall be carried as the customer-assigned SDR number to facilitate depot research. The discrepancy may be reported as total non-receipt (total denial) or as a shortage (partial denial). DLA shall issue credit based upon the depot recommendation and confirmation of prior billing. If materiel is still required, a new requisition shall be generated perpetuating the applicable denial management code. The replacement requisition shall also cite the prior (original) document number for cross-reference.

C17.3.2.7. Misdirected Materiel. Report when materiel, regardless of dollar value, is improperly addressed and shipped to the wrong activity. The document number assigned to the SDR will be the document number from the shipping documentation of the misdirected shipment received. (If the customer requisitioned materiel that was not received, it must be reported on a separate SDR for total non-receipt using the document number for the requisitioned materiel.) Misdirected shipments received by Security Assistance customers identify the location of the discrepant materiel and the country reporting the receipt (which may differ from the intended customer). All customers (U.S. and Security Assistance) are required to report misdirected controlled inventory, arms, arms parts, and explosives within 24 hours of discovery. (Properly addressed materiel incorrectly shipped to the wrong activity while under U.S. Government-controlled transportation is reportable as a transportation discrepancy.)

C17.3.2.8. Packaging Discrepancies

C17.3.2.8.1. Improper Packaging. Report any unsatisfactory condition resulting from improper packaging that causes the item, shipment, or package to be vulnerable to any loss, delay, or damage according to the specific conditions cited. Unless otherwise indicated, the minimum dollar value reporting criteria is when the estimated/actual cost of correction exceeds \$100; or the value of the item, shipment, or package is \$2500 or over, regardless of the estimated or actual cost to correct the packaging discrepancy. This may include loss or damage to the item, shipment, or package except when a report is otherwise required by DTR 4500.9-R, Defense Transportation Regulation, Part II, Cargo Movement. Where encoded information on the SDR is not sufficient, the submitter should provide detailed descriptions of how the materiel was packaged, as well as the actual damages incurred to the materiel. The submitter should also include, when available, the estimated cost of correction of packaging on the initial SDR.

C17.3.2.8.2. Packaging Discrepancies Noted at DLA Distribution Depots. To ensure proper billing, indicate if the materiel is a major item, i.e., ships, aircraft, missiles, ammunition, vehicles, etc., or secondary item, i.e., any item that supports a major item such as reparables, consumables, assemblies, etc. Distribution Depots shall include projected or actual costs for labor and repackaging materiels. If actual, indicate the date corrective action was completed.

C17.3.2.8.3. Mission or Life Endangering. Report packaging discrepancies, regardless of dollar value, resulting in damaged materiel that may endanger life, impair combat or deployment operations, or affect other materiel. Report immediately to the shipping activity, contracting office, or control point by the quickest communication medium to enable the shipper to take immediate corrective action. Submit an SDR within 24 hours of the initial report.

C17.3.2.8.4. Hazardous Materiel (Includes Ammunition and Explosives). Report any packaging discrepancy, regardless of dollar value, if a potentially hazardous condition could result or if damage or an unsatisfactory condition has occurred involving any hazardous materiel. This includes improper identification markings of items and packaging and/or unitized loads. Use hazardous materiel discrepancy codes when applicable.

C17.3.2.8.5. Excessive Packaging. Report excessive packaging by contractors that result in additional costs to the U.S. Government, regardless of dollar value.

C17.3.2.8.6. Improper Packing. Report any type of inadequate or improper packing to include incorrect blocking or bracing, oversized or incorrect container, and inadequate closure, resulting in an unsatisfactory condition or damage. Report when materiel is not packed in required reusable container regardless of dollar value.

C17.3.2.8.7. Delay or Additional Costs. Report packaging discrepancies resulting in delay or additional packaging costs at aerial or water terminals or at consolidation and containerization points. The activity responsible for operating the terminal or port of embarkation/debarkation shall be responsible for the preparation and submission of an SDR on discrepancies noted on shipments moving through the activity. These SDRs shall be prepared using Discrepancy Document Type Code W.

C17.3.2.8.8. Improper Packaging of Customer Returned Materiel. Distribution Depots shall send an SDR to the materiel owner for packaging discrepancies related to customer returned materiel or inter-depot transferred materiel. The materiel owner is responsible for funding packaging costs associated with preparing materiel for storage and reissue. Packaging discrepancies occurring in materiel returns are subject to recoupment action at the discretion of the materiel owner. If the packaging is so bad that the item must be disposed, the shipper may be required to reimburse the receiver for any packing required to effect the shipment and the cost of

turn in to DLA Disposition Services. The distribution depot shall always include the estimate of the costs of repackaging or disposal on the initial SDR submission, in the remarks section and complete the appropriate data element entries for electronic submission.

C17.3.2.8.9. Wood Packaging Materiel (WPM). Report WPM that is not consistent with the international standards for the regulation of WPM transiting international borders and Department of Agriculture regulation governing importation of regulated WPM. Compliant WPM must display certification marking as prescribed in reference. Use discrepancy code P215 and provide remarks as applicable. Also see guidance for CCP-originated SDRs below.

C17.3.2.8.10. Repetitive Packaging Discrepancies. Include Discrepancy Code Z1, Repetitive Discrepancy, with the other specific packaging discrepancy code(s) to report repetitive packaging discrepancies that impose a significant burden on receiving or transshipment activities. Total costs to correct packaging shall be included in the SDR.

C17.3.2.8.11. Improper Preservation. Report any type of inadequate or improper preservation or physical protection resulting in an unsatisfactory condition or damage. Report improper preservation of any materiel identified as being electrostatic/electromagnetic (ES/EM) sensitive, regardless of the dollar value.

C17.3.2.8.12. Improper Marking. Prepare an SDR to report any omitted, incomplete, illegible, or misplaced markings. Report improper identification of containers, or items that require opening the container, or result in improper storage of the materiel, regardless of cost. Improper marking includes discrepancies related to passive radio frequency identification (pRFID) tags as follows:

C17.3.2.8.12.1. Report all missing, damaged, or unreadable pRFID tags when such tags are required by contract provisions, DoD policy, or specified by prior shipment notice/status reflecting pRFID content. Report duplication of tag identification associated with a previously processed receipt.

C17.3.2.8.12.2. SDRs may be used to report a tag read formatted for DoD use, but which does not relate to an advance shipment notification containing pRFID content when such advance shipment notification is required by contract provisions or DoD policy.

C17.3.2.8.13. Improper Unitization. Report improper unitization that includes inadequate wrapping/strapping or lack of unitization, where appropriate, resulting in an unsatisfactory condition or damage. Report multiple consignees in a single consignee consolidation container as improper unitization.

C17.3.2.8.14. Latent Packaging Discrepancies. Prepare a late SDR for materiel found in storage with latent preservation and packaging discrepancies. Confine these reports to stocks that constitute a problem resulting from a particular

specification, preservation, or packaging method. Reports relative to packaging discrepancies found in storage shall be annotated "not incident to shipment."

C17.3.2.9. Quality Related Issues Identified During Distribution Depot Receipt. Three-position Q-series discrepancy codes have been developed to accommodate materiel owners with special programs requiring immediate visibility and notification of quality deficient (or potentially deficient) materiel received at the distribution depot. These codes are applicable for reporting to ICP/IMMs via the SDR process, based upon special inspection requests by the materiel owner. These reports are contingent upon pre-existing receipt restriction requirements that identify the National Stock Number (NSN) and specific actions the materiel owner expects the distribution depot to perform. Some of the specific programs that require reporting of quality-related concerns for receipts, including new procurement and customer returns, are: PQDR exhibits, items identified as customer return improvement initiative (CRII) items, critical safety items, items that failed under use, and items requiring First Article Testing.

C17.3.2.10. Technical Data. Report item technical information, e.g., name plate, operating handbook, logbook, precautionary markings, warranty data, engineering drawings and associated lists, specifications, standards process sheets, manuals, technical reports, catalog item identifications, and related information that are missing, illegible, incomplete and/or incorrect regardless of dollar value. When reparable are returned and the appropriate historical information/documentation, operator/maintenance logbooks, engine oil analysis, etc., as required by Government regulations, and/or technical manuals are not included, the receiving activity shall submit an SDR regardless of dollar value. Any additional costs incurred by the repairing depot/arsenal because of the missing data shall be charged to the originating activity. The submitter shall ensure that the specific description of what documentation is missing is included in the remarks section.

C17.3.2.11. Incorrect Item

C17.3.2.11.1. Report incorrect or misidentified materiel or unacceptable substitutes regardless of dollar value. However, unless the requisition contains an appropriate advice code in accordance with Chapter 4, limiting the request to a specific item, automatic shipment of an interchangeable or substitute item is allowed by policy. See Interchangeability & Substitutability (I&S) guidance. Report wrong item receipts of controlled inventory, arms, arms parts, and explosives within 24 hours.

C17.3.2.11.2. Incorrect item discrepancies discovered while opening a sealed vendor pack shall be reported regardless of dollar value or shipper. These reports must contain the contract number from the packaging and, if available, the lot number and the original document number. A constructed document number shall be provided when the original number is not known. When using a constructed document number in an SDR coordinate with the applicable Component finance office and follow MILSBILLS procedures citing Code U in the first position of the constructed document number serial number (DLMS Utilization Code U), include fund code and credit-to/bill-to

DoDAAC to ensure that credit/billing is appropriate. Include identity of the incorrect item received in the discrepancy report.

C17.3.2.11.3. Where two separately managed items are involved in a wrong item SDR, e.g., a DLA-managed item was ordered and a Military Service-managed item was received due to shipper error, the SDR initiator shall forward the report to the shipping depot or manager of the item ordered, in accordance with Component rules. It is the responsibility of the SDR action activity (receiver of the SDR) to ensure full and appropriate resolution by coordinating with the other involved ICP/IMM or transferring the SDR (manually), so that the initiator receives all applicable and appropriate response information from the responsible party. This may be interpreted to mean two separate SDR replies, or a single coordinated response identifying financial resolution from the Component that sourced the order, and materiel disposition instructions provided by the owner of the materiel shipped.

C17.3.2.11.4. Report part number discrepancies when the part number marking appears to be inconsistent with the specified NSN. This includes when the part number received is not associated with the applicable NSN or when the part number cannot be matched to Federal Logistics Information System (FLIS) catalog data/FEDLOG. The SDR must include the part number and manufacturer's Commercial and Government Entity (CAGE) Code for the item received. Part discrepancies shall be submitted directly to the item manager.

C17.3.2.11.5. DoD WebSDR requires identification of the incorrect item received using discrete data elements (refer to the DLMS Supplement 842A/W). If multiple incorrect items are received under the same document number, use the appropriate discrepancy code for mixed stock and identify the first (highest quantity or controlled item) and use the remarks text to explain the mixed content shipment.

C17.3.2.12. Repetitive or Other Discrepancies. Receiving activities shall report repetitive discrepancies, regardless of dollar value. Additionally, receiving activities may report any other discrepant condition of an item not specifically identified in this chapter at the time of receipt, unless listed specifically under exclusions.

C17.3.3. SDRs Resulting from Redistribution Orders (RDOs). When a distribution depot receives an RDO from another distribution depot and the materiel is short, over, wrong, or quality deficient, the receiving depot shall:

C17.3.3.1. RDO Shortage. Prepare the SDR to report shortage and use Action Code 1D (materiel still required). The shipping depot shall receive the action copy; the ICP shall receive an information copy. The depot receiving the SDR shall treat it as a priority and conduct inventories as appropriate. If the inventory confirms an over balance, the depot shall respond using Disposition/Status (Reply) Code 123 (materiel will be reissued at no charge) citing inventory conducted and verified shipment error. If the inventory confirms correct balance or the balance is short, the depot shall reply with Disposition/Status (Reply) Code 126 (materiel not available for reshipment) or 701 (SDR rejected) citing inventory conducted and no overage was discovered; no

materiel will be shipped, OR, inventory conducted and shortage was identified; loss adjustment recorded on depot accountable record, no materiel will be shipped.

C17.3.3.2. RDO Overage. Prepare the SDR to report overage using Action Code 1B (materiel being retained). The shipping depot will receive the action copy; the ICP shall receive an information copy. The depot receiving the SDR shall treat it as a priority and conduct inventories as appropriate. If the inventory confirms an over-shipment error, the shipping depot shall respond with Disposition/Status (Reply) Code 137, annotating that inventories were conducted and balances were adjusted to show correct on hand balance. If inventory confirms no over-shipment was made, the shipping depot shall respond with Disposition/Status (Reply) Code 701 (SDR rejected), citing inventory conducted and on-hand balances are correct.

C17.3.3.3. RDO Wrong Item. Prepare the SDR to report receipt of wrong item using Action Code 1D (materiel still required). The shipping depot shall receive the action copy; the ICP shall receive an information copy. The depot receiving the SDR shall treat it as a priority and conduct inventories on both the wrong item that was shipped and the correct item that was not shipped. No distribution depot shall request or authorize return or movement of wrong materiel received as an RDO; the ICP/IMM shall make all materiel movement decisions. If the inventory confirms an overage of the correct NSN, the shipping depot shall respond using Disposition/Status (Reply) Code 123 (materiel will be reissued at no charge), citing inventory conducted and shipment error confirmed; materiel will be shipped to correct shipment error. If the inventory fails to confirm an overage of the correct NSN, but an inventory of the wrong NSN reveals a shortage, the shipping depot shall reply using Disposition/Status (Reply) Code 126 (materiel not available for shipment), citing inventories conducted on both NSNs confirm shipment error; accountable record corrected; no materiel will be shipped. Report wrong item receipts of controlled inventory, arms, arms parts, and explosives within 24 hours.

C17.3.3.4. RDO Quality-Related Issues. Prepare an SDR when quality-related issues are noted upon receipt, or when materiel received on the RDO must be suspended prior to stow. The action copy shall be sent to the ICP/IMM using Action Code 1A (disposition instructions requested). The ICP/IMM shall respond to the receiving depot with disposition instructions, to include condition code change requirements where appropriate. Refer to quality-related issues in paragraph C17.3.2.9.

C17.3.4. Material Returns

17.3.4.1. Discrepancy Greater Than \$100. Continental United States (CONUS) and Outside Continental United States (OCONUS) activities receiving materiel returns (excess or redistributed materiel, or reparable materiel, including returns from FMS customers) shall submit an SDR for discrepancies specified above regardless of condition when the dollar value is equal to or greater than \$100 per line-item. Discrepancies pertaining to controlled inventory items shall be reported by SDR regardless of dollar value or condition.

17.3.4.2. Exception for Returns Between U.S. Activities. When the materiel return shipments are classified as unserviceable and uneconomically reparable upon receipt, the receiving activity shall report to the shipping activity. The report shall include materiel return document number, quantity, and an explanation of condition classification.

C17.3.5. Discrepancies Resulting from Lateral Redistribution Orders (LROs) on Total Asset Visibility (TAV) Shipments. Coordination with the Military Service shipping activity is recommended prior to ICP resolution of the SDR. An exception from normal routing exists for SDRs entered via DoD WebSDR on LROs for TAV shipments between DLA and the Army's Non-Army Managed Items Group, Supply Directorate (NAMI Group, RIC AJ2)".

C17.3.5.1. All SDRs submitted for DLA directed LROs where the item is managed by DLA, owned by NAMI (RIC AJ2), and shipped from an Army CONUS site, shall be sent to NAMI for investigation, with an information copy to DLA (RIC SMS). NAMI shall research the discrepancy and forward recommended disposition to DLA for final action. The NAMI action activity shall provide recommended disposition to DLA within 25 calendar days. After 25 calendar days have elapsed and NAMI recommended resolution has not been received, DLA shall follow-up for recommended disposition.

C17.3.5.2. Upon receipt of recommended disposition, DLA shall review and provide final decision to the customer, along with an information copy to NAMI. DLA shall be responsible for reversing credit to the TAV shipping activity, issuing credit to the requisitioner, and deleting activities from the TAV process due to poor performance, in coordination with NAMI.

C17.3.5.3. If Army shipped the wrong item or an overage, NAMI shall be responsible to provide the customer with disposition instructions and/or directions for returning the item back to Army. If the item is to be retained by the customer, NAMI shall be responsible for financial actions as appropriate. DLA shall not reimburse the shipper for wrong item or over shipments of Army issues relative to TAV.

C17.3.6. Distribution Depot Receipt with no Due In. Distribution Depots shall report receipt of unscheduled materiel from new procurement to the owner/IMM, regardless of condition of materiel, as a discrepancy. Other unexpected materiel receipts, including returns and/or redistributions that are not ICP/IMM directed, and

unscheduled returns to/from maintenance, may be reported by prior direction of the owner/IMM.

C17.3.6.1. New procurement materiel with other applicable discrepancies, e.g., missing receiving report/DD Form 250, improper packaging, shall be placed in Supply Condition Code (SCC) L pending resolution. Exception: discrepant critical safety item (CSI) materiel shall be placed in SCC J regardless of whether it is new procurement or returned materiel. Initial SDR shall include estimated costs of disposal or repackaging in the remarks section and complete the appropriate data element entries for electronic submission.

C17.3.6.2. If other than new procurement, the SDR should show receipt in SCC K when the actual condition cannot be determined. Materiel returned with other identified discrepancies, e.g., without associated technical data, shall also be reported as indicated under the appropriate discrepancy category. Returns of excess materiel that are not ICP/IMM directed are subject to recoupment of costs associated with disposal or repackaging costs incurred by the distribution depot.

C17.3.7. DLA Disposition Services Discrepancies

C17.3.7.1. Dollar Value Greater Than \$100. Receiving activities shall submit an SDR for discrepancies specified above in shipments to and from DLA Disposition Services Field Offices when the dollar value is greater than \$100 per line item.

C17.3.7.2. Exception. Activities shall submit a discrepancy for overages and shortages in shipments of controlled inventory items regardless of dollar value.

C17.3.7.3. DLA Disposition Services and DLA Disposition Field Office SDR Procedures. During the receiving process, if the DLA Disposition Services Field Office identifies a supply discrepancy, an outgoing SDR shall be generated consistent with Chapter 16.

C17.3.8. Discrepancies in Item Unique Identification (IUID) Data. Report discrepancies involving IUID under Unique Item Tracking (UIT) program requirements or as contractually required under IUID program policy. Discrepancies may be related to the packaging label, including automated information technology (AIT); the item marking, including AIT; supply documentation; the due-in record; and/or a mismatch between the item and any of these. The elements which may comprise unique identification are: unique item identifier (UII), UII type, issuing agency code, enterprise identifier (or manufacturer's CAGE), part number (original or current), serial number, and batch/lot number. The application of these elements vary according to multiple factors such as the type of item and the specific contract requirements. Discrepancies identified during receipt of new procurement materiel must be reported prior to acceptance. Materiel may be placed in a suspended condition pending resolution. Discrepancies that result in incorrect information within the IUID registry at DLA Logistics Information Service must be reported and corrective action taken.

C17.3.9. Transshipper Prepared SDRs. CCPs shall prepare an SDR to report packaging discrepancies as described above.

C17.3.9.1. Supply Discrepancies Requiring Transshipper Reporting. SDRs shall be prepared for supply discrepancies related to hazardous shipments and non-compliant wood packaging material (WPM). The following discrepancy codes apply, although this does not exclude other item/packaging discrepancies that may result in frustrated shipments:

C17.3.9.1.1. H3 – Lack of a material safety data sheet (MSDS) in Hazardous Material Information Resource System (HMIRS).

C17.3.9.1.2. H6 – Shipper's declaration for dangerous goods missing or incorrect.

C17.3.9.1.3. P209 – Improper packing of hazardous materials.

C17.3.9.1.4. P215 – Non-conformance to specified requirements for WPM.

C17.3.9.1.5. P302 – Improper marking of hazardous materials.

C17.3.9.2. CCP SDRs for Non-Compliant WPM. CCPs shall notify ICPs that their OCONUS WPM shipment is not in compliance with DoD 4140.65-M, "Compliance For Defense Packaging: Phytosanitary Requirements for Wood Packaging Material (WPM)," and ISPM 15 requirements. The expiration of the DoD Pest Free mark and the requirement to use the International Plant Protection Convention (IPPC) stamp to indicate WPM compliance brings the requirement to remediate all noncompliant WPM destined for OCONUS. WPM shipments can be remediated by repackaging or by use of a heat chamber. SDRs shall be prepared for noncompliant shipments received by the CCPs. Noncompliant shipments will not be held for disposition. Shipments on noncompliant pallets will immediately be re-palletized onto compliant wood pallets. Boxes, crates, etc. shall be sent to a remediation area through use of DSS packing, packaging, preservation & marking (PPP&M) process, and placed in a Hold Status W until remediation is completed. SDRs shall be generated for both pallet replacements and box/crate rebuilds. The SDR will normally cite SDR Action Code 3B, Discrepancy Reported for Corrective Action and Trend Analysis. No reply is required. This type of SDR does not require a response from the source of supply or other designated activity; but is provided so that the source of supply may take appropriate action with the Component shipper or vendor and track trends and associated repackaging costs. The SDR shall be auto-closed in the DSS, based on the P215 discrepancy code (indicating noncompliant WPM), and will not be reopened. The point of contact (POC) may be contacted if SDR was sent to the wrong supply source. Labor and material to remediate will be charged to a CCP Cost Code. If a frustrated shipment requires an expedited SDR reply to the CCP, use of Action Code 3A, Transshipper (Aerial/Water port or CCP) Requests Expedited Response; Shipment Frustrated, is authorized.

C17.3.9.3. Aerial or Water Port Prepared SDRs. The port (identified by DoDAAC) shall prepare an SDR to report packaging or documentation discrepancies as described above. If the shipment is not frustrated and forward movement is not stalled awaiting the action activity response, the SDR shall cite Action Code 3B, Discrepancy Reported for Corrective Action and Trend Analysis. No reply is required. If the shipment is frustrated, the SDR shall cite Action Code 3A, Transshipper (Aerial/Water port or CCP) Requests Expedited Response; Shipment Frustrated, is Authorized. The submitter shall use the remarks block to clarify desired actions and shipment information where specific data fields in the SDR are not available pending full implementation.

C17.3.9.4. Expected Data Content for Transshipper SDRs. These SDRs shall be identified by Discrepancy Document Type Code W and shall include the number and type of discrepant pieces. The transportation control number (TCN) shall be the primary reference number for operational processes. If the shipment is received at the CCP without a TCN, one shall be assigned in accordance with the DTR. SDRs prepared at the shipment level may include multiple items, or there may not be due-in or documentation available. Because a document number is mandatory within DoD WebSDR, the CCP or other transshipment activity may need to generate a document number based upon the submitter's DoDAAC if multiple documents are included or the original document number is unavailable. Action activities shall not reject Transshipper SDRs for unmatched document numbers without researching by TCN and other identifying shipment information. Multiple document numbers, when available, shall be recorded in the SDR remarks. Materiel identification may be identified as "UNKNOWN" or "MIXED" (multi-pack or other consolidation of different items). When this occurs, quantity and U/I shall be left blank. When possible, the shipper shall be perpetuated from the due-in notification (e.g. DLMS (US TRANSCOM-maintained) 856A) or shipping documentation. The owner/manager (source of supply) shall be identified as the ICP/IMM that directed the shipment when applicable.

C17.3.10. SDR Distribution. This section addresses those organizations that must be identified on the SDR as initial action recipient or as receiver of information copies. Such determination is based upon the type or origin of the shipment involved, the DoD Component that directed shipment, and the type of discrepancy. Applicable action activities include ICP, ILCOs, and DLA Distribution Depots. For items requiring special handling and/or reporting, such as controlled inventory items, the responsible action activity must ensure additional distribution of the report as required. The submitter shall provide a copy of the Serious Incident Report, or other Component-required report, regarding controlled inventory items believed to be stolen, lost, or unaccounted for. Where access to an electronic SDR application and associated supply information is available, hard-copy documents shall not be mailed. Where electronic attachment capability is not available, an exception is provided for mailing of information not readily available to the responsible/action activity and photographic/pictorial evidence of the discrepancy.

C17.3.10.1. Security Assistance Shipments. All Security Assistance SDRs shall be sent directly to the applicable ILCO for initial screening and processing. SDRs

may be submitted to the ILCO via SF 364, Report of Discrepancy, or authorized electronic/automated formats. The ILCO shall forward the SDR electronically to the appropriate action activity. Security Assistance SDRs bypassing the ILCO shall not be accepted by DoD and participating Agency action activities.

C17.3.10.2. SDR Distribution for Shipment (Item) Discrepancies

C17.3.10.2.1. DoD Originated Shipments

C17.3.10.2.1.1. Army Directed Shipments. Initial action shall be directed to the source of supply (SoS). The only valid Army action activity/SoS RICs are AKZ, A12, A35, AJ2, B14, B16, B17, B46, B64, and B69. Army users are advised not to submit SDRs to single stock fund (SSF) site RICs or to Army shipping depot RICs via DoD WebSDR. There are currently no WebSDR interfaces to support SSF sites or Army shipping depots. The Army action activity can be determined from the shipping documentation (e.g., the RIC in record position 67-69 of the DD 1348-1A), or as part of a NIIN/NSN or Part Number search in WebFLIS (<http://www.dlis.dla.mil/webflis/>). Note that the FLIS SoS will not apply if the requisition was filled by AJ2, Non-Army Manager Item (NAMI) SoS. Services ammunition users are advised to send SDRs to B14 for ammunition commodity discrepancies. These SDRs will be further routed by the Army to Army ammunition storage depots that manage Army, Service common, and Service unique ammunition stock.

C17.3.10.2.1.2. Total nonreceipt SDRs for Security Assistance Shipments from DLA Distribution Depots. SDRs shall be forwarded by the ILCO directly to the DoD shipping depot regardless of implementing Component. Where the shipping depot is not known, forward to the ICP/IMM.

C17.3.10.2.1.3. Defense Logistics Agency (DLA) Directed Shipments. Initial action to the DoD shipping activity. Where the shipping activity is not known, forward the SDR to the ICP/IMM. WebSDR shall provide an information copy to the ICP when identified on the SDR and when the SDR response is provided by the shipping activity. The ICP shall provide additional response to the submitter with final resolution and providing financial action when applicable. For contact information for DLA action activities refer to the DLA Customer Handbook. For assistance contact the Customer Support - Virtual Contact Center at 1-877-352-2255 (1-877-DLA-CALL) or DSN 661-7766; or the DLA Distribution Customer Support Team Point of Contact for SDRs at DSN 977-8749 (717)770-8749.

C17.3.10.2.1.4. GSA Directed Shipments

C17.3.10.2.1.4.1. GSA shipped from a GSA Supply Distribution Facility. Initial action to GSA (GSA National Customer Service Center).

C17.3.10.2.1.4.2. GSA shipped from a DLA Distribution Depot. Initial action to the shipping activity. DoD WebSDR shall provide a copy to GSA.

C17.3.10.2.1.4.3. Purchases made by DoD Activities from Federal Supply Schedules or GSA Open-End Contracts. The customer may coordinate off-line with the supplier for resolution. Identify GSA to receive the SDR under the following conditions:

- repetitive discrepancies,
- cases of dispute that cannot be resolved between the ordering office and the supplier, or
- product quality deficient materiel in Security Assistance shipments where GSA has provided inspection at source.

C17.3.10.2.1.5. All Other DoD Component or Participating Agency Directed Shipments. Initial action to the DoD shipping activity. Where the shipping activity is not known, forward to the ICP/IMM. WebSDR shall provide an information copy to the ICP, when identified, and/or the SDR response is provided by the shipping activity.

C17.3.10.2.2. DoD Central Procurement and Direct Vendor Delivery. For materiel procured centrally by a DoD Component ICP, distribution shall be as follows irrespective of the point of inspection and acceptance.

C17.3.10.2.2.1. Initial action to the procuring ICP for internal distribution to the contracting officer or designated personnel.

C17.3.10.2.2.2. Copy to office administering the contract/purchase order, if different from the purchasing office, except as otherwise prescribed for purchases made from federal supply schedules or GSA open-end contracts below. If not identified on the SDR, the initial action activity may forward as appropriate.

C17.3.10.3. Materiel Returns

C17.3.10.3.1. Initial action to manager's ICP.

C17.3.10.3.2. Copy to shipping activity.

C17.3.10.4. Shipments to DLA Disposition Services

C17.3.10.4.1. Initial action to the turn-in activity, as identified on the defense turn-in document (DTID) (DD 1348-1A, Block 2). The SDR will be sent directly to the generator's email address when available as the result of an electronic turn-in (DLA Disposition Services ETID). If ETID email address is not available, WebSDR distribution shall be to the turn-in activity SDR monitor or Component-sponsored SDR application.

C17.3.10.4.2. If distribution via ETID email address, a WebSDR generated copy will also be provided to the turn-in activity SDR monitor or Component-sponsored SDR application.

C17.3.10.5. Shipments from DLA Disposition Services. Initial action to the Disposition Services Field Office or Recycling Control Point (RCP) as applicable. If not known, SDRs may be directed to DLA Disposition Services (RIC S9D).

C17.3.10.6. Local Purchase. Follow DoD Component guidance. A copy will be furnished the Government inspector when inspection is at origin. DoD WebSDR does not support SDRs applicable to local purchase discrepancies.

C17.3.10.7. Industrial Plant Equipment Shipments. DLA, shall review all SDRs from the initiator, make further distribution as necessary, request appropriate action from the consignor, and provide the initiator with replies from the consignor and other closeout action.

C17.3.10.8. SDR Distribution for Packaging Discrepancies

C17.3.10.8.1. Contractor/Vendor Shipments

C17.3.10.8.1.1. Initial action to the ICP.

C17.3.10.8.1.2. Copy to Contract Administration Office (CAO).

The submitter is encouraged to identify the applicable Defense Contract Management Agency (DCMA) office as a distribution copy recipient when applicable (see block 10 of DD Form 250, Material Inspection and Receiving Report or comparable receiving report). When applicable and not identified by the submitter on the SDR, the initial action activity shall forward the SDR to the DCMA or other applicable CAO. When the contract is administered by the Service or Agency issuing the contract, the ICP is responsible for insuring the CAO has access to the SDR information.

C17.3.10.8.2.3. Copy to Administrative Contracting Office (ACO).

The initial action activity shall furnish a copy of the SDR to the ACO (or otherwise provide visibility), if a different organizational entity is involved.

C17.3.10.8.2.4. Copy to Procuring Contracting Office (PCO). The

initial action activity shall furnish a copy of the SDR to the PCO (or otherwise provide visibility), if a different organizational entity is involved.

C17.3.10.8.2.5. Copy to Component Packaging Monitor. SDRs for

Air Force ICP-directed shipments shall be provided to the designated Air Force ICP packaging monitor by DoD WebSDR under Component-unique routing rules.

C17.3.10.8.2. DoD Originated Shipments

C17.3.10.8.2.1. Initial action as indicated above for DoD originated shipments.

