the BUSINESS SITUATION

ON the basis of information available as of mid-September, it appears that the third-quarter increase in real GNP was a little less than the second-quarter increase, and that the increase in GNP prices was about the same. The auto strike started too late in the quarter to affect the third-quarter GNP materially.

The information that sheds light on the third-quarter GNP is limited to 1 or 2 months of the quarter, and in some cases is preliminary. The major sources are: for inventories, July book values for manufacturing and trade, and unit auto inventories through August; for personal consumption expenditures (PCE), July and August retail sales, and unit sales of autos through the first 10 days of September; for nonresidential fixed investment, the same information for autos, July construction put in place, July shipments of equipment, July and August sales of trucks, and business investment plans for the quarter as a whole; for residential investment, July construction put in place and July and August housing starts; for net exports of goods and services, July merchandise trade; for government purchases of goods and services, Federal expenditures for July, State and local construction put in place for July, and State and local employment for July and August; and, for GNP prices, the Consumer Price Index and the Wholesale Price Index for July and August. Some of this information is shown in table 1.

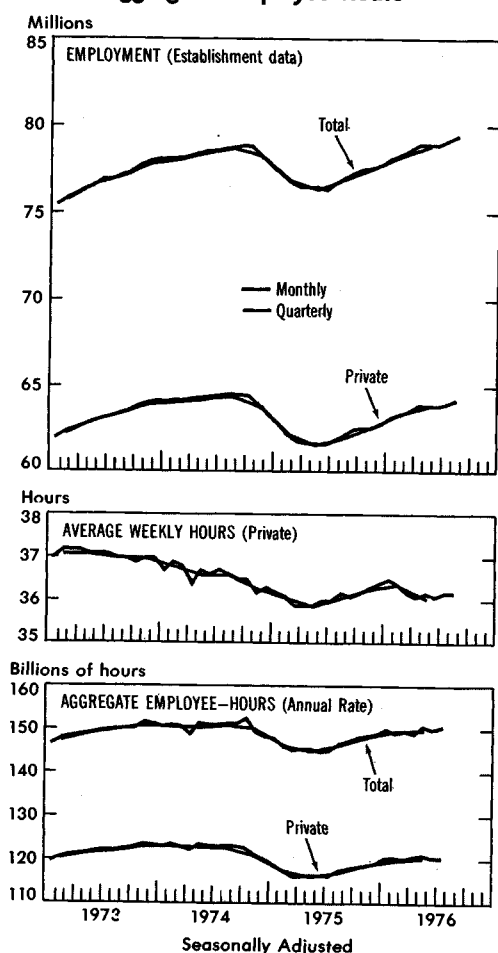

The third-quarter increase in real GNP was in final sales. Inventory investment was at about the same rate as in the second quarter, assuming moderate August and September increases in nonfarm inventories for which no information is available. PCE increased a little more in the third quarter than in the second. This conclusion is based on the very large increase in August retail sales, and holds if the September change turns out to be small. A moderate increase in nonresidential fixed investment is indicated by the most recent BEA plant and equipment Survey, which is reviewed later in this issue. This conclusion assumes a repetition of recent shortfalls

of actual plant and equipment outlays from plans. However, even if plans are taken at their face value, they do not indicate the long-awaited takeoff in capital outlays. The increase in residential investment decelerated. The underlying starts and permits data are discussed later in this issue. For net exports and for government purchases, no abrupt changes are indicated by the information at hand. As explained in the July issue of the SURVEY, the shift in the beginning of the fiscal year from July 1 to October 1 makes it particularly difficult to evaluate current changes in Federal expenditures.

The increase in food prices continued to be small. Energy price increases accelerated sharply in the third quarter, if it is assumed that some further increases in these prices occur in September. Mainly reflecting energy prices, the average of prices paid by consumers accelerated. The average of all other GNP prices rose a little less than in the second quarter.

Unemployment and labor input.—As shown in the tabulation below, if August is taken as representative of the third quarter, the civilian labor

Average weekly hours (hours)....	-.3	.1
Aggregate hours (billions, at annual rate).....	.54	.32

NOTE.—Based on seasonally adjusted data.

force registered another unusually large increase. However, employment increased much less than in the second quarter and, as a result, unemployment and the unemployment rate increased after having decreased in the second quarter.

The recent rise of the unemployment rate—from 7.3 percent in May to 7.9 percent in August—has led to a renewal of the discussion of the difficulties of adjusting the rate for seasonal variation. However—unlike in the months when the unemployment rate declined from last year's peak—the “additive” and the “residual” methods, which are the major alternatives to the method used in calculating the official rate, showed changes similar to those shown by the official rate.

	Official	Additive	Residual
1976: January.....	7.8	8.2	8.2
February.....	7.6	7.9	7.9
March.....	7.5	7.7	7.7
April.....	7.5	7.4	7.5
May.....	7.3	7.1	7.2
June.....	7.5	7.5	7.4
July.....	7.8	7.7	7.6
August.....	7.9	7.8	7.8

A somewhat broader difficulty has to do with the separation of the seasonal and cyclical movements when, as in recent years, the latter are large. These difficulties affect not only the calculation of the unemployment rate and of other labor measures, but also of GNP and many other economic series.

To discuss aggregate hours, the establishment data for the private nonfarm economy are used, because

they provide consistent employment and average hours information (chart 1). Employment in the third quarter increased less than in the second according to these data also, but the slowdown was not as pronounced as in the household data. (The two employment series differ for definitional and statistical reasons.) Even though average weekly hours were up slightly in the third quarter after declining in the second, aggregate hours showed a somewhat smaller increase in the third quarter than in the second. This information is highly tentative, as is the information on real GNP. However, in combination with the latter, it suggests that the performance of productivity in the third quarter was not as favorable as in the second.

1. Gasoline and motor oil, fuel oil and coal, and gas and electricity weighted by their December 1975 relative importance.

2. Figures are percents, not percent changes.

Personal consumption and income

As noted earlier, the acceleration of real PCE in the third quarter reflects the large increase in August retail sales. The August increase followed several months in which retail sales showed little strength, and although

encouraging, this one increase should not be regarded as conclusive evidence that vigorous growth has resumed.

The acceleration of real PCE was in durable goods, and extended to all three major categories—motor vehicles and parts, furniture and household equipment, and other durables (chart 2). In nondurable goods, only expenditures on clothing and shoes showed larger increases in the third quarter than in the second. Expenditures on food, which had increased sharply in the second quarter, rose only moderately in the third.

If August is taken as representative, the increase in personal income was \$27½ billion (annual rate)—somewhat less than in the second quarter. A somewhat smaller increase in wages and salaries and a swing in farm proprietors' income from an increase to a decrease were about offset by an opposite swing in transfer payments and a larger increase in personal interest income. The deceleration in wages and salaries was concentrated in manufacturing and trade, and reflected mainly a tapering of manufacturing production and the flattening of retail trade prior to August. The main factor in the swing in farm proprietors' income was livestock prices, which had increased sharply in the second quarter and returned to about their first-quarter level in the third. Most of the third-quarter spurt in transfer payments—\$4½ out of \$5 billion—was due to the 6.4 percent cost-of-living increase in social security benefits that became effective in July.

Personal tax and nontax payments, and therefore disposable personal income, also increased by similar amounts in the two quarters. However, real disposable personal income increased less—about 3 percent at an annual rate as compared with 4½ percent in the second quarter. This deceleration reflected the more rapid third-quarter increase in prices paid by consumers.

ments—were up \$1½ billion at a seasonally adjusted annual rate from the first quarter. Compared with the preliminary figures issued last month, the second-quarter total was revised up \$1 billion; most of the revision was in profits from abroad.

On the revised basis, domestic profits of nonfinancial corporations increased \$2½ billion. Gains in durable manufacturing more than accounted for the increase. Most industries in durable manufacturing showed increases; the largest were in motor vehicles and primary metals. Most industries in nondurable manufacturing showed decreases; the largest were in food and petroleum. Profits in both retail and wholesale trade were down. Changes in other nonfinancial industries were small. Both domestic profits of financial corporations and profits from abroad declined.

Before-tax book profits were up \$5 billion. These profits differ from profits from current production for two reasons. First, they reflect tax-return based capital consumption allowances, rather than "economic" capital consumption allowances, which are based on uniform service lives and depreciation formulas and replacement cost valuation. Second, they include inventory profits, which arise when inventories used up are valued at historical rather than at replacement cost. Inventory profits, which amounted to \$11½ billion in the first quarter and \$14½ billion in the second, accounted for most of the difference between the second-quarter change in before-tax book profits and that in profits from current production.

The increase in inventory profits reflected the turnaround in wholesale prices of farm products and processed food in the second quarter. In the first quarter, wholesale prices declined and inventory losses were registered on withdrawals of farm and food products from inventories held by manufacturing and trade. In the second quarter, these prices increased and inventory profits were registered. Inventory profits on stocks of goods other than farm and food products were somewhat less in

1. Equals GNP in constant dollars measured as the sum of final products less GNP in constant dollars measured as the sum of gross product by industry. The quarterly estimates are obtained by interpolating the annual estimates with the statistical discrepancy deflated by the implicit price deflator for gross domestic business product.