C17.3.10.8.2.2. Information copy to be provided systemically by

DoD WebSDR per Component guidance. SDRs for Air Force ICP directed shipments shall be provided to the designated Air Force ICP packaging monitor.

C17.3.10.10. The Exchange (formerly Army and Air Force Exchange Service (AAFES)). SDRs may be routed to the Exchange via DoD WebSDR to the SoS RIC.

C17.3.11. Follow-Up on Original SDR

C17.3.11.1. When the action activity does not respond to an SDR within the prescribed timeframe specified in this chapter, the submitting activity shall provide an SDR follow-up. Prior to submitting a follow-up, the reporting activity should first attempt to ascertain the status of the SDR using the DoD WebSDR query function. If there is no record of an action activity reply, a follow-up should be submitted. Follow-ups must be directed to the last identified action activity when the original SDR was forwarded by the original recipient. Cite the SDR report number of the original report. For transactional exchange, include the WebSDR-assigned control number when known. Follow-up transactions should include all data that was in the previous SDR submission. POC information for the follow-up and the follow-up date are required. A narrative entry is required to provide clarification for the follow-up.

C17.3.11.2. If no response is received to the follow-up within 30 calendar days, the originator shall contact DLA Distribution for distribution depot shipments (direct email to: DDC.ISDR@dla.mil) or the SoS for all other shipments to request assistance. Off line communication with the action activity is recommended because electronic processing errors may have impeded timely response to the SDR and later follow-up. DLA Distribution or SoS will ensure that a response with disposition or interim status is provided within 30 calendar days.

C17.3.12. Responsible Action Activity Response to an SDR

C17.3.12.1. Procedures

C17.3.12.1.1. Processing. Responsible action activities shall process all discrepancy reports under the policies and procedures set forth in this publication and the DoD Component implementing regulations. Responsible action activities include all activities required to take action on a reported discrepancy. Action activities shall consider the associated MRA during validation of SDRs. Conflicting information shall be investigated as appropriate.

C17.3.12.1.2. Replies. Responsible activities shall reply to SDRs by submission of a DLMS 842A/R to WebSDR or via direct WebSDR input. Pending implementation of DLMS, other previously authorized SDR response formats may be used. SDR replies shall indicate the appropriate disposition, e.g., acknowledgment of the report, disposition of the materiel, validation of the report with authorization of financial adjustment, and/or instructions for repackaging, repair or other types of corrective action. SDR replies must contain the appropriate discrepancy code consistent with all information provided by the customer. This may require updating of the discrepancy codes used by the customer to assign the appropriate discrepancy code for the scenario described in the SDR remarks. The action activity shall identify the disposition/status using the appropriate Reply Code (Appendix 3). Action activities

shall ensure that inappropriate reply codes are blocked from use when responding to transshipper SDRs (Document Type Code W)². Shipment information applicable to direct vendor deliveries, new procurement, etc., must be completed by the action activity where incomplete or inaccurate on the original report. This includes identification of the shipping activity or vendor (by CAGE), contract number, and identifying shipment numbers. DLMS compliant applications must also ensure that direct vendor delivery shipments are identified by Document Type Code 6 on the SDR reply, regardless of what the customer originally designated. Historical replies (transactions citing Transaction Set Purpose Code 49) shall be used to fulfill these requirements where the submitter indicated that an SDR reply was not required.

C17.3.12.1.2.1. Interim Replies. Interim replies may be used to inform the submitter that an SDR has been forwarded to another organization for investigation or resolution. Responsible activities must provide an interim reply where a final reply cannot be provided within the established timeframes. Failure to meet the established timeframes must be caused by reasons outside the control of the ICP/IMM or GSA. Such interim replies shall indicate when additional status will be provided. Identify the interim disposition/status using the appropriate Reply Code (Appendix 3). If no coding exists to specifically identify the reasons for the delay, select Code 137 and provide a clear-text explanation.

C17.3.12.1.2. 2. Denials. SDRs not meeting the reporting criteria or timeframes specified in this chapter or not including sufficient justification, shall be considered for information only, or denied, as appropriate. DoD ICP/IMM action activities are encouraged to accept late submissions lacking justification for trend analysis/corrective action; with associated financial credit provided at the discretion of the action activity. The responsible activity shall use the SDR response and cite the appropriate disposition/status (reply) code.

C17.3.12.1.3. DoD ICP/IMM, Shipping Depot, or GSA Actions. The ICP/IMM, shipping depot, or GSA shall:

C17.3.12.3.1. Review all SDRs received for processing and determine proper course of action based on available supply records and the results of investigation. This includes SDRs which the customer has reported as requiring no action (Action Code 1H or 3B).

C17.3.12.3.2. Provide the SDR response to include disposition instructions as needed to the customer or the ILCO for Security Assistance SDRs. The responsible activity shall provide point of contact information for each SDR response.

C17.3.12.3.3. Based upon validated SDRs, request that DFAS or integrated financial process authorize adjustment/credit in accordance with MILSBILLS procedures in DLM 4000.25, Volume 4, Finance.

² Refer to [Approved DLMS Change 317B](#), Action Activity Replies to Transshipper-Prepared SDRs

C17.3.12.3.4. Provide signed evidence of shipment to the ILCO for Security Assistance SDR for non-receipt of materiel. If this documentation cannot be provided, appropriate credit is required.

C17.3.12.3.5. Provide documentation to the ILCO that is matched to the quantity shipped for Security Assistance SDRs for concealed shortages. Examples of such documentation are those containing size, total weight, and cube accepted by the carrier. Credit is denied if the documentation, in conjunction with the unit weight, supports shipment of the total quantity billed. Otherwise, appropriate credit for the differences is required.

C17.3.12.4. Disposition of Materiel. Use the SDR response as an action reply for those discrepant conditions requiring disposition instructions to the reporting activity, e.g., overages, damages (USPS), deficient materiel (Security Assistance), or erroneous or misdirected materiel.

C17.3.12.4.1. Returning Discrepant Materiel. When discrepant materiel is directed to be returned, the responsible activity shall direct the customer to reship the materiel using the same document number under which the materiel was originally shipped. The SDR reply shall include the date by which the customer is requested to return the materiel to the designated location. The ICP shall require expedited return where appropriate, such as FMS classified/sensitive item returns, and overage returns for back-ordered materiel not available within another customer's required delivery date. The return-to location shall be identified by DoDAAC or CAGE (contractors where no DoDAAC is assigned). Clear text addresses may be included in addition to the coded address since all customers may not have access to the authoritative address source. The SoS shall provide reimbursement for packing, crating, handling, and transportation for directed returns under MILSBILLS procedures in DLM 4000.25, Volume 4, Finance, procedures. Use of the Defense Transportation System (DTS) for the return movement is encouraged. As an alternative to providing transportation reimbursement, the responsible action activity may provide the transportation account code (TAC) chargeable for the transportation services and supporting information, e.g., the bill of lading number, or small package carrier account information. In those cases where an exhibit of the discrepant materiel is directed for return, the activity requesting this action will pay for exhibit shipment costs. Action activities shall either furnish DD Form 1348-1A for materiel to be returned or provide comparable information to accomplish the return. A copy of the SDR and the shipment document shall be included with returned materiel and annotated as an "SDR RETURN." When discrepant materiel is directed for return to a contractor, a hard-copy SDR including disposition instructions shall be included with the shipment. No statement adversely affecting the Government's claim shall be shown on any documentation returned to the contractor. For non-Security Assistance customers, materiel not returned as directed within 90 calendar days (if CONUS) or 120 days (if OCONUS) of the SDR reply will be billed.

C17.3.12.4.2. Corrective Action for Packaging Discrepancies. Responsible activities shall immediately investigate reported discrepancies and take

action to prevent their recurrence. An indication of what corrective action shall normally be included in the SDR reply. An information copy shall be sent to the appropriate Component packaging monitor. For shipments of ammunition, explosives, or other hazardous materiel, the DoD or GSA responsible activities must provide reports of corrective action in all cases. Wherever possible, use the reply code and SDR remarks to show the corrective action. A corrective action statement may be recorded on a separate document if additional space is required. Statements of corrective action shall also be sent when requested by the SDR initiator or upon special request of the Component packaging monitor. For contractor originated shipments, investigating activities shall send an information copy of the results of their investigation to the responsible procurement activity or commodity command. Reports of corrective action must not be delayed pending final determination of the contracting officer when reimbursement is warranted. Report final actions when completed. When a Contract Administration Office (CAO) investigating activity finds corrective or preventive action is outside the scope of contract administration and requires action by the procuring activity, the SDR and investigation report shall be forwarded to the procuring activity for action, with information copies to the appropriate Component packaging monitor and the initiator.

C17.3.12.4.3. Packaging Discrepancies Noted at a Distribution Depot. The ICP shall annotate the SDR to indicate that distribution depot repackaging is approved or not approved. If the ICP authorizes corrective action, the SDR will also show the appropriate funding/ authorization document, e.g., job order number, Military Interdepartmental Purchase Request (MIPR) number, or SF 1080, to which the distribution depot may charge the corrective action costs. After completing corrective action, the distribution depot will annotate the actual cost of the work performed, note the date completed, and forward a copy to the ICP for close-out.

C17.3.12.4.4. Corrective Action for Non-Compliant WPM. Action activities in receipt of SDRs reporting WPM non-compliance under generic packaging discrepancy codes must reassign the discrepancy code to P215 on their responses. This supports mandatory tracking and trend analysis using automated SDR applications. In the event the shipment becomes frustrated, the action activity will provide instructions for corrective action in order to bring the shipment into conformance or otherwise direct remedial action. Corrective actions and options shall be based upon the circumstances of the quarantined/frustrated shipment, value and priority of the shipment, access to the shipment by DoD personnel, and location of the consignee. Alternatives include:

C17.3.12.4.4.1. Inspection, certification, and marking of
compliant WPM,

C17.3.12.4.4.2. Replacement of the WPM,

C17.3.12.4.4.3. Consignee pick-up of the materiel only, or

C17.3.12.4.4.4. Return to origin or designated location.

C17.3.12.4.4.5. Repacking and disposal costs associated with non-compliant WPM receipts that shall be the responsibility of the owner of the stock directing shipment (i.e. last identified shipper or item manager). Photographic evidence may be requested to substantiate a claim for the recoupment of funds expended in bringing the shipment into compliance. Where applicable, the reporting activity may submit an SF 1080, "Voucher for Transfers between Appropriations and/or Funds."

C17.3.13. Time Standards

C17.3.13.1. Submitting SDRs and SDR Responses. This section provides standard timeframes for submission of SDRs and SDR responses.

C17.3.13.1.1 Timeframes for SDR Submission by Non-Security Assistance Customers. An SDR shall be submitted by receiving activities and/or transshipment activities as soon as possible, but not later than the time standards listed below. SDRs not meeting the reporting criteria or timeframes specified in this guidance that do not present sufficient justification shall be processed for information only. Routine time standards, special rules, and exceptions are:

C17.3.13.1.1.1 CONUS Destinations: 60 calendar days from date of shipment.

C17.3.13.1.1.2. Overseas Destinations: 120 calendar days from the date of shipment

C17.3.13.1.1.3. Discrepant Controlled Inventory Items, Arms, Arms Parts, Ammunition, and Explosives. Report discrepancies within 24 hours of discovery for shortage, overage, wrong item, misdirected shipments. This includes stock number materiel with a catalogued controlled inventory item code (CIIC) indicating the item is identified as classified or sensitive. In addition, pilferable codes associated with arms and ammunition are also included (codes N and P) in this category.

C17.3.13.1.1.4. Exceptions:

C17.3.13.1.1.4.1. Time limits do not apply to short shipment and wrong item discrepancies discovered upon opening a sealed vendor pack.

C17.3.13.1.1.4.2. Time limits do not apply to those IUID discrepancies that must be reported to ensure the IUID registry and/or owner records are properly maintained.

C17.3.13.1.1.4.3. Time limits for reporting discrepancies relating to contractor warranties are prescribed in individual warranty clauses and/or contracts. Those time limits override other time limits specified in this chapter.

C17.3.13.1.1.5. Late Submission. When circumstances prevent compliance with the above time standards, e.g., response to a tracer action reveals a supposed transportation discrepancy to be a shipping/packaging discrepancy, the reasons for delay shall be provided in a brief clear-text explanation. If appropriate, the responsible activities will honor the discrepancy report. Reporting activities are required to send SDRs to report a shipping or packaging discrepancy even after the above submission time standard has elapsed. If lacking justification, action activities shall process for use in reporting metrics and corrective action, if appropriate. The SoS shall not be responsible for financial resolution on late submission SDRs unless shipment history is available and the circumstances warrant such action

C17.3.13.2. Time Standards for SDR Response. Responsible action activities shall reply to all SDRs received within the following time standards. Interim responses shall be provided when extenuating circumstances necessitate additional processing time.

C17.3.13.2.1. Discrepant controlled inventory items, arms, arms parts, ammunitions, and explosives (shortage/overage/wrong item/misdirected): Total response time, to include sequential processing by multiple action activities when necessary, shall not exceed 25 calendar days. Wrong item receipts identified as controlled/sensitive and unidentified items shall be returned to the designated location within 30 calendar days of the SDR reply. Sources of supply shall monitor for the return and follow-up with the SDR submitter if materiel is not returned.

C17.3.13.2.2. Expedited processing is required for transshipper prepared SDRs requiring positive action from the action activity (e.g., preparation of MSDS or verification of label/marketing information). Where forward movement of the shipment is delayed pending a response as indicated by Action Code 3A, the response time shall not exceed 5 calendar days.

C17.3.13.2.3. Distribution depots shall respond to SDRs submitted directly to the shipping activity within 25 calendar days. Responses from distribution depots may be confirmed or superseded/corrected by a later response when Component business rules require sequential processing by the source of supply and the finance center.

C17.3.13.2.4. ICP/IMMs shall respond to SDRs submitted directly to the SoS within 50 calendar days. Where sequential process by distribution depot and ICP/IMM are required, total processing time shall not exceed 50 calendar days.

C17.3.13.2.5. Action activities receiving SDRs inappropriately shall make every effort to forward to the correct action activity within 5 calendar days. Customers should be aware that misrouting of SDRs may extend total processing time beyond the authorized 50 calendar day processing time.

C17.3.13.3. Transfers of IMM Responsibilities

C17.3.13.3.1. Logistics Reassignment. Under the logistics reassignment procedures, IMM responsibility for an item may have been transferred to another DoD Component after the date of shipment. In these instances, a single discrepancy reported on a requisition line-item may require action and/or reply from two different DoD Components (e.g., shipper's ICP/IMM and gaining item manager (GIM)). For example, on receipt of an incorrect item, one DoD Component could be responsible for the investigation (shipping activity) and the initiation of a billing adjustment (shipper's ICP/IMM) for the item billed (but not received), and the GIM would be responsible for providing disposition instructions for the erroneous materiel.

C17.3.13.3.2. Response Coordination. It is not the responsibility of the SDR initiator to forward copies of the SDR to all parties involved. Instead, it shall be the responsibility of the shipping activity or losing item manager (LIM) to coordinate with the GIM for an appropriate response/disposition to the submitter.

C17.3.14. Contested Decisions for Non-Security Assistance Related Discrepancies. When the SDR originator does not concur with a reply/disposition received in response to an SDR, they shall forward the SDR indicating a contested decision. Requests for reconsideration pertaining to distribution depot shipments shall be forwarded to the shipping depot; all others shall be forwarded to the SoS. Requests for reconsideration must be submitted within 45 calendar days from date of action activity response. Cite the SDR report number of the original report. For transactional exchange, SDR applications shall include the WebSDR-assigned control number when known. Requests for reconsideration transactions require all data that was in the previous SDR submission. In addition, a narrative entry is required to provide justification for reconsideration. POC information for the new submission and submission date is required. An SDR must be in a closed status before a request for reconsideration can be submitted (this means the action activity reply to the SDR must be recorded within the applicable Component application). The designated recipient of the request for reconsideration shall review all data relating to the problem and provide a response to the reporting activity with information to all concerned parties within 45 calendar days. When the shipping depot is unable to respond to the contested SDR, the depot will forward the SDR to the SoS for resolution (when the SDR is forwarded, the 45 calendar days for processing and evaluation will begin when the SDR is received by the SoS). The resulting decision shall be final.

C17.3.15. Correction and Modification/Update of Original Report. When the originator needs to modify discrepancy information or requested action concerning a previously submitted SDR, a new transmission of the SDR may be used. Indicate that the SDR is a modification or correction and forward to all parties who received the original submission. Cite the nonconformance report number of the original report. SDR applications shall include the WebSDR-assigned control number when known. SDR applications shall include revised content and the original unchanged discrepancy information from the original report using the DLMS 842A/W. POC information applicable to the revised SDR is required. A brief narrative description of the revision

must be included. Significant errors, such as an incorrect requisition document number or document number suffix must be corrected by canceling the original SDR and submitting a new report.

C17.3.16. Cancellation of an Original Report. When an SDR originator discovers a previously reported SDR is not valid or appropriate for any reason and should be withdrawn, a new SDR cancellation must be prepared to cancel the original. Forward to all parties that received the original submission. Cite the original report number. SDR applications shall include the WebSDR-assigned control number when known. Do not duplicate detail information from the original report except as indicated in the DLMS 842A/W. POC information applicable to the cancelled SDR is required. A brief narrative description of the reason for cancellation should be included.

C17.3.17. Consignor Replies on Industrial Plant Equipment (IPE) Packaging Deficiencies. Consignor (shipper) replies on IPE packaging deficiencies, which DLA Aviation in Richmond, Virginia, has previously funded for packaging, crating, and handling (PC&H) will provide necessary documents to transfer or reimburse funds for any required corrective action. Handling for PC&H is based on specified requirements for IPE in MIL-HDBK-701, Military Standardization Handbook Blocking, Bracing, and Skidding of Industrial Plant Equipment, and MIL-STD-107, Military Standard Preparation and Handling of Industrial Plant Equipment.

C17.3.18. Follow-up on Credit Adjustments on SDRs. When an action activity has indicated that a credit adjustment has been authorized, reimbursement is normally provided to the fund code and bill-to address cited on the original requisition. When concerned about an apparent non-receipt of credit and 60 calendar days has elapsed, the SDR submitter should consult the bill-to finance office for verification. When non-receipt of credit is confirmed, the financial office shall submit a request for billing adjustment as prescribed by MILSBILLS procedures in DLM 4000.25, Volume 4, Finance.

C17.3.19. Materiel Receipt Acknowledgment (MRA). ICPs shall monitor for discrepancies reported on MRAs (DLMS 527R) to ensure identified discrepancies have been properly reported.

C17.3.20. Defense Automatic Addressing System (DAAS) SDR Processing

C17.3.20.1. Under DLMS, SDRs shall be integrated with standard logistics transaction processing through DAAS. DLMS transaction formats are available in ASC X12 EDI or EDI-based XML. Guidance for transaction content is provided in DLMS Supplements available at www.dla.mil/j-6/dlms/elibary/transformats/140_997.asp. DoD WebSDR shall perform the following actions:

C17.3.20.1.1. Pass/route SDR transactions.

C17.3.20.1.1.1. Generate and route an information copy of each SDR reporting packaging discrepancies associated with Air Force-directed shipments to the Air Force packaging monitoring office.

C17.3.20.1.1.2. Route the action copy of SDRs reporting distribution depot receipt of PQDR exhibits (Discrepancy Code Q11) to the materiel owner by agreement with DLA. For Air Force owners, this process shall use an electronic (e-mail-based) interface with the Air Force processing system for product quality deficiencies.

C17.3.20.1.1.3. Provide special e-mail routing of the action or distribution copy of transshipper prepared SDRs upon Component request.

C17.3.20.1.1.4. Return unroutable transshipper prepared SDRs to the submitter for continued processing off-line.³

C17.3.20.1.2. Edit SDR transactions in accordance with business rules specified below. Additionally, DoD WebSDR shall edit SDRs to improve data consistency and the appropriateness of data content as follows:

C17.3.20.1.2.1. The owner/manager may not be identified by a routing identifier associated with a Distribution Depot or a CCP.

C17.3.20.1.2.2. The shipping activity may not be identified by the routing identifier associated with an inventory control point or item manager.

C17.3.20.1.2.3. Inappropriate entries will be overlaid with the correct value, if available, from DAAS history.⁴

C17.3.20.1.3. Provide translation capability to the Army User Defined File (UDF) format to support Army Web-Based Tool (WBT) SDR application transaction processing pending DLMS implementation.⁵ No other transactional non-DLMS formats are authorized for SDRs.

C17.3.20.1.4. Convert SDRs for e-mail distribution where SDR transactions are not feasible due to lack of an established SDR application interface.

C17.3.20.1.4.1. Upon determination that an e-mail (vice transaction) is to be prepared for a specific SDR communication, DLA Transaction Services will check to determine if the appropriate e-mail certificate has been registered. If registered, the SDR e-mail transmission shall be encrypted as FOUO. The e-mail SDR shall contain all associated SDR content as well as clear text addresses and code explanations to facilitate interpretation. If not registered, an abridged content SDR report, confirmation, distribution copy, or reply, as appropriate, will be prepared. The e-

³ Refer to ADC 317, Revised Business Rules for Transshipper-Prepared Supply Discrepancy Reports. Implementation delayed.

⁴ Refer to ADC 425, Revised SDR Codes and Procedures, including Incorrect Part Number Discrepancy Codes and DoD WebSDR Data Edits and Forwarding Enhancement.

⁵ Refer to ADC 452, Implementation of DOD WebSDR Automated SDR Rejection Capability.

mail sent to the user will also provide information on how to access WebSDR and instructions on registering the e-mail certificate.

C17.3.20.1.4.1.1. Abridged SDR. The abridged unencrypted version of the SDR e-mail will include the following data content. Coded information shall not include the corresponding clear-text explanation. The submitter and action activities shall not be identified by clear-text addresses.

- DoD Web SDR Report Control Number
- Additional System SDR Control Number
- Customer-Assigned Control Number
- Document Number/Suffix
- Contract Number
- Transportation Control Number
- Date of Preparation
- Document Type Code
- DLA Disposition Services SDR Type Code
- Discrepancy Code(s)
- Action Code
- Submitter (Activity From)
- SDR Point of Contact
 - Name
 - Commercial Phone or DSN
 - E-mail
- Attachment/Off-line Flag

C17.3.20.1.4.1.2. Abridged SDR Reply. The abridged unencrypted version of the SDR Reply e-mail shall include the following data content. Coded information shall not include the corresponding clear-text explanation with the exception of the Reply Disposition Code which must include text for understanding. The submitter and action activities shall not be identified by clear-text addresses.

- DoD WebSDR Report Control Number
- Additional System SDR Control Number(s)
- Original Reference Number
- Document Number/Suffix
- Contract Number
- Transportation Control Number
- Reply Date
- Document Type Code

- DLA Disposition Services SDR Type Code
- Reply Code(s)
- Action Activity (Activity From)
- Submitter (Activity To)
- Comments/Remarks
- Reply POC
 - Name
 - Commercial Phone or DSN
 - E-Mail
- Attachment/Off-line Flag

C17.3.20.1.4.1.3. Organizations that are not supported by an SDR application for transactional reference shall provide to DLA Transaction Services an e-mail address to be linked with their DoDAAC/RIC for e-mail distribution.

C17.3.20.1.4.1.4. Each DoD Component shall designate to the DoD SDR System Administrator a specific e-mail account or point of contact to receive unroutable SDRs for manual attention. This is required to ensure operational support where no SDR application or e-mail address has been identified for an SDR recipient, or an attempted e-mail distribution has failed due to an invalid address.

C17.3.20.1.5. Maintain historical records of SDRs and associated transactions.

C17.3.20.1.6. Provide access to SDR information via Web Visual Logistics Information Processing System (WEBVLIPS).

C17.3.20.1.7. Provide ad-hoc queries and management reports.

C17.3.20.1.8. Maintain the DoD WebSDR as a value-added service to support submission, reply, and other functions related to SDR processing.

C17.3.20.1.9. Convert CCP-generated SDRs for e-mail distribution pending owner/manager ability to process electronically.

C17.3.20.1.10. Post for history, but not forward SDR replies to the SDR submitter (i.e., distribution depots or CCP) identifying passive RFID or WPM discrepancies based upon addressing to the DAAS RIC (SGA). This will suppress unnecessary transmission of SDR transactions where the SDR submitter has closed the SDR with no expectation/requirement for a reply under these conditions.⁶

⁶ Refer to ADC 425, Revised SDR Codes and Procedures including Incorrect Part Number Discrepancy Codes and DoD WebSDR Data Edits and Forwarding Enhancement, Implementation delayed.

C17.3.20.2. WebSDR shall edit SDR transactions prior to passing/routing to ensure minimal standards of acceptability.⁷ Reject to the generating activity SDR and follow-on transactions that do not meet the following conditions:

C17.3.20.2.1. SDR transactions must contain valid values as appropriate to the transaction purpose: discrepancy code, action code, and reply code. Reject with Disposition/Status Code (Reply) Code 915, 916, or 927.

C17.3.20.2.2. SDR must include materiel identification. Materiel identification may consist of the NSN, manufacturer's part number and manufacturer's CAGE, or as authorized under DLMS for unique business processes (e.g. "mixed" or "unknown" for transshipper SDRs and local catalog identification number⁸). Where wrong item discrepancies are reported, materiel identification of the wrong item must be included. Wrong item received may be identified as previously indicated or by description alone (citing "UNKNOWN" as the wrong item part number). Reject with Disposition/Status (Reply) Code 931.

C17.3.20.2.3. SDRs reporting materiel received is not in the correct condition must include valid condition codes to identify the received conditions. Only valid condition codes shall be permitted. The condition code must be appropriate for the discrepant materiel and associated action activity or source of supply (i.e., Supply Condition Code N, V, and T may not be directed to the DLA ICP). Reject with Disposition/Status (Reply) Code 928.

C17.3.20.2.4. SDRs coded to indicate narrative is required must provide applicable narrative. Reject with Disposition/Status (Reply) Code 924.

C17.3.20.2.5. SDRs must include minimal point-of-contact information to include name and phone/email. Reject with Disposition/Status (Reply) Code 920 or 921.

C17.3.20.2.6. Only valid DoDAACs and RICs will be permitted. Reject with Disposition/Status (Reply) Code 929.

C17.3.20.2.7. Quantity fields will only allow entry of numeric values. Reject with Disposition/Status (Reply) Code 917 or 918.

C17.3.20.2.8. SDR replies coded to indicate that a ship-to/mail-to address or additional information is associated with the reply, must include the specified additional address or information as transaction data fields and must include narrative

⁷ Refer to ADC 452, Implementation of DOD WebSDR Automated SDR Rejection Capability.

⁸ Refer to ADCs 282, CCP-Originated SDRs including Noncompliant WPM Procedures and Shipment Hold Code; 317, Revised Business Rules for Transshipper-Prepared SDRs; and 322, Addition of Local Catalog ID qualifier to Support Requirements for Theater Enterprise-Wide Logistics System (TEWLS) Requisitions. Local Catalog ID implementation delayed.

remarks to reflect the address (due to limited implementation of the separate address fields). Reject with Discrepancy Status/Disposition Code (Reply) 924.

C17.3.20.2.9. SDR follow-ups must comply with follow-up submission timeframes. Follow-ups submitted without allowing sufficient action activity response time will be rejected (see section C17.3.13. Reject with Discrepancy Status/Disposition Code 933 (implementation pending).

C17.3.20.2.10. SDR follow-ups and contested SDR/reconsideration requests shall not be submitted against cancelled SDRs. Reject with Discrepancy Status/Disposition Code 907.

C17.3.20.2.11. Reply with Discrepancy Status/Disposition Code 504 forwarding action may not be used to forward SDRs where incomplete information is available to construct the new forwarded SDR, or the SDR is otherwise not suitable for automated forwarding action. Reject with Discrepancy Disposition/Status (Reply) Code 935.

C17.3.20.2.12. SDR document numbers and associated suffix codes must conform to MILSTRIP standards. A temporary exception is allowed for Air Force maintenance document numbers used between the Air Force item manager and the supporting depot. The full document number edit does not apply to transshipper SDRs (Document Type W) due to the potential for reporting against the shipment unit rather than a specific document number. For these SDRs, the document number must be filled and must be 14 positions. It may contain a 14 position purchase request number, the first 14 positions of the transportation control number, or a constructed document number based upon the DoDAAC of the port submitting the SDR. Reject with Discrepancy Status/Disposition Code 910.

C17.3.20.2.13. SDRs must contain valid transaction set purpose codes and document type codes as shown in the applicable DLMS Supplement. Reject with Discrepancy Disposition/Status (Reply) Code 938 and 939, respectively. Submitting system personnel will be notified of invalid transaction set purpose codes.

C17.3.20.2.14. SDRs associated with new procurement (Document Type 9 or P) must contain the applicable contract number and contractor-assigned shipment number. Reject with Discrepancy Disposition/Status (Reply) Code 940.

C17.3.20.2.15. Inter-Component SDR replies citing 200-series reply codes may be used only for Security Assistance SDRs. Reject with Discrepancy Disposition/Status (Reply) Code 941.

C17.3.20.2.16. Duplicate SDRs defined as a new submission matching an existing SDR on document number/suffix, discrepancy code, and transportation control number (if provided). Reject with Discrepancy Disposition/Status (Reply) Code 719. Note: DoD Components may use this code based on internal business rules.

C17.3.20.3. WebSDR will edit SDR submissions via DoD WebSDR at the point of entry to improve the accuracy of the data content. All of the above criteria apply. In addition, web-specific functionality includes:

C17.3.20.3.1. The SDR submission process will be facilitated by the auto-population of data content based upon the shipment and cataloging data available to DAAS.

C17.3.20.3.2. Address information will be retrieved based upon DoDAAC and RICs. User generated updates to initiator's address are permitted and will be passed to the receiving system for information, but will not impact SDR processing.

C17.3.20.3.3. SDR replies coded to indicate that an address or additional information is associated with the reply must include the specified additional address or information.

C17.3.20.4. DAAS shall provide the support to SDR transaction exchange to facilitate DLMS processes.

C17.3.20.4.1. WebSDR shall facilitate appropriate distribution when the action party receiving the initial distribution employs the Distribution/Status (Reply) Code 504 indicating the SDR must be forwarded to a new action activity. When the new action activity is a distribution depot, the original SDR will be retransmitted to the designated depot. The customer shall receive notification of interim status.

C17.3.20.4.2. WebSDR shall facilitate appropriate distribution when the action party receiving the initial distribution employs distribution status codes in the 300 series indicating that the SDR must be sent to the SoS for disposition. The SDR reply shall be sent to the designated SoS and to the SDR initiator for notification of interim status.

C17.3.20.4.3. WebSDR will respond to DAAS-directed rejected reply transactions indicating no matching original report or information copy of the SDR is found in the automated application (Reply Code 926), by providing an information copy of the original report to the activity which rejected the reply. Unmatched requests for an information copy will be returned by DAAS as rejected (Reply Code 926) to the sending organization. DAAS will create and forward an information copy of the DLA SoS for all customer SDRs based upon the storage site reply where an information copy was not previously provided.

C17.3.20.4.4. WebSDR shall provide information copies of SDRs in accordance with Component business rules and as designated by the initiator.

C17.3.20.4.4.1. WebSDR shall ensure DLA Enterprise Business System (EBS) receives an information copy of all SDRs routed to a distribution depot for initial action where EBS is the SoS.

C17.3.20.4.4.2. All parties receiving an information copy of the original SDR as designated by the initiator or by a Component business rule will receive a copy of all changes, cancellation, and replies associated with the SDR.

C17.3.20.4.5. WebSDR shall accept and forward supporting documentation associated with SDRs using DLMS attachment exchange procedures.

C17.3.20.4.5.1. SDR attachments may be uploaded directly to the DoD WebSDR or exchanged electronically in association with the SDR transaction.

C17.3.20.4.5.2. SDR attachments must be referenced/uploaded under a SDR Attachment File Name constructed in accordance with DLMS rules. Up to five attachments may be associated with a new SDR report and subsequent change, reply, request for reconsideration. Attachments may be submitted with follow-up and cancellation transactions for archive, but these will not be forwarded to the action activity.

C17.3.20.6. DoD WebSDR shall restrict the use of inappropriate discrepancy status/disposition reply codes in responses to transshipper prepared SDRs.

C17.4. MANAGEMENT EVALUATION

C17.4.1 Purpose. The supply discrepancy reporting program is designed to promote evaluation, correction, and improvement of logistics operations. To accomplish this objective, discrepancies as specified in this publication must be reported and investigated in accordance with established policies and procedures. DoD Components shall institute SDR quality programs that will include periodic reviews to assess the accuracy and quality of work processes applicable to supply discrepancy processing. In addition, DoD Components shall require, as a minimum, semi-annual summary reporting to an appropriate headquarters for review and analysis. The DoD Components unable to support the full scope of the required data collection under legacy systems shall incorporate this reporting requirement under business system modernization efforts. The DoD WebSDR management reports and canned queries may be used to supplement internally prepared reports. DoD Components and USTRANSCOM shall monitor SDR program performance applicable to transshipper SDRs. Data collected must be sufficient to enable monitoring activities to:

C17.4.1.1. Identify trends.

C17.4.1.2. Establish volume and dollar values of SDRs.

C17.4.1.3. Bring management attention to problems with shipping activities as necessary.

C17.4.1.4. Prevent recurrence of discrepancies.

C17.4.1.5. Measure quality and responsiveness of action activities.

C17.4.2. IMM/ICP Summary Reporting. As a minimum, the IMM/ICP and shipping activities must have visibility of detail/summary reports that show:

C17.4.2.1. The number of SDRs received during a particular timeframe by shipping activity, dollar value, and discrepancy type. Reports will measure compliance with SDR submission timeframes.

C17.4.2.2. The number of SDR responses processed during a particular timeframe by action activity, dollar value, and discrepancy type. Reports will show a breakdown of SDR actions taken to include dollar value of credit authorized and reshipped materiel. Reports will measure compliance with SDR processing timeframes and show age of ongoing investigations.

C17.4.3. Receiving Activity Reporting. As a minimum, the U.S. Government receiving activity and the ILCO must have visibility of detail/summary reports that show:

C17.4.3.1. The number of SDRs prepared during a particular timeframe by shipping activity, dollar value, and discrepancy type. Reports will measure compliance with SDR submission, processing, and follow up timeframes.

C17.4.3.2. Responses received from the responsible action activity, and dollar values recovered, either in the form of reshipped materiel or credit received.

C17.5. SECURITY ASSISTANCE DISCREPANCY REPORTS

C17.5.1. General. This section provides specific procedural guidance relevant to the processing of Security Assistance SDRs. Based upon United States of America Letter of Offer and Acceptance (LOA) agreements, Security Assistance customers will use SDRs to report all supply, billing/financial, and product quality deficiencies/discrepancies associated with Security Assistance shipments. Supply discrepancies are identified under paragraph C17.3.2., Reporting Criteria, except as specifically excluded for Security Assistance and as supplemented below. In addition to the routine data content, Security Assistance SDRs shall include the location of the discrepant materiel (in-country depot, freight forwarder, U.S. Government facility, or contractor facility) and the country that received the discrepant materiel. Security Assistance discrepancy reports below dollar limitations contained in the United States of America Department of State LOA controlling the case, or any other sales agreement with a Security Assistance purchaser, shall not be accepted by the ILCO for subsequent processing by the DoD Components or participating Agencies unless a valid justification for the submission is also provided.

C17.5.1.1. All Security Assistance SDRs will be submitted directly to the applicable ILCO for initial screening and processing in accordance with this manual and DoD 5105.38-M, SDRs may be forwarded via SF 364, Report of Discrepancy, or authorized electronic/automated formats. Incorrect item SDRs must provide supporting documentation to include photographs of the wrong item received.

C17.5.1.2. Acceptable SDRs will be forwarded for further processing to DoD ICP/IMM, shipping depot, GSA, or other organization as applicable. ILCOs shall submit SDRs using a DLMS-compliant SDR application or, pending full implementation, via direct DoD WebSDR input. Total non-receipt SDRs shall normally be forwarded directly to the shipping depot. All responses to discrepancy reports shall be returned to the ILCO.

C17.5.1.3. Responding action activities shall provide the SDR reply for Security Assistance SDRs using a DLMS-compliant SDR application via DoD WebSDR or, pending full implementation, via direct DoD WebSDR input or authorized electronic/automated equivalent format. SDR replies must include, at a minimum, the applicable document number, the Security Assistance report number (item 2 of the SF 364), point of contact information, and pertinent information from the data blocks on the reverse side of the SF 364 or the expanded SDR data element code lists (Appendix 3).

C17.5.1.4. The DoD shipping activity will retain paper copies of the Security Assistance shipping documentation (signed carrier's receipt and shipping document) at the shipping site for a period of 2 years following the shipping date. After this point, the paper records shall be retired to the appropriate Federal Records Center for a period of 28 years. The stored records must be segregated by country and the container marked accordingly. Billing documentation will be retained by the Military Departments and DoD agencies as specified in MILSBILLS procedures and DoD 7000.14-R, Vol. 15, Department of Defense Financial Management Regulation (Security Assistance Policy and Procedures).

C17.5.2. Time Standards

C17.5.2.1. Time Standards for SDR Submission by Security Assistance Customers. Discrepancy report preparation and submission time by the Security Assistance purchaser is limited to the time standards cited in the United States of America Department of State LOA, and amendments thereto, as explained in DoD 5105.38-M.

C17.5.2.2. Security Assistance customers receiving misdirected shipments or shipments containing incorrect items that are identified as classified/sensitive materiel, and/or arms, arms parts, or explosives, must report within 24 hours of discovery regardless of dollar value for disposition. Where estimated dollar values are unknown or fall below the minimum criteria, report using Action Code 1A, Disposition instructions for discrepant materiel requested; financial action not applicable.

C17.5.2.3. ILCOs are permitted 15 calendar days from the time of discrepancy report receipt for processing prior to forwarding to the appropriate action activity. Upon return of the SDR response from the action activity, ILCOs are permitted 15 calendar days for processing and forwarding to the Security Assistance customer.

C17.5.3. Directed Returns

C17.5.3.1. Whenever materiel is directed for return to U.S. custody, the purchasing country will be instructed to reship the materiel using the same document number under which the materiel was originally shipped. The country will be advised that they must return the materiel to U.S. Government custody within 180 calendar days from date of approval/instructions. However, the time standard allowed for the return of wrong item controlled/sensitive materiel or unidentified materiel is 30 calendar days from date of the ILCO reply. The ILCO shall monitor directed returns and follow-ups with customers where controlled/sensitive materiel has not been returned. In those instances when materiel is to be returned to the United States at U.S. Government expense, every effort will be made to utilize the DTS for the return movement. Action activities shall provide the Service/Agency transportation account code (TAC) chargeable to return the discrepant materiel to the appropriate U.S. Government activity or other designated location. In lieu of the TAC, the action activity may provide commercial package carrier account information. In addition, the SoS shall provide reimbursement for packing, crating, handling for directed returns under MILSBILLS procedures in DLM 4000.25, Volume 4, Finance. The SoS shall also provide reimbursement for in-country transportation of the original shipment to the Security Assistance customer (when a directed return applies) under procedures prescribed by DoD 5105.38-M, as amended. When appropriate, the action activity may direct the submitter to return an exhibit of the discrepant materiel. The activity requesting this action will pay for exhibit shipment costs. The exhibit shall be returned to U.S. Government custody within 90 calendar days from the date of instructions. Action activities or the ILCO shall furnish DD Form 1348-1A for materiel to be returned. A copy of the SDR and DD Form 1348-1A should be included with returned materiel and annotated as an "SDR RETURN." Upon evidence of materiel being returned, a credit adjustment will be processed for the return of the discrepant materiel if previously authorized. This evidence releases the Security Assistance customer of liability for the materiel.

C17.5.3.2. Discrepant Security Assistance materiel not being returned to the stocks of the Department of Defense or GSA, or retained, or sent to disposal by the foreign government at the direction of the ILCO, shall be turned in to the nearest U.S. accountable military activity (regardless of the DoD Component responsible for the materiel). This is in accordance with the governing regulation serving as the authority for the turn-in. The local U.S. military activity shall pick up the materiel up in stock as a gain to inventory and determine if materiel is required or is in excess to requirements. If materiel is required, it shall be retained. If excess to requirements of the local military activity, the materiel must be reported under Chapter 12.

C17.5.4. Incorrect Items. Incorrect item SDRs are not permitted for authorized substitution, unless the substitute item does not meet fit, form, or function standards. DoD Components and GSA follow the policy of automatic shipment of an interchangeable item unless the requisition contains an appropriate advice code, in accordance with MILSTRIP, limiting the request to a specific item. Similarly, quantities may be adjusted to the unit pack quantity, when appropriate, unless restricted by the

appropriate advice code in the customer requisition. Such adjustments resulting in quantity variance are not reportable as discrepant.

C17.5.5. Non-receipt. When an SDR is initiated for non-receipt, the Security Assistance customer is required to provide documentation from the freight forwarder indicating that no materiel has been received on the requisition and transportation control numbers that apply. The ILCO shall deny any non-receipt SDRs received that do not have this documentation attached. The ILCO shall return these SDRs to the customer as incomplete.

C17.5.6. SDR Follow-Up. When the action activity does not respond to an SDR within the prescribed time standard specified in this chapter, the ILCO, acting on behalf of the Security Assistance customer, shall submit an SDR follow-up. Prior to submitting a follow-up, the ILCO must first attempt to ascertain the status of the SDR using the DoD WebSDR query function. If there is no record of an action activity reply, a follow-up should be submitted. Follow-ups must be directed to the last identified action activity when the original SDR was forwarded by the original recipient. Cite the SDR report number of the original report. For transactional exchange, include the WebSDR-assigned control number when known.

C17.5.6.1. Follow-up transactions should include all data that was in the previous SDR submission. POC information for the follow-up and the follow-up date are required. A narrative entry is required to provide clarification for the follow-up.

C17.5.6.2. If no response is received to the follow-up within 30 calendar days, the ILCO may contact DLA Distribution for distribution depot shipments or the SoS to request assistance. Off-line communication with the action activity is recommended because electronic processing errors may have impeded timely response to the SDR and subsequent follow-up. DLA Distribution or the SoS shall ensure that a response with disposition or interim status is provided within 30 calendar days.

C17.5.7. Cancellation of an Original Report. When an SDR originator discovers a previously reported SDR is not valid or appropriate for any reason and should be withdrawn, an SDR cancellation must be prepared to cancel the original. The ILCO via the DoD WebSDR will forward to all parties that received the original submission. Cite the original report number and the WebSDR-assigned control number when known. Do not duplicate detail information from the original report except as indicated in the DLMS Supplement. Provide POC information. A brief narrative description of the reason for cancellation should be included.

C17.5.8. Contested Decisions and Requests for Reconsideration. These procedures allow the report originator to voice disagreement with disposition decisions. The Security Assistance purchaser has recourse through the ILCO to the ICP/IMM or GSA and, if still not satisfied, to the ILCO's Service focal point.

C17.5.8.1. Requests for Reconsideration

C17.5.8.1.1. The Security Assistance purchaser may ask the U.S. Government to reconsider the disposition for a reported supply discrepancy. Purchasers must send a Request for Reconsideration to the ILCO within 45 calendar days from the date of the ILCO final reply to the customer concerning disposition, except when materiel/exhibit return to the customer is required subsequent to US Government-directed evaluation/testing/repair. This exception is applicable only when the materiel/exhibit must be re-inspected by the customer to confirm that the reported discrepancy/deficiency has been resolved and, therefore, additional transportation time is necessary for the return shipment. Under this scenario only, the SA purchaser is authorized up to 90 days from the date of the final ILCO reply to submit the Request for Reconsideration to the ILCO. The ILCO shall be responsible for monitoring that requests for reconsideration are submitted within the allowable time standards.

C17.5.8.1.2. The request for reconsideration shall use the nonconformance number associated with the original report. When the customers ask for reconsideration, the ILCO shall add a Suffix Code R to the SDR number. The ILCO shall convert the request for reconsideration to electronic transmission and forward to the appropriate DoD ICP/IMM or GSA action activity for reconsideration within 20 calendar days of receiving the request for reconsideration from the customer. If relevant information is not accessible by the responsible activity, the ILCO may forward supporting documentation. The designated recipient of the request for reconsideration shall review all data relating to the problem and provide a response to the reporting activity with information to all concerned parties within 45 calendar days (90 days for security assistance shipments where materiel was returned to country when previous SDR resubmission was closed)⁹. When the shipping depot is unable to respond to the contested SDR, the depot will forward the SDR to the SoS for resolution (when the SDR is forwarded, the 45 calendar days for processing and evaluation will begin when the SDR is received by the SoS).

C17.5.8.3. Second Request for Reconsideration (Contested Reconsideration Response). Security Assistance customers may further contest the ICP/IMM or GSA decision given after the request for reconsideration. To do so, the customer must send a written request to the ILCO within 45 calendar days from the date of the ILCO reply to the request for reconsideration. The customer must indicate why the ICP/IMM or GSA decision is not satisfactory. Cite the nonconformance number on the original SDR. The ILCO shall add a Suffix Code C to the report number, which shall be used in all references to the SDR. The ILCO shall convert the request to electronic transmission and forward the SDR, with an appropriate advice code, within 20 calendar days to the appropriate focal point who shall review all the information and send the ILCO the final decision within 50 calendar days from the date of receipt of the ILCO information. A contested reconsideration may only be submitted transactionally to DoD

⁹ ADC 430, Timeframe Change for Security Assistance SDR Requests for Reconsideration

WebSDR and will be forwarded to the original action activity(ies). Additional distribution may be accomplished manually. Pending full DLMS implementation, contested reconsideration requests may be forwarded manually. If relevant information is not accessible by the focal point, the ILCO may forward supporting documentation. The ILCO shall ensure all interested parties receive the SDR resolution.

C17.5.9. Follow-up on Credit Adjustments on SDRs

C17.5.9.1. When an action activity has indicated that a credit adjustment has been authorized, reimbursement is normally provided to the fund code and bill-to address cited on the original requisition. When concerned about an apparent non-receipt of credit, the ILCO should consult with the appropriate finance office for verification. Allow a minimum of 60 calendar days from the date of the SDR response before initiating a follow-up action. To facilitate research of supply and financial records, it is suggested that follow-up action for non-receipt of credit associated with the return of discrepant materiel occur within a reasonable period (e.g., not longer than 45 calendar days after the ILCO provides the action activity the initial notice with evidence of discrepant materiel return).

C17.5.9.2. When non-receipt of credit is confirmed, the ILCO will submit a request for billing adjustment as prescribed by MILSBILLS procedures under DLM 4000.25, Volume 4, Finance, using DLMS 812R (DIC FAE) and Billing Advice Code 26. Do not send a hardcopy of the SDR or reply, as this may create duplicate work for the finance centers and may cause improper processing of your request.

C17.5.10. Product Quality. Product quality deficiencies relative to Security Assistance shipments are reportable via SDR. If product quality is for latent defect, the the Security Assistance customer must provide evidence that a receipt inspection was done and the defect could not be detected at that time and that the defect is present for reasons other than deterioration or damage incurred during storage or handling. Quality deficiencies include deficiencies in design, specifications materiel, manufacture, and/or workmanship. The submitter must identify by discrepancy code any quality deficiencies (including latent defects) that result in a safety hazard. Include the following information in the SDR, as applicable: manufacturer's name; contract/purchase order number; date of manufacture, pack, or expiration; lot/batch number; location of materiel; point of contact information (if other than the preparing official); along with a detailed description of the complaint if needed to supplement encoded information. Include the following information in all product quality SDR packages, as applicable: photographs, test data, and related documentation. When submitting a latent defect discrepancy code on the SDR, the report must include substantiating documentation to validate the latent defect such as the applicable test report used to identify the latent defect. Latent defects must be submitted to the ILCO with substantiating documentation. Following is a list of potentially applicable forms of substantiating documentation:

C17.5.10.1. Receipt tests conducted and test reports (including test equipment model, serial number and software version), or documentation of receipt tests not conducted, and justification for tests not conducted.

C17.5.10.2. Subsequent tests conducted and results including test equipment model, serial number, and software version along with test readings.

C17.5.10.3. Justification that initial receipt inspection and testing could not have detected the deficiency.

C17.5.10.4. Documentation of storage and handling of the item since receipt including type of storage.

C17.5.11. Billing Discrepancy. Billing discrepancies reported to the ILCO on a SDR shall be converted to the appropriate transaction format per MILSBILLS procedures under DLM 4000.25, Volume 4, Finance, for the DLMS 812R (DIC FAE).

C17.5.12. Financial Discrepancy. Financial discrepancies reported to the ILCO on a SDR shall be forwarded to DFAS-DE/I for processing.

C17.5.13. Management Evaluation. As a minimum, the ILCO must have visibility of detail/summary reports that show:

C17.5.13.1. The number of SDRs received during a particular time standard by customer with breakdown by shipping activity showing dollar value and discrepancy type. Reports will measure customer compliance with SDR submission time standards and ILCO compliance with SDR processing time standards.

C17.5.13.2. A breakdown of SDR action activity response showing actions taken to include dollar value of credit authorized and reshipped materiel.

C17.5.14. Responsibilities

C17.5.14.1. The ILCO shall:

C17.5.14.1.1. Complete initial SDR screening in accordance with this manual and DoD 5105.38-M.

C17.5.14.1.2. Review all SDRs received for processing and determine proper course of action based on available case history data. Reject discrepancy reports that fail to meet Security Assistance time and dollar standards (with exception of those that require disposition instructions for wrong item received or misdirected shipments) or do not contain required data, unless such data is readily available, at the ILCO. Forward SDRs to the appropriate ICP/IMM, shipping depot, or GSA action activity.

C17.5.14.1.3. Reject duplicate SDRs, except those that are resubmitted to request reconsideration of previous decision.

C17.5.14.1.4. Review all requests for reconsideration that contest a reconsideration decision (second request for reconsideration). Reject those requests

that lack sufficient justification or were not received within the established time standards.

C17.5.14.1.5. Process to the Security Assistance customer initial acknowledgment of receipt of SDR replies and/or denials.

C17.5.14.1.6. Report the disposition of SDRs applicable to materiel and services to the DFAS-DE/I as required in the DoD 7000.14-R, Volume 15.

C17.5.14.1.7. Review SDR replies from action activities for completeness and reject those that do not specify necessary information, e.g. disposition instructions for discrepant materiel. Under DLMS transactional exchange, the ILCO reject transaction may be directed to the action activity to identify necessary corrections. After three ILCO reject transactions, the action activity should be contacted off-line to clarify the issues involved.

C17.5.14.1.8. Maintain records of all Security Assistance-related discrepancy reports to completion.

C17.5.15.2. The DoD ICP/IMM, shipping depot, or GSA shall:

C17.5.15.2.1. Review all SDRs received for processing and determine proper course of action based on available supply records and the results of investigation.

C17.5.15.2.2. Furnish properly completed SDRs to the ILCO for further processing to the Security Assistance customer. The action activity shall cite the appropriate reply code (Appendix 3).

C17.5.15.2.3. Based upon the validated SDR, request that DFAS authorize adjustment/credit in accordance with MILSBILLS procedures under DLM 4000.25, Volume 4, Finance.

C17.5.15.2.4. Provide signed evidence of shipment to the ILCO when non-receipt of materiel is involved. If this documentation cannot be provided, appropriate credit is required.

C17.5.15.2.5. Provide documentation that is matched to the quantity shipped for concealed shortages. Examples of such documentation are those that contain size, total weight, and cube accepted by the carrier. Credit is denied if the documentation, in conjunction with the unit weight, supports shipment of the total quantity billed. Otherwise, appropriate credit for the difference is required.

C18. CHAPTER 18

SMALL ARMS AND LIGHT WEAPONS SERIAL NUMBER REGISTRATION AND REPORTING

C18.1. SCOPE.

C18.1.1. Applicability. The provisions of this chapter apply to the DoD Components responsible for inventory management of small arms and light weapons (SA/LW) and other activities involved in the shipment, registration, or receipt of SA/LW.

C18.1.2. Transactions. This chapter addresses the procedures applicable to SA/LW serial number registration and reporting using the DLMS 140A and 888A transactions. The corresponding Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP) legacy transaction functionality is identified for information purposes in a mixed Defense Logistics Standard System (DLSS)/Defense Logistics Management System (DLMS) environment. Other formats, such as DLMS Extensible Markup Language (XML), are also available. See the DLA Logistics Management Standards Website www.dla.mil/j-6/dlmsso/elibrary/TransFormats/140_997.asp for available formats.

C18.1.2.1. DLMS 140A, SA/LW Reporting, is used for the following transaction functions identified by the Accredited Standards Committee (ASC) X12 beginning segment (1/BGN/20) Transaction Type Code (BGN07) and, where applicable, Action Code (BGN08):

C18.1.2.1.1. SA/LW Control Reporting Transaction is identified by Transaction Type Code W4 – Weapons Control Report. This transaction provides MILSTRAP legacy Document Identifier Code (DIC) DSM functionality.

C18.1.2.1.2. SA/LW Receipt/Shipment Follow-up Transaction is identified by Transaction Type Code W4 – Weapons Control Report, with Action Code T – Status Query. This transaction provides MILSTRAP legacy DIC DSD functionality.

C18.1.2.1.3. SA/LW Reconciliation Transaction is identified by Transaction Type Code W5 – Weapons Control Report Reconciliation. This transaction provides MILSTRAP legacy DIC DSR functionality when DSR is used as reconciliation transaction.

C18.1.2.1.4. SA/LW Reject Transaction is identified by Transaction Type Code W5 – Weapons Control Report Reconciliation, with Action Code U – Reject. This transaction provides MILSTRAP legacy DIC DSR functionality when DSR is used to reject invalid/erroneous SA/LW transactions.

C18.1.2.1.5. SA/LW Reconciliation/Reject Follow-up Transaction is identified by Transaction Type Code W5 – Weapons Control Report Reconciliation, with Action Code T – Status Query. This transaction provides MILSTRAP legacy DIC DSF functionality.

C18.1.2.1.6. SA/LW Correction Transaction is identified by Transaction Type Code W5 – Weapons Control Report Reconciliation, with Action Code AC – Acknowledge. This transaction provides MILSTRAP legacy DIC DSC functionality.

C18.1.2.2. DLMS 888A. SA/LW Data Change Transaction is identified by ASC X12 beginning segment (1/BGN07/15) Transaction Type Code W1 – Weapons Data Change. This transaction provides MILSTRAP legacy DIC DSA/DSB functionality.

C18.2. GENERAL REQUIREMENTS

C18.2.1. Purpose. This chapter provides procedures for reporting SA/LW serial number data between the DoD Components and the DoD SA/LW Registry (hereafter referred to in this chapter as the DoD Registry). SA/LW, as defined in Definitions and Terms, including those mounted on aircraft, vehicles, and vessels, that are accounted for in unclassified property records, shall be reported (included will be foreign and commercial weapons, museum pieces with serial numbers, and captured, confiscated, or abandoned enemy SA/LW in the possession of the Department of Defense).

C18.2.2. List of Serial Numbers in Shipments. In addition to the shipment requirements contained in this volume, the shipping activity shall send a listing of the weapon serial numbers contained in each shipment with the shipment documentation accompanying SA/LW shipments between the DoD Components. When shipments consist of multiple containers, the listing shall identify which serial numbers are within each container.

C18.2.3. Small Arms and Light Weapons Without a National Stock Number and/or Serial Number. When discovered, SA/LW without a National Stock Number (NSN) and/or SA/LW (except museum pieces) with missing, obliterated, mutilated, or illegible serial numbers, shall be reported to the DoD Registry by the Component Registry for review and assignment of a Management Control Number (MCN)/NSN and/or serial number. Assignment of Local Control Number (LCN) or MCN shall not replace or be used in lieu of procedures to request assignment of an NSN where applicable. The Component Registry shall report all SA/LW without an NSN and/or SA/LW serial number, by message or letter, for assignment of serial number and/or NSN in the format in Table C18.T1 below:

C18.T1. Format To Report Small Arms and Light Weapons Without a National Stock Number/Serial Number

<u>NSN</u>	<u>Serial Number</u>	<u>Description</u>
(NSN or none)	(Serial Number or none)	(Make, model, caliber, and other nomenclature)

C18.2.4. Management Control Number/Local Control Number. MCNs/LCNs shall be used by the DoD Components for weapon identification until a valid NSN can be obtained from the DoD Registry in accordance with C18.2.3, or notification that the MCN/LCN will not be assigned an NSN.

C18.2.5. Lost, Abandoned, or Unclaimed Privately-Owned. Lost, abandoned, or unclaimed privately-owned SA/LW that are processed through a Board of Officers for actions described in [DoD 4160.21-M](#), "Defense Materiel Disposition Manual," Chapter 4, and later turned into a DLA Disposition Services Field Office, shall be registered immediately when they come under U.S. Government control.

C18.2.6. Nonappropriated Funded. Nonappropriated funded SA/LW turned in to a DLA Disposition Service Field Office and privately owned weapons classified as claims property shall be registered immediately when they come under the control of the Department of Defense. SA/LW that are claimed (private property whose title has passed to the Department of Defense as a result of a claim against the U.S. Government due to its damage in connection with U.S. Government activities, usually movement of household goods) and confiscated (private property whose title has passed to the Department of Defense as a result of being confiscated by appropriate authority, usually as a result of being abandoned and/or unauthorized for personal possession) by DoD activities shall be reported immediately to the Component Registries.

C18.2.7. Ceremonial/Training. The DoD Components shall obtain a new NSN (or currently assigned NSN) from the DoD Registry for modified weapons rendered inoperable that are used for ceremonial or training purposes. These weapons shall be retained on the Component Registries as weapons subject to the reporting criteria.

C18.2.8. Lost, Stolen, and/or Recovered. The DoD Components shall establish procedures to ensure reporting of lost, stolen, unaccounted, and/or recovered SA/LW under the provisions of [DoDM 5100.76](#), "Physical Security of Sensitive Conventional Arms, Ammunition, and Explosives".

C18.2.9. Mobilization. In the event of mobilization or other emergency, the DoD Registry and the Component Registries shall continue to operate and be maintained. SA/LW Transaction Code J (Emergency Suspense Status) may be used in emergency situations as authorized by the individual DoD Components.

C18.2.10. Enemy Small Arms and Light Weapons. Captured, confiscated or abandoned enemy SA/LW in the possession of the Department of Defense as a result of military actions shall be registered. SA/LW may be of foreign or domestic manufacture and may include recaptured US military SA/LW.

C18.2.11. Reporting Foreign Weapon Serial Numbers.

C18.2.11.1. When reporting foreign weapons' serial numbers that contain unidentifiable characters (non-English alpha characters/non-Arabic numerals) that can be translated into an alpha/numeric equivalent, the translated serial number shall be permanently inscribed on the weapon. When the foreign-weapon serial number cannot be translated into alpha/numeric equivalents, the DoD Component shall contact the DoD Registry for assignment of a serial number. Upon assignment of a serial number, the DoD Component shall permanently inscribe the newly assigned serial number on the weapon.

C18.2.11.2. The translated or assigned serial number of the historical weapon must be reported to the Component and DoD Registries in accordance with reporting requirements of this document.

C18.2.11.3. Foreign weapons designated by their Component Registry as having historical value are exempt from the requirement to have translated or assigned serial numbers permanently inscribed, since inscription would destroy the historical value of the weapon.

C18.3. OBJECTIVES

C18.3.1. Establish continuous visibility over all SA/LW by serial number from the contractor to depot; in storage; in transit to requisitioners; in post, camp, and station custody; in the hands of users; during turn-ins; in renovation; and during disposal/demilitarization.

C18.3.2. Interface the SA/LW serial number reporting between the DoD Components using standard procedures.

C18.3.3. Provide follow up procedures for delinquent shipment/receipt transactions.

C18.3.4. Provide SA/LW records reconciliation procedures.

C18.3.5. Provide law enforcement agencies, within 72 hours, the identification of the last known accountable activity having a specific serial-numbered SA/LW.

C18.4. EXCLUSIONS

C18.4.1. Nonappropriated Funds Purchases. SA/LW purchased with non-appropriated funds and privately-owned weapons are exempt from being reported to the DoD Registry since these weapons are controlled by civil authorities under the [Gun](#)

[Control Act of 1968](#). This does not include weapons turned in for disposal (see paragraphs C18.2.5 and C18.2.6 above).

C18.4.2. Classified Activities. Classified activities that determine that specific SA/LW should not be registered under these procedures shall request guidance through appropriate channels from the DoD Component.

C18.4.3. Deviations. Deviations from these requirements by DoD activities with small static inventories require concurrence of the Joint Small Arms/Light Weapons Coordinating Group (JSA/LWCG) and approval of the JSA/LWCG Chair. Submit requests for deviations, to include appropriate justification, via electronic mail to DLA Logistics Management Standards at www.dla.mil/j-6/dlms/About/Comment/coment_form.php or by traditional mail to:

DLA Logistics Management Standards J627 ROOM 1650
Defense Logistics Agency J6
JSA/LWCG Chair
8725 John J Kingman Road, STOP 6205
FORT BELVOIR, VA 22060-6217.