NOTE.—Table 2: "Final sales" is classified as durable or nondurable by type of product.

"Change in business inventories" is classified as follows: For manufacturing, by the type of product produced by the establishment holding the inventory; for trade, by the type of product sold by the establishment holding the inventory; for construction, durable; and for other industries, nondurable.

Table 3: The industry classification within the business sector is on an establishment basis and is based on the 1967 Standard Industrial Classification.

1. In February 1974, the U.S. Government paid to India \$2,010 million (quarterly rate) in rupees under provisions of the Agricultural Trade Development and Assistance Act. In the national income and product accounts, this payment is included in capital grants received by the United States (net); in the balance of payments accounts, it is included in unilateral transfers (excluding military grants of goods and services), net. Accordingly, this payment is excluded from Federal Government transfers to foreigners and related totals shown in tables 12, 14, and 15, and is included in the first quarter of 1974 as -\$8.0 billion (annual rate) in capital grants received by the United States (net) shown in tables 14 and 15.

2. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories shown in this table is not the current-dollar change in business inventories (CBI) component of GNP. The former is the difference between two

inventory stocks, each valued at end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

3. Quarterly totals at annual rates.

4. Equals ratio of nonfarm inventories to final sales of business. These sales include a small amount of final sales by farms.

NOTE.—Table 16: Inventories are classified as durable or nondurable as follows: For manufacturing, by the type of product produced by the establishment holding the inventory; for trade, by the type of product sold by the establishment holding the inventory; for construction, durable; and for other nonfarm industries, nondurable. The industry classification is based on the 1967 Standard Industrial Classification.

Gross national product.....	116.41	127.25	124.55	125.93	128.07	130.27	131.29	132.96
Personal consumption expenditures.....	116.9	126.3	123.7	125.1	127.3	129.1	130.3	131.7
Durable goods.....	108.3	117.7	115.1	117.1	118.2	120.2	121.8	123.8
Nondurable goods.....	124.0	133.7	131.2	132.1	135.1	136.2	136.4	136.9
Services.....	113.5	122.7	119.7	121.5	123.6	125.9	128.0	129.8
Gross private domestic investment.....	117.7	132.4	129.9	131.9	132.7	134.9	137.0	139.0
Fixed investment.....	116.1	132.1	129.4	131.8	132.7	134.5	136.2	137.5
Nonresidential.....	128.7	141.6	141.6	141.5	141.4	142.0	143.3	145.0
Producers' durable equipment.....	110.0	127.4	123.5	127.1	128.3	130.8	132.8	133.8
Residential.....	122.3	133.2	131.5	132.1	132.8	135.9	139.0	142.9
Nonfarm structures.....	122.8	133.7	132.1	132.7	133.3	136.4	139.6	143.4
Farm structures.....	122.8	133.6	130.9	131.6	132.6	136.2	138.8	143.8
Producers' durable equipment.....	105.3	116.3	113.6	115.6	117.0	118.8	120.1	122.4
Change in business inventories.....	117.7	132.4	129.9	131.9	132.7	134.9	137.0	139.0
Net exports of goods and services.....	148.6	163.4	163.4	163.0	163.4	163.7	164.6	168.1
Exports.....	169.6	187.4	188.9	186.9	186.6	187.3	189.2	190.4
Imports.....	118.3	129.9	126.7	128.6	130.8	133.4	135.4	137.3
Government purchases of goods and services.....	117.1	130.0	126.8	128.4	130.4	134.2	135.4	136.7
Federal.....	119.0	129.8	128.5	128.7	131.0	132.9	135.4	137.7
State and local.....	119.0	129.8	128.5	128.7	131.0	132.9	135.4	137.7

1. Consists of the following industries: Banking; credit agencies other than banks; security and commodity brokers, dealers, and services; insurance carriers; regulated investment companies; small business investment companies; and real estate investment trusts.

NOTE.—Tables 17 and 18: The industry classification of compensation of employees, proprietors' income, and rental income is on an establishment basis; the industry classification of corporate profits and net interest is on a company basis. The industry classification of these items is based on the 1967 Standard Industrial Classification.

Change in business inventories of new and used autos.....								
Addenda:								
Domestic output of new autos ¹	106.0	115.0	111.7	114.3	115.4	118.1	120.2	121.0
Sales of imported new autos ²	105.8	115.0	112.0	114.5	115.1	118.0	120.4	121.2

1. Consists of final sales and change in business inventories of new autos produced in the United States.

2. Consists of personal consumption expenditures, producers' durable equipment, and government purchases.

NOTE.—Table 21: "Final sales" is classified as durable or nondurable by type of product. "Change in business inventories" is classified as follows: For manufacturing, by the type of product produced by the establishment holding the inventory; for trade, by the type of product sold by the establishment holding the inventory; or construction, durable; and for other industries, nondurable.

Tables 22 and 24: The industry classification within the business sector is on an establishment basis and is based on the 1967 Standard Industrial Classification.

Housing Activity in the Recent Recovery

IN the housing recovery that began after combined construction starts and mobile home shipments hit their low in the first quarter of 1975, single-family construction accounted for more than a proportionate share. Recently, however, single-family construction activity appears to have flattened, and the slack has not been picked up by either multiunit construction or mobile home shipments. Some signs of the conditions prerequisite to the acceleration of multiunit construction and mobile home shipments are visible, but they are as yet rather tentative and spotty.

Single-family construction

On a quarterly basis, the recovery in starts and permits of private single-family homes proceeded uninterrupted through the first quarter of 1976. Since then erratic month-to-month movements have made it difficult to discern the extent of the recovery's continuation. Single-family homes were started at an annual rate of 1,121,000 units in the first quarter of 1976, up 51 percent from the first quarter of 1975. They declined to 1,086,000 units in the second quarter, but picked up to an average of 1,162,000 units in July and August (table 1 and chart 3). In the first quarter of 1976, permits, at an annual rate of 865,000 units, were 63 percent higher than a year earlier. They declined to 813,000 units in the second quarter, but strengthened to an average of 886,000 units in July and August.

Sales of new one-family houses in the first quarter, at a seasonally adjusted annual rate of 608,000 units, were 39 percent above the first quarter of 1975. However, they were off from the fourth

quarter of 1975, the last quarter in which purchases under the housing tax credit could be made. In the second quarter, sales declined further, to an annual rate of 584,000 units. Largely reflecting these changes in sales, the ratio of houses for sale to houses sold has moved from 10.8 in the first quarter of 1975 to 7.7 in the first quarter of 1976, and to 8.3 in the second quarter. Throughout this period, the inventory of unsold houses was high—around

390,000 units—and tended to move up. In July, the median number of months from start to sale of a one-family house was 3.6, and the median number of months a completed house remained in inventory was 10.2. The difference between the two medians indicates that the market for such houses continued to be two-tiered; the slowly selling older inventory, mostly located in areas of prior overbuilding did not significantly impede sales in other areas.

CHART 3

Housing Starts and Mobile Home Shipments

U.S. Department of Commerce, Bureau of Economic Analysis

Data: Census
76-9-3

Prices of new one-family houses have increased sharply. As a result, the ability of a family with a median income to purchase a new house with a median price has deteriorated. The ratio of the median sales price to median family income rose from 2.48 in 1972 to 2.86 in 1975, the latest year for which median income is available. The faster increase in housing prices than in income is likely to have constrained the demand for new houses.

Mortgage interest rates have remained high, despite the strong net flow of savings into thrift institutions through July. So far in 1976, the rate for conventional mortgages on new homes did not drop below 8.90 percent, and in August stood at the upper end of its range, at 9.05 percent. Other mortgage terms—amortization period and loan-to-price ratio—have shown little change. These financial terms, combined with high home prices, have resulted in high and rising monthly mortgage payments.

In January, the outlook for single-family construction had been brightened by the lifting of the moratorium on commitments under Section 235 of the 1968 Housing and Urban Development Act. Section 235 was originally established to subsidize the interest charges on mortgages insured by the

Federal Housing Administration. The lifting of the moratorium restored \$264 million of spendable funds to the Department of Housing and Urban Development (HUD), of which \$100 million has already been distributed to field offices, and the balance is to be distributed by the end of 1978. However, builders showed little interest in the reactivated program during the first two quarters of 1976. There were only about 15,000 preliminary builder reservations or obligations, apparently because the maximum mortgage was low in comparison to the sales price of new houses. In August, Congress raised the maximum mortgage an average of 16 percent. This change should stimulate greater interest in the program. According to a HUD estimate, with the existing contract authority, 270,000 single-family houses could be financed under Section 235 by 1980.

Mobile home shipments

The recovery of mobile home shipments has been interrupted. In the first quarter, they were at a seasonally adjusted annual rate of 265,000 units—up 32 percent from the first quarter of 1975—but dropped to 243,000 units in the second quarter, and to 224,000 units in July.

An important factor handicapping the recovery of mobile home shipments was the high delinquency and repossession rates of the preceding few years. From March 1972 to March 1974, the delinquency rate—the percentage of mobile home loans outstanding with payments overdue for at least 30 days—increased from 1.97 to 4.34 percent. From January–February 1972 to January–February 1974, the repossession rate increased from 4.52 to 7.21 per 1,000 loans outstanding. The resulting large supply of repossessed mobile homes continues to depress the market for new mobile homes, and the high delinquency rate led to tighter credit standards, which reduced lending from what it otherwise would have been.