C18.5. DELINEATION OF RESPONSIBILITIES

C18.5.1. DoD Registry. The DoD Registry shall:

C18.5.1.1. Be operated and maintained by the Department of the Army.

C18.5.1.2. Provide a central repository of SA/LW serial numbers from the Component Registries, to include those on-hand, in transit, lost, stolen, demilitarized, or shipped outside the control of the Department of Defense.

C18.5.1.3. Provide law enforcement agencies, within 72 hours, the identification of the last known accountable activity (to include telephone number) having a specific serial-numbered weapon (see paragraph C18.7.6, below). Respond as expeditiously as possible to other inquiries, depending upon volume and existing workload.

C18.5.1.4. Enter all inquiries from law enforcement agencies and inquiries from appropriate military and civilian activities for weapons located in foreign countries on the DoD Registry file when no record exists on the active or inactive file. This shall be accomplished by using DLMS 140A SA/LW Control Reporting Transaction (MILSTRAP DIC DSM function) with SA/LW Transaction Code I (Interrogation/Inquiry Record) and entering the message/inquiry form number in the transaction number (document number) field for cross-reference purposes.

C18.5.1.4.1. For weapons identified as belonging to a DoD Component, these entries shall remain in the DoD active master file until the weapon is returned to DoD control and properly recorded on a Component Registry.

C18.5.1.4.2. Weapons identified as other than the Department of Defense in origin shall be placed in the inactive file of the DoD registry.

C18.5.1.5. At minimum, identify duplicate serial numbers received from the Component Registries on a quarterly basis. The appropriate DoD Component shall be contacted to verify duplicates and the DoD Registry shall issue selected suffixes to modify affected serial number(s) for all but one of the duplicate numbers. To the extent possible, weapons with duplicate serial numbers located in the wholesale system shall be modified first to maintain an audit trail for all modification actions:

C18.5.1.5.1. Provide appropriate corrective instructions to the Component Registries reporting duplicate serial numbers.

C18.5.1.5.2. Establish a complete historical cross-reference record (mechanical or hard copy).

C18.5.2. Component Registries. Component Registries shall:

C18.5.2.1. Maintain and control a mechanized active, inactive, and history file to control SA/LW serial numbers for which they do or did maintain accountability.

C18.5.2.2. Update files based on transaction reporting (e.g., receipts, issues, turn-ins, and inter-DoD Component transfers). Perpetuate suffix codes from all receipt/issue/adjustment transactions when updating files.

C18.5.2.3. Use standard data elements and standard transactions (identified in paragraph C18.1.2) to interface between the Component Registries for reporting changes affecting the SA/LW status in the master file of the Component Registries.

C18.5.2.4. Provide monthly electronic file overlays to the DoD Registry showing active and inactive files in serial number sequence.

C18.5.2.5. Identify duplicate serial numbers on file and request altering instructions from the DoD Registry for all but one of the duplicate numbers. Suspend movement of these weapons pending verification of the record and/or receipt of instructions for modification of the serial number on the weapon.

C18.5.2.6. Provide available data upon receipt of an inquiry from a law enforcement agency within 72 hours, and initiate action as deemed appropriate.

C18.5.2.7. Perform an annual records verification utilizing the registry files to obtain records compatibility with depot files and inventory control point (ICP) files by stock number and quantity.

C18.5.2.8. Report lost, damaged, or destroyed weapons in accordance with [DoD 7000.14-R](#), "Department of Defense Financial Management Regulations," Volume 12, Chapter 7. SA/LW Transaction Code Q (Notification of Suspected Loss) is applicable for reporting potential lost or stolen SA/LW pending full investigation and

preparation of a Financial Liability Investigation of Property Loss Report ([DD Form 200](#)). SA/LW Transaction Code U (Found or Recovered) is applicable for reporting if the missing weapon is found or recovered. Use the SA/LW Control Reporting Transaction for updating the registries.

C18.5.2.9. After all investigative requirements have been initiated, including preparation of a Financial Liability Investigation of Property Lost Report, identify lost or stolen weapons on the Component Registry using the SA/LW Control Reporting Transaction with SA/LW Transaction Code L (Inventory Adjustment - Loss). (Note: In accordance with DoDM 5100.76, the DoD Components are required to submit semiannual reports to the chairperson, Physical Security Review Board for all SA/LW where theft, loss, and recovery occur.)

C18.5.2.10. Perform an annual SA/LW reconciliation with all activities recorded on the registry as having possession and/or accountability of reported SA/LW by serial number, stock number, and quantity. The reconciliation method shall depend on the DoD Components' ability to use Defense Data Network transaction sets or listings. When listings are used to perform the annual reconciliation, they shall be identified by the appropriate transaction set either as header information or shown with each line entry (see paragraph C18.7.8 below).

C18.5.2.11. Report all new weapons or devices that could be construed as SA/LW to the JSA/LWCG chairperson. The chairperson shall determine the reportability and notify the DoD Component. Weapons or devices for which no determination can be made will be discussed by the full JSA/LWCG.

C18.5.3. JSA/LWCG. JSA/LWCG responsibilities are as set forth in [DoD 4140.1-R](#), "DoD Supply Chain Materiel Management Regulation".

C18.6. SAFEGUARDING AND PHYSICAL SECURITY OF AUTOMATIC DATA PROCESSING RECORDED DATA

C18.6.1. The SA/LW data contained in the Automatic Data Processing (ADP) records of the DoD Registry could produce classified data if the total number of serial numbers by weapon type were summarized. Consideration must be given to security of the SA/LW records due to their sensitive nature. Security of ADP records shall be in accordance with [DoD 5200.1-R](#), "Information Security Program".

C18.6.2. A determination to classify shall be made when there is sound reason to believe that knowledge of the information would provide unfriendlies an insight into the war potential, war defense plans, or posture of the United States and could reasonably be expected to cause a degree of harm to the national security.

C18.6.3. The operation of this program does not relieve units/activities from the requirements for physical security of weapons in accordance with DoD Component regulations.

C18.7. OPERATING PROCEDURES

C18.7.1. The Component Registries shall provide for electronic file transfer of their active and inactive files, in serial number sequence, to arrive at the DoD Registry not later than the 10th of each month. The format shall be in accordance with the DLMS 140A SA/LW Control Reporting Transaction (MILSTRAP DIC DSM function). The DoD Registry shall verify record counts as indicated on the files.

C18.7.2. The DoD Registry shall combine the DoD Components' electronic files into a single file, in serial number sequence, not later than the 15th day of each month. At minimum, the DoD Registry shall identify duplicate serial numbers quarterly in accordance with subparagraph C18.5.1.5 above.

C18.7.2.1. If duplicate serial numbers appear during the next check, and are owned by a single DoD Component, the Component Registry shall be notified to validate the serial numbers. If duplicate serial numbers remain after this validation, the Component Registry shall request altering instructions from the DoD Registry to modify the affected serial number(s). The DoD Registry shall issue modified serial numbers (using selected alpha suffix(es) and maintain a complete historical cross-reference record.

C18.7.2.2. If duplicate serial numbers appear during the next check, and are owned by more than one DoD Component, the DoD Registry shall notify each Component Registry to validate its serial numbers. If duplicates remain after this validation process, the DoD Registry shall issue modified serial numbers to one of the Component Registries (using selected alpha suffixes) and maintain a complete historical cross-reference record.

C18.7.3. Recovered Weapons. Weapons recovered by law enforcement agencies or foreign countries and returned to the custody of a DoD Component shall be registered on the Component Registry using the SA/LW Control Reporting Transaction with SA/LW Transaction Code U (Found or Recovered).

C18.7.4. Inter-DoD Component Transfers. The SA/LW Control Reporting Transaction is used to report inter-DoD Component transfers between the Component Registries. The requirements for reporting shipments shall be as follows:

C18.7.4.1. Shipments Between DoD Components:

C18.7.4.1.1. Shipping Registry. When weapons are selected for shipment by the shipping activity, SA/LW Control Reporting Transaction with SA/LW Transaction Code S (Shipment) shall be sent to the shipping Component Registry. The shipping Component Registry enters the SA/LW data in the active file to indicate the in-transit shipment. The shipping Component Registry then sends the transaction to the destination Component Registry for all inter-DoD Component shipments.

C18.7.4.1.2. Receiving Registry. The receiving Component Registry enters the SA/LW data into the active file to open the record. This record is maintained until confirmation of weapon receipt is provided by the receiving activity.

C18.7.4.1.2.1. Receiving Activity Actions. The receiving activity verifies the serial number(s) and sends SA/LW Control Reporting Transaction with SA/LW Transaction Code R (Receipt) to its Component Registry. The receiving Component Registry matches the SA/LW data against the in-transit record. A match constitutes a reconciliation and completes the record.

C18.7.4.1.2.2. Discrepant Serial Numbers. Discrepant serial number(s) shall be verified by electronic mail, telephone or letter and corrective action taken as required.

C18.7.4.1.2.3. Receiving Registry. The receiving Component Registry provides SA/LW Control Reporting Transaction with SA/LW Transaction Code R to the shipping Component Registry.

C18.7.4.1.3. Maintenance Reporting. Weapons shipments from one DoD Component to another for maintenance purposes shall also be reported to appropriate Component Registries. This requirement shall be included in any maintenance support agreement.

C18.7.4.1.4. Shipping Timeframe. If 30 calendar days from date of shipment for continental United States (CONUS) and 90 calendar days for overseas is exceeded, the shipping Component Registry shall initiate coordination to determine the status of the outstanding SA/LW Control Reporting Transactions with SA/LW Transaction Code S (see paragraph C18.8.2) (for receiving Component Registry procedures, see paragraph C18.8.3.). A monthly overage shipment listing shall also be sent to the receiving Component Registry.

C18.7.4.2. Shipments from Procurement. When weapons are shipped from a contractor to activities within the Department of Defense, the contractor is required to prepare three SA/LW Control Reporting Transactions. SA/LW Transaction Code P (Procurement Gains) shall be in the one transaction sent to the shipping Component Registry giving notification of shipment. The data are entered in the shipping Component Registry to open the record. This record shall be held in suspense until confirmation of weapon receipt is provided by the receiving activity. The receiving activity shall submit an SA/LW Control Reporting Transaction to update its Component Registry. The two remaining control reporting transactions shall have the Routing Identifier Code (RIC) of the shipping Component Registry to which the confirmation of receipt shall be provided. The SA/LW Control Reporting Transaction shall accompany the shipment documentation. When shipments consist of multiple containers, a listing shall identify which serial numbers are within each container.

C18.7.4.3. Shipments Outside the Control of the Department of Defense. When SA/LW are selected for shipment to Foreign Military Sales (FMS)/Grant Aid and

other Agencies outside DoD control, or when a DoD agency assumes title and accountability for U.S. weapons purchased or produced under a DoD contract then shipped directly to Security Assistance or other customers outside the Department of Defense, the SA/LW Control Reporting Transactions for the weapons shall be provided to the shipping Component Registry giving notification of shipment. The shipping Component Registry codes each weapon in the shipment using SA/LW Transaction Code N (Shipment to Other Agencies) or code F (Shipment to FMS/Grant Aid) depending upon type of shipment. The shipping Component Registry then enters the SA/LW shipment data into the inactive file. Weapons returned to the DoD supply system from previous shipments to FMS/Grant Aid and other agencies outside DoD control shall be registered by the receiving activity on its Component Registry.

C18.7.5. Demilitarization. When SA/LW are selected for destruction at the demilitarization activity, the demilitarization activity sends SA/LW Control Reporting Transaction with SA/LW Transaction Code V (Demilitarization) to the Component Registry once the demilitarization has been completed. The Component Registry shall code each of the demilitarized weapons and enter the SA/LW demilitarization data into the inactive file.

C18.7.6. Department of Defense Small Arms and Light Weapons Serialization Program. The DoD SA/LW Serialization Program is designed to provide investigative agencies, within 72 hours, the identification of the last accountable activity having a specific serial-numbered SA/LW. Investigative agencies will process all inquiries by electronic mail, message, letter, or telephone to the DoD Registry. The DoD Registry shall identify the accountable Component Registry from the data contained in its master record and query that registry as to the last accountable activity for the specific serial-numbered weapon. Once the Component Registry identifies the last accountable activity, response is provided to the investigative agency through the DoD Registry.

C18.7.7. Invalid or Erroneous DLMS 140A Transactions. The Component Registry shall reject invalid or erroneous DLMS 140A SA/LW transactions to the originator using the DLMS 140A SA/LW Reject Transaction (MILSTRAP DIC DSR function). (See paragraph C18.7.10 for rejecting DLMS 888A SA/LW Data Change Transaction with SA/LW Transaction Code K (Multi-Field Correction).) The rejecting Component Registry shall cite the appropriate SA/LW Error Transaction Reject Codes in the SA/LW Reject Transaction. The code explanations identify required corrective action. In a DLMS environment, the SA/LW Reject Transaction may contain more than one SA/LW error transaction reject code, and activities shall ensure that all error conditions are corrected prior to resubmission. Under the constraints of the 80 record position DLSS (MILSTRAP) environment, the reject advice code identifies only one error condition in the transaction, and activities shall review all other fields of the rejected transactions prior to resubmission to ensure that all data entries are correct.

C18.7.7.1. Correction of Rejected Transactions. The Component Registry shall hold rejected transactions in a suspense file until corrective action has been received from the DoD Component. DLMS 140A SA/LW Correction Transaction

(MILSTRAP DIC DSC function) with the appropriate SA/LW error transaction reject code shall be used to respond to rejected transactions.

C18.7.7.2. Follow-Up. If no corrective action is received by the Component Registry within 14 calendar days, the Component Registry shall send a DLMS 140A SA/LW Reconciliation/Reject Follow-up Transaction (MILSTRAP DIC DSF function) to the DoD Component.

C18.7.8. Annual Reconciliation. The annual reconciliation of all SA/LW on the Component Registry shall be performed using DLMS 140A SA/LW Reconciliation Transaction (MILSTRAP DIC DSR function) with SA/LW Transaction Code E (intra-DoD Component Reconciliation of SA/LW serial numbers, and inter-DoD Component reconciliation when reconciling with DLA Defense Distribution Depots). This is a bottoms-up records reconciliation (i.e., matching records from the activity having physical custody and/or accountability of the weapon to the Component Registry records). Matching records shall be considered reconciled. Duplicate SA/LW serial numbers detected during the reconciliation shall require modification instructions from the DoD Registry. Component Registries that perform the annual reconciliation using other than transaction reporting shall ensure that listings contain SA/LW Reconciliation Transaction in the heading. SA/LW Transaction Code E need not be identified on the listing or posted to the Component Registry.

C18.7.8.1. Registry Rejects. Unmatched records and weapons for which no reconciliation was received by the Component Registry shall result in a SA/LW Reject Transaction with the appropriate SA/LW error transaction reject code(s) to the DoD Component.

C18.7.8.2. Follow up for Response to Reject. If corrective transactions and/or notification of a problem is not received from the DoD Component within 60 calendar days, the Component Registry shall follow up using DLMS 140A SA/LW Reconciliation/Reject Follow-up Transaction (MILSTRAP DIC DSF function).

C18.7.9. Mass Stock Number/Department of Defense Activity Address Code Changes. Accomplish mass stock number changes and mass DoD Activity Address Code (DoDAAC)/Unit Identification Code (UIC) changes using DLMS 888A SA/LW Data Change Transaction with SA/LW Transaction Code H (Mass Stock Number Change) (MILSTRAP DIC DSB function) or SA/LW Transaction Code M (Mass DoDAAC/UIC Change) (MILSTRAP DIC to be determined).

C18.7.10. Multi-field Corrections. Reporting activities shall use DLMS 888A, SA/LW Data Change Transaction with SA/LW Transaction Code K (Multi-Field Correction) (MILSTRAP DIC DSA function) to change erroneous information on the Component Registry active/inactive file. The Component Registry shall reject any SA/LW Data Change Transactions (with SA/LW Transaction Code K), that contain invalid data or do not match the file or.

C18.7.10.1. Preparation of Small Arms and Light Weapons Data Change Transaction. Reporting activities shall prepare SA/LW Data Change Transaction with SA/LW Transaction Code K when the Component Registry contains erroneous information. Changes can be made to the NSN/MCN/LCN/DoDAAC/UIC of the accountable activity and serial number.

C18.7.10.2. Rejection of Small Arms and Light Weapons Data Change Transactions. SA/LW Data Change Transactions (with SA/LW Transaction Code K) received by the Component Registry that do not match the NSN/MCN/LCN, reporting activity DoDAAC/UIC, or serial number contained on the active/inactive file shall be rejected to the reporting activity using DLMS 888A as a reject transaction. The rejected SA/LW Data Change Transaction (with SA/LW Transaction Code K) shall contain the appropriate SA/LW error transaction reject code. Rejected transactions shall be suspended in the Component Registry pending receipt of a corrected SA/LW Data Change Transaction (with SA/LW Transaction Code K). Under DLMS, more than one SA/LW error transaction reject code may be shown in the rejected SA/LW Data Change Transaction (with SA/LW Transaction Code K), and the reporting activity must review all invalid data before resubmitting the corrected transaction. In a DLSS (MILSTRAP) environment, only one SA/LW error transaction reject code can be identified in the rejected transaction (MILSTRAP DIC DSA), and the reporting activity must review all entries for additional invalid data before submitting the corrected transaction.

C18.7.10.3. Small Arms and Light Weapons Transaction Code K Conversion. The Component Registries shall not include SA/LW Data Change Transactions (with SA/LW Transaction Code K) on their electronic file transfer overlay records to the DoD Registry. The Component Registry shall convert the DLMS 888A SA/LW Data Change Transactions (with SA/LW Transaction Code K) received from the reporting activity to DLMS 140A SA/LW Control Reporting Transaction with SA/LW Transaction Code K and the old serial number cited for all changes to the serial number field for the monthly electronic file transfer.

C18.8. TIME STANDARDS FOR PROCESSING UPDATES AND FOLLOW-UPS FOR SHIPMENTS AND RECEIPTS

C18.8.1. Weapons Visibility. One objective of the SA/LW serial number registration and reporting procedures is to provide visibility of actual location of all weapons by the timely update of the Component Registries during the shipment or receipt process. The timeframe for processing DLMS 140A SA/LW Control Reporting Transaction (MILSTRAP DIC DSM function) for SA/LW Transaction Codes R and S is 10 calendar days from date of action.

C18.8.1.1. Notification of In-transit Shipment to Shipping Component Registry. Within 10 calendar days of selection for shipment, the shipping activity shall send the SA/LW Control Reporting Transaction (with SA/LW Transaction Code S) to the shipping Component Registry to indicate which serial numbers are included in the in-transit shipment. activities that do not have mechanized capability shall provide the SA/LW Control Reporting Transaction (with SA/LW Transaction Code S) or hard copy

information to the shipping Component Registry by the fastest available means, leaving the shipping activity within 10 calendar days of selection for shipment.

C18.8.1.2. Update of Shipping Component Registry. Within 10 calendar days of receipt of the SA/LW Control Reporting Transaction (with SA/LW Transaction Code S) from the shipping activity, the shipping Component Registry shall use the transaction to update its files, establish the in-transit record, and send the SA/LW Control Reporting Transaction to the receiving Component Registry for all inter-DoD Component shipments.

C18.8.1.3. Receiving Component Registry Verification. Within 10 calendar days of receipt of the weapon(s), the receiving activity shall use the SA/LW Control Reporting Transaction data that accompanied the shipment to verify the received serial number(s) and provide the WSN transaction (with SA/LW Transaction Code R) to the receiving Component Registry. activities that do not have mechanized capability shall provide the SA/LW Control Reporting Transaction (with SA/LW Transaction Code R) or hard-copy information, to the receiving Component Registry by the fastest available means.

C18.8.1.4. Shipping Component Registry Verification. Within 10 calendar days of receipt of the SA/LW Control Reporting Transaction (with SA/LW Transaction Code R) from the receiving activity, the receiving Component Registry shall send SA/LW Control Reporting Transaction (with SA/LW Transaction Code R) to the shipping Component Registry to provide notification of weapons receipt. The 10-calendar day requirement for shipment/receipt notification also applies to SA/LW shipments from one DoD Component to another for maintenance purposes. This requirement shall be included in any maintenance support agreements between the DoD Components.

C18.8.2. Overage Shipments. The shipping Component Registry shall send a follow-up on all in-transit weapons (30 calendar days for CONUS shipments, and 90 calendar days for overseas shipments) from date of shipment, for which no confirmation of receipt (SA/LW Control Reporting Transaction with code R) has been received. The shipping Component Registry shall send DLMS 140A SA/LW Receipt/Shipment Follow-up Transaction (MILSTRAP DIC DSD function) to the receiving Component Registry. Allow 10 calendar days for response to the follow-up transaction.

C18.8.2.1. Weapon Received. If the weapon has been received, the receiving Component Registry shall submit a SA/LW Control Reporting Transaction with SA/LW Transaction Code R.

C18.8.2.2. Weapon Not Received. If the weapon has not been received, the receiving Component Registry shall submit SA/LW Control Reporting Transaction with SA/LW Transaction Code A (Weapon Not Received).

C18.8.2.3. No Response Received. If no response is received, an electronic transmission (message) shall be sent to the receiving Component Registry with an information copy to the receiving activity and its higher headquarters.

C18.8.2.4. Negative/No Response Reporting. Negative response or no response to the message shall cause the shipping Component Registry reporting the weapon(s) as missing, lost, or stolen to its appropriate investigative agency and the DoD Registry (see subparagraphs C18.5.2.8. and C18.5.2.9. above).

C18.8.3. Shipment Follow-Up Procedures. Follow-up procedures shall be initiated by the receiving Component Registry for all received weapons for which no DLMS 140A SA/LW Control Reporting Transaction (with SA/LW Transaction Code S) was provided by the shipping Component Registry. The follow up procedure is necessary to confirm that the serial number(s) reported as received matches the serial number(s) selected and shipped. The receiving Component Registry shall take the follow-up action with the shipping Component Registry using the SA/LW Receipt/Shipment Follow-up Transaction within 10 calendar days after a weapon(s) has been confirmed as received. Lack of response within 10 calendar days shall cause an electronic transmission (message) to be sent to the shipping Component Registry with an information copy to the shipping activity and its higher headquarters.

C18.8.4. Intra-DoD Component Timeframes. The standard timeframes for inter-DoD Component submission of SA/LW Control Reporting Transaction with SA/LW Transaction Codes R and S as prescribed above also apply to intra-DoD Component shipments and receipts.

C19. CHAPTER 19

UNIQUE ITEM TRACKING

C19.1. **SCOPE**. The provisions of this chapter apply to the Military Departments including Coast Guard and Defense Agencies (hereafter referred to as the DoD Components) responsible for unique item tracking (UIT).

C19.2. **EXCLUSIONS**

C19.2.1. Classified activities that determine the visibility of specific UIT assets may compromise operational security shall request guidance from their DoD Components. No DoD Component activity shall deviate from these requirements without the concurrence of their DoD Component and the Unique Item Tracking Committee (UITC). Submit requests for deviation, to include appropriate justification, to DLA Logistics Management Standards, J627, Room 1650, 8725 John J Kingman Road, STOP 6205, Fort Belvoir, VA 22060-6217 or use the comment form on the DLA Logistics Management Standards Website www.dla.mil/j-6/dlms0/About/Comment/comment_form.php.

C19.2.2. Small arms and light weapons program reporting requirements are outlined in Chapter 18.

C19.3. **GENERAL**. This chapter covers procedures to obtain a UIT designator code and to report, populate, update, and reconcile UIT assets in the DoD Component systems related to or impacted by UIT.¹

C19.4. **OBJECTIVES**

C19.4.1. Establish continuous visibility over all UIT assets from their point of entry into the DoD logistics systems through disposal, demilitarization or shipment outside the control of the Department of Defense.

C19.4.2. Reestablish visibility over a UIT item previously shipped outside the Department of Defense's control when it is reintroduced to DoD control.

C19.4.3. Requires use of standard logistics transactions to interface UIT reporting between/among owners, the DoD Components and suppliers. The objective is to populate accountability and, if required, visibility records using standard DLMS logistics transactions. These procedures do not dictate whether the DoD Component systems accomplish UIT through an integrated automated information system (AIS) accommodating UIT data or through use of stand-alone UIT data registries.

¹ All AISs relevant to the unique identification and tracking of item of supply throughout the DoD supply chain. These systems include, but are not limited to, the supply system, financial system, maintenance system, procurement system, the DoD Component repositories.

19.4.4. To provide coverage for all UITC DoD level (inter-DoD Component) UIT programs registered through the DoD UITC in accordance with [DoD 4140.1-R](#), "DoD Supply Chain Materiel Management Regulation," May 23, 2003.

C19.5. SAFEGUARDING AND PHYSICAL SECURITY OF UNIQUE ITEM TRACKING DATA RECORDS

C19.5.1. Secure AIS records as required by [DoD 5200.1-R](#), "Information Security Program," January, 14, 1997.

C19.5.2. Safeguarding AIS UIT recorded data does not relieve units and activities from the DoD Component requirements for physical, electronic, and procedural security of unique item identifier (UII) items.

C19.6. VISIBILITY OF UNIQUE ITEM TRACKING ITEMS. Establishing visibility of items comprising a UIT program (hereafter referred to as UIT items or UIT assets) may begin at any point in the supply chain. Customarily, for "cradle to grave" UIT programs, initial tracking begins at time of shipment from the manufacturer. Alternatively, a UIT program may begin after UIT items are already in the DoD logistics system.

C19.7. RESPONSIBILITIES FOR UNIQUE ITEM TRACKING. The DoD Components shall:

C19.7.1. Maintain AIS necessary to track UIT items for which the owner has or had accountability/visibility.

C19.7.2. Submit existing and proposed DoD level (inter-DoD Component) UIT programs to the DoD UITC for registration and assignment of a Federal Logistics Information System UIT designator code. Coordinate candidate UIT programs with the other DoD Components during the nomination process. Appendix 5 provides procedures for nominating and coordinating a UIT program candidate.

C19.7.2.1. Provide the nominating DoD Component the reason(s) when disapproving a UIT candidate for registration.

C19.7.2.2. Request mediation by the UITC when another DoD Component disapproves a UIT candidate program.

C19.7.3. Apply UIT designator codes to national item identification numbers (NIINs). Refer to C19.28, Table C19.T2. for assigned UIT designator codes. Ensure that the integrated materiel manager (IMM) applies the UIT designator code to every NIIN comprising the DoD level program, for which a UIT designator code is not already assigned. The IMM assigns UIT designator codes to a NIIN based on direction by the DoD Component UIT central control point. UIT designator code provides the DoD Components a systematic means to identify that a NIIN is subject to UIT and subject to these procedures.

C19.8. NATIONAL STOCK NUMBERS. If known, an item's national stock number (NSN), in conjunction with the UII², shall be the preferred means for tracking an item in logistics AIS. If there is no NSN, the owner(s) or an accountable officer shall assign a local control number (LCN) until a valid management control number (MCN) or NSN can be obtained. DLMS provides flexibility to accommodate tracking by NSN and UII, or by NSN and serial number, until such time as IUID policy and use of UIIs is fully implemented. UIT by NSN and serial number is a transitional requirement until the Components fully implement the IUID concept for serially managed assets, and tracking by UII, across the Department of Defense

C19.9. VISIBILITY OF ITEMS. Visibility tracking shall cease when UIT items are shipped outside the control of the Department of Defense, or when demilitarization and/or disposal are confirmed. Historical UIT transactions shall be retained in an inactive file accessible through an automated means.

C19.10. RETENTION OF UNIQUE ITEM TRACKING DOCUMENTATION. Audit capability is required following UIT document processing. Audit capabilities include establishing and maintaining a transaction history that ensures and facilitates successful UIT asset tracing for the following periods:

C19.10.1. Controlled Inventory Items. A minimum of 10 years for controlled inventory items (identified in [DoD 4100.39-M](#), "Federal Logistics Information System (FLIS) Procedures Manual") and other items that may be designated by the OSD and the DoD Components.

C19.10.2. Non-Controlled Inventory Items. A minimum of 6 years for non-controlled items.³

C19.10.3. Source Documents. Retain original documents or facsimiles (e.g., (microfilm, microfiche, Compact Disk-Read Only Memory (CD-ROM)) for a minimum of six years for non-controlled items and a minimum of 10 years for controlled items from date originated. Retain foreign military sales (FMS) source documents and financial records for 10 years from date of closure.

C19.10.4. Transaction History. AIS transaction history files associated with UIT shall include the information system transaction record and the required source document information that prompted the information system transaction. Transaction history records shall be organized and maintained in a manner that shall ensure that

² The UII is an identifier used to uniquely identify an individual asset used within the DoD. The UII may be a DoD Recognized IUID equivalent [e.g., Vehicle identification number (VIN)] or a composite structure defined by the Department of Defense [refer to UII Construct 1 and UII construct 2]. Refer to DoD policy and supporting documentation for specific IUID guidance at www.acq.osd.mil/dpap/pdi/uid/index.html. Refer to the most current version of [MIL-STD-130](#) for specific guidance marking of U.S. Military property.

³ DoD 4140.1-R requires that transaction histories be maintained for a least 2 years. Under the document retention requirements contained in the [National Archives Records Administration](#) (NARA) General Records Schedule (GRS), the document retention period for Accountable Officer's Records is 6 years 3 months.

accurate information can be retrieved and collated in a timely and reliable manner for a minimum of 10 years.

C19.11. DUE-IN AND PREPOSITIONED MATERIEL RECEIPT INFORMATION.

Establish due-in records in accordance with due-in procedures in Chapter 12. Upon establishing a due-in, provide a DLMS 527D Prepositioned Materiel Receipt (PMR) transaction to each intended storage activity in accordance with the PMR procedures in Chapter 12. If UIIs are known at time of DLMS 527D initiations, they shall be included.

C19.12. ADVANCE SHIPPING NOTICE. When the procuring DoD Component orders UIT items from a production contractor, the procuring DoD Component shall ensure that the applicable clause requiring the vendor to provide UIIs in accordance with DoD UID Defense Acquisition Regulations Supplement (DFARS) clause is included in the contract.⁴ The contractor shall submit IUID UII information to Wide Area Workflow – Receipt and Acceptance (WAWF-RA) in accordance with the WAWF Implementation Guides for the 856, Advance Shipment Notice; 857 Shipment and Billing Notice; direct online input; or another comparable information exchange method supported by WAWF-RA. WAWF shall disseminate the vendor shipment notice to the procuring activity to satisfy the shipment performance notice requirement for the vendor to provide notification of shipment to the procuring activity using DLMS 856, including UII(s). In addition, the WAWF-RA shall disseminate the vendor shipment information to the receiving depot or other DLMS-compliant receiving system using DLMS 856, Advanced Shipment Notice, including UII(s).

C19.13. AIR FORCE INTEGRATED LOGISTICS SOLUTION-SUPPLY RETAIL STATUS. Air Force Integrated Logistics Solution-Supply (ILS-S) (Retail Supply) Supply Status (DLMS 870S) shall be used on an intra-Air Force basis to provide the latest status to the intended receiving activity, including UII and/or serial number in support of UIT for positive inventory control (PIC) nuclear weapon related materiel (NWRM). For legacy items where the UII has not been marked in accordance with IUID policy, the serial number alone shall be passed. DLA Transaction Services shall enable transmission of information copies of the ILS-S Supply Status to the NWRM PIC Fusion Module UIT Registry to ensure the PIC NWRM program has near real time access to UIIs and the associated serial numbers of NWRM item movements.

C19.14. ACCEPTANCE REPORT. When acceptance at origin is applicable, DLMS 856, forwarded to the procuring and receiving activity, shall contain accepted IUID information. When acceptance at destination is applicable, the receiving system may report acceptance, including UII(s), using the DLMS 861, Acceptance Report, to WAWF. Where electronic interface is not available, the receiver may report acceptance, including UII(s), using direct online input to WAWF-RA. WAWF shall extract the IUID information for all Government accepted IUID items and forward to the DoD IUID Registry. Additional information and guidance on the IUID registry can be found on the UID Website <http://www.acq.osd.mil/dpap/pdi/uid>.

⁴ See www.acq.osd.mil/dpap/pdi/uid for specific UID DFARS clause information to include in the contract.

C19.15. MATERIEL RECEIPT

C19.15.1 Receipt. The receiving activity shall notify the owner when UIT items are received. Submit receipt including UII(s) using DLMS 527R Receipt Transaction, in accordance with the receipt procedures in [Chapter 13](#).

C19.15.2 Correction Of Erroneous Receipts. The preferred method for correcting receipt errors for complete or partial receipt (accountable document quantity, UII(s), or both) is to submit a DLMS 527R Receipt reversal in accordance with Chapter 13 Receipt procedures to correct the audit trail.

C19.16. UNIQUE ITEM IDENTIFIER RECEIPT DISCREPANCIES. When received UIIs do not match accompanying UII documentation (e.g., quantity and/or UIIs), the receiving activity shall record the actual quantity and UIIs received, and notify the shipping activity or inventory control point (ICP)/IMM, as applicable, of the discrepancy. The receiving activity shall submit a supply discrepancy report (SDR) showing the appropriate discrepancy code for quantity and IUID discrepancies in accordance with SDR procedures. For shortages or overages in shipments of controlled inventory items, arms, arms parts, ammunitions, and explosives, report within 24 hours of discovery (see SDR response timeframes). Action activities shall reply to all SDRs within 30 calendar days from date of receipt of reports by the action activity when associated with shipments of controlled inventory items. See [Chapter 17](#) for SDR procedures.

C19.17. REINTRODUCTION OF UNIQUE ITEM IDENTIFIER ITEM PREVIOUSLY SHIPPED OUTSIDE THE CONTROL OF THE DEPARTMENT OF DEFENSE. When a UIT item(s) previously shipped outside DoD control is reintroduced to DoD control, the receiving activity shall report the receipt, including UIIs, to the owner. The receiving activity shall submit the receipt using DLMS 527R Receipt transaction.

C19.18. MATERIEL REDISTRIBUTION AND RELEASE

C19.18.1. The shipping activity shall release the appropriate number and condition code of UII items without regard to the UIIs selected. Also applies to disposal release orders (DRO). There is currently no documented requirement for an owner to direct release of specific UIIs.

C19.18.2 Defense Logistics Management System Retail Transportation and Supply Receipt And Acknowledgement Interchange. (See [DLM 4000.25](#), "Defense Logistics Management System Manual," Volume 3, Chapter 2.) For designated supply trading partners (currently limited to the Standard Base Supply System (SBSS) – Cargo Movement Operations System (CMOS) interface), the DLMS 940R Materiel Release shall be used to support the UIT program for PIC NWRM. UIIs and the associated serial number shall be passed in the DLMS 940R for each item meeting the PIC NWRM program criteria. For legacy items where the UII has not been marked in accordance with IUID policy, the serial number alone shall be passed. This is an interim measure pending transition to tracking by UII and associated IUID business rules/transactions.

C19.18.3. For designated supply trading partners (currently limited to SBSS – CMOS interface), an information copy (image) of the Materiel Release 940R and Materiel Release Advice 945A shall be used in support of Air Force PIC Fusion program data requirements. The routing of an additional information only copy of the DLMS standard transactions (940R and 945A) is authorized for forwarding PIC Fusion data needed for the Air Force UIT registry. This is a specific authorized use with unique identifiers to flag the transaction as information only.

C19.19. CANCELLED MATERIEL RELEASE ORDER/DISPOSAL RELEASE ORDER SUPPORTING UNIQUE ITEM IDENTIFIER MATERIEL RELEASE

C19.19.1. The storage activity shall confirm materiel release order (MRO) or DRO cancellation to the owner, including UIIs. The storage activity shall confirm MRO or DRO cancellations in accordance with DLMS 945A materiel release cancellation advice or disposal release cancellation advice in accordance with Chapter 4.

C19.19.2. The owner shall confirm MRO cancellation with Status Code BQ using DLMS 870S Supply Status via DAAS to eligible status recipients. Data are entered in the eligible status recipient's AIS.

C19.20. MATERIEL RELEASE CONFIRMATION

C19.20.1. For all UIT programs, with the exception noted below for the retail transportation and supply receipt acknowledgment interchange, the shipping activity shall confirm materiel release to the owner and report shipped UIIs. The storage activity shall submit a MRC, including UIIs, using DLMS 945A, processed in accordance with Chapter 4.

C19.20.2. DLMS Retail Transportation and Supply Receipt and Acknowledgement Interchange. (See DLM 4000.25 Volume 3, Chapter 2). Transportation activities do not currently have a requirement to perform unique item tracking. As a result, the DLMS 945A Materiel Release Advice does not currently authorize inclusion of UII (or serial number).

C19.21. CONFIRMATION OF SHIPMENT TO DEMILITARIZATION AND/OR DISPOSAL. The shipping activity shall report to the owner, shipment of all UII items to demilitarization and/or disposal. The storage activity shall include the UIIs on the DLMS 945A Materiel Release Advice.

C19.22. SHIPMENT STATUS. For all UIT programs, the shipping activity shall report shipment status, with UIIs selected for shipment, to the receiving DoD Component. The receiving DoD Component shall enter the data in its AIS to confirm that received UIIs are the UIIs reported shipped.

C19.23. PHYSICAL INVENTORY OF UNIQUE ITEM IDENTIFIER ITEMS. Physical inventory of UIT items shall be conducted in accordance with Chapter 6 physical inventory procedures. There is currently no DoD requirement to inventory by UII.

C19.24. DOD STOCK READINESS PROGRAM. Under the Stock Readiness program, the Department of Defense requires uniform care of supplies, including the inspection and reporting of materiel condition and serviceability, and the scheduling, controlling, and reporting of packaging and other cost reimbursable actions supporting care of supplies in storage (COSIS). For UIT items, the distribution depot shall report storage quality issues requiring COSIS work to the materiel owner via the Storage Quality Control Report, including UII, for approval in accordance with DoD Component "[Stock Readiness](#)" Policy using DLMS 842SQ Storage Quality Control Report and DLMS 842S/R Storage Quality Control Report Reply.

C19.25. SIGHT VERIFICATION UNDER SPECIAL CIRCUMSTANCES. Reserved. (NOTE: This capability is to be provided on an exception basis by DLMS 140B once requirements are defined in a proposed DLMS change.

C19.26. DLMS TRANSACTIONS WITH UNIQUE ITEM TRACKING CAPABILITY. Table C19.T1 shows the DLMS transactions with UIT capability and the associated DLMS chapter for processing the transactions.

Table C19.T1. DLMS Transactions with Unique Item Tracking Capability

DLMS Transaction	TITLE	DLMS Volume, Chapter
140A ⁵	Small Arms and Light Weapons Reporting	Vol 2, Chapter 18
140B	RESERVED. No documented business case/requirement (Unique Item Tracking Report)	
180M	Materiel Returns Reporting	Vol 2, Chapter 11
511M	Requisition Modification	Vol 2, Chapter 4
511R	Requisition	Vol 2, Chapter 4
527D	Due-in/Advance Receipt/Due Verification	Vol 2, Chapter 12
527R	Receipt, Inquiry, Response and MRA	Vol 2, Chapter 13
810L	Logistics Bill	Vol 5, Chapter 2
842A/W	SDR Follow-up, Correction, Cancellation, & Reconsideration Request	Vol 2, Chapter 17
842S/Q	Storage Quality Control Report	Vol 2, Chapter 21
842S/R	Storage Quality Control Report Reply	Vol 2, Chapter 21
846A	Asset Reclassification	Vol 2, Chapter 7
846F	Ammunition Freeze/Unfreeze	Vol 2, Chapter 14

⁵ DLMS 140A is specific to use for Small Arms and Light Weapons tracking under the DoD Small Arms and Light Weapons Serialization Program.

Table C19.T1. DLMS Transactions with Unique Item Tracking Capability

DLMS Transaction	TITLE	DLMS Volume, Chapter
846I	Asset Status Inquiry/Report	Vol 2, Chapter 5
846R	Location Reconciliation Request	Vol 2, Chapter 6
856	Advance Shipment Notice	Vol 2, Chapter 19
856R	Shipment Status Materiel Returns	Vol 2 Chapter 11
856S	Shipment Status	Vol 2, Chapter 5
861	Acceptance Report	Vol 2, Chapter 19 (WAWF)
867I	Issue	Vol 2, Chapter 14
870M	Materiel Returns Supply Status	Vol 2, Chapter 11
870S	Supply Status	Vol 2, Chapter 5
888A ⁶	Small Arms and Light Weapons Data Change	Vol 2, Chapter 18
940R	Materiel Release	Vol 2, Chapter 4
940R	Materiel Release for retail transportation and supply receipt and acknowledgement interchange	Vol 3, Chapter 3
945A	Materiel Release Advice	Vol 2, Chapter 4
947I	Inventory Adjustment	Vol 2, Chapter 7

C19.27. DOD-LEVEL UNIQUE ITEM TRACKING PROGRAMS

C19.27.1. DoD Small Arms and Light Weapons Serialization Program. See [DLMS, Volume 2, Chapter 18](#), for the DoD Small Arms and Light Weapons (SA/LW) Serialization Program procedures.

C19.27.2. Radiation Testing and Tracking System Program

C19.27.2.1. The Radiation Testing and Tracking System (RATTS) is a program established to provide regulatory and statutory compliance with Federal, state, and local regulations for the use of radioactive materiel in fielded chemical defense equipment and in industrial applications. It maintains visibility of radioactive source UIDs and wipe test results. It is designed to provide strict control and identification of all radioactive sources to comply with Nuclear Regulatory Commission (NRC) license requirements.

⁶ DLMS 888A is specific to use for Small Arms tracking under the DoD Small Arms Serialization Program.

C19.27.2.2. The cell, detector chemical (a component of the M43A1 detector), and drift tube module (a component of the chemical agent monitor (CAM)) are reportable. In turn, the M43A1 detector and M43 alarm are components of the M8A1 chemical agent alarm. The drift tube module in the CAM is the key component of the end item. Hereafter the cell, detector chemical, and CAM drift tube module are identified as radioactive “sources.” The requirements for these reporting standards are as set forth in NRC License 12-00722-13 and 12-00722-14.

C19.27.2.3. NRC licenses require UII control of the radioactive source throughout its life cycle. NRC requires a wipe test on an annual basis for the M43A1 detector radioactive source and CAM radioactive source. In addition, the M43A1 detector radioactive source and the CAM radioactive source must be wipe tested within six months of transfer to another activity.

C19.27.3. Navy Depot Level Reparable Program. The Navy Depot Level Reparable (NDLR) program is the recognized inter-DoD Component UIT program for Navy-managed DLRs.

C19.27.4. Army Maintenance Management System Equipment Data Base

C19.27.4.1. The Army Maintenance Management System (TAMMS) Equipment Data Base (TEDB) identifies major end items for all ground, rail, and some construction equipment and watercraft. The information is maintained on vehicles accepted into the Army inventory and includes their age, location, NSN re-designations, overhaul/rebuild/recapitalization and Operating Tempo (OPTEMPO)/usage data. Information is also provided on OPTEMPO (usage) and vehicle age (miles and years). It is used for procurement planning, budgetary justifications, asset redistribution, identity of candidates for safety recalls or overhaul; and for one-time logistics reports and summaries to field units. Additionally, units use the data to reconstruct lost or destroyed equipment logbooks and missing or illegible serial/registration numbers. TEDB is the repository for the Army Vehicle Registration Number Program. The U.S. Army Logistics Support Activity is responsible for recording and maintaining a cross-reference file for all Army vehicle registration numbers on all Army vehicles during their life span. Information from this program meets several management needs such as satisfying state and foreign country registration requirements and assisting law enforcement agencies. The registration number remains unique to a specific equipment item during its life span.

C19.27.4.2. TEDB benefits the warfighter because it is a single source for selected vehicle information. Organizations requiring vehicle location, OPTEMPO/usage, or age information can obtain this information from the TEDB for units throughout the Active Army and Reserve components regardless of the equipment manager. TEDB contributes to improved budgetary, logistics acquisition, and depot program management at all levels of the Army.

C19.27.5. Aviation Component Tracking Program. The Aviation Component Tracking Program is comprised of a set of procedures and databases designed to

ensure unique part identification for flight safety parts and for life managed or special interest items. It provides for control, improved accountability, and visibility of U.S. Army Aviation equipment. The maintenance consolidated database contains the life cycle installation/removal/repair data for all life managed and special interest items. By maintaining the central repository for historical component data, the maintenance consolidated database allows for the recovery of critical data and continued use of parts with missing or erroneous data that would otherwise have to be scrapped.

C19.27.6. Tritium UIT Program. This program identifies all primary and secondary items comprised of tritium throughout the Army, Army Reserve, National Guard, and Marines. This program is necessary to meet a requirement for location visibility of all tritium sources at all times.

C19.27.7. Controlled Cryptographic Items Program. The controlled cryptographic items (CCI) program was established to meet National Security Agency requirements to maintain visibility of controlled cryptographic end items, standalone CCI, and embedded CCI. The CCI program shall perform a complete physical inventory at periodic intervals not to exceed 12 months between successive inventories in accordance with National Security Telecommunications and Information Systems Security Instruction (NSTISSI) 4001, Controlled Cryptographic Items, July 1996. This inventory must include all CCI equipment and uninstalled CCI components. This is necessary to guard against preventable losses of un-keyed CCI to an actual or potential adversary.

C19.27.8. Positive Inventory Control of Nuclear Weapons Related Materiel. Air Force program for providing positive inventory control (PIC) for nuclear weapons related materiel (NWRM).

C19.28. UNIQUE ITEM TRACKING DESIGNATOR CODES. The Federal Logistics Information System is the authoritative source for UIT designator codes. The UIT designator code indicates that an item requires UIT at the DoD level and identifies a DoD UIT program associated with the UIT requirement. See C19.7.3 for application of UIT designator codes. Table C19.12 shows the UIT Designator Codes.

Table C19.T2. Unique Item Tracking Designator Codes

Code	Explanation
AAA	DoD Small Arms and Light Weapons Serialization Program (DoDSALWSP)
AAB	Security Risk Category I Non-Nuclear missiles and Rockets
AAC	Radiation Testing and Tracking System (RATTS) Program
AAD	Navy Depot Level Repairables (NDLR) Program
AAE	Army Maintenance Management System (TAMMS) Equipment Data Base (TEDB)
AAF	Aviation Component Tracking Program
AAG	Tritium Unique Item Tracking Program

Table C19.T2. Unique Item Tracking Designator Codes

Code	Explanation
AAH	Controlled Cryptographic Items (CCI)
AAJ	Positive Inventory Control (PIC) Nuclear Weapon Related Materiel (NWRM)

C20. CHAPTER 20

MEDICAL UNIT ASSEMBLY PROGRAM

C20.1. **GENERAL**. This chapter provides procedures supporting the DoD Medical Unit Assembly Program. This program is an integral part of the DoD Deployable Medical Systems (DEPMEDS). These procedures cover from issuance of the advance assembly build/release order through the actual building and packing of the assembled component. Included are receipts at the assembly activity (e.g., Distribution Standard System (DSS) assembly depot), from procurement and non-procurement sources and the reporting of those receipts to the assembly manager (e.g., United States Army Medical Materiel Agency (USAMMA), DLA Troop Support, Philadelphia, PA. Receipts under the USAMMA Prime Vendor Program are included.

C20.2. **APPLICABILITY AND SCOPE**. These procedures apply primarily to DLA and USAMMA, who issue/process transactions in support of the DoD Medical Unit Assembly Program. Other DoD Components who participate in this program or other similar programs shall comply with these procedures.

C20.3. **BUILD REQUIREMENT**. The assembly manager shall use DLMS 650A Assembly Component Maintenance Structure to identify to the assembly activity, the specific medical assembly to be built. DLMS 650A may also be used by the assembly manager and assembly activity to enter corrections, provide missing data, or to send history data. This is the initial transaction establishing the requirement, and it identifies the end-item to be assembled, as initiated by a new requisition, or by changes to a previous one. The transaction provides the build directive number, unit assembly number, end-item nomenclature, cost estimate, total number of assemblies to be built, number of components in each, and DoD activity address code (DoDAAC) of the ship-to activity by providing the assembly activity sufficient information to start planning the end-item assembly.

C20.4. **DUE-IN ESTABLISHMENT**. The assembly manager shall use the Defense Logistics Management System (DLMS) 527D, Due-in/Advance Receipt/Due Verification transaction to establish pre-positioned materiel receipt (PMR) information at the assembly activity. DLMS 527D PMR provides the procurement instrument identification number (i.e., contract number), contract line item number, call order serial number, national stock number (NSN), part number, build directive number, and other information necessary to ensure that the assembly activity receipts the item in the correct build directive number. The PMR also provides data to prepare the DLMS 527R Receipt transaction upon receipt of the materiel. Assembly managers and assembly activities shall follow procedures in Chapter 12, Due-in PMR, to establish advance receipt information and to maintain control of due-in materiel.

C20.5. **RECEIPT PROCESSING**. The assembly activity shall report procurement and nonprocurement receipts to the assembly manager using DLMS 527R Receipt. This

notifies the assembly manager that assembly components have been received for a specific build/assembly of the medical end item. Assembly activities shall maintain accountability by processing receipts from new procurements within seven calendar days and all other receipts within 10 calendar days. Receipts are measured from date turned over by the carrier to the designated receiving activity to date when storage location/proof of storage is posted in the receiving activity's records. Assembly activities shall comply with Chapter 13 for maintaining control of receipts and for reporting discrepant/deficient receipts.

C20.6. COMPONENT PACKING CONFIRMATION. The assembly activity shall use DLMS 650C, Component Packing Confirmation to notify the assembly manager that packing has been completed at the assembly activity.

C21. CHAPTER 21

STOCK READINESS PROGRAM¹

C21.1 **GENERAL**. This chapter provides general information supporting the DoD Stock Readiness (SR) Program. The authoritative source for detailed procedures pertaining to this program is

[DLAI 4145.4/AR 740-3/AFJMAN 23-231/NAVSUPINST 4400.100/MCO 4450.15](#), Stock Readiness. Under the SR Program, the Department of Defense requires uniform care of supplies, including the inspection and reporting of condition and serviceability of materiel, and the scheduling, controlling, and reporting of packaging and other cost reimbursable actions in support of the stock readiness program. This chapter provides an overview of the DLMS transactions that support the stock readiness program. Initial implementation is internal to DLA and its storage activities using Distribution Standard System (DSS). The DoD Components shall phase in usage during modernization. All transactions shall be processed through the Defense Automatic Addressing System (DAAS). Capability to support communication with non-DLMS owner/managers and non-DSS storage sites using email and web-based processing is planned.

C21.1.1. **Screening Request/Reply**. The electronic stock screening request is used by materiel owners/manager to request storage activities to perform a screening action based upon specified criteria. The storage activity shall provide an electronic response to the request with results of the screening or to report that materiel matching the screening criteria was not found. The DLMS 842C, Stock Screening Request/Reply transactions replace the manual tracking and communication of screening requests and results where electronic capability is supported. This DLMS enhancement provides the DoD Components with the capability to use an electronic transmission method within their inventory management systems and improve tracking and management of screening actions.

C21.1.2. **Storage Quality Control Report (SQCR)/Reply**. The electronic SQCR is used by the storage activity to report storage quality issues requiring stock readiness work (e.g. repair, repackaging, testing, etc.) to the owner for approval. The DLMS 842S, Storage Quality Control Report/Reply transactions, replace the SQCR, [DD Form 1225](#), for information exchange under the DLMS. This DLMS enhancement provides the DoD Components with the capability to use an electronic transmission method within their inventory management systems and eliminates the exchange of hardcopy documents. This process includes both the storage activity report and the owner reply. A future enhancement to report storage activity completion of work is also available in the DLMS format².

C21.2 **APPLICABILITY AND SCOPE**. This guidance is applicable to DoD Components owner/managers and storage activities. It applies to classes of supply that are managed

¹ DLMS procedures in this Chapter are effective February 2008.

² Refer to ADC 131, DLMS Submission of Electronic DD Form 1225, Storage Quality Control Report.

by the DoD Components and stored at the storage activities, except Class V, Class VI, and Bulk Class III.

C21.3 STOCK SCREENING REQUEST/REPLY OVERVIEW. The materiel owner/manager shall create a stock screening request to notify distribution activities to screen for potentially quality deficient/defective materiel. Triggers for stock screening actions include a Product Quality Deficiency Report (PQDR), Supply Discrepancy Report (SDR), the critical item management (CIM) process, or other notification of defect. The materiel owner/manager shall identify materiel to be screened by NSN or part number/CAGE, specify the inspection type, and provide detailed instructions for the stock screening criteria (e.g., part numbers, vendor, markings, contract, etc.). Screening instructions may be defined by data elements within screening request or by narrative remarks.

C21.3.1 Under DLMS, the stock screening request is prepared using the DLMS 842C/I, Stock Screening Request. The owner/manager shall create and transmit a separate transaction for each action and information copy recipient (i.e., 28 transactions prepared for 28 storage activities). The owner/manager shall identify as the action recipient those storage activities known by the owner/manager to have the materiel in question in storage. An information copy shall be reported to all other storage activities. This process shall ensure that all applicable materiel is screened, to include, for example, DLA-managed materiel that is now owned by the DoD Components.

C21.3.2 The stock screening request shall remain open in the owner/manager application until a reply is received from all the action storage activities/locations indicating that the stock screening has been: completed with no defects found; completed with SQCR created; or completed with a "no stock" reply. An interim reply may be provided under exceptional circumstances with explanatory comments. When all action activity replies have been received, the request shall be closed.

C21.3.3 Under DLMS, the stock screening reply is prepared using the DLMS 842C/R, Stock Screening Reply, to close the automated coordination of stock screening actions. Storage activities shall send a stock screening reply transaction to the owner/manager for storage activities identified for action. If no stock is stored at a particular storage activity, the storage activity shall send a "no stock" reply where designated for action.

C21.3.4 If the storage activity finds stock within its location, the storage activity shall automatically create an inspection workload using the data from the stock screening transaction. If the inspection type is critical safety item (CSI), the storage activity shall automatically freeze the stock. When the inspection is complete, action storage activities shall send a reply to the owner/manager with the results of the stock screening and close the screening request. When materiel is found matching the screening criteria, the reply shall specify the quantity and condition of the materiel. Depending upon the results of the screening, the reply may indicate that an SQCR will follow.

C21.3.5 No screening reply is prepared by information stock screening request recipients. This is true regardless of the results of the screening. However, if defective materiel is located at a storage activity receiving only an information copy, an SQCR may be prepared for the materiel owner following guidance below.

C21.3.6 Detailed Requirements. The owner/manager preparing the stock screening request shall assign a suspense date based on the inspection type. The owner/manager shall specify screening criteria as appropriate. Only one contract number (optionally including call number and CLIN), vendor, or batch/lot may be specified per request. The materiel owner/manager may specify up to five CAGE/part number combinations associated with an NSN, e.g., for CSI inspections. The owner/manager shall assign an internal reference number for identification of the stock screening request, that may be used to associate the request with the triggering event. This reference number may be systemically assigned and shall be perpetuated to the stock screening reply and any resulting SQCRs. A document number is required to ensure a DoD-wide unique control number. Both the stock screening reference number and the document number must be included in all transactions. In addition, when applicable, the Product Quality Deficiency Report (PQDR) report control number (RCN) or the SDR document number shall be included to provide a cross reference when the screening action is triggered by a PQDR or SDR.

C21.3.7. Inspection Types. Stock screening requests may be prepared for the following inspection types: aviation safety action message (ASAM), safety of flight (SOF), special inspection, quality related (PQDR or SDR), safety of use (SOU), CSI, and other. Inspection type is identified within the screening request and reply by the Type Inspection Code.

C21.3.8. The owner/manager request format performs four functions:

C21.3.8.1. Stock Screening Request for Action. This is the basic request sent to storage locations where materiel matching screening criteria is known to be held.

C21.3.8.2. Informational Stock Screening. This is sent to storage locations where materiel matching screening criteria is not known to be held, but which may hold such materiel owned by other organizations.

C21.3.8.3. Cancellation. This cancels a previously transmitted request.

C21.3.8.4. Additional Comments. This identifies a follow-on separate transmission that provides clarification of the original request.

C21.3.9. The storage location reply format performs five functions:

C21.3.9.1. No Stock Found. Used by action storage activities to inform the owner/manager that no materiel matching the screening criteria was located.

C21.3.9.2. Stock Screening Completed. Used by action storage activities to inform the owner/manager that the stock screening action is complete and provide the results of the screening.

C21.3.9.3. Interim Reply – Comments Provided. This is used by exception when necessary to communicate with the owner/manager prior to completion of the screening action, e.g., to request additional time or clarification of the screening criteria.

C21.3.9.4. Not Processed – Additional Comments Rejected. This is used to provide notification that the additional comments from the owner/manager cannot be processed because the screening action has been completed and closed.

C21.3.9.5. Cancellation. This cancels a previously transmitted reply so that a corrected reply may be provided.

C21.4. STORAGE QUALITY CONTROL REPORT PROCESS OVERVIEW. The SQCR is submitted by storage activities when changes in the condition of stocks are discovered during stock surveillance, inspections/screening, or during distribution processes requiring stock inspection/screening. The SQCR is forwarded to the materiel owner to obtain disposition instructions, to include approval for reimbursable stock readiness work, e.g. repair, repackaging, testing, etc.

C21.4.1. Triggers for preparation of the SQCR include:

C21.4.1.1. Changes to an unserviceable condition when it is determined that there may be contractor liability for unserviceability under the terms of warranty clauses or unserviceability is due to a latent defect. Materiel in this condition shall be transferred to SCC L (suspended litigation) pending negotiation with contractor(s) or receipt of disposition instructions.

C21.4.1.2. Transfers to SCC D (serviceable – test/modification), E (unserviceable – limited restoration), F (unserviceable – repairable), G (unserviceable – incomplete), J (suspended in stock), and L (suspended – litigation).

C21.4.1.3. Changes in condition of dated, limited shelf-life materiel, medical, or subsistence items.

C21.4.1.4. The item in stock is unidentified or misidentified.

C21.4.2. Under DLMS, the SQCR is prepared by DSS DDs using the DLMS 842S/Q, SQCR. Where DLMS is not supported, the SQCR shall be mailed or faxed to the materiel owner pending implementation of the DLMS or DAAS capability to convert transactions to email.

C21.4.3. Under DLMS, the SQCR response is prepared using the DLMS 842S/R, SQCR Reply. Where DLMS is not supported, the materiel owner shall return the SQCR form annotated with the applicable response information.

C21.4.4. Upon completion of authorized reimbursable stock readiness work, the storage activity shall annotate the hard-copy SQCR with the cost of the action and return it to the materiel owner. The electronic SQCR storage activity reply with completion information is not applicable to DLA, which has query capability to provide visibility of inventory status. A DLMS enhancement for future implementation will support the storage activity notification to the materiel owner that work has been completed³.

C21.4.5. Detailed Requirements. The distribution activity shall prepare an SQCR for each item, reporting quantity by condition code. SQCRs are forwarded to the appropriate materiel owner stock readiness (SR) coordinator for response. The SQCR shall remain open in at the storage activity until disposition is received from the materiel owner. The SR coordinator reviews the item for excess stock position, cost of action in relation to the value of materiel, etc., and approves or disapproves the stock readiness action request. When disapproving the stock readiness request, the SR coordinator shall concurrently provide disposition instructions for the materiel. When approving the SR request, the SR coordinator shall reply to the storage activity for action. A disposition/status reply code is available in the DLMS format to communicate the reply to reduce reliance on narrative text and to facilitate automated tracking/trend analysis.

C21.4.6. Inspection Types. An SQCR may be prepared as a result of any of the following inspection types: ASAM, SOF, special inspection, quality related (PQDR or SDR), SOU, CSI, cyclic, outbound shipment, shelf-life inspection, standard stock readiness, or other. The inspection type is identified within the SQCR and reply by the type inspection code.

C21.4.7. The storage activity shall provide materiel identification by NSN or manufacturer's CAGE /part number. It shall also support identification by description if needed. Data content is comparable to the DD 1225. When applicable, the report shall include the stock screening request reference number as a cross-reference between the screening request and the resulting SQCR. The SQCR shall use a discrepancy code to identify the non-conformance situation. It provides the estimated/actual cost for repair or repackaging. By DLMS enhancement for future implementation, the SQCR/reply allows for item unique identification.⁴

C21.4.7.1. The storage activity SQCR format performs four functions:

C21.4.7.1.1. Original Report

C21.4.7.1.2. Correction

³ DLMS procedures in this Chapter are effective February 2008..

⁴ Ibid.

C21.4.7.1.3. Cancellation

C21.4.7.1.4. Historical Report. This is used to transmit a record of the SQCR to DAAS under DLMS, when an alternative method of communication was employed. Currently, it is only used when the DSS storage activity communicates with a DLA legacy ICP.

C21.4.7.2. The SQCR reply format performs three functions:

C21.4.7.2.1. SQCR Reply. This is used by the materiel owner to provide disposition instructions on requested stock readiness work.

C21.4.7.2.2. Work Completion Notice. This is used to provide completion status to the materiel owner after approval is given to perform stock readiness work. The storage activity completion reply is provided in the DLMS format as an enhancement for future implementation with the Military Services.⁵

C21.4.7.2.3. Historical Reply. This is used to transmit a record of the SQCR Reply to DAAS under DLMS, when an alternative method of communication was employed.