Despite these problems, long-term prospects of the mobile home industry are favorable. The relatively low cost of mobile homes makes them increasingly popular among middle income persons who have been deterred by high prices from conventional housing. In the third quarter of 1975, the average price per square foot of a mobile home was \$12.16, about 40 percent less than the average price per square foot of a site-built house exclusive of the value of the lot. Also, mobile homes are being manufactured to be similar to site-built houses in

quality, appearance, and permanence. Further, many States are considering changing the status of mobile homes from personal to real property, and subjecting them to real estate taxation. Although this move would raise the cost of owning a mobile home, it might lessen the reluctance of revenue-minded community planners to zone more land for mobile home placement. Classification of mobile homes as real property would also increase the willingness of lending institutions to offer conventional long-term mortgages to finance purchases of these homes, and consequently lower the monthly payment on them. (The reduction of the monthly payment would be due to the lengthening of the average term of the loan and—because mortgage finance charges are based on a diminishing balance, whereas personal property finance charges are based on the amount of the original loan for the entire term of the loan—the cutting of the effective interest rate.)

From the first quarter of 1975 to the first quarter of 1976, the median sales price of new one-family houses sold increased 12 percent, to \$42,800. This increase is 4 percentage points more than the corresponding increase in the price index of new one-family houses sold. The index controls for variations in the quality of houses sold by measuring changes in the price of houses that are the same with respect to eight physical characteristics as houses sold in 1967. Even if allowance is made for statistical imperfections, the difference between the rates of increase in the two measures suggests an increase in the quality of new houses, although the difference probably overstates the quality increase for two reasons. First, the index does not control for changes in lot size, an important dimension of quality, which appears to have declined. Second, part of the increase in the median sales price is due to a mix effect stemming from the increased concentration of sales in the West, where new house prices are relatively high. Thus, this limited evidence does not suggest that builders have marketed more lower-cost "no-frills" houses to bring more houses within potential owners' reach.

The Federal Government is giving more recognition to the mobile home industry as a supplier of housing. On June 15, mandatory Federal standards on safety and quality became effective. Although compliance with these standards is expected to raise the capital cost of a mobile home—HUD estimates \$390 per unit—it is expected to reduce operating costs and, by increasing the useful life of mobile homes, also their depreciation rate. In addition, the Housing Authorization Act of 1976 included mobile homes that are purchased with a lot in the definition of housing units for the purposes of the Section 235 homeownership assistance program.

Multiunit construction

Judging from the number of units started, multiunit housing has recovered little of the ground lost during the contraction. In the first quarter of this year, starts of private multiunit structures were at a seasonally adjusted annual rate of 280,000 units, up only 18 percent from a year earlier. They increased to 347,000 units in the second quarter, but fell back to an average of 304 units in July and August. In contrast, first-quarter permits were at a seasonally adjusted annual rate of 301,000 units, up 58 percent from the first quarter of 1975, and thereafter continued up, to 317,000 units in the second quarter and to an average of 371,000 units in July and August. Although there are many pitfalls in the interpretation of these data, the stronger performance of permits suggests an improvement in multiunit construction.

Surveys by the Institute of Real Estate Management show that average operating expenses of rental buildings increased 26 percent from 1972 to 1975, while the average rent increased only 13 percent. The resultant shrinkage of profit margins discouraged potential builders and increased the reluctance of lenders to finance such construction.

Rents did not increase enough to maintain the profit margins. In part, the sluggishness of rents reflects the over-supply of rental units built during the construction boom of the early 1970's. In part, it reflects the fact that

newer units must compete with older ones that were built at much lower cost. Rent controls may have also been a factor. However, the supply-demand situation is beginning to change. Completions of multiunit structures have dropped sharply, and the rental market has tightened as a result. Although the rental vacancy rate is erratic and quarter-to-quarter changes in it should not be read too closely, it is apparent that the rate has drifted down over the past year. Furthermore, 85 percent of the apartments completed in buildings with five or more units in the first quarter of 1976 were rented in the second quarter of this year, a 19 percentage point increase over the market absorption rate for the corresponding period a year earlier. Further tightening of the rental market can be expected as general economic improvement leads to the usual undoubling of families. Tightening of the rental market can be expected to result in upward pressure on rents. More rapidly increasing rents will raise profitability unless there are offsetting increases in operating costs.

Federal housing programs are helping multiunit construction. The Section 8 housing assistance payments program, established by the 1974 Housing and Community Development Act, is intended to become HUD's major vehicle for housing assistance. Section 8 is a rent subsidy program for low income families. Although its first priority is the utilization of existing housing, it has an impact on new construction also. Under Section 8, a builder may apply to HUD for a long-term commitment—generally 20 years—to receive housing assistance payments on behalf of prospective tenants. These payments are calculated as the difference between HUD-approved contract rents, which are set on the basis of the quality and location of the housing unit, and tenant contributions, which vary from 15 to 25 percent of an eligible family's income. Through August, 14,500 new units were started under Section 8. HUD has met the program's fiscal year goal of making commitments to subsidize 125,000 new housing units by October.

(Continued on page 21)

Business Reports Change in Quarterly Pattern of 1976 Capital Spending Plans

BUSINESS plans to spend \$121.2 billion for new plant and equipment in 1976, 7.4 percent more than in 1975, according to the BEA survey conducted in late July and August (table 1).¹ Spending in 1975 was 0.3 percent more than in 1974. The latest projection of spending for the year as a whole is virtually unchanged from that reported in the April-May survey: the January-February survey had projected a 6.5 percent increase.

Spending in the second quarter rose 3.0 percent from the first, to an annual rate of \$118.1 billion. This was the second successive quarter-to-quarter rise, first-quarter spending rose 2.6 percent. Plans call for a 4.1 percent rise in the third quarter, to \$123.0 billion, and 3.3 percent in the fourth, to \$127.0 billion.

Spending in the second quarter was 2½ percent lower than projected in the April-May survey; the revisions were chiefly in communications, public utilities, and durable goods manufacturing. The third-quarter projection is almost the same as that reported in the preceding survey; downward revisions in the nondurables manufacturing and commercial groups were offset by upward revisions in durables manufacturing and transportation. The fourth-quarter projection has been raised 2 percent, with most of the

revision in durables manufacturing and transportation.

The second-quarter shortfall followed similar ones in the first quarter of this year and the fourth quarter of last year. Actual spending in the first quarter was 3½ percent lower than the January-February projection; fourth-quarter spending was 2½ percent lower than the October-November projection. Investment shortfalls in periods of projected advances are not inconsistent with the past experience of the survey. The three recessions preceding the most recent one were followed by periods of rising investment in which plans for plant and equipment spending exceeded actual spending in several consecutive quarters. The 1969-70 recession was followed by seven consecutive quarters of shortfall; in the second and third quarters of 1972, the shortfalls were 4 percent and 3 percent, respectively. The reasons for shortfalls in second-quarter spending were discussed with officials of about two dozen firms in the reporting panel. While various reasons were given, the most significant result was that no official mentioned deliberate cancellation or deferral based on a reassessment of the general business outlook.

The projected increase in third-quarter spending—4.1 percent—is more moderate than the increases projected for the first and second quarters, and factors influencing investment are favorable for continued moderate growth. Corporate profits and cash flow remain strong. Capital appropriations increased significantly in the second quarter and new orders for nondefense capital

goods have shown a strong uptrend during the year. New projects started in manufacturing increased in the second quarter and manufacturing capacity utilization remained at 82 percent in June, after increasing 3 points from December 1975 to March 1976.

Neither plans nor actual spending reported in the surveys are adjusted for price changes, and only rough adjustments for inflation can be made. The implicit price deflator for fixed

1. Includes industries not shown separately.

1. Spending plans have been adjusted for systematic biases (table 5, footnote 2). For example, 1976 plans before adjustment were \$122.76 billion for all industries, \$54.26 billion for manufacturing, and \$68.50 billion for nonmanufacturing. The adjustments were applied separately to each major industry; their net effect was to lower the manufacturing total \$1.49 billion and the nonmanufacturing total \$0.12 billion.

nonresidential investment in the national income and product accounts rose at an annual rate of 4½ percent in the first half of 1976. If the latest spending plans reflect an expected price rise of about that magnitude, a 2½ percent rise in real investment is indicated for the year. Last year, real spending—calculated on the basis of

the nonresidential fixed investment deflator—declined about 12 percent. Real spending declined for seven consecutive quarters following a peak in the first quarter of 1974. Although real spending increased in the first and second quarters of 1976, the second-quarter rate was still 13 percent below the peak.

plan a 10 percent increase—13 percent for nondurables and 7 percent for durables. In nondurables, large increases are planned by textiles (24 percent), food-beverage (19 percent), paper (19 percent), rubber (15 percent), and petroleum (12 percent). In durables, large increases are planned by motor vehicles (18 percent), stone-clay-glass (14 percent), electrical machinery (14 percent), and nonelectrical machinery (12 percent). Most other major manufacturing industries plan small increases; primary metals plans a 4 percent decline.

Manufacturing Programs

CAPITAL spending by manufacturers rose 3 percent in the second quarter, compared with 5 percent in the first. Plans call for rises of 6 percent in the third quarter and 4½ percent in the fourth. Durable goods producers reported a 4 percent rise in the second quarter, compared with 2 percent for

nondurables. Large increases are planned in the third quarter by both durables and nondurables, 7 percent and 6 percent, respectively. In the fourth quarter, nondurables plan a 6 percent increase, compared with 3 percent in durables.

For the year 1976, manufacturers

Manufacturing projects started in the second quarter totaled \$12.8 billion—10 percent above the first quarter and about equal to the second quarter of 1975 (table 2 and chart 5). Starts by nondurables rose 12 percent from the first quarter, reflecting a sharp increase by the chemical industry. Food-beverage and paper also reported sizable

^r Revised.

1. Starts are estimated by adding changes in carryover to expenditures during the given period.

2. Carryover refers to expenditures yet to be incurred on plant and equipment projects already underway at end of period.

3. Includes data not shown separately.

4. Includes guided missiles and space vehicles.

increases. Durables rose 7 percent, mainly due to a large increase in primary metals.

The value of projects started about equaled capital spending in the second quarter; consequently, there was little change in carryover—the amount still

to be spent on projects already underway. Seasonally adjusted carryover at the end of June totaled \$38.4 billion, only \$100 million higher than at the end of March. Manufacturing carryover has shown little change over the past 2 years; increases in nondurable goods have offset declines in durables.

In manufacturers' evaluation of the adequacy of their facilities (in light of prospective sales over the next 12 months), there was no change in the proportion of facilities viewed as inadequate. At the end of June, as at the end of March, companies owning 37 percent of fixed assets reported a need for more facilities (table 3 and chart 6). Facilities viewed as about adequate increased from 52 percent of fixed assets as of March 31 to 55 percent as of June 30.

Capacity utilization

The utilization rate of manufacturing capacity was at 82 percent in June, the same as in March (table 4 and chart 7).² The rate had risen 3 points from December to March, it is still 4 points below the peak of 86 percent in 1973. Sizable offsetting changes occurred among individual industries. The increases were chiefly in the durable goods industries; most nondurables industries reported decreases.

Primary metals increased 5 points from March to June, to 83 percent, reflecting the strength in auto sales. Electrical machinery increased 3 points to 81 percent. Smaller increases were reported by petroleum, chemicals, motor vehicles, and nonelectrical machinery.

Rubber declined from 86 percent in March to 68 percent in June; this reflected widespread work stoppages in the industry. Textiles declined 4 points, to 85 percent. Smaller declines were reported by stone-clay-glass, food-beverage, aircraft, and paper.

The utilization rate reported by large-sized firms was 85 percent in June

2. The survey asks manufacturers to report actual and preferred rates of capacity utilization for the last month of each quarter. Utilization rates for industry and asset-size groups are weighted averages of individual company rates. See "The Utilization of Manufacturing Capacity, 1965-73," SURVEY OF CURRENT BUSINESS, July 1974, pp. 47-57.

CHART 4

Plant and Equipment Expenditures

(1 point above March); by medium-sized firms, 79 percent (also 1 point above March); and by small-sized firms, 75 percent (1 point below March). Primary-processed goods industries as a group reported a rate of 83 percent in June, the same as in March, and advanced-processed goods industries reported 82 percent, 1 point above March.

1. According to respondent companies' characterizations of their plant and equipment facilities, taking into account their current and prospective sales for the next 12 months.

2. Includes industries not shown separately.

3. Includes machinery, transportation equipment, and fabricated metals industries.

Nonmanufacturing Programs

NONMANUFACTURERS' spending rose 3 percent in the second quarter, to a seasonally adjusted annual rate of \$67½ billion; plans call for 2½ percent rises in the third and fourth quarters. The second-quarter rise was centered in the transportation industries; the third- and fourth-quarter rises are chiefly in public utilities, communications, and the commercial group.

For the full year 1976, spending plans in nonmanufacturing are up 5½ percent, compared with a 2½ percent decline in actual spending last year.

Electric utilities plan a 14 percent rise, following a 3½ percent decline in spending in 1975. Gas and other utilities plan a 9 percent rise this year, compared with a rise in actual spending of 7 percent last year. An 11 percent rise in "other transportation" reflects continued increases in expenditures for the Trans-Alaska pipeline.

Communications firms plan a 9 percent increase in spending this year; last year, their spending declined 9 percent. Railroads plan to reduce spending 14 percent from the peak

level of \$2½ billion in 1975 and 1974. Both railroads and airlines expect to reduce equipment purchases. Airlines plan a 27 percent drop in their total spending, following declines of 8 percent in 1975 and 17 percent in 1974.

Starts of new projects by public utilities totaled \$8.6 billion in the second quarter, compared with \$3.4 billion in the first. Carryover was \$105½ billion at the end of June, about \$3 billion higher than at the end of March.

1. Excludes agricultural business; real estate operators; medical, legal, educational, and cultural services; and nonprofit organizations.

2. Estimates are based on expected capital expenditures reported by business in late July and August 1976. The estimates for the third and fourth quarters of 1976 have been corrected for systematic biases. The adjustment procedures are described in the February 1976 issue of the SURVEY OF CURRENT BUSINESS. Before such adjustment, 1976 expenditures were expected to be \$122.76 billion for all industries, \$54.26 billion for manufacturing, and \$68.50 billion for nonmanufacturing.

3. Includes data not shown separately.

4. Includes guided missiles and space vehicles.

5. Includes fabricated metal, lumber, furniture, instruments, and ordnance and miscellaneous except guided missiles and space vehicles.

6. Includes apparel, tobacco, leather, and printing-publishing.

7. Includes trade, service, construction, finance, and insurance.

(Continued from page 3)

the second quarter than in the first quarter as wholesale price increases decelerated.

Income originating in the rest of the world—including profits and interest flows—is a component of GNP. As a result of information from BEA's quarterly survey of foreign direct investment, second-quarter GNP was revised up about \$1 billion. Gross domestic product, which does not include income from abroad, was not revised.

(Continued from page 15)

Another program, the so-called tandem plan, subsidizes federally backed mortgages for new apartments. Under this program, the Government National Mortgage Association buys mortgages from lenders at higher than

market prices for resale to private lenders at market prices, absorbing the loss. In January, HUD released \$3 billion for this purpose, expecting it to finance 120,000 starts. So far, construction under the program has been very limited. In September, an additional \$2 billion was released, which is expected to finance 80,000 units.

The "for-sale" segment of the market for multiunit construction remains depressed. In the first quarter of 1976, only 14,462 condominium and cooperative units were completed, about half as many as in the first quarter of 1975. Reflecting this decrease, the market absorption rate—the percentage of units sold within 3 months after completion—rose 15 percentage points over the past year, but, at 55 percent in the first

quarter of 1976, remains low. This low market absorption rate is due to the large supply of condominiums completed in 1973 and 1974 that continue to be a drag on the market. Although the data are not very reliable, it appears that the overhang is highly concentrated in Florida and Georgia, and it will undoubtedly delay the recovery of condominium starts in these States.

Multiunit, and especially condominium, construction continues to suffer from the financial difficulties that were the aftermath of earlier overbuilding. Real estate investment trusts, which were especially hard hit, remain in disarray; and other lenders, life insurance companies in particular, seem to have little interest in apartment building mortgages.

Capital Expenditures by Majority-Owned Foreign Affiliates of U.S. Companies: Projections for 1976 and 1977

CAPITAL expenditures in 1976 by majority-owned foreign affiliates of U.S. companies are expected to be virtually unchanged from 1975, but are to increase 8 percent, to \$29.2 billion, in 1977. There was an increase of 5 percent in 1975 (table 1 and chart 8).¹ These estimates are not adjusted for price change; if they were, they would show a decrease in real expenditures in 1976 and little change overall in 1977. However, some areas and industries would show substantial increases next year.

Spending in 1976 is not expected to increase even though economic recovery is underway in many countries. The 1974-75 recession left in its wake substantial excess productive capacity and a large accumulation of inventories abroad. Thus, increases in demand, particularly in a moderate recovery, could be met for quite some time by increased utilization of existing capacity and inventory liquidation, postponing increases in capital spending.

The increase in 1977 spending reflects the continuation of economic recovery abroad. Manufacturing affiliates plan the largest increase, mainly in developed countries, where

Manufacturing

Manufacturing affiliates plan to increase expenditures 2 percent in 1976 and 15 percent, to \$13.2 billion, in 1977. The latter increase will be concentrated in developed countries, where

NOTE.—Estimates were prepared by John A. Munz, Juris E. Abolins, and Shirley J. Davis.

1. These are universe estimates based on BEA's latest semiannual sample survey, taken in June 1976, covering approximately 325 U.S. direct investors and their 4,700 majority-owned foreign affiliates. See the December 1973 SURVEY OF CURRENT BUSINESS for a description of the methodology used in preparing these estimates.

spending is to rise 17 percent, following reductions in 1975 and 1976. In developing countries, a 4 percent increase is expected (table 2).