C21.4.8. DAAS Query Capability.⁶ By DLMS enhancement for future implementation, when DAAS web-based processing is available for SQCR and Stock Screening Requests, the web will include capability to query to provide historical information by: NSN, CAGE/part number, control numbers, serial number or batch/lot (associated with NSN/part number), contract number or CAGE, date open, date closed, storage location, and owner/manager.

⁵ Ibid.

⁶ DAAS query capability not currently available pending full implementation of ADC 240, DLMS Transactions for Stock Screening Request/Reply and Web-Enhanced Stock Screening Requests and SQCRs.

C22. CHAPTER 22

ASSET STATUS REPORTING

C22.1. GENERAL

C22.1.1. Purpose. This chapter prescribes asset status reporting procedures for the interchange of asset status information between the DoD Component wholesale and below wholesale distribution systems and owners/managers.

C22.1.2. Transactions. This chapter addresses the procedures applicable to the asset status reporting function using the DLMS 846I. The asset status reporting function is identified by the DLMS 846I Accredited Standards Committee (ASC) X12 beginning segment (1/BIA02/020) report type codes. Its DLSS (MILSTRAP) legacy counterpart identified by document identifier codes (DIC), is included for information purposes to allow for processing in a mixed DLMS/DLSS environment. Other formats such as Extensible Markup Language (XML) are also available. See the DLA Logistics Management Standards Website for available formats (www.dla.mil/j-6/dlmso/elibrary/TransFormats/140_997.asp).

C22.1.2.1. DLMS 846I, Asset Status Inquiry/Report is used for the following transaction functions identified by the beginning segment Report Type Code:

C22.1.2.1.1. Request for Asset Status Report is identified by Report Type Code TI–Asset Status Inquiry. This transaction provides MILSTRAP legacy DIC DZE functionality, which was sent from an inventory control point (ICP) to Military Service designated central points to request reporting from bases, posts, camps and stations.

C22.1.2.1.2. Asset Status Report is identified by Report Type Code TJ–Asset Status Advice. This transaction provides MILSTRAP legacy DIC DZA and DZF functionality.

C22.2. IN STORAGE ASSETS

C22.2.1. Assets Within the Wholesale Distribution System

C22.2.1.1. For assets within the wholesale distribution system, Asset Status Report Transactions may be used between DoD Components by mutual agreement. Send Asset Status Report Transactions (legacy DIC DZA) between DoD Components based on mutually agreed schedules.

C22.2.1.2. Asset status transactions may be used between a Component ICP and a DLA storage activity by mutual agreement.

C22.2.1.3. Under MILSTRAP, due to the number of record positions in DIC DZA devoted to entries prescribed by the DoD Components for use within Component distribution systems, each Component is authorized to procure a printed format suited to its needs. DoD Components must identify to Defense Logistics Management Standards any Component-prescribed data in DIC DZA that will be required in the Component's modernized system using DLMS. This is necessary so that DLA Logistics Management Standards can incorporate the Component data in the DLMS 846I Asset Status Report Transaction.

C22.2.2. Assets Below the Wholesale Distribution System. Assets below the wholesale distribution system shall be reported to the owner/manager when requested by the owner/ manager.

C22.2.2.1. Use the Request for Asset Status Report Transaction with the appropriate asset status code to request, change, or discontinue asset status reporting from the below wholesale distribution system.

C22.2.2.2. For the total asset visibility program, use the Request for Asset Status Report Transaction to request the report of assets above the requisitioning objective using DS to Federal IC 180M, Materiel Returns Reporting (Military Standard Requisitioning and Issue Procedures, DLM 4000.25-1, ([MILSTRIP](#)) DIC FTE). Use with the asset visibility program is based on agreement of the involved DoD Components.

C22.2.2.3. Transmit Request for Asset Status Report Transactions to central points designated by DoD Components. Each DoD Component designated activity shall be responsible for notifying its reporting activities of the reporting requirements shown in the Request for Asset Status Report Transactions received from the other Components. The Component activities designated to receive the requests are:

Component	Activity	Routing Identifier Code
Army	USAMC Logistics Support Activity ATTN: AMXLS-V Building 5307, Sparkman Center Redstone Arsenal, AL 35898-7466	AGT
Navy	Navy Supply Systems Command Weapon Systems Support Mechanicsburg, PA 17055-5000	NRP47

Component	Activity	Routing Identifier Code
Air Force	Headquarters Air Force Materiel Command 4375 Chidlaw Road, Suite 6 Wright-Patterson Air Force Base Dayton, OH 45433-5006	FNA
Marine Corps	ILS Directorate (Code 820) Marine Corps Logistics Base Albany, GA 31704-5000	MPB

C22.2.2.4. Always show dates for commencement of reporting (Asset Status Reporting Codes C and D) and change of reporting (Reporting Codes H and J) in the Request for Asset Status Report Transaction as the first day of a month. In these instances, send the request transaction not later than 60 calendar days before the commencement date.

C22.2.2.5. Provision is made for requesting earlier commencement of reporting by use of Asset Status Reporting Code M. In this instance, the DoD Components' central points shall ensure that reporting commences as soon as possible after receipt of the request.

C22.2.2.6. When a one-time asset status report is required on an expedited basis, the Request for Asset Status Report Transaction shall contain Asset Status Reporting Code Z and the date the report is required. The DoD Component central point or the reporting activity in receipt of the request shall take no further action if the date the report is required is already past.

C22.2.2.7. When a one-time asset status report is required for the asset visibility/redistribution program, the Request for Asset Status Report Transaction shall contain Reporting Code N and the date the report is required. Use with the asset visibility program is based on agreement of the involved DoD Components.

C22.2.2.8. Use the Request for Asset Status Report Transaction to request termination of reporting by citing Asset Reporting Code E. Show dates for termination of reporting in the transaction as the last day of the month. Send the Request for Asset Status Report Transaction termination request not later than 60 calendar days prior to the termination date entered in the transaction.

C22.2.2.9. Activities below the distribution system (base, post, camp, or station) shall use Asset Status Report Transactions to report assets to the requesting ICP. Report on hand balances by each separate supply condition of held materiel. Under the constraints of the MILSTRAP fixed length format, the DIC DZF Asset Status

Report Transaction is designed to provide for use of multiple transactions when either or both of the following apply:

C22.2.2.9.1. More than two supply conditions of materiel are held.

C22.2.2.9.2. Requisitioning objective, due-in, or reserved quantities exceed 999,999.

C22.2.2.10. The asset status reporting code cited in the Asset Status Report Transaction shall indicate the type of reporting being accomplished.

C22.3. INTRA-COMPONENT USE

C22.3.1 Intra-Army Use. Army also uses the DLMS Asset Status Report Transaction on an intra-Army basis for Army Single Stock Fund Asset Balance Reporting. This use serves a dual purpose:

C22.3.1.1 When used to report on the single stock fund to the national level systems, the Asset Status Report Transaction represents a report to update the requisitioning objective, reorder point, and retention limit.

C22.3.1.2. When used during a logistics reassignment outside the Army by the losing item manager, the Asset Status Report Transaction informs the Army manager for Non-Army Managed Items (NAMI) of the requisitioning objective and safety level to be set in their systems to be able to monitor and maintain the single stock fund stocking levels.

C22.3.2. Intra-Navy Use. Navy also uses the DLMS 846I Asset Status Report Transaction on an intra-Navy basis for reporting allowance-based assets that are below the whole distribution system to the ICP. This allows the ICP to determine when the activity requires more materiel due to being below its allowance.

C23. CHAPTER 23

CATALOG DATA SUPPORT

C23.1. GENERAL

C23.1.1. Purpose. This chapter provides general information regarding procedures and data exchange requirements for the communication of the DLMS Catalog Data Support.

C23.1.2. Transactions. This chapter addresses procedures applicable to the following Accredited Standards Committee (ASC) X12 transaction functions identified by the transaction set number and the beginning segment Transaction Purpose Code. There are no legacy 80 record position (MILS) equivalent transactions. See the DLA Logistics Management Standards Website for available DLMS Supplement formats www.dla.mil/j-6/dlms/elibrary/TransFormats/140_997.asp.

C23.1.2.1. DLMS 832N, Catalog Data Support, is used for the following transaction functions identified by the beginning segment Catalog Purpose Code (1/BCT01/0200):

C23.1.2.1.1. CP – Use to identify catalog data support communicated between DLA Disposition Services, DLA Disposition Services Field Offices, and Distribution Depots supporting Reutilization Business Integration (RBI). These catalog data support transactions identified by BCT01=CP are referred to in this document as DLA Disposition Services Catalog Data Support. See Chapter 16 for detailed procedures associated with this type of catalog data support.

C23.1.2.1.2. RC – Use to identify catalog data support communicated between DLA and maintenance/industrial activities (IAs) authorized by DLA IA support agreement supporting Supply, Storage, and Distribution (SS&D) for the Navy and Retail Storage and Distribution Interface (SDI) for the Marine Corps. These catalog data support transactions are referred to as IA Catalog Data Support.

C23.1.2.1.3. SC – Use to identify catalog data support communicated between DLA Disposition Services and DLA Disposition Services Field Offices supporting Reutilization Business Integration (RBI). These catalog data support transactions are referred to as Sales Contract Catalog Data Support. Note: Only the following detail level functional data is applicable to this process: Generic Name Description, Sales Contract Number, Sales Contract Line Item Number, Remaining Authorized Quantity, and Unit of Measure. See Chapter 16 for detailed procedures associated with this type of catalog data support.

C23.1.2.2. Reserved. (This is a placeholder for other Catalog Data Support transactions that shall be identified by different Transaction Purpose Codes.)

C23.2. INDUSTRIAL ACTIVITY CATALOG DATA SUPPORT

C23.2.1. Navy Background. As a result of the 2005 Base Realignment and Closure (BRAC) decision, retail supply, storage and distribution functions and associated infrastructure supporting the Navy industrial/maintenance sites transferred to DLA. DLA is the material provider for all consumable items in support of the maintenance mission at these sites. To effectively manage materiel at these sites, DLA shall maintain materiel master records identifying the materiel identification and associated characteristics for all DLA managed, non-DLA managed, and local stock number materials that are used by the Navy. Prior to the BRAC decision, Enterprise Business System (EBS) maintained materiel master records for all DLA managed items and some non-DLA Managed items; with this new requirement the DLA EBS shall establish materiel master records for any non-DLA managed item requested by the Navy Fleet Readiness Centers (FRCs) and the Naval Shipyards (NSYs).

C23.2.2. Marine Corps Background. As a result of the 2005 BRAC decision, operating materiel and supplies storage and distribution functions and associated infrastructure supporting the Marine Corps Maintenance Centers (MCMC) industrial/maintenance sites transferred to DLA. DLA is the storage and distribution provider for most consumable items in support of the maintenance mission at these sites. To effectively manage materials at these sites, DLA Distribution Standard System (DSS) shall maintain item data records containing the materiel identification and associated characteristics for all materiel used by the MCMC. Prior to the BRAC decision, DSS maintained item data records for all DLA managed items and most non-DLA-managed items; with this new requirement the DLA DSS established item data records for any item assigned a local stock number (LSN) by the MCMC.

C23.2.3. The catalog data exchange supports the following functions. Specific implementation varies by Service:

C23.2.3.1. Communication of Federal Logistics Information System (FLIS) and user unique data associated information for newly cataloged national stock number (NSN) materiel.

C23.2.3.2. Identification of non-NSN materiel by an LSN so that the LSN may be recognized for requisitioning, storage, and receipt processing.

C23.2.3.3. Communication of FLIS Catalog Change Notices to the Navy NSY and FRC sites. DLA shall send change notices whenever an active materiel master record is updated in the form of DLMS 832N IA Catalog Data Support transactions. EBS shall send notices for changes resulting from manual/ programmatic updates (within EBS) and from systemic updates (from FLIS). FLIS changes include communication of replacement, superseded, and discontinued NSNs.

C23.2.3.4. Identification of NSN materiel by an LSN so that the LSN may be used for storage and distribution of materiel identified at the unit of use (that is, a unit of measure that is less than the FLIS unit of issue).

C23.2.3.5. Identification of MCMC LSNs to a unit of use LSN.

C23.2.3.6. Communication of a Service coordinated/approved substitute/ interchangeable item as a result of DLA or other Service provided supply status to associate the substitute NSN with the primary NSN.

C23.2.3.7. Shipyard prepared queries to identify available DLA EBS materiel master matches on NSN, LSN, or CAGE/part number. This action may trigger an EBS query against FLIS. EBS responses shall be returned in an DLMS 832N IA Catalog Data Support transaction.

C23.3. PROCEDURES – NAVY INTERFACE

C23.3.1. Upon data conversion, all the current LSNs and non-DLA managed materiel masters from the FRC and NSY systems shall migrate to EBS. This shall provide a base line for the materiel currently used at the BRAC sites.

C23.3.2. The catalog data shall be applicable to new item inductions, FLIS change notices for DLA items and non-DLA managed items, as well as Navy-assigned LSNs. Since DLA shall purchase, store, and sell these items to industrial activities, DLA shall have this data resident in EBS and shall provide visibility and updates to the Navy systems via the DLMS 832N IA Catalog Data Support transaction.

C23.3.3. EBS shall also maintain site specific materiel master records for Depot Level Repairable, Nuclear Support Consumables, or Program Owned Material (even cognizance (COG)) items to provide updates pertaining to FLIS data or user unique data elements to the FRC or NSY sites. DLMS 832N IA Catalog Data Support change transactions shall be provided to applicable sites based on FLIS updates or end user changes to user defined data elements for these items.

C23.3.4. Web-based Query. When new items are needed by any of these sites, the capability is required to create new materiel masters or update user defined data elements to existing materiel masters directly into EBS through a user unique screen. This application within EBS shall prompt users for mandatory fields and user defined fields for new entries, that may be optional depending upon the site (FRC/NSY). The screen shall allow the user to query the current EBS data base and determine if an NSN or LSN already exists within EBS.

C23.3.5. If an existing record is found, and EBS does not currently reflect the materiel master is extended to the user site, based on user response, the materiel shall be extended to the user site and an DLMS 832N IA Catalog Data Support transaction shall be sent to user site and identified as an 'ADD' record.

C23.3.6. When no record is found within EBS, the system shall query the FLIS reference master data environment (RMDE) to identify any associated NSN. Once the materiel master is created in EBS, an DLMS 832N IA Catalog Data Support transaction shall be sent to the applicable FRC or NSY site. If found, the user shall have the option to build a materiel master record created with FLIS data and any mandatory user unique

data elements in EBS based on user response/input. EBS shall then format an DLMS 832N IA Catalog Data Support transaction. This DLMS 832N IA Catalog Data Support transaction shall be identified as an 'ADD' and shall be sent to the appropriate NSY/FRC site via DLA Transaction Services.

C23.3.7. If no NSN is found in FLIS, the user shall have the option to add a materiel master identified by an EBS assigned LSN. EBS has logic that defaults specific mandatory FLIS data elements, and prompts the user for those for which a default cannot be determined. EBS shall then format an DLMS 832N IA Catalog Data Support transaction and send it to the site identified by the user and also furnish a copy to the instance of DSS at the same site.

C23.3.8. Materiel Identification. Cataloging data shall be categorized by two methods of materiel identification

C23.3.8.1. Items identified by NSN. For these, DLA shall relay FLIS catalog information in the absence of a Navy-FLIS interface. DLA shall also incorporate additional DLA/Navy unique content.

C23.3.8.2. Items identified by LSN. There shall be four configurations of LSN materiel numbers within EBS.

C23.3.8.2.1. Items Cataloged with an NSN but issued to the Navy by Unit of Use. EBS shall assign a unique LSN using the existing data associated with the original NSN. All transactions for this item shall be recorded within EBS under the LSN. There shall be a cross-reference on the materiel master from the LSN to the NSN, and on the NSN to the LSN. LSNs in this category shall use the following construct: 5975-U0-000-1234.

C23.3.8.2.2. Items Identified within a Navy System (e.g., Materiel Access Technology (MAT) or Manufacturing Resource Planning II (MRP II)) by LSN. These LSNs shall be migrated into EBS. EBS shall continue to process transactions against these numbers and modification shall be done through user unique screen application by end users. Updates shall be sent to applicable sites based on these updates. LSNs in this category shall use the following construct: 5315-LL-00-9876.

C23.3.8.2.3. Items with no current LSN or NSN assigned to the Cage and Part Number combination within EBS or FLIS. EBS shall allow end users to create a materiel master for these items via the user unique screen application and systemically assign an LSN. Updates shall be sent to applicable sites based on the initial creation and any subsequent updates based on end user input. These LSNs shall be established based on Federal Supply Classification (FSC) with a serial number range of NL00000000001 through NL99999999999.

C23.3.8.2.4. Hazardous Materiel under Regional Hazardous Inventory Control System (RHICS). For items for which a materiel master is needed to identify

hazardous materiel under RHICS, an LSN identifying the RHICS cataloged or created "LLN" numbers shall be used if no NSN is assigned.

C23.3.8.2.4.1. EBS shall search the existing data base to determine if there is an existing record of the RHICS material beginning with LLN (first 3 digits). When there is an existing materiel master, EBS shall return a DLMS 832N Catalog Data Support transaction identified as an "ADD" record containing all agreed to data elements to build a record in MAT and pass a copy to DSS.

C23.3.8.2.4.2. If no materiel master exists for the RHICS hazardous materiel, the user shall be prompted for mandatory fields and user defined fields for new entries using the RHICS data base elements. The key is that only one RHICS LLN number shall be used for like material. Thereby having only one LLN number per hazardous materiel for all users. When the query is for an LLN, the DLMS 832N Catalog Data Support transaction shall be an output transaction to MAT and a copy shall be furnished to the applicable DSS site.

C23.3.8.3. New Records. Upon creation of new materiel identification content applicable to this process, EBS shall build the materiel master, apply the catalog data to the identified sites (extend to the user sites), and format an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code AA, New Catalog Record Added, that shall be sent to the appropriate NSY/FRC site via Defense Automatic Addressing System (DAAS). EBS shall provide a copy of DLMS 832N IA Catalog Data Support transactions for items identified as LSNs to the applicable DSS site.

C23.3.8.4. Modified Records. When the user entry modifies an existing record via the user unique screen application, the user shall be prompted to save changes. This shall trigger EBS to generate a DLMS 832N Catalog Data Support transaction citing Catalog Purpose Code CC, Catalog Record Changed. This record shall contain all applicable data elements to build a record within Navy systems (allowing overlay, vice transmission of only the modified content). If the change is to an existing LSN record previously provided to a DSS site, a copy of the change shall also be furnished.

C23.3.8.5. Transaction Query. NSY sites shall have the additional capability to inquire EBS materiel master records using an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code QU, Site Query for Catalog Record, to determine if NSN or LSN or CAGE Code and Part Number combination exists in the EBS data base when there is no existing record on the internal table within the NSY Navy system.

C23.3.8.5.1. If there is an existing materiel master within EBS for the inquired NSN, EBS shall extend the materiel master to the inquiry site and return an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code AA, New Catalog Record Added, containing all mandatory data elements to build a record in the MAT system.

C23.3.8.5.2. If there is no materiel master within EBS for the inquired NSN, EBS shall inquire FLIS. When the response is positive, EBS shall build a materiel master and return an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code AA, New Catalog Record Added, containing all mandatory data elements to build a record in MAT system.

C23.3.8.5.3. If the response from FLIS for the inquired NSN is negative EBS shall return an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code NN, No record exists for NSN query. MAT shall output for manual review.

C23.3.8.5.4. If there is an existing material master within EBS for the inquired LSN, EBS shall extend the materiel master to the inquiry site and return an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code AA, New Catalog Record Added, containing all mandatory data elements to build a record in MAT system.

C23.3.8.5.5. If the response for the inquired LSN is negative EBS shall return an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code NL, No record exists for LSN query. MAT shall output for manual review. The user may at this point enter data into the EBS user unique entry screen indicating the need to create a record.

C23.3.8.5.6. If there is an existing materiel master within EBS for the inquired 'Part Number/CAGE', EBS shall extend the materiel master to the inquiry site and return an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code AA, New Catalog Record Added, containing all mandatory data elements to build a record in MAT system.

C23.3.8.5.7. If there is NO existing materiel master within EBS for the inquired 'part number/CAGE', EBS shall invoke a query to FLIS.

C23.3.8.5.7.1 When the FLIS response is positive and only one NSN is returned, EBS shall build the materiel master to the inquiry site and return an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code AA, New Catalog Record Added, containing all mandatory data elements to build a record in the MAT system.

C23.3.8.5.7.2. When the FLIS response is positive and multiple NSNs are returned, EBS shall return an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code MN: Multiple NSNs for Part Number/CAGE. MAT shall output record for manual review. The user shall determine which NSN is applicable for their use and shall have the option to inquiry against the specific NSN or build the record through the EBS on-line input.

C23.3.8.5.7.3. When the FLIS response is negative, EBS shall return an DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code NP, No NSN or LSN Found for Part Number/CAGE, to MAT for manual review.

C23.3.9. Unit of Use. Unique functionality to be added in support of the 2005 BRAC decision at the NSY and FRC sites is the ability to issue and store material at a quantity and unit of use less than the FLIS unit of issue. In these instances EBS shall apply unique logic to create a materiel master with an LSN. This record shall contain all applicable FLIS and user unique data elements copied from the original NSN. The EBS materiel master records for both the LSN and NSN shall reference each other.

C23.3.9.1. EBS shall create an LSN record for all NSN items identified with a unit of use upon data conversion as a base line. After initial conversion, these records shall be based on either a requisition alert or funded requisition from any NSY or FRC site identifying a unit of use requirement. An DLMS 832N IA Catalog Data Support transaction record shall NOT be generated to the NSY/FRC sites, but shall be forwarded to the applicable DSS site.

C23.3.9.2. The DLMS 832N IA Catalog Data Support record shall reflect the assigned LSN and Unit of Use as well as the associated NSN and FLIS unit of issue. DSS shall build an internal table cross-referencing the NSN and the associated Unit of Use LSN, FLIS Unit of Issue and the Unit of Use.

C23.3.10. Substitute Cross Reference. EBS shall provide catalog data reflecting substitute reference during the status process. This shall occur for both DLA managed substitutions and for other Service managed substitutions.

C23.3.10.1. When EBS processes a request from an NSY or FRC and determines the primary materiel identification number (e.g., NSN) is not available but an approved substitute is available, EBS shall provide 'BH' status and format an DLMS 832N IA Catalog Data Support identified as a substitute record reflecting the primary NSN and reference the substitute NSN.

C23.3.10.2. When EBS receives a 'BH' indicating DLA will be sent an item previously identified as a Navy suitable substitute for a DLA funded requisition, the status shall prompt EBS to format a DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code SN, NSN Substituted, reflecting the primary NSN and referencing the substitute NSN when a materiel master already exists in EBS.

C23.3.10.3. When a materiel master for the substitute NSN does not exist in EBS, a materiel master record shall be created. Any user unique data elements shall be copied from the primary NSN specific to that site. A DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code SN, NSN Substituted, reflecting the primary NSN and referencing the substitute NSN shall be forwarded to the applicable site for updating of Navy systems.

C23.3.10.4. EBS shall not maintain a cross reference to other service managed NSNs pertaining to Substitution.

C23.3.11. FLIS Change Notices. EBS shall be responsible for providing all change notices to the Navy BRAC 2005 SS&D sites. These change notices shall be generated as a result of FLIS data changes. Anytime a FLIS recorded data element in EBS is modified, a DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code CC, Catalog Record Changed, shall be sent to all FRC/NSY sites that the material has been extended to within EBS. The changed data element shall not be specifically identified. Each FRC/NSY system shall update internal records accordingly.

C23.3.11.1. NSN Replacement. When an NSN is specifically identified as a 'REPLACED BY' the DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code RN, NSN Replaced, and both the former and new NSN shall be identified. MAT and MRP II shall update its systems as applicable for these records.

C23.3.11.2. When an NSN is specifically identified as 'DISCONTINUED' the DLMS 832N IA Catalog Data Support transaction shall cite Catalog Purpose Code DN, NSN Discontinued; no Replacement. If a subsequent NSN is identified from the FLIS update, the DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code NS, NSN Superseded, shall contain both the former and new NSN. MAT and MRP II shall update its systems as applicable for these records.

C23.3.11.3. When an NSN is specifically identified as 'When Exhausted use' the DLMS 832N IA Catalog Data Support transaction shall cite Catalog Purpose Code RS, Use NSN When Exhausted, and both the former and new NSN shall be identified on the DLMS 832N IA Catalog Data Support transactions. MAT and MRP II shall update its systems as applicable for these records.

C23.3.12. Unanticipated Situations Impacting Catalog Transaction Exchange

C23.3.12.1. If the connection between DLA EBS and FLIS, via FLIS Portfolio Data Warehouse (FPDW) is down, EBS shall initially respond with a 'Response Delayed' status and recycle the query until the FPDW connection resumes and then provide the appropriate status at that time. This process is identified by a DLMS 832N IA Catalog Data Support transaction citing Catalog Transaction Purpose Code RD.

C23.3.12.2. If an unexpected error occurs that is not accounted for by existing response codes, a response of "Manual Action Required" shall be provided by EBS and the transaction shall output for manual review. This process is identified by a DLMS 832N IA Catalog Data Support transaction citing Catalog Transaction Purpose Code AR.

C23.4. PROCEDURES – MARINE CORPS INTERFACE.

C23.4.1. Upon data conversion, all the current local stock numbers and non-DLA managed materiel masters from the MCMC systems shall be migrated to DSS. This shall provide a base line for the materiel currently used at all MCMC sites.

C23.4.2. The catalog data shall be applicable to MCMC-assigned LSNs. Since DLA shall be storing and distributing these items to industrial activities (IAs), DLA shall have this data resident in the DSS and the MCMC shall provide visibility and updates to these LSNs via the DLMS 832N IA Catalog Data Support transaction.

C23.4.3. Web-based Query. When new items are needed by any of these sites, the capability to create new material masters or update user defined data elements to existing material masters directly into MCMC systems through a user unique screen. This application within the MCMC systems shall prompt users for mandatory fields and user defined fields for new entries, which may be optional depending upon the site application. The screen shall allow the user to query the current MCMC data base and determine if an NSN or LSN already exists.

C23.4.4. If no NSN or LSN exists in the MCMC systems, the user shall have the option to add a materiel master identified by a MCMC assigned LSN. MCMC systems have logic that shall default specific mandatory data elements, and prompt user for those for which a default cannot be determined. MCMC systems shall then format a DLMS 832N IA Catalog Data Support transaction and send to the site identified by the user.

C23.4.5. Materiel Identification. Cataloging data shall be categorized by items identified by LSN where no NSN is assigned.

C23.4.5.1. Items currently identified within MCMC systems ((Industrial Logistics Support Management Information System), and MRP II) as an LSN shall be migrated into DSS. DSS shall continue to process transactions against these LSNs and modification shall be done through user unique screen application maintained by the MCMC systems. Updates shall be sent to applicable sites based on these updates.

C23.4.5.2. For items identified by contractor and Government entity (CAGE) and part number combination (with no LSN or NSN assigned) within MCMC systems, MCMC systems shall allow end users to create a materiel master for these items via the user unique screen application and systemically assign an LSN. Updates shall be sent to applicable sites based on the initial creation and any subsequent updates based on end user input. These LSNs shall be established based on the FSC with a sequentially assigned number in the LSN NIIN.

C23.4.5.3. A cataloging action is not required to establish unit of use LSNs for NSN materiel or for non-NSN materiel previously assigned an LSN. A DLMS 846A Asset Reclassification action shall be used to re-identify the materiel and trigger the creation of an item data record under the new LSN within DSS.

C23.4.6. New Records. Upon creation of new materiel identification content applicable to this process, MCMC systems shall build the materiel master, apply the catalog data to the identified sites (extend to the user sites), and format a DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code AA, New Catalog Record Added, that shall be sent to the DSS via DLA Transaction Services.

C23.4.7. Modified Records. When the user entry modifies an existing record via the user unique screen application, the user shall be prompted to save changes. This shall trigger the MCMC system to generate a DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code CC, Catalog Record Changed. This record shall contain all applicable data elements to build a record within the DSS system (allowing overlay, vice transmission) of only the modified content

C23.4.8. Deleted Records. When the user entry deletes an existing record via the user unique screen application, the user shall be prompted to save changes. This shall trigger the MCMC system to generate a DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code DD, Catalog Record Delete. This record shall contain all applicable data elements to delete a record within the DSS system

C23.4.9. FLIS Change Notices. DSS shall be responsible for providing change notice information via catalog data support transactions to MCMC sites for changes related to the NSN itself. MCMC systems shall be updated as applicable for these records.

C23.4.9.1. NSN Replacement. When an NSN is specifically identified as a 'REPLACED BY,' the DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code RN, NSN Replaced, including the former and new NSN shall be identified.

C23.4.9.2. When an NSN is specifically identified as 'DISCONTINUED' the DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code DN, NSN Discontinued; no Replacement, shall be provided. If a subsequent NSN is identified from the FLIS update, the DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code NS, NSN Superseded, shall be provided containing both the former and new NSN.

C23.4.9.3. When an NSN is specifically identified as 'When Exhausted use' the DLMS 832N IA Catalog Data Support transaction citing Catalog Purpose Code RS, Use NSN When Exhausted, shall be provided including both the former and new NSN.

AP1. APPENDIX 1

REPORT OF VALIDATION OF MATERIEL OBLIGATIONS

1. Total overage Materiel obligations referred for validation (includes those forwarded by USAF bases to ALCs):		
a. U.S. Forces	Number	Value ¹
b. FMS and Grant Aid	Number	Value ²
2. Total cancellations requested by the requisitioner.		
	Number	Value ³
3. Total canceled by the logistics system as a direct result of the above requests: ⁴		
a. U.S. Forces	Number	Value ⁵
b. FMS and Grant Aid	Number	Value ⁶
4. Percentage of accomplishment (Line 3 divided by Line 2).		
	Percent	Percent
5. Materiel Obligation Validation requests to which the requisitioner did not respond (requisitioner failed to acknowledge receipt of requests; did not confirm that materiel obligation should be retained; and did not request suspension of automatic cancellations).		
	Number	Value ⁷

¹ All dollar values will be expressed in thousands.

² Ibid.

³ Ibid.

⁴ A materiel obligation shall not be counted as actually canceled until it is certified that the materiel will not be delivered to the requisitioner; for example, the affected elements of the logistics system have confirmed that shipment/procurement action has been stopped.

⁵ All dollar values will be expressed in thousands.

⁶ Ibid.

⁷ Ibid.

6. Total canceled by the logistics systems due to nonresponse: ⁸		
a. U.S. Forces	Number	Value ⁹
b. FMS and Grant Aid	Number	Value ¹⁰
7. Percentage of accomplishment (Line 6 divided by Line 5)	Percent	Percent
8. Reinstatement requests received: ^{11,12}		
Army	Number	Value ¹³
Navy	Number	Value ¹⁴
Air Force	Number	Value ¹⁵
Marine Corps	Number	Value ¹⁶
Other DoD	Number	Value ¹⁷
9. Reinstatements accomplished: ^{18,19}		
Army	Number	Value ²⁰
Navy	Number	Value ²¹
Air Force	Number	Value ²²
Marine Corps	Number	Value ²³
Other DOD	Number	Value ²⁴

⁸ Ibid

⁹ Ibid.

¹⁰ Ibid.

¹¹ Reinstatement requests received are measured from the ending of the prior MOV cycle to the ending date of the current MOV cycle. This report reflects cycle reinstatements.

¹² Established procedures to reinstate canceled requisitions last reported as not implemented by USN. Refer to AMCL 150C.

¹³ All dollar values will be expressed in thousands.

¹⁴ Ibid.

¹⁵ Ibid.

¹⁶ Ibid.

¹⁷ Ibid.

¹⁸ Reinstatement requests received are measured from the ending of the prior MOV cycle to the ending date of the current MOV cycle. This report reflects cycle reinstatements.

¹⁹ Established procedures to reinstate canceled requisitions last reported as not implemented by USN. Refer to AMCL 150C.

²⁰ All dollar values will be expressed in thousands.

²¹ Ibid

²² Ibid

²³ Ibid

²⁴ Ibid

AP2. APPENDIX 2

QUARTERLY INTRANSIT TO DLA DISPOSITION SERVICES FIELD OFFICE REPORT¹

AP2.1. A Quarterly Intransit To DLA Disposition Services Field Office Report is produced by DLA Disposition Services upon request. In addition, an annual report is produced at the end of each fiscal year that includes the previous four totals upon request. The report is in four parts:

AP2.1.1. Total DoD Summary

AP2.1.2. Service Summary

AP2.1.3. DoDAAC breakout (including further subdivision by DLA Disposition Services Field Office Routing Identifier Code (RIC)).

AP2.1.4. A Supplemental Invalid DoDAAC Report

AP2.2. The report shall be distributed upon request. All copies of the reports are provided to the designated DoD Component MILSTRIP Focal Points. Further dissemination of the reports is the responsibility of each individual DoD Component.

AP2.3. The format of the report and the explanation of the derivation of the counts:

Table AP2.T1. QUARTERLY INTRANSIT TO DLA DISPOSITION SERVICES FIELD OFFICE REPORT

Total DoD, Service, or DoDAAC (Clear-text name and address of the DoDAAC will be printed)							
		DLMS 940R (DIC AFX) Generated	DLMS 940R (DIC AFZ) Generated	No Response to DLMS 940R (DIC AFZ)			Unresolved Discrepancies Moved to History
	Discrepancies Cleared	Advice Code	Advice Code	30-60 Days	60-90 Days	>90 Days	
Total Matches	DLMS 945A (DIC ASZ) / DLMS 870S (DIC AE3) – BF, DE, DF, DG, DH	36 37	36 37	36 37	36 37	36 37	36 37
Note:	1. All columns show transaction and dollar totals. Show dollars in multiples of \$100.00 2. Report prepared in hardcopy shall page break after each distinct record, i.e., after each DoDAAC or Service.						

¹ Establishing intransit control procedures for shipments to DLA Disposition Services Field Offices last reported as not implemented by USAF and USMC. Refer AMCL 158B.

AP2.4. Explanation of columns in the report:

AP2.4.1. Total Matches. Reflects a count of matching DLMS 856S (DIC AS3) transactions and DLA Disposition Services Field Office receipts. Physical security/controlled inventory item totals required an exact quantity match. All other items require a quantity match within \$800 of an exact match.

AP2.4.2. Discrepancies Cleared. Reflects a count of transactions received by DLA Disposition Services Field Offices in response to DLMS 940R (DIC AFX) and DLMS 940R (DIC AFZ) follow-ups, subdivided by type of response; DLMS 945A (DIC ASZ) or DLMS 870S (DIC AE3) with Status Code BF, DE, DF, DG, or DH.

AP2.4.3. DLMS 940R (DIC AFX) Generated. Reflects a count of DLMS 940R (DIC AFX) transactions generated during the period (quarter or fiscal year) by DLA Disposition Services, subdivided by the type of condition causing a mismatch between the DLMS 856S (DIC AS3) and the DLA Disposition Services Field Office receipt.

AP2.4.4. DLMS 940R (DIC AFZ) Generated. Reflects a count of the DLMS 940R (DIC AFZ) transaction generated during the period (quarter or fiscal year) by DLA Disposition Services, subdivided by type of condition causing a mismatch between the DLMS 856S (DIC AS3) and the DLA Disposition Services Field Office receipt.

AP2.4.5. No response to DLMS 940R (DIC AFZ). Reflects a count of the DLMS 940R (DIC AFZ) transactions to which there has been no response, subdivided by number of days since the DLMS 940R (DIC AFZ) transaction was generated prior to the report preparation cutoff date; further subdivided by type of condition causing a mismatch of the DLMS 856S (DIC AS3) and the DLA Disposition Services Field Office receipt.

AP2.4.6. Unresolved Discrepancies Moved to History. Count of the transactions (records) moved from the active file to history during the period (quarter or fiscal year) that has no resolution of the discrepant condition. Documents (records) are removed from the active file to history, one year from the date of receipt of the first transaction in the record (either a DLMS 856S (DIC AS3) or a DLA Disposition Services Field Office receipt transaction).

AP3. APPENDIX 3.

SUPPLY DISCREPANCY REPORT RELEVANT DATA ELEMENTS

AP3.1. GENERAL

AP3.1.1. This appendix provides a consolidated reference resource for data elements and their associated code sets applicable to Supply Discrepancy Report (SDR) submissions and responses. These data elements are applicable in all DoD SDR applications under the DLMS. The following data elements are included in this appendix. Within the context of SDR procedures, these data elements may be recognized by abbreviated names as indicated.

- Shipping Packaging and Storage Discrepancy Code. Also referred to as Discrepancy Code.
- SDR Requested Action Code. Also referred to as Action Code.
- Discrepancy Status or Disposition (Reply) Code. Also referred to as Reply Code.
- Discrepancy Report Document Type Code. Also referred to as SDR Document Type.
- DLA Disposition Services SDR Type Code. Also referred to as Disposition Services Sub-Type.

AP3.2. SHIPPING AND PACKAGING DISCREPANCY CODES

AP3.2.1. The following codes are used to provide a description of the discrepant condition. Multiple codes may be used on a single report. Customer-prepared SDRs may use up to three discrepancy codes per SDR. SDRs associated with Distribution Depot receipts may identify up to two discrepancy codes per SDR. Preprinted codes on the face of the SF 364 may be supplemented from this list of codes. Use of the expanded list of codes is encouraged to clearly identify the discrepant situation, reduce the reliance on narrative descriptions, and facilitate capture of SDR metrics.

DISCREPANCY CODES

Condition of Materiel

- C1 In a condition other than shown on supply document or on the supporting inspection/test certificate (if hazardous material use code H1)
- C2 Expired shelf life item (if hazardous material use code H5)
- C3 Damaged U.S. Postal Service shipment (Security Assistance customers are authorized to use this code for all types of damaged shipments)
- C4 Materiel received stripped of parts or components (cannibalized) (applicable to materiel returns or repairs only)
- C5 Incomplete item received. Do not use for incomplete sets/kits/outfits (See discrepancy S9)

Supply Documentation

- D1 Supply documentation not received with materiel
- D2 Supply documentation illegible or mutilated
- D3 Supply documentation incomplete, improper, or without authority (use only when receipt cannot be properly processed)
- D4 Receiving report/Materiel Inspection and Receiving Report/Receiving Report (DD 250 or equivalent) omitted
- D5 Transportation-specific documentation discrepancy (select specific detail-level code if applicable)
- D501 Special Handling Data/Certification, DD Form 1387-2, omitted
- D502 Special Handling Data/Certification, DD Form 1387-2, incomplete or incorrect
- D503 Transportation Control and Movement Document (TCMD), DD Form 1384, omitted
- D504 TCMD, DD Form 1384, incomplete or incorrect
- D505 Shipper's Declaration for Dangerous Goods omitted
- D506 Shipper's Declaration for Dangerous Goods incomplete or incorrect
- D601 Hazardous Waste Profile Sheet omitted
- D602 Hazardous Waste Profile Sheet incomplete or incorrect
- D701 Hazardous Waste Manifest omitted
- D702 Hazardous Waste Manifest incomplete or incorrect

DISCREPANCY CODES

Billing and Financial Discrepancies (Security Assistance Only)

- B1 Requisitioned materiel received (no record of billing)
- B2 Duplicate billing
- B3 Wrong amount billed
- F1 Financial discrepancy involving Security Assistance surcharge

Hazardous Material¹

- H1 Hazardous item in a condition other than shown on supply document or on the supporting inspection/test certificate
- H2 Hazardous item in storage damaged or requires repair
- H3 Lack of a Material Safety Data Sheet (MSDS) in Hazardous Material Information Resource System (HMIRS)
- H4 Non-radioactive item classified as radioactive, or non-hazardous item classified as hazardous
- H5 Expired hazardous shelf life item

Lumber

- L1 Moisture exceeds allowable percentage
- L2 Not treated in accordance with specification
- L3 Product off grade
- L4 Improper size
- L5 Improper tally
- L6 Improper or no grade mark on product
- L7 Rotten product
- L8 Splits, excessive wane, scant, or not end trimmed (one or all)

Misdirected

- M1 Materiel improperly addressed and shipped to wrong activity

¹ Discrepancy Code H6, Shipper's Declaration for Dangerous Goods, has been re-assigned to the D-series. See D505 and D506.

DISCREPANCY CODES

Overage, Duplicate, Or Receipt of Canceled Materiel

- O1 Quantity received is more than quantity shown on the supply document.
- O2 Quantity received is more than quantity requested plus variance, if applicable (other than unit of issue or unit of pack)
- O3 Quantity duplicates another shipment
- O4 Materiel received after cancellation
- O5 Concealed overage discovered in a sealed shipping container
- O6 Overage due to unit of issue/unit of pack incompatibility (use only when requisition specified no unit of issue/unit of pack variance)

Packaging Discrepancy Codes

- P1 **Improper preservation**
- P101 Cleaning inadequate, incorrect, or omitted
- P102 Preservative inadequate, incorrect, or omitted
- P103 Barrier materiel inadequate, incorrect, or omitted
- P104 Unit pack cushioning inadequate, incorrect, or omitted
- P105 Unit container inadequate, incorrect, omitted or oversized
- P106 Desiccant incorrect, improperly located, or omitted
- P107 Tape/closure of unit container incorrect or inadequate
- P108 Hazardous materiel not removed as required
- P109 Improper preservation of hazardous materiel (includes ammunitions/explosives)
- P110 Level of protection excessive or inadequate
- P111 Minimum protection not applied (materiel returns)
- P112 Non-conformance to specified requirements for preservation (explanation required)
- P113 Electrostatic/electromagnetic device preservation inadequate or omitted
- P114 Concealed preservation defect found in storage (retail only)

DISCREPANCY CODES

Packaging Discrepancy Codes

P2	Improper packing
P201	Container inadequate, incorrect, or oversized
P202	Intermediate container inadequate, incorrect, oversized, or omitted
P203	Exterior container inadequate, incorrect, oversized, or omitted
P204	Blocking and bracing inadequate, incorrect, or omitted
P205	Cushioning inadequate, incorrect, or omitted
P206	Level of protection excessive or inadequate
P207	Container deteriorated
P208	Skids incorrect or omitted
P209	Improper packing of hazardous materials (includes ammunitions/explosives)
P210	Non-conformance to specified requirements for packing (explanation required)
P211	Improper foam-in-place
P212	Reusable container not used or improperly prepared
P213	Closure incorrect or inadequate
P214	Concealed packing defect found in storage (retail only)
P215	Non-conformance to specified requirements for wood packaging material (WPM)

Packaging Discrepancy Codes

P3	Improper markings
P301	Identification markings omitted, incomplete, incorrectly located, or not legible
P302	Improper marking of hazardous materials (includes ammunitions/explosives)
P303	Labels omitted or improperly affixed
P304	Contract data omitted, incomplete, incorrectly located, or not legible
P305	Precautionary or handling markings omitted, incomplete, or not legible
P306	Shelf-life markings omitted, incorrect, or not legible
P307	Bar code markings omitted, or not legible
P308	Incorrect lot number
P309	Set or assembly markings omitted
P310	Address incorrect or not legible
P311	Non-conformance to specified requirements for marking (explanation required).

DISCREPANCY CODES

- P312 Electrostatic/electromagnetic device markings inadequate or omitted
- P313 Packing list omitted or incorrectly located
- P314 Passive RFID tag is missing
- P315 Passive RFID tag is visibility damaged and unreadable
- P316 Passive RFID tag is present but unreadable (not visibility damaged)
- P317 Passive RFID tag read has no corresponding advance shipment notification
- P318 Passive RFID tag read duplicates previously used tag identification
- P319 Military Shipment Label (MSL), DD Form 1387, omitted; no Transportation Control Number (TCN)
- P320 MSL, DD Form 1387, improperly affixed, incorrect, or incomplete

Packaging Discrepancy Codes

- P4 Improper unitization (includes palletization and containerization)**
- P401 Cargo not unitized
- P402 Shrink/stretch wrap inadequate or omitted
- P403 Strapping inadequate or omitted
- P404 Multiple consignees in single consignee consolidation container
- P405 Protective covering/wrapping inadequate, improper, or omitted
- P406 Contents of multipack container inadequately packaged, stuffed or missing unit packs

Product Quality (Item) Deficiency (Security Assistance Only)

- Q1 Product Quality Deficiency
- Q2 Quality deficiency, contractual noncompliance
- Q3 Design deficiency, item requires change in design
- Q4 Contracting deficiency, specification, and/or technical data deficient.
- Q7 Safety hazard
- Q8 Latent defect

DISCREPANCY CODES

Quality Deficiency Receipts/Stock Screening (Distribution Depot Only)

- Q11 Returned or stock screen item, PQDR exhibit deficiency
- Q22 New procurement receipt, customer return, redistribution order or stock screen item quality deficiency, contractual non-compliance
- Q33 Returned, redistribution order, or stock screened item suspected materiel deficiency (DLA Customer Returns Improvement Initiative (CRII) items only)
- Q44 New procurement receipt, customer return, redistribution order or stock screen item contracting deficiency, for specification and/or technical data deficiency
- Q55 Item under investigation
- Q66 Customer return or stock screen item failed under use
- Q77 New receipt, customer return, redistribution order to stock screen item identified as a Critical Safety Item (CSI)
- Q99 New receipt item received for First Article Testing

Shortage or Nonreceipt

- S1 Quantity received less than quantity indicated on supply documentation
- S2 Quantity received is less than quantity requested minus variance, (other than unit of issue or unit of pack)
- S3 Total nonreceipt of U.S. Postal Service shipment.
- S4 Total nonreceipt; not transportation related. (U.S. only)
- S5 Total nonreceipt (Security Assistance only)
- S6 Shortage due to unit of issue/ unit of pack incompatibility (use only when requisition specified no unit of issue/ unit of pack variance)
- S7 Shortage or nonreceipt of an item in a multipack or sealed shipping container
- S8 Concealed shortage discovered upon opening a sealed vendor's pack (not applicable to Security Assistance)
- S9 Incomplete sets/kits/outfits (do not use to report cannibalization of Supply System Responsibility Item (SSRI), Components Of End Item (COEI), or Basic Issue Item (BII); see Discrepancy Code C4)

DISCREPANCY CODES

Technical Markings (Name Plates, Log Books, Operating Handbooks, Special Instructions)²

T1	Technical data markings missing
T2	Technical data markings illegible or mutilated
T3	Precautionary operational markings missing
T4	Inspection data missing or incomplete
T5	Serviceability operating data missing or incomplete
T6	Warranty data missing
T7	Missing part number on bare item
T9	Operating handbooks, log books, and/or special instructions missing

Unique Identification

U01	Unique identification data on label missing, damaged, or unreadable
U02	Unique identification data on item missing, damaged, or unreadable
U03	Unique identification data on supply documentation missing, damaged, or unreadable
U04	Unique identification data not provided on shipping notice
U05	Non-conformance to unique identification requirements under terms of contract
U06	Multiple containers without separate unique identification data listings
U07	Mismatch between unique identification data on item and label
U08	Mismatch between unique identification data on item and shipping documentation
U09	Mismatch between unique identification data on item and due-in or shipping notice
U10	Mismatched or missing unique identification discovered upon opening a sealed pack
U11	Materiel unidentifiable; stock number missing or damaged
U12	Duplicate unique identification

² Discrepancy Code T8 discontinued. See W7 and W8.

DISCREPANCY CODES

Incorrect Item

- W1 Incorrect item received.
- W2 Unacceptable substitute received.
- W3 Incorrect item received, but not identifiable to an NSN or part number.
- W4 Misidentified item received.
- W5 Mixed stock received.
- W6 Incorrect item discovered upon opening a sealed vendor's pack (Not applicable to Security Assistance)
- W7 Part number unmatched to FEDLOG/FLIS
- W8 Incorrect part number for NSN received

Other Discrepancies

- Z1 Other discrepancy - see remarks
- Z2 Repetitive discrepancy (must use in combination with other codes or describe in remarks; not applicable to Security Assistance)
- Z3 Distribution Depot receipt not due-in.
- Z4 No record exists for document number cited on supply document (not used by distribution depot; not applicable to Security Assistance)
- Z5 Immediate resolution/replacement of discrepant item under DLA industrial activity support agreement
- Z6 SDR resubmitted following inappropriate cancellation (must use in combination with other discrepancy codes)
- Z7 Property not authorized or not acceptable for turn-in to DLA Disposition Services.

AP3.3 SDR REQUESTED ACTION CODES. The SDR Requested Action Code is used to provide a description of the action requested by the initiator of the SDR. This data element may be referred to as the SDR Action Code. This is a two position alphanumeric code. Only one action code may be used per SDR under DLMS. Preprinted codes on the face of the SF 364 may be supplemented from this list.

SDR ACTION CODES

- 1A Disposition instructions for discrepant materiel requested; financial action not applicable
- 1B Materiel being retained
- 1C Supporting supply documentation requested
- 1D Materiel still required; expedite shipment. Not applicable to Security Assistance
- 1E Local purchase materiel to be returned at supplier's expense unless disposition instructions to the contrary are received within 15 calendar days (not applicable to Security Assistance or DLA customers)
- 1F Replacement shipment requested (not applicable to Security Assistance)
- 1G Reshipment not required; item to be re-requisitioned
- 1H No action required; information only
- 1Z Other action requested (see remarks)
- 2A Disposition of materiel and financial adjustment (credit) requested.
- 2B Materiel being retained. Financial adjustment (debit) requested.
- 2C Technical documentation/data requested.
- 2F Materiel being held for disposition instructions, request funds citation. Not applicable to Security Assistance
- 2J Financial adjustment requested
- 2K Evidence of shipment requested (Security Assistance only)
- 2L Request billing status (Security Assistance only)
- 2Z Additional information is being submitted off-line (use with electronic SDR submission only)
- 3A Transshipper (aerial/water port or CCP) requests expedited response; shipment frustrated
- 3B Discrepancy reported for corrective action and trend analysis; no reply required.
- 3C Receiving activity not authorized to accept property (pick-up by original owner required)

AP3.4 DISCREPANCY STATUS OR DISPOSITION (REPLY) CODES. Action activities use the Discrepancy Status or Disposition (Reply) Codes to codify a response to an SDR. This data element may be referred to as an SDR Reply Code. It is a three position numeric code. Up to three reply codes may be used on a single report to provide complete financial and materiel disposition instructions and provide additional information as needed. Codes may be used to replace or supplement preprinted information on the reverse side of the SF 364. System design should accommodate clear text for ease of use and interpretation.

REPLY CODES

The 100-series codes provide status of financial resolution, materiel disposition instructions, or other appropriate information:³

- 101 Credit authorized/recommended.
- 102 Credit not authorized.; see remarks.
- 105 Forward materiel received to address shown. Must use traceable and most economical means available.
- 106 Forward materiel received to contractor address shown (must use traceable and most economical means available).
- 110 Disposal authorized in accordance with local procedures.
- 111 Disposal authorized, monetary reimbursement from contractor.
- 112 Disposal authorized, contractor will provide replacement.
- 113 Provide disposal documentation to address shown.
- 114 Provide disposal documentation by date indicated to address shown. Credit will be authorized upon receipt.
- 115 Turn in materiel received to DLA Disposition Services Field Office.
- 116 Turn in hazardous materiel received to DLA Disposition Services Field Office (MIPR or bill-to DoDAAC provided to cover disposal costs).
- 117 Materiel will be billed if not returned by date indicated.
- 118 Debit authorized for materiel retained.
- 119 Retain materiel received at no charge.
- 120 Retain materiel with consideration from contractor.
- 121 Retain materiel without consideration from contractor.
- 122 Retain materiel for future supply decision.
- 123 Materiel will be reshipped (estimated date of replacement shipment provided, when known).
- 124 Materiel is no longer procurable.
- 125 Incomplete part/missing component being forwarded.
- 126 Stock not available or will not be reshipped in response to SDR.

³ Exception: Reply Codes 103, 104, 107, and 108 have been moved to interim reply grouping.

REPLY CODES

- 127 Contractor to reship.
- 128 Balance of contract materiel will not be shipped.
- 129 Reimbursement for repackaging discrepancy cannot be authorized until submitter provides cost for repackaging.
- 130 Place materiel in stock as is.
- 131 Remark/repackage materiel and place in stock.
- 132 Inspect and place in depot stock.
- 133 Upgrade materiel to Condition Code A, correction made by government with reimbursement from contractor.
- 134 Upgrade materiel to Condition Code A, correction made by government without reimbursement from contractor.
- 135 Documentation/technical data is being forwarded.
- 136 Confirmed canceled requisition shipped.
- 137 Additional comments provided; see remarks.
- 138 Shipment shortage based on pieces, weight, and cube.
- 139 Warehouse denial total shipment.
- 140 Warehouse denial partial shipment.
- 141 Duplicate shipment from stock or procurement.
- 142 Proof of Delivery/Evidence of Shipment not available.
- 143 SDR canceled by submitter.
- 144 Recorded for information only; no action taken.
- 145 No contractor liability found.
- 146 Materiel return acknowledged.
- 147 Corrected shipment document (DD Form 250) provided.
- 148 Representative will contact you for discussion concerning disposition.
- 149 Materiel will be picked up in number of days indicated.
- 150 Your requisition will be reinstated and placed on backorder.
- 151 Replacement/revised disposition/status; prior response is superseded.

The 200-series codes provide additional information relevant to Security Assistance SDRs:

- 201 Incorrect information provided by U.S. Government contract.
- 202 MAPAD information not current by U.S. Government error.
- 203 Materiel erroneously returned to U.S. Government stock.
- 204 Overage of Repair and Replace materiel.
- 205 Shortage of Repair and Replace materiel.

REPLY CODES

- 206 Administrative write-off recommended.
- 207 No financial adjustment required. Excess Defense Articles (EDA). Overage not billed.
- 208 Repaired in-country by contractor or U.S. Government personnel.

The 300-series codes indicate Distribution Depot status on SDRs forwarded to the owner/manager for action:

- 301 SDR forwarded for disposition by USA as indicated.
- 302 SDR forwarded for disposition by USAF as indicated.
- 303 SDR forwarded for disposition by USMC as indicated.
- 304 SDR forwarded for disposition by USCG as indicated.
- 305 SDR forwarded for disposition by USN as indicated.
- 306 SDR forwarded for disposition by GSA as indicated.
- 307 SDR forwarded for disposition by DLA as indicated.

The 400-series codes indicate the SDR has been closed for the reason provided:

- 400 SDR closed. Non-compliance with disposition instructions.
- 401 SDR closed. Non-response to additional information request.
- 402 SDR closed. Wrong materiel returned.

The 500-series (and some 100-series) codes indicate an interim reply:

- 103 Discrepancy report receipt acknowledgment.
- 104 Additional clarification required from customer; see remarks.
- 107 Forward materiel to address shown for inspection/exhibit analysis (must use traceable and most economical means available).
- 108 Forward materiel to contractor address shown for inspection/exhibit analysis (must use traceable and most economical means available).
- 501 SDR assigned to Defense Contract Management Agency (DCMA) for investigation.
- 502 SDR resolution deferred pending receipt of exhibit.
- 503 SDR currently under investigation.
- 504 SDR forwarded to new action activity as shown.
- 505 SDR under investigation; SDR forwarded to activity identified for additional action.
- 506 Item has been transferred to new item manager; referred to GIM for disposition.
- 507 SDR forwarded to shipping depot for Proof of Delivery.
- 508 SDR forwarded to shipping depot for Evidence of Shipment.

REPLY CODES

- 509 SDR forwarded to local procurement office for action.
- 510 SDR forwarded to Item Manager for research and/or disposition instructions.
- 511 SDR forwarded to Industrial Operations Command for action.
- 513 SDR forwarded to IL Directorate or Repair and Return Office for research of R&R case.
- 514 SDR forwarded to the packaging specialist for research.
- 515 Procurement/DCMA awaiting response from contractor; SDR suspended.
- 516 Receipt of materiel returned by customer has not posted to date; under investigation.
- 517 Defense Finance and Accounting Service (DFAS) billing information requested.
- 518 Your SDR identifies a transportation discrepancy and is being processed as a Transportation Discrepancy Report (TDR).
- 519 Your SDR identifies a quality deficiency and is being processed as a Product Quality Deficiency Report (PQDR).

The 600-series codes indicate an ICP reply to the Distribution Depot:

- 601 Change supply condition code and submit as new complaint (original complaint cannot be modified to show new supply condition code).
- 602 Item(s) unsuitable; destroy.
- 603 Remark and return to stock.
- 604 Repackage and return to stock.
- 605 Reidentify and return to stock.
- 606 Safety hazard; destroy.
- 607 Safety hazard; dispose

The 700-series codes indicate SDR rejection:

- 701 SDR rejected. See remarks.
- 702 SDR rejected. Materiel shipped as requisitioned.
- 703 SDR rejected. Overage/shortage is within contract variation clause.
- 704 SDR rejected. Evidence of shipment/proof of delivery forwarded.
- 705 SDR rejected. Records indicate the inspection or test date or this shelf-life item has been extended to date indicated.
- 706 SDR rejected. Shelf-life not applicable for this item.
- 707 SDR rejected. Acceptable substitute issued for materiel requisitioned.
- 708 SDR rejected. Materiel shipped prior to cancellation request.
- 709 SDR rejected. Discrepant quantity shipped after SDR submission.

REPLY CODES

- 710 SDR rejected. Discrepant quantity on backorder.
- 711 SDR rejected. Materiel shipped via insured/certified/registered mail. Request you contact local postal authority to verify delivery of materiel.
- 712 SDR rejected. Submit offer of materiel under materiel returns program.
- 713 SDR rejected. Discrepancy does not meet required minimum dollar value.
- 714 SDR rejected. Billing adjustments may not be requested on a SDR (except Security Assistance). Contact local finance office.
- 715 SDR rejected. Discrepancy not reported within required timeframe.
- 716 SDR recorded for information and possible corrective action.
- 717 SDR identifies a carrier discrepancy. Resubmit as a Transportation Discrepancy Report (TDR).⁴
- 718 SDR identifies a quality deficiency. Resubmit as a PQDR.⁵
- 719 SDR rejected. Duplicate of previously submitted SDR.

The 800-series codes provide additional rejection notices relevant to Security Assistance SDRs:

- 800 SDR rejected. No U.S. Government liability.
- 801 SDR rejected. No billing discrepancy exists.
- 802 SDR rejected. Bill reflects pre-positioning costs/non-recurring costs.
- 803 SDR rejected. Bill reflects contract termination charge.
- 804 SDR rejected. Item proven serviceable when shipped (repair & return, exhibits).
- 805 SDR rejected. Freight forwarder tracking system indicates materiel received. Customer should challenge freight forwarder.
- 806 SDR rejected. Repair/adjustment procedures provided by source.
- 807 SDR rejected. Materiel shipped to address specified on LOA in lieu of country.
- 808 SDR rejected. SDR does not meet latent defect criteria and is, therefore, beyond the allotted timeframe for submission
- 809 SDR returned without action. Credit cannot be granted since debit billing has not processed. (ILCO use only.)
- 810 Freight forwarder notification not submitted for total nonreceipt.

⁴ Use of this code is discouraged. Every effort should be made to process the discrepancy report and resolve the situation without requiring the initiator to resubmit. See preferred codes 518 and 519.

⁵ Use of this code is discouraged. Every effort should be made to process the discrepancy report and resolve the situation without requiring the initiator to resubmit. See preferred code 519.

REPLY CODES

The 900-series codes are intended for system/application use in processing transactions. When SDRs are processed manually, these codes may be user assigned as appropriate:

- 901 Transaction rejected. SDR submitted to wrong source of supply. Resubmit to the correct action activity.
- 902 Transaction rejected. Invalid action code for type of discrepancy submitted.
- 904 Transaction rejected. Open suffix must be closed before SDR can be reopened.
- 906 Transaction rejected. Record already closed.
- 907 Transaction rejected. Record closed, canceled, or a final reply has been provided.
- 908 Transaction rejected. Record is currently open and cannot be reopened for reconsideration until closed.
- 909 Transaction rejected. SDR must be reopened for reconsideration before it can be contested.
- 910 Transaction rejected. Missing or invalid document number (or document number/suffix).
- 911 Transaction rejected. Missing or invalid case designator.
- 912 Transaction rejected. Missing or invalid SDR number.
- 915 Transaction rejected. Missing or invalid type of discrepancy code.
- 916 Transaction rejected. Missing or invalid action desired code.
- 917 Transaction rejected. Missing or invalid discrepant quantity.
- 918 Transaction rejected. Missing or invalid quantity received.
- 920 Transaction rejected. Missing or invalid point of contact name.
- 921 Transaction rejected. Missing or invalid point of contact phone number/email..
- 923 Transaction rejected. Missing or invalid transaction date.
- 924 Transaction rejected. Narrative missing.
- 926 Transaction rejected. No record found.
- 927 Transaction rejected. Missing or invalid disposition/reply code
- 928 Transaction rejected. Missing or invalid condition code.
- 929 Transaction rejected. Missing, invalid, or unauthorized use of DoDAAC, MAPAC, or RIC.
- 930 Transaction rejected. Missing information associated with disposition/reply
- 931 Transaction rejected. Missing or invalid materiel identification.
- 932 Transaction rejected. Missing or invalid wrong item information.
- 933 Transaction rejected. SDR follow-up submitted before action activity response time has elapsed.
- 934 Transaction rejected. Forwarding action not authorized. Submit new SDR.