Within manufacturing, chemical affiliates plan increases of 8 percent in 1976 and 18 percent in 1977. The increase this year is centered in the European Communities (EC(9)),² par-

2. The EC(9) consists of Belgium, France, Germany, Italy, Luxembourg, the Netherlands, Denmark, Ireland, and the United Kingdom.

ticularly Belgium-Luxembourg, the Netherlands, and the United Kingdom; it is primarily for expansion of productive facilities. A large increase, mainly for acquisition of existing plants and support facilities, is also planned by Mexican affiliates. The 1977 increase is concentrated in Canada and is primarily for construction of major petrochemical plants and related facilities by one affiliate. Canadian authorities recently authorized a 10-year

CHART 8

Capital Expenditures by Majority-Owned Foreign Affiliates of U.S. Companies

76-9-8

export program whereby petrochemical products from the new facilities that are in excess of Canadian needs can be exported to the United States; this authorization is a variance from Canadian programs designed to limit the export of crude oil, natural gas, and certain derivative products.

Affiliates manufacturing nonelectrical machinery plan increases of 8 percent this year and 7 percent next year. This year's increase is concentrated in the United Kingdom and Brazil. The 1977 increase is spread among affiliates in developed countries, particularly Japan, the United Kingdom, and Canada. The increases in both years are mainly by computer manufacturing affiliates.³

3. Capital expenditures by these affiliates include the cost of computers leased to other firms.

Expenditures by affiliates manufacturing food products are expected to increase 5 percent in 1976 and 45 percent in 1977. The substantial 1977 increase is widespread among affiliates in the EC(9). Large increases are also expected by affiliates in Canada, several of which will postpone until 1977 the construction of new plants originally scheduled for 1976, and in Venezuela and Brazil.

Affiliates manufacturing primary and fabricated metals plan to increase spending 2 percent in 1976 and 36 percent in 1977, following two years of spending cuts. The large 1977 increase is widely dispersed among affiliates in developed countries, particularly in the EC(9), Canada, and Norway. It reflects increased industrial demand and expectations of higher prices of basic

metals. In contrast, there are partly offsetting decreases in most developing countries.

*Less than 0.5 percent (±).

1. Based on results of the survey taken in June 1975, but revised to incorporate information obtained subsequently.

2. Based on results of the survey taken in June 1976.

3. Based on results of the survey taken in December 1975.

4. The European Communities (9) was established in 1973. Estimates for earlier years are the sum of estimates for the European Communities (6), Denmark, Ireland, and the United Kingdom.

After a moderate decline this year, electrical machinery affiliates plan to increase spending 35 percent next year. The increase is concentrated in the EC(9) and Canada.

Petroleum

Expenditures by petroleum affiliates

are expected to increase 3 percent in 1976 and 1 percent in 1977, compared with a 22 percent average annual increase for 1973-75. The sharp drop in spending growth reflects several factors: the less favorable investment climate in many host countries, as evidenced by higher tax and royalty

rates and increased equity participation by host governments; a sharp drop in spending for tankers; a leveling off of expenditures for exploration and development in the North Sea area; a slower rate of refinery expansion in Europe; and, perhaps, uncertainties concerning U.S. tax policy on foreign

1. Based on results of the survey taken in June 1975, but revised to incorporate information obtained subsequently.

petroleum earnings. (Current estimates of 1977 petroleum spending are subject to substantial revision because several large U.S. companies did not provide 1977 projections for their affiliates.)

The 1976 increase is concentrated in the United Kingdom, Ireland, Norway, and "other" Middle East. The 25 per-

cent increase in the United Kingdom and the 15 percent increase in Norway partly reflect higher costs of operations in the North Sea area due to inflation. Increased expenditures in Ireland this year are related to intensified development of offshore gas projects. In 1977, large increases in "other" Middle East,

Norway, and Japan will be nearly offset by decreases in most other areas.

Expenditures in "other" Middle East are expected to rise 15 percent in 1976 and 40 percent, to \$2.4 billion, in 1977. These increases are largely for continuing construction of downstream and support facilities—including pipelines,

shipping terminals, and storage facilities—and for a natural gas collection and distribution network.

In other countries where affiliates are engaged primarily in exploration and development, spending plans are mixed. Moderate increases are expected in both years by Canadian affiliates. In In-

donesia, a 3 percent increase in 1976 will be followed by a 25 percent decrease in 1977. The latter may reflect the recent modification of a government production-sharing formula that reduces foreign-owned companies' shares of crude oil from 40 percent to 15 percent. In Nigeria, where uncertainties

concerning government policy continue to prevail, affiliates plan to decrease spending in both years.

In areas where affiliates are engaged primarily in refining and distribution, decreases in spending are widely dispersed. In 1976, large spending cuts are expected in Belgium-Luxembourg,

where refining facilities have been operating below capacity, and in Germany and France, where major refinery expansion projects have been completed. In 1977, a moderate increase is expected in Belgium-Luxembourg, and sizable decreases are expected in Germany and France.

In "other Western Hemisphere," spending is expected to decrease 31 percent this year and 47 percent next year. These decreases reflect the near-completion of construction of refineries in the Bahamas and development of natural gas liquefaction facilities in Trinidad.

Spending by Japanese affiliates is expected to decrease 65 percent this year but to increase threefold next year, to \$0.1 billion. This shift partly reflects the postponement until 1977 of construction of refining facilities orig-

1. Based on results of the survey taken in June 1976.

U.S. International Transactions: Second Quarter 1976

U.S. international transactions in the second quarter were highlighted by large changes in capital movements. U.S. assets abroad increased \$8.8 billion (capital outflows), \$1.2 billion less than in the first quarter. The slowdown was due to a shift to an unusual net inflow for U.S. direct investments abroad and a reduction in net U.S. purchases of foreign securities. Foreign assets in the United States rose \$7.2 billion (capital inflows), \$1.8 billion more than in the first quarter. A large increase in short-term inflows reported by U.S. banks (increases in U.S. liabilities) and a shift to a net inflow for foreign direct investments in the United States from an atypical outflow in the first quarter were the major factors. Net inflows from unrecorded transactions (statistical discrepancy) were \$1.0 billion, significantly less than the first-quarter inflows but still large by historical standards.

The balance on U.S. current account transactions was in surplus by \$0.7 billion, compared with a deficit of \$0.1 billion in the first quarter.¹ This was mainly due to a narrowing of the merchandise trade deficit, as improving foreign markets for U.S. goods stimulated exports.

U.S. dollar in exchange markets

Events abroad continued to be the major factors affecting the value of the dollar in exchange markets. The dollar strengthened against the British pound (chart 9 and table C), as mounting concern about the British economy led to a steep drop in the exchange market value of the pound. In June, British proposals for government fiscal restraint and the announcement of a \$5.3 billion foreign exchange credit

facility for the United Kingdom helped to stabilize the pound. The dollar appreciated sharply against the Italian lira early in the quarter, but subsequently slipped back somewhat, as tighter Italian foreign exchange controls and additional international financial assistance bolstered the lira. The dollar appreciated further against the French franc and remained relatively stable against the German mark and the Dutch guilder. On the other hand, the dollar declined against the Japanese yen, the Canadian dollar, and the Swiss franc. There was substantial exchange market intervention by several foreign monetary authorities during the quarter. Measured in terms of its trade-weighted average value against either 22 OECD currencies or the currencies of 10 major industrial countries, the dollar showed little net change in the second quarter, reflecting offsetting movements against the major currencies.

1. In the text, data for current account items are seasonally adjusted.

Major Transactions

Merchandise trade

U.S. merchandise imports exceeded exports by \$1.3 billion in the second quarter, compared with a \$1.7 billion deficit in the first. (These data are on a balance of payments basis, which excludes the military trade of U.S. defense agencies and reflects adjustments to the

Bureau of the Census trade figures for timing, coverage, and valuation.)

Exports increased 6 percent to \$28.5 billion, in contrast to a 3 percent decrease in the first quarter. The increase was mostly in volume, which rose 5 percent. Both agricultural and nonagricultural exports rose (chart 10). Agricultural exports rose 10 percent in value and 11 percent in volume, as prices

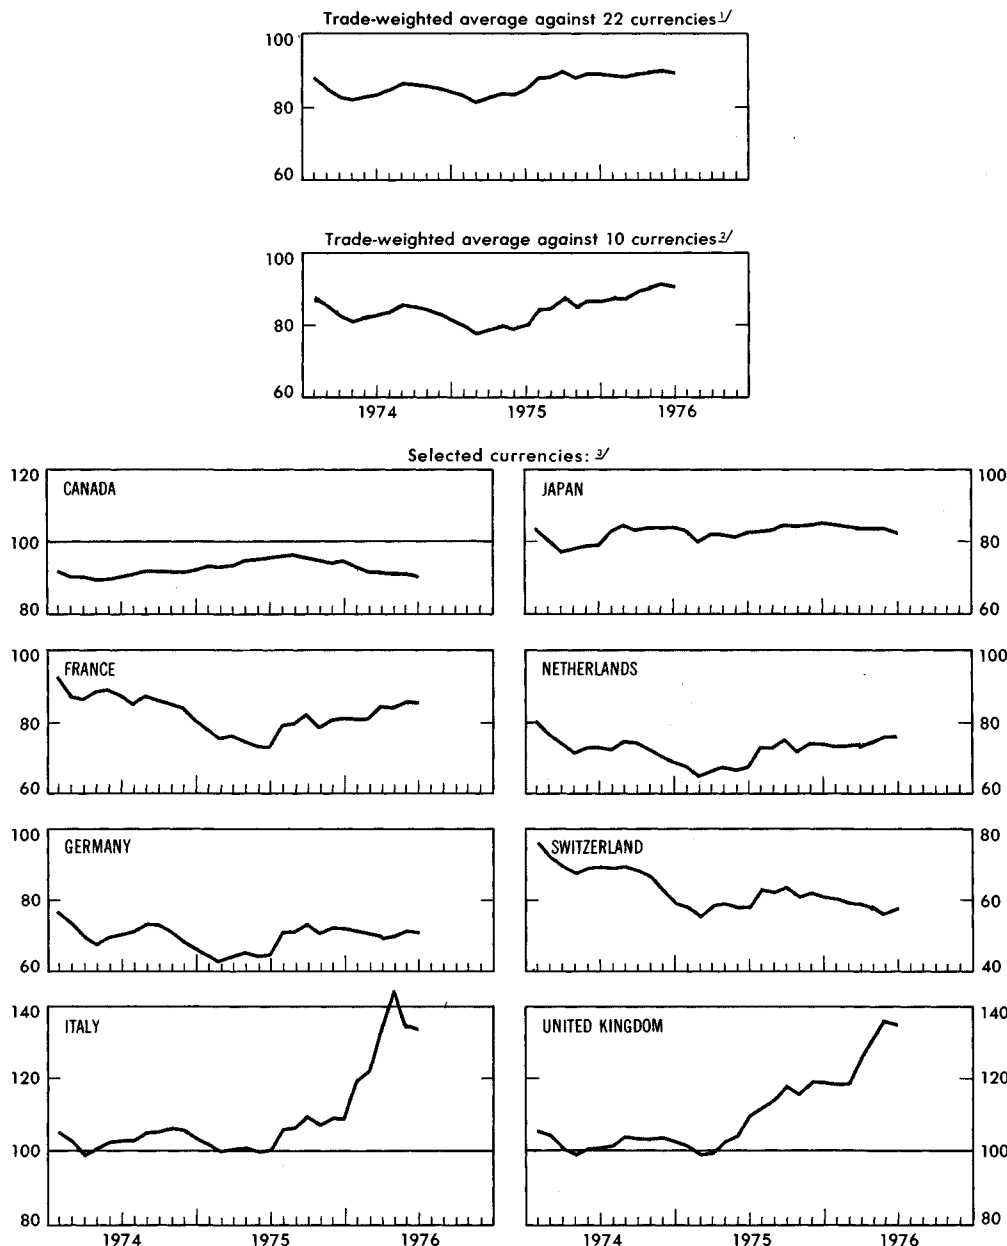

moved downward; the price decline was considerably less than in the preceding five quarters. Grain shipments rose to both Western and Eastern Europe. Shipment of soybeans to Japan and cotton exports to the developing countries of Asia also increased. Nonagricultural exports rose 5 percent in value and 4 percent in volume. Increased exports of machinery and industrial supplies contributed to the advance; in addition, a bunching of deliveries led to a sharp rise in exports of civilian aircraft. Exports of automotive products also increased, particularly shipments of parts by U.S. manufacturers to their Canadian affiliates.

Imports increased 4 percent to \$29.7 billion—a sharp deceleration from the 12 percent increase in the first quarter. In volume, imports rose 2 percent, compared with 10 percent in the first quarter. Nonpetroleum imports—virtually unchanged in value—accounted for the slowdown; a 2 percent drop in volume was offset by a similar rise in prices. Imports of petroleum and products increased 15 percent, to \$8.5 billion, following a 7 percent rise in the first quarter. Volume advanced 14 percent to a record quarterly average of 7.7 million barrels per day.

Although the change in the overall trade balance was small, there were some large and mostly offsetting shifts by geographical area. Stepped-up U.S. exports to Western Europe resulted in a \$2.2 billion trade surplus, compared with a surplus of \$1.4 billion in the first quarter. On the other hand, U.S. trade with Canada shifted to a \$0.1 billion deficit from a \$0.5 billion surplus, as imports from Canada rose substantially. Likewise, a \$1.1 billion increase in imports from non-OPEC developing countries, accompanied by a small drop in U.S. exports, resulted in a \$0.5 billion deficit, contrasting with the \$0.5 billion first-quarter surplus. Trade balances with members of OPEC and Japan showed little change, at deficits of \$3.5 billion and \$1.5 billion, respectively.

3. Source: International Monetary Fund.

Note.—Data are for end of month.

U.S. Department of Commerce, Bureau of Economic Analysis.

Service transactions and unilateral transfers

Receipts from exports of services were unchanged. Income from U.S. direct

investments abroad declined \$0.2 billion, following a \$0.6 billion rise in the first quarter that resulted from a large dividend payment by a foreign affiliate of a U.S. petroleum company. Increases in exports of other services offset the decline. Payments for imports of services decreased \$0.1 billion, mainly due to decreased travel payments to Canada and Latin America.

Net payments for unilateral transfers dropped \$0.2 billion, largely the result of a temporary reduction in U.S. Government grants to Israel.

U.S. assets abroad

U.S. official reserve assets increased \$1.6 billion in the second quarter, following a \$0.8 billion increase in the first. There was an increase in U.S. foreign currency holdings that resulted from Mexican drawings on swap arrangements and British utilization of standby credits established in June, as both countries supported their currencies in exchange markets. Similarly, most of the \$0.8 billion rise in the U.S. reserve position in the International Monetary Fund (IMF) stemmed from British drawings of dollars from the IMF to support the pound. (The U.S. reserve position in the IMF is calculated as the difference between the U.S. quota in the IMF and the IMF's holdings of dollars. It represents the amount of foreign exchange the United States can automatically draw from the IMF.)

Transactions involving U.S. private assets abroad showed a reduction in net capital outflows to \$6.2 billion in the second quarter from \$8.6 billion in the first. Net capital flows for U.S. direct investments abroad shifted from net outflows of \$1.8 billion in the first quarter to unusual net inflows of \$0.5 billion in the second. Liquidations of foreign affiliates accounted for part of the inflows; most of the remainder resulted from changes in intercompany account balances, especially decreases in short-term receivables on the books of U.S. parents. (Because of the volatility of intercompany account transactions, undue significance should not be attached to second-quarter developments.) The inflows were widespread across industries and geographic regions. There were net