REPLY CODES

- 935 Transaction rejected. Forwarding action cannot be processed due to incomplete SDR history. Contact originator to resubmit with updated action activity.
- 936 SDR processing suspended. Request DoD WebSDR provide an information copy of the original report.
- 937 Transaction rejected. DoD WebSDR unable to provide requested SDR information copy.
- 938 Transaction rejected. Missing or invalid transaction set purpose code.
- 939 Transaction rejected. Missing, invalid, or inappropriate SDR document type code.
- 940 Transaction rejected. Missing either contract number or contractor-assigned shipment number on SDR associated with vendor shipment.
- 941 SDR failed during processing. SDR cannot be transmitted electronically to the designated action activity.
- 942 Transaction rejected. Unauthorized use of reply code. The 200-series reply codes may only be used for Security Assistance SDRs.

AP3.5 DISCREPANCY REPORT DOCUMENT TYPE CODES

AP3.5.1. The following codes are used to identify report categories for appropriate automated processing. Discrepancy Report Document Type Codes and DLA Disposition Services SDR Type Codes are one position alphanumeric codes.

AP3.5.2. The Discrepancy Report Document Type Code (DLMS Qualifier D) is used on SDRs to identify the type of discrepancy report and type of shipment involved. In the context of SDR processing, this data element may be referred to as an SDR Document Type; however, there are many other code values assigned that are not applicable to SDRs. This data element is mandatory on SDR transactions.

AP3.5.3. The DLA Disposition Services SDR Type Code (DLMS Qualifier ST) is used as a sub-type code in conjunction with the SDR Document Type to further clarify the shipment scenario. This data element may be referred to as an SDR Sub-Type Code. This data element is conditional; it is used when applicable.

SDR DOCUMENT TYPE CODES

Available for DoD WebSDR and Component-Sponsored SDR applications:

- 6 Customer originated, direct vendor delivery
- 7 Customer Originated, depot/lateral shipment

Restricted Use. Authorized user only:

- A Storage Site receipt, customer return/Other

- N Storage site receipt, depot shipment (RDO)
- P Storage Site receipt, vendor delivery (new procurement)
- V Customer originated, lateral shipment under TAV
- W Transshipment SDR

Available for Distribution Standard System Originated SDRs only:

- 8 Depot originated, depot receipt from non-procurement source (other than RDO)
- 9 Depot originated, vendor delivery to depot
- R Depot originated, redistribution order receipt
- D DLA Disposition Services Field Office originated⁶

DLA DISPOSITION SERVICES DOCUMENT TYPE CODES

Available for Distribution Standard System Originated SDRs only. Must use in conjunction with SDR Document Type Code D:

- B Distribution Depot shipment to a Field Office
- E Field Office Redistribution
- T DLA Disposition Services Field Office Turn-in

Available for DoD WebSDR only. Restricted Use. Must use in conjunction with SDR Document Type Code 7:

- D Disposition Services donated materiel
- F Disposition Services transferred materiel
- O Other Disposition Services shipment
- R Disposition Services reutilization
- S Disposition Services sale

Restricted. No longer available for new submissions after March 30, 2012:

- L Disposition Services DEMIL
- P Disposition Services Field Office SDR, depot shipment

⁶ SDR Document Type Code D must be used in conjunction with the applicable DLA Disposition Services Document Type Code

AP4. APPENDIX 4

INSTRUCTIONS FOR PREPARATION OF STANDARD FORM 364

AP4.1. ORIGINAL REPORT. A hard copy Supply Discrepancy Reports (SDR) shall only be used by exception under Chapter 17 guidance. When reported manually via hard copy, the following instructions for use of the [SF 364](#), Report of Discrepancy, apply.

AP4.1.1. Indicate whether shipping discrepancy or packaging discrepancy by placing an "X" in appropriate boxes at the top of the form.

- Item 1 Date of Preparation. Use month, day, and four-position year format for the date the reporting activity prepares the SDR (e.g., January 10, 2012).

- Item 2 Report Number. Provide the locally assigned report number. For Security Assistance shipments, this consists of one alpha character to identify the initiating office in-country, four numeric characters for number control, two alpha characters for the foreign customer country and three to six alphanumeric characters for the master and line item case designator, i.e., A0010-JA-KBD/001. For any unnumbered reports received, the International Logistics Control Office (ILCO) shall assign number x9000 to x9999 and so advise the foreign country customer on the receipted copy. Suffix code R added to the report number indicates the purchaser has asked for reconsideration of the report disposition. Suffix code C added to the report number indicates that the purchaser has contested the U.S. Government's decision on a request for reconsideration.

- Item 3 To. In-the-clear name, address, ZIP code and DoD Activity Address Code (DoDAAC) and/or Routing Identifier Code (RIC) (if assigned), and attention symbol/code of action activity. The action activity is based upon the origin of the shipment. If forwarding to the ICP, the RIC of the ICP is located in positions 67-69 of the DD Form 1348-1A. If forwarding to the Defense Distribution Depot, the RIC of the shipping depot is located in positions 4-6 of the DD Form 1348-1A.

- Item 4 From. DoDAAC, name, address and ZIP code of the reporting activity or Security Assistance customer (consignee). The in-the-clear address shall be entered.

- Item 5a Shipper's Name. Enter name, DoDAAC and/or RIC (for DoD activities) or commercial and government entity (CAGE) code (if available, for commercial contractor facilities), and address of shipper (consignor) when different from Item 3. If applicable, the RIC of the shipping depot is located in positions 4-6 of the DD Form 1348-1A.
- Item 5b Number and Date of Invoice. Applicable to Security Assistance billing discrepancies. Enter number and date of vendor's invoice or shipper's bill number. Attach copy of invoice to SF 364.
- Item 6 Transportation Document. Enter the type of transportation document, Transportation Control Number (TCN), Government Bill of Lading (GBL), Commercial Bill of Lading (CBL), manifest, waybill, insured/certified U.S. Postal Service, or transportation control and movement document (TCMD) and the identifying number assigned to such document. This is a mandatory entry when shipment received was made via traceable means, (e.g., GBL, CBL). Further for U.S. SDRs, for discrepancies involving shortages, include following statement in Item 12--"Shortage has been verified as not being transportation related."
- Item 7a Shipper's Number. Enter shipment number (when more than one shipment is made under a contract or requisition) and contract/contract line item number/document number (e.g., contract, purchase order). For Security Assistance, also include the shipment date to distinguish multiple shipments from a contractor source.
- Item 7b Office Administering Contract. Name, address, and ZIP code of the Contract Administration Office (CAO) activity that directed/arranged shipment.
- Item 8 Requisitioner's Number. Enter the requisitioning activity's number, (e.g., requisition, purchase request, and suffix code), if applicable. Entry of the applicable requisition document number is mandatory in all instances, even though a contract/purchase order is involved. Only one document number will be included on each SF 364. For U.S. SDRs only, when the original requisition number cannot be identified for discrepancies in sealed vendor packs, the reporting activity must include a constructed document number. When using a constructed document number in an SDR, use block 13 to cite the fund code and bill-to/credit-to DoDAAC, if different from that in the document number.
- Item 9a NSN/Part Number and Nomenclature. If item received is different from item shown on shipping documents, or different from item ordered, show each item on a separate line. For serial numbered principal items, sets, kits and outfits, list the item individual serial number first, followed by the discrepancies applicable to that serial number. (Sets,

kits and outfits showing an assembly order number, the assembly order number should also be listed.)

- Item 9b Unit of Issue. Enter unit of issue as billed or indicated on shipping document for each item listed in Item 9a.
- Item 9c Quantity Shipped/Billed. Enter quantity of item shipped or billed. When code C1 is applicable, enter the quantity and the supply condition code of the item when shipped, (e.g., 980A as shown on shipping document).
- Item 9d Quantity Received. Enter the quantity of item received.
- Item 10a Discrepancy Quantity. Enter the discrepant quantity. If code C1 is applicable, enter the quantity and the supply condition code of the item received. If total quantity received is classified under more than one condition code, enter separately each partial quantity so classified, followed by the applicable condition code, (e.g., 960A, 20F).
- Item 10b Discrepancy Unit Price. Enter the unit price as billed or shown on shipping document.
- Item 10c Discrepancy Total Cost. For shipping discrepancies, enter the total value of materiel (10a x 10b). For U.S. SDR packaging deficiencies, enter total cost for corrective packaging of all discrepant items. For SDRs reporting both a packaging and a shipping discrepancy on the same item, enter on separate lines both the total value of the materiel and the total cost for corrective packaging.
- Item 10d Discrepancy Code. Nature of the discrepancy using the applicable discrepancy code. See Appendix 3 for discrepancy codes that supplements those listed on the face of the form. If a condition exists that is not listed, use code Z1 and describe discrepancy in Item 12, Remarks. Use up to three discrepancy codes. When Discrepancy Code Q1, Product Quality Deficiency, or C2, Expired Shelf Life, is applicable, enter the following information under Item 12, Remarks:
1. Manufacturer's name and commercial and government entity (CAGE) code (if available).
 2. Contract/purchase order number if not shown in Item 7a.
 3. Date manufactured, date cured, date assembled, date packed (apply one as appropriate), and expiration date for Type I (nonextendible) shelf-life items and inspection or test date for Type II (extendible) shelf-life items. Include the date overhauled/rebuilt if pertinent.
 4. Lot/batch number.

5. Location of materiel.
6. Name, address, and telephone number of point of contact.
7. Nature of complaint stating in detail why materiel is unsatisfactory.

Item 11 Action Code. Nature of the action requested identified by action code. See Appendix 3 for action codes that supplements those listed on the face of the form.

Item 12 Remarks.

General Conditions. Use for any supplemental information when the combination of discrepancy codes and action codes needs clarification; when discrepancies need explanation; and when a breakdown of cost to report, in terms of labor man-hours and materials, is required. Specific data such as appearance, lot/batch number, manufacture/packaging date, inspector number and inspection date, probable cause of improper packaging, and suggested corrective action should be entered here. Provide photos where it would assist in determining the cause/validity of the discrepancy/deficiency.

Information Contact. Include name and communication numbers, (e.g., DSN and commercial telephone numbers, facsimile number, and e-mail address) of the person to be contacted for additional information if different from that entered in Item 14a.

Discrepancies in Sealed Vendor Packs. Enter, if available, the contract number and lot number from the item package and the words "concealed discrepancy found upon opening sealed vendor pack," or cite the appropriate discrepancy code.

Special conditions. For shortages or nonreceipt of GSA items shipped via U.S. Postal Service--cite whether all packages shown as shipped in Item 5 of GSA or DD Form 1348-1A were received. For medical materiel requiring refrigeration or frozen storage--cite the information requested on the special instruction sheet, which is included with shipments of such materiel. For classified materiel--cite whether indications of container tampering were or were not evident; indicate whether a security deviation inquiry may be necessary at the origin.

Security Assistance SDRs. Cite the specific violation of specification, regulation, packaging instruction, or contract.

Item 13 Funding and Accounting Data. (Not applicable to Security Assistance SDRs.)

For packaging discrepancies, the accounting/appropriation fund cite may be entered in this block by the SDR initiator if reimbursement funds/credits are expected for costs incurred to correct reported deficiencies. Use only when a billing document such as the SF 1080, Voucher for Transfer Between Appropriation and/or Funds, will not be prepared.

When using a constructed document number under authorized SDR procedures and prior coordination with the applicable Component finance office (Code U in the first position of the constructed document number serial number (DLMS Utilization Code U) per MILSBILLS procedures), include fund code and credit-to/bill-to DoDAAC, to ensure that credit/billing is appropriate.

Item 14a Typed or Printed Name, Title, and Phone Number of Preparing Official. Self-explanatory. Include both full commercial, DSN, and facsimile communication numbers and e-mail address, if available.

Item 14b Signature. Self-explanatory.

Item 15 Distribution Addressees for Copies. Enter other addressees receiving copies of the report. Not applicable to Security Assistance SDRs.

AP4.2 SUPPLY DISCREPANCY REPORT REPLY. The reverse of SF 364 shall be completed by the action activity as required by this publication.

Item 16 From. The name, DoDAAC and/or RIC, and address of the activity preparing the reply.

Item 17 Distribution Addressees for Copies. Enter addressees (including DoDAAC and/or RIC (if assigned)) receiving copies of the reply in addition to addressee listed in Item 18.

Item 18 To. Enter address (including DoDAAC and/or RIC (if assigned)) of the activity indicated in Item 4 on face of the form. For Security Assistance, use the address for the appropriate ILCO.

Item 19 Enter action taken by responsible action office by placing an "X" in appropriate box(es). Do NOT check box 19f(2) for U.S. SDRs; the regulation(s) citation(s) applies only for shipments to Security Assistance customers. Also, see instructions for Item 23.

Item 20 Enter disposition instructions by placing an "X" in appropriate box(es). Also, see instructions for Item 23.

Item 21 Enter an "X" to indicate to the reporting activity that a new requisition is required if the materiel is still needed. Also, see instructions for Item 23.

Item 22 Enter an "X" to indicate a replacement shipment will be made and the approximate shipment date. Also, see instructions for Item 23.

Item 23 Remarks

General Conditions. Enter any clarification or information necessary for a complete reply. Enter corrective action taken to preclude future packaging discrepancies and/or record the SDR reply code (Appendix 3). This code and applicable narrative may be used rather than marking equivalent boxes for Items 19, 20, and 21.

Item 24a Typed or Printed Name and Phone Number of Preparing Official. This is the individual authorized to provide an SDR response. Include both DSN and full commercial telephone numbers.

Item 24b Signature. Self-explanatory.

Item 24c Date. Use month, day, and four-position year (e.g., January 10, 2012).

AP4.3. SUPPLY DISCREPANCY REPORT FOLLOW-UPS, CORRECTIONS, AND CANCELLATIONS

AP4.3.1. At the top of the original report annotate the appropriate word ("FOLLOW-UP," "CORRECTION," or "CANCELLATION") and the date the follow-up, correction, or cancellation was prepared and forward to the same distribution addresses as the initial report.

AP4.3.2. Where there is any change to the point of contact information provided in block 14a of the original SF 364, enter the new point of contact name and telephone number(s) and e-mail address.

AP4.3.3. For corrected or cancelled SDRs, the initiator shall explain the clarifying data in detail in the "Remarks" block. Include the signature, date, DSN number, complete commercial telephone number, and e-mail address, if available, of the person preparing the revised report.

AP5. APPENDIX 5

INSTRUCTIONS FOR SUBMISSION OF DOD UNIQUE ITEM TRACKING PROGRAM CANDIDATES

AP5.1 ORIGINATOR

AP5.1.1. DoD Component Unique Item Tracking (UIT) Representative. Include the name, organization and office symbol, DSN and commercial telephone number, and electronic-mail address.

AP5.1.2. DoD Component. Identify the DoD Component submitting the UIT program candidate or the joint DoD Component group/committee sponsoring the program candidate.

AP5.1.3. Originator. Identify the person who can discuss the concepts, needs, and the rationale underlying the UIT program candidate. Include name, organization and office symbol, DSN and commercial telephone number, and electronic-mail address.

AP5.1.4. Program Sponsor. Include the name, organization and office symbol, and DSN and commercial telephone number, and electronic-mail address.

AP5.2. UNIQUE ITEM TRACKING PROGRAM CANDIDATE

AP5.2.1. Program Name. Enter the full name of the UIT program candidate. Spell out all acronyms.

AP5.2.2. Program Description. Provide a brief description of the UIT program and its applicability to the overall DoD UIT Program. Identify the functional area associated with the UIT program candidate, any other program which may be affected by, or have an interest in, and if applicable, cite authority documents. Identify any additional data element requirements that may be added, revised, or deleted as a result of this program.

AP5.2.3 Justification for UIT Requirement. Provide background and support for the UIT program candidate. Elaborate on the need for the UIT program candidate in a context that allows evaluators to understand the full impact of the program and the impact of not maintaining the status quo. Also, provide responses to the following questions:

AP5.2.3.1. What value does the UIT candidate program add to the DoD UIT Program?

AP5.2.3.2. What potential customers will benefit from the candidate UIT program?

AP5.2.3.3. How does the candidate UIT program contribute to the accountability and visibility of the asset being tracked?

AP5.2.3.4. Is the candidate UIT program compliant with sections C5.7. (Item Accountability, Control and Stewardship) and C5.7.3. (Unique Item Tracking) of, DoD 4140.01-R, DoD Supply Chain Materiel Management Regulation? If yes, at what level and when was compliance achieved? If no, is there a plan to become compliant with DoD 4140.01-R, sections C5.7. and C5.7.3.?

AP5.2.3.5. How many line items (NSN + UIT elements (Unique Item Identifier (UII), and/or serial number = line item) are to be tracked?

AP5.2.3.6. How many reportable line items and UIT events are to be reported?

AP5.2.3.7. What is the name and location of the AIS where the assets will be reported? What standard DLMS transactions will be used to report the assets (e.g., DLMS 527R Receipt, DLMS 856S Shipment Status, DLMS 947I Inventory Adjustment, etc.)?

AP5.2.3.8. In accordance with DoD 4140.1-R, subparagraph C5.7.3.2.3. what provisions have been made for use of AIT?

AP5.2.3.9. In accordance with Item Unique Identification (IUID) policy, IUID is a system of marking items with UIIs that have machine-readable data elements to distinguish an item from all other like and unlike items. A data matrix is used for marking. The Department of Defense requires IUID for specific categories of items. All UIT program items fall under the IUID category of serial managed assets. Accordingly, UIT program items require 2D marking in accordance with IUID policy. IUID policy and specific IUID guidance are available at <http://www.acq.osd.mil/dpap/pdi/uid/index.html>. For specific guidance on marking DoD property for IUID, refer to the current version of [MIL-STD-130](#). For items that are not currently in compliance with IUID marking policy, provide medium in use and placement of UIT identification.

AP5.2.3.10. Identify any special processing requirements. For example, for Navy depot level reparables, Navy indicated they did not want the DLA distribution depots to open the containers to verify serial number information. Such requirements should be identified and explained, as part of the program submission process. Also, identify the following:

AP5.2.3.10.1. Physical handling (e.g., whether or not to sight verify (open containers, etc.).

AP5.2.3.10.2. Proposed types of UIT events to be reported (e.g., receipt, location reconciliation, inventory adjustment (gain/loss), shipment status, etc.).

AP8.55	AV_	Notification Of Customer Nonresponse To Materiel Obligation Validation Request

⁴ Ibid.

⁵ Use of revised MOV temporary suspension procedures for selected activities last reported as not implemented by USMC. Refer to AMCL 37.

AP9. APPENDIX 9

GENERATOR COMMUNICATIONS INTERFACE STANDARD 5.0.0

AP9.1 General.

AP9.1.1. Generator Communications (GenComm) basically serves as an interpreter, allowing DLA Disposition Services to read automated data submitted from the generator's system, which meets the standard set forth in this document. Data can be submitted in bar delimited format or in XML.

AP9.1.2. GenComm allows for the electronic transfer of the Waste Profile Sheet (WPS, DRMS 1930 and the Disposal Turn-In Document (DTID, DD1348-1A) data.

AP9.1.2.1. It expedites the transfer of accountability from the Generator to the DLA Disposition Services Field Office.

AP9.1.2.2. It expedites the ultimate disposal of hazardous waste from the DoD supply chain by reducing keystroke errors and lowering data entry costs by decreasing paper handling.

AP9.2. Procedure.

AP9.2.1. The generator uses their system to create either an ASCII or an XML file.

AP9.2.2. The generator transfers their file to the GenComm server by using one of the following methods:

AP9.2.2.1. E-mail file to: gencomm@gencomm.dla.mil

AP9.2.2.2. Upload the file to: Gencomm Upload Page
(<https://www.drms.dla.mil/gencomm/GencommUpload>)

AP9.2.2.3. Use secure shell/secure FTP

AP9.2.3. Generator checks the GenComm Log file to check for problems or errors. The log file lists the WPS numbers and DTID numbers, which processed. Items rejected show the WPS/DTID number and a reason for the reject. Items rejected need to be resubmitted in a new file, with a different name. Note: the individual records reject – not the entire file.

AP9.2.4. To receive the GenComm Log file submit the following via e-mail:

AP9.2.4.1. DoDAAC

AP9.2.4.2. E-mail Address for system or individual(s) to receive the log.

AP9.2.4.3. To: <mailto:DRMSShipHQ@dla.mil>

AP9.3. File Format for Generator Communications (Version 5.0.0 – 04/17/08). The basic structure for communicating this data is to use sections and subsections in a text file. The record format for each text line is determined by a combination of its sequence in the outline and its first field.

AP9.3.1. Structure.

AP9.3.1.1. The required outline is as follows:

- File Header
- WPS Section, if any
- DTID Section, if any

AP9.3.1.2. Each WPS section is as follows:

- WPS Section Header
- WPS Subsection(s), if any
- WPS Section Trailer

AP9.3.1.2.1 Each WPS Subsection is as follows:

- WPS Record
- Chemical Composition Subsection, if any
- EPA Waste Number Subsection, if any.

AP9.3.1.2.2. Each Chemical Composition Subsection is as follows:

- Chemical Composition Section Header
- Chemical Composition Record(s)
- Chemical Composition Section Trailer.

AP9.3.1.2.3. Each EPA Waste Number Subsection is as follows:

- EPA Waste Number Subsection Header
- EPA Waste Number Record(s)
- EPA Waste Number Subsection Trailer.

AP9.3.1.3. Each DTID section is as follows:

- DTID Section Header
- DTID Subsection(s), if any
- DTID Section Trailer.

AP9.3.1.3.1. Each DTID Subsection is as follows:

- DTID Record
- DTID Container Subsection, if any
- DTID EPA Waste Code Subsection, if any
- DTID State Waste Code Subsection, if any

AP9.3.1.3.2. Each DTID Container Subsection is as follows:

- DTID Container Subsection Header
- DTID Container Record(s)
- DTID Container Subsection Trailer.

AP9.3.1.3.3. Each DTID Container Subsection is as follows:

- DTID EPA Waste Code Subsection Header
- DTID EPA Waste Code Record(s)
- DTID EPA Waste Code Subsection Trailer.

AP9.3.1.3.4. Each DTID State Waste Code Subsection is as follows:

- DTID State Waste Code Subsection Header
- DTID State Waste Code Record(s)
- DTID State Waste Code Subsection Trailer.

AP9.3.2. Fields are restricted to a maximum of the length indicated, unless noted as variable (V).

AP9.3.3. Fields will be delimited by the pipe symbol (“|”) in the bar delimited files. However, there will not be a trailing pipe (“|”).

AP9.3.4. Records will be delimited by the carriage return <CR>, technically stored as the carriage return line feed (LF) combination. This will be represented as End of Record Indicator in the record formats.

AP9.3.5. At the end of any record there are three options:

AP9.3.5.1. Continue with the next record.

AP9.3.5.2. Terminate the section or subsection with its trailer and start a new section or subsection.

AP9.3.5.3. Terminate the section or subsection with its trailer and quit (End of file).

AP9.3.6. The following codes are used in defining record formats:

- Mandatory (M)
- Optional (O)
- Alpha (A)
- Numeric (N)
- Alpha/Numeric (A/N)

AP9.4. Record Formats for Generator Communications (Version 5.0.0 - 04/17/08)

AP9.4.1. File Header Format. The header record will be followed by one or two sections: Waste Profile Sheet (WPS) Section or Disposal Turn In Document (DTID) Section. Each section can contain one or more records. A section must have a section header and a section trailer. Permissible combinations are: File Header (FH) and WPS and DTID Sections (in that order), FH and WPS Section only, or FH and DTID section only. Note: The Routing Identifier Code (RIC) SFX must be coordinated with your environmental contact to ensure proper routing.

M/ O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	DoDAAC	A/N	6	6	The Generator DoDAAC i.e. FB2020
M	Date	N	7	7	Julian date the file was created i.e. 1994332
M	Time	N	4	4	In the format HHMM
M	Form Version	A/N	5	1	DLA Disposition Services File Format version Number (will currently be 5.0.0)
M	DLA Disposition Services Filed Office RIC	A/N	4	3	DLA Disposition Services Filed Office RIC and Suffix
M	Form Version	A/N	V	1	Generator Software Release Version Number
M	End of Record Indicator				

AP9.4.2. WPS Section Header Format.

O	Basis For Information	A	4	0	USER for user knowledge LAB for chemical analysis	Part 2-6
O	RCRA Requirements	A/N	255	0		
O	Addl RCRA Requirements	A/N	255	0		Part 2-6
O	Certifier Name	A	45	0		Part 2-6
M	End of Record Indicator					

AP9.4.4. Chemical Composition Header Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style	DRMS 1930 Block # Correlating Data Elements
M	Composition Subsection Header	A/N	13	13	A constant of "beg_comp_sect"	
M	End of Record Indicator					

AP9.4.5. Chemical Composition Record Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style	DRMS 1930 Block # Correlating Data Elements
M	Chemical Name	A	60	2		Part 2-3
M	Chemical Concentration	A/N	10	1		Part 2-3
M	Chemical Range	A/N	30	2		Part 2-3
M	CAS Number	A/N	11	2	Chemical Abstract Service Number	Part 2-3
M	End of Record Indicator					

AP9.4.6. Chemical Composition Trailer Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	Composition Subsection Trailer	A/N	13	13	A constant of "end_comp_sect"
M	End of Record Indicator				

AP9.4.7. EPA Waste Number Header Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	EPA Waste No Subsect Header	A/N	12	12	A constant of "beg_ewn_sect"
M	End of Record Indicator				

AP9.4.8. EPA Waste Number Record Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	EPA HW Number	A/N	4	4	EPA HW Number i.e. D001
M	Range	N	20	2	Range of concentration
M	EPA Units	A/N	5	2	
M	End of Record Indicator				

AP9.4.9. EPA Waste Number Trailer Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	EPA Waste No Subsection Trailer	A/N	12	12	A constant of "end_ewn_sect"
M	End of Record Indicator				

AP9.4.10. WPS Section Trailer Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	WPS Section Trailer	A/N	12	12	A constant of "end_wps_sect"
M	End of Record Indicator				

AP9.4.11. DTID Section Header Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	DTID Section Header	A/N	12	12	A constant of "beg_dtid_sect"
M	End of Record Indicator				

AP9.4.12. DTID Record Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	Federal Supply Class	N	4	4	
M	NIIN/Local Stock Number	A/N	9	5	
O	Additional Data	A/N	2	0	
M	Document Number	A/N	15	14	Disposal Turn In Document Number
M	Unit of Issue	A	2	2	
M	Quantity	N	5	1	
O	Disposal Authority Cd	A	1	0	M=Approved, N=Not Reqd., R=Auth. Received
M	Hazardous Waste/Mat Code	A	1	1	"W" for hazardous and non-regulated waste, "M" for hazardous material, and "N" for all other property turn-ins to DLA Disposition Services Field Office
M	Unit Price	N	5.2	1	NNNNN.NN (Acquisition Unit Price)
M	Item Nomenclature	A/N	60	2	
M	Supply Condition Code	A	1	1	
M	Demil Code	A	1	1	
O	Accumulation Start Date	N	7	0	Julian Date i.e. 1994320
O	Waste Profile Sheet No	A/N	20	0	
O	MSDS Number	A/N	15	0	
O	Receipt Manifest Number	A/N	17	0	Only used for property received at the DLA Disposition Services Field Office from an off-site facility. Put in the 12 digit EPA Manifest Number.
O	Type of Container	A/N	60	0	
O	Total Wt/Vol	N	6	0	
O	Wt/Vol Code	A	1	0	P= Pounds, T= Short Tons (2000 LB), G= Gallons, Y= Cubic Yards, K= Kilograms, M= Tonnes (1000KG), L= Litres, C= Cubic Meters
O	Org Code	A/N	6	0	
O	Building	A/N	6	0	
O	Type Operation	A	60	0	i.e. Motor Pool, Spill Residue, Degreasing etc.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	Contact Name	A	18	4	
M	Contact Phone	A/N	21	4	
O	Waste Description line 1	A/N	60	0	
O	Waste Description line 2	A/N	60	0	
O	Waste Description line 3	A/N	60	0	
O	Waste Description line 4	A/N	60	0	
O	Contract Number	A/N	13	0	
O	CLIN/HIN	A/N	6	0	
M	Total Disposal Cost	N	5.2	4	NNNNN.NN
M	Fund Code	A/N	2	2	
O	Bill to DoDAAC	A/N	6	0	
O	Pickup DoDAAC	A/N	6	0	
O	Number of Containers	N	4	0	Count of containers in DTID
M	End of Record Indicator				

AP9.4.13. DTID Container Header Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	Container Subsection Header	A/N	13	13	A constant of "beg_cont_sect"
M	End of Record Indicator				

AP9.4.14. DTID Container Record Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	Document Number	A/N	15	14	Disposal Turn In Document Number
M	Container Number	A/N	15	4	Alias "Drum Number"

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
O	Storage Location Code	A/N	9	0	Location within the building
O	Container WT/VOL	N	6	0	
O	Accumulation Start Date	N	7	0	Julian Date i.e. 1994320
M	End of Record Indicator				

AP9.4.15. DTID Container Trailer Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	Container Subsection Trailer	A/N	13	13	A constant of "end_cont_sect"
M	End of Record Indicator				

AP9.4.16. DTID EPA Waste Code Header Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	EPA Waste Code Subsection Header	A/N	16	16	A constant of "beg_dtidepa_sect"
M	End of Record Indicator				

AP9.4.17. DTID EPA Waste Code Record Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	Document Number	A/N	15	14	Disposal Turn In Document Number
M	DTID EPA Waste Codes	A/N	4	4	EPA waste code for DTID
M	End of Record Indicator				

AP9.4.18. DTID EPA Waste Code Trailer Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	EPA Waste Code Subsection Trailer	A/N	16	16	A constant of "end_dtidepa_sect"
M	End of Record Indicator				

AP9.4.19. DTID State Waste Code Header Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	State Waste Code Subsection Header	A/N	16	16	A constant of "beg_dtidsta_sect"
M	End of Record Indicator				

AP9.4.20. DTID State Waste Code Record Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	Document Number	A/N	15	14	Disposal Turn In Document Number
M	DTID State Waste Codes	A/N	10	4	State waste code for DTID
M	End of Record Indicator				

AP9.4.21. DTID State Waste Code Trailer Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	State Waste Code Subsection Trailer	A/N	16	16	A constant of "end_dtidsta_sect"
M	End of Record Indicator				

AP9.4.22. DTID Section Trailer Format.

M/O	Field Name	A, N or A/N	Field Length	Min Field Length	Example, Format or Style
M	DTID Section Trailer	A/N	13	13	A constant of "end_dtid_sect"
M	End of Record Indicator