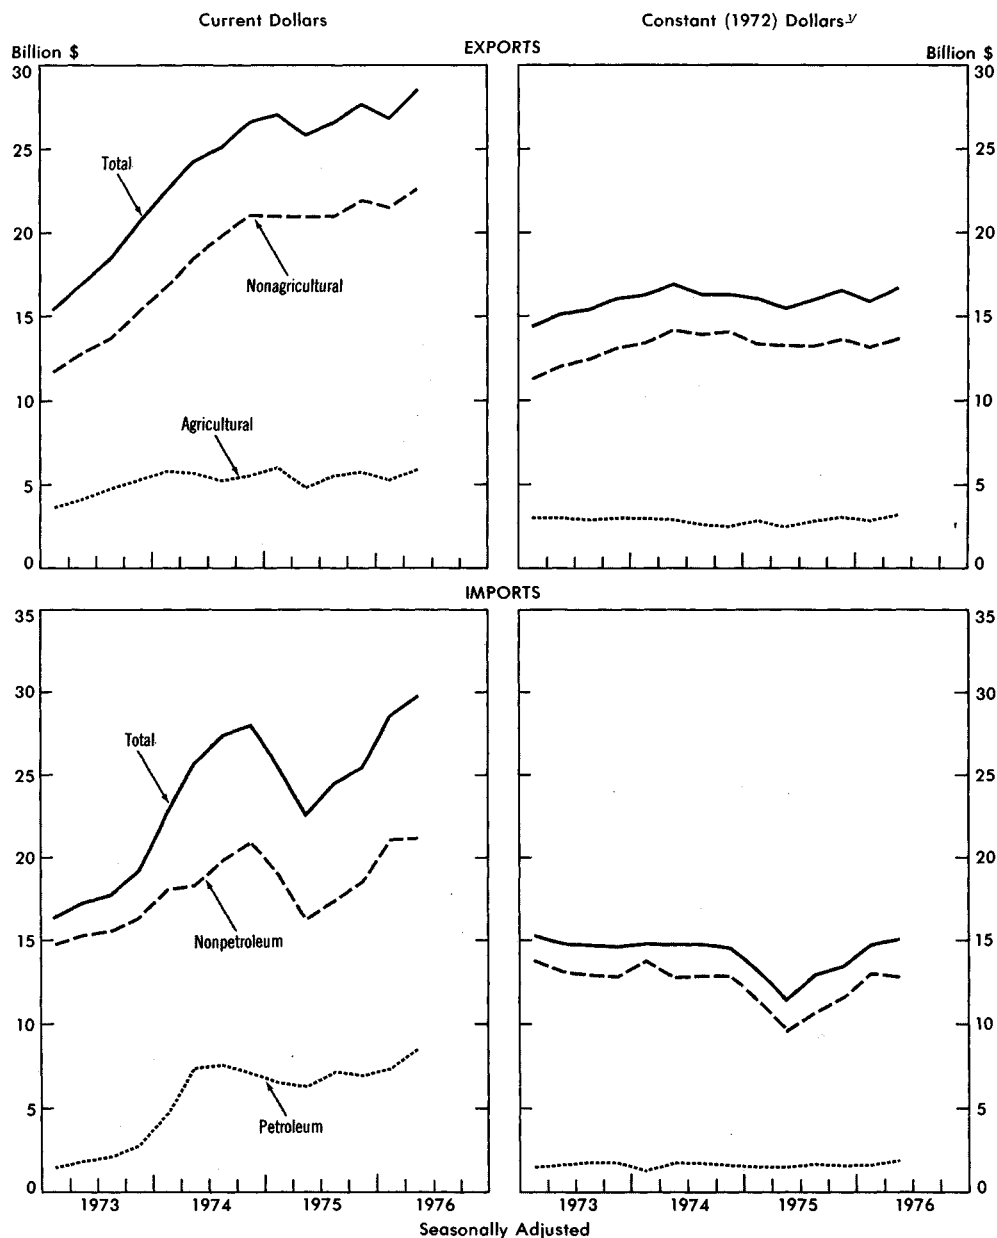

inflows of \$0.1 billion from petroleum affiliates, following net outflows of \$0.4 billion in the first quarter. Inflows from Japan, Continental Western Europe, and Latin America more than offset a large increase in outflows to the United Kingdom. Net inflows from nonpetroleum affiliates were \$0.4 billion, in contrast to net outflows of \$1.4 billion in the first quarter. The largest inflows were from Western Europe and Canada.

Net U.S. purchases of foreign securities were \$1.4 billion, compared with

\$2.5 billion in the first quarter. New foreign bond issues in the United States were \$1.6 billion, well below the record \$2.8 billion placed in the first quarter. Canadian issues decreased but remained substantial. Flotations by Western European entities were unchanged as issues by two European regional institutions offset a decline in other issues. There was a significant increase in Australian placements. Transactions involving other foreign securities showed small net inflows.

CHART 10

U.S. Merchandise Trade

1. Current values deflated by unit value indexes (1972=100).
U.S. Department of Commerce, Bureau of Economic Analysis

Net claims on foreigners reported by U.S. banks rose \$4.7 billion, after a \$3.6 billion rise in the first quarter. Continued slack domestic demand for loans and relatively low U.S. interest rates were leading factors. There was a shift to net outflows to the United Kingdom and Japan from net inflows in the first quarter. There were large increases in outflows to Italy, Brazil, and Mexico. On the other hand, outflows through Caribbean branches of U.S. banks were \$2.1 billion, compared with a \$3.6 billion outflow in the first quarter.

Foreign official assets in the United States

Net foreign official assets in the United States increased \$4.0 billion,

about the same as in the first quarter (table B). Official assets of OPEC members increased \$3.3 billion, compared with a \$3.5 billion increase in the first quarter. In the second quarter, a decline in prepayments on orders for U.S. military equipment for future delivery was largely offset by an increase in holdings of U.S. Government securities. Purchases of U.S. corporate securities by OPEC members were unchanged. In both quarters, the increases in OPEC official assets in the United States reflected the rise in their investable funds, which stemmed from higher petroleum production and some shift of their funds to the United States from other areas. Non-OPEC developing countries also continued to add to

their official dollar holdings in the second quarter. In contrast, official assets of industrial countries continued to decline. Net dollar sales by countries seeking to limit the depreciation of their currencies—particularly France and the Netherlands—exceeded net dollar purchases of other countries seeking to limit the appreciation of their currencies—primarily Japan and Switzerland.

Among transactions involving other foreign assets in the United States, net foreign purchases of U.S. securities (other than U.S. Treasury securities) were \$0.1 billion, \$0.9 billion less than in the first quarter. Reduced purchases of U.S. corporate stocks, largely by Western European purchasers, more

^rRevised. ^pPreliminary.
1. EC (9), other Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.
2. Partly estimated. Based on data for Indonesia, Venezuela, and Middle East and African oil-exporting countries.

3. Includes \$250 million, the amount by which the dollar countervalue of the Federal Reserve pre-August 1971 Belgian and Swiss franc commitments was increased to take account of the two U.S. dollar devaluations of 1971 and 1973 and the Belgian franc revaluation of 1971. This valuation adjustment is excluded from the balance of payments transactions shown in line 1.
4. Includes \$200 million in drawings from the U.S. Treasury Department.

than accounted for the drop. There was a \$0.5 billion net inflow for foreign direct investments in the United States, after an unusual \$0.7 billion outflow in the first quarter. The first-quarter outflow reflected a special payment of accumulated dividends to a Middle Eastern country that has a participation in a U.S.-incorporated petroleum company. Net inflows from Western European and Canadian parents to their U.S. affiliates were less than in the first quarter.

U.S. liabilities to private foreigners and international institutions reported by U.S. banks (lines 60, 64, and 65, table 1) rose \$3.0 billion, compared with \$1.1 billion in the first quarter. Larger inflows from Caribbean branches of U.S. banks and the Middle East accounted for most of the increase. Partly offsetting was a shift to net outflows to Japan from net inflows in the first quarter. Included in bank-reported transactions was a \$0.6 billion reduction in holdings of Treasury securities (line 60) by the International Bank for Reconstruction and Development, which increased its holdings of other U.S. money market instruments; this was, in turn, reflected in an increase in short-term liabilities (line 65).

U.S.-Canadian Current Account Reconciliations

Reconciliations of the 1974 and 1975 bilateral current account balance of payments statistics of the United States and Canada were completed in July 1975 and July 1976, respectively. Reconciliations were completed earlier for 1970-1973 (see SURVEY OF CURRENT BUSINESS, June 1975). U.S.-Canadian current account reconciliations will continue to be undertaken annually. On the basis of the conceptual framework established for the studies, the results for 1974 and 1975 are as follows:

U.S.-Canadian Balance on Current Account

[Billions of U.S. dollars]

	1974	1975
Reconciled data (U.S. surplus/Canadian deficit).....	1.7	4.7
U.S. published data (U.S. surplus).....	1.5	4.7
Canadian published data (Canadian deficit).....	1.6	4.6

Revisions based on the reconciliation have been incorporated in the published series insofar as is presently possible. It is not possible to substitute the reconciled data fully for the previously published data because U.S. transactions with other areas would be affected.

Additional data on the reconciliation are contained in the following table:

U.S.-Canadian Balance on Current Account

(Continued from page 27)

inally scheduled for 1976. The 1977 increase also is related to the recently implemented Japanese government policy of raising petroleum storage capacity to mitigate the effects of possible future oil embargoes.

Spending by international shipping affiliates of U.S. petroleum companies is expected to decline 8 percent in 1976 and 26 percent, to \$0.7 billion, in 1977. The declines reflect excess capacity in the world tanker market, and the completion of several new tankers this year.

Mining and smelting

Mining and smelting affiliates plan to decrease expenditures 22 percent in 1976 and, in contrast, to increase them 9 percent, to \$1.0 billion, in 1977. The decrease this year is concentrated in Peru and Australia. In 1977, further decreases in those two countries will be more than offset by a large increase in Canada.

The declines in spending in Peru are related to completion of a major expansion of a copper mining project. In Australia, coal, nickel, and iron ore mining projects are scheduled for completion this year.

In Canada, the 1977 increase is due largely to the delay until that year of iron and copper mining and refining facilities' expansion originally planned for 1976.

Trade and other industries

Trade affiliates expect to decrease spending 18 percent in 1976. In 1977, a 6 percent increase is expected, mainly in Brazil, the United Kingdom, and Spain.

The decrease this year is largely due to elimination from the BEA sample of several computer sales affiliates, in which U.S. ownership fell below 50 percent.⁴ (BEA's sample covers only majority-owned foreign affiliates—those owned 50 percent or more, directly or indirectly, by U.S. companies.) The change in BEA's sample primarily accounts for decreases this year in several EC(9) countries (notably France, Germany, Belgium, and the Netherlands), Spain, and Australia.

Affiliates in the United Kingdom also expect a sizable spending decrease this year. This is mainly due to the completion, in 1975, of warehouse facilities by retail food affiliates.

Affiliates in "other industries"—consisting of agriculture, public utilities, transportation, construction, and finance and other services—are to increase spending 8 percent in 1976 and 5 percent in 1977. Substantial increases—primarily in public utilities—are expected in Canada in both years.

4. In the December 1975 survey, U.S. ownership of these affiliates was erroneously reported to have fallen below 50 percent in 1975, instead of 1976. This largely accounts for the 16 percent decrease previously projected for 1975, compared with an actual increase of 4 percent.

Footnotes to U.S. International Transactions Tables 1-10

General notes for all tables:

* Revised.

* Preliminary.

* Less than \$500,000 (±).

n.a. Not available.

Details may not add to totals because of rounding.

Table 1:

1. Credits, +: exports of goods and services; unilateral transfers to United States; capital inflows (increase in foreign assets (U.S. liabilities) or decrease in U.S. assets); decrease in U.S. official reserve assets.

Debits, -: imports of goods and services; unilateral transfers to foreigners; capital outflows (decrease in foreign assets (U.S. liabilities) or increase in U.S. assets); increase in U.S. official reserve assets.

2. Excludes transfers of goods and services under U.S. military grant programs (see line 14).

3. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to a balance of payments basis; see table 3.

4. Consists of interest, dividends, and branch earnings.

5. Excludes reinvested earnings of foreign incorporated affiliates of U.S. firms or of U.S. incorporated affiliates of foreign firms.

6. For all areas, amounts outstanding June 30, 1976, were as follows in millions of dollars: line 34, 18,477; line 35, 11,698; line 36, 2,316; line 37, 3,198; line 38, 1,365.

7. Includes sales of foreign obligations to foreigners.

8. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.

9. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.

10. Includes, primarily, U.S. Government liabilities associated with military sales contracts and other transactions arranged with or through foreign official agencies; see table 4.

11. Consists of investment in U.S. corporate stocks and in debt securities of private corporations and State and local governments.

12. Conceptually, the sum of lines 71 and 66 (total, all areas) is equal to "net foreign investment" in the national income and product accounts (NIPA's) of the United States. Beginning with 1973-IV, however, the foreign transactions account in NIPA's excludes the shipments and financing of extraordinary military orders placed by Israel. Line 69 (total, all areas) differs from net exports of goods and services in the NIPA's due to the omission in the NIPA net exports of shipments of extraordinary military orders placed by Israel and of U.S. Government interest income payments to foreigners. The latter are classified in a separate category in the foreign transactions account in NIPA's.

Table 2:

For footnotes 1-12, see table 1.

Table 3:

1. Exports, Census basis, represent transaction values, f.a.s. U.S. port of exportation; imports, Census basis, represent transaction values, f.a.s. foreign port of exportation.
2. Adjustments in lines A6, A14, B8, B21, and B34 reflect the reconciliation of discrepancies in the merchandise trade statistics published by the United States and the counterpart statistics published by Canada.
3. Exports of military equipment under U.S. military agency sales contracts with foreign governments (line A7), and direct imports by the Department of Defense and the Coast Guard (line A15), to the extent such trade is identifiable from Customs declarations. These exports are included in tables 1, 2, and 10, line 3 (transfers under U.S. military agency sales contracts); and the imports are included in tables 1, 2, and 10, line 17 (direct defense expenditures).
4. Addition of electric energy; deduction of exposed motion picture film for rental rather than sale; deduction of exports to the Panama Canal Zone; net change in stock of U.S.-owned grains in storage in Canada; net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another; and coverage adjustments for special situations in which shipments were omitted from Census data.
5. Correction for discrepancy between sum of four quarters, seasonally adjusted, and the unadjusted annual totals.
6. Addition of electrical energy; deduction of foreign charges for repair of U.S. vessels abroad, which are included in tables 1, 2, and 10, line 20 (other transportation); deduction of imports from Panama Canal Zone; net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another; and coverage adjustments for special situations in which shipments were omitted from Census data.
7. Annual and unadjusted quarterly data shown in this table correspond to country and area data in table 10, lines 2 and 16.
8. The BEA definition for "petroleum and products" (lines C12, C29, and D56) includes propane and butane, in line with current Bureau of Mines and Federal Energy Administration practice.
9. The statistical identification of automotive products exports to Canada (line D34) is not as complete and comprehensive as the identification under the U.S.-Canada Automotive Products Trade Act. However, the underestimation of automotive shipments to Canada due to unreported exports, amounting to about \$930 million in 1975, has largely been corrected in line C18.
10. Includes silver ore and bullion.
11. Includes nuclear fuel materials and fuels.

NOTE.—The "seasonal adjustment discrepancy lines" (B13, B26, B39, C22, C38, D47 and D91) show the difference between total exports and imports and the sum of major items independently adjusted.

Table 4:

1. Expenditures to release Israel from its contractual liability to pay for defense articles and services purchased through military sales contracts—authorized under Public Laws 93-199 and 93-559 (sec. 45(a)(7)(B))—are included in line A3. Deliveries against these military sales contracts are included in line C10; see footnote 2. Of the line A3 items, part of the military expenditures is applied in lines A38 and A41 to reduce short-term assets previously recorded in lines A36 and C8; this application of funds is excluded from line C3. A second part of line A3 expenditures finances future deliveries under military sales contracts and is applied directly to lines A37 and C9. A third portion of line A3, disbursed directly to finance purchases by Israel and other countries from commercial suppliers, is included in line A32.
2. Transactions under military sales contracts are those in which the Defense Department sells and transfers military goods and services to a foreign purchaser, on a cash or credit basis. Purchases by foreigners directly from commercial suppliers are *not* included as transactions under military sales contracts. The entries for the several categories of transactions related to military sales contracts in this and other tables are partially estimated from incomplete data.
3. The identification of transactions involving direct dollar outflows from the United States is made in reports by each operating agency. However, such data for second quarter 1976 are only extrapolated estimates by BEA, because of incomplete reports from one operating agency, and are to be revised in future issues of the SURVEY.
4. Line A33 includes foreign currency collected as interest and lines A38 and B2 include foreign currency collected as principal, as recorded in lines A13 and A14, respectively.
5. Includes (a) advance payments to the Defense Department (on military sales contracts) financed by loans extended to foreigners by U.S. Government agencies and (b) the counter-value of the part of line C10 which was delivered without prepayment by the foreign purchaser. Also includes expenditures of appropriations available to release foreign purchasers from liability to make repayment.
6. Excludes liabilities associated with military sales contracts financed by U.S. Government grants and credits and included in line C2.
7. Lines C3 and C4 exclude recovery of investment value of aircraft on long-term lease through physical return of depreciated aircraft.

Table 5:

1. Acquisition of capital stock of existing and newly established companies, capitalization of intercompany accounts, and other equity contributions.
2. Sales and liquidations of capital stock and other equity holdings, total and partial.
3. Petroleum includes the exploration, development and production of crude oil and gas, and the transportation, refining and marketing of petroleum products exclusive of petrochemicals. Manufacturing excludes petroleum refining and the smelting operations of mining companies. "Other" industries includes industries other than petroleum and manufacturing, the major ones being agriculture, mining and smelting, public utilities, transportation, trade, insurance, finance and services.

Table 6:

1. As published in Treasury Bulletin. Treasury data are based on transactions by foreigners reported by banks and brokers in the United States; net purchases by foreigners (+) correspond to net U.S. sales (-).
2. Redemptions consist of scheduled retirements and identifiable premature retirements of U.S.-held foreign debt securities, and estimates for redemptions of Canadian issues held by U.S. residents, based on Canadian statistics. Unidentifiable nonscheduled retirements appear in line 30.
3. Consists of International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), and Inter-American Development Bank (IDB).
4. Mainly reflects exclusion of investments by foreign official agencies in U.S. corporate stocks and in debt securities of U.S. Government corporations and agencies, private corporations, and State and local governments. These investments are included in table 1, lines 54 and 57.
5. Securities newly issued by finance subsidiaries incorporated in the Netherlands Antilles are included to the extent that the proceeds are transferred to U.S. parent companies.

Table 7:

1. Consists of negotiable and other readily transferable foreign obligations payable on demand or having a contractual maturity of not more than one year, including loans payable on demand. Excludes other types of loans, acceptances and accounts receivable.
2. Includes funds obtained by finance subsidiaries incorporated in the Netherlands Antilles from sources other than sales of newly issued securities to the extent that they are transferred to U.S. parent companies.
3. Reports by brokerage concerns have been discontinued.
4. Outstanding amounts as of March 31, 1976.

Table 8:

1. Includes claims of U.S. banks on their foreign branches and those of U.S. agencies and branches of foreign banks on their head offices and foreign branches of such head offices.
2. Mainly claims on U.S. branches in the Bahamas and Cayman Islands.

Table 9:

1. Time deposits with maturity of 1 year or less; negotiable certificates of deposit with a maturity of 1 year or less are included in "other obligations."
2. Excludes long-term liabilities in line B8.
3. Coverage of line B4 is limited to Western Europe, Canada, Japan, Bahamas, and Cayman Islands.
4. Consists of International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), and Inter-American Development Bank (IDB).
5. Outstanding amounts as of March 31, 1976.

Table 10:

- For footnotes 1-12, see table 1.
13. The "European Communities (9)" includes the "European Communities (6)", the United Kingdom, Denmark, and Ireland.
 14. The "European Communities (6)" includes Belgium, France, Germany, Italy, Luxembourg, the Netherlands, the European Atomic Energy Community, and the European Coal and Steel Community.
 15. Includes transactions with U.S. affiliated shipping companies operating under the flags of Honduras, Liberia, and Panama, and U.S. affiliated multinational trading companies, finance, and insurance companies, not designated by country.
 16. Details not shown separately; see totals in lines 51 and 58.
 17. Details not shown separately are included in combined lines 64 and 65.

Alternative Measures of Constant-Dollar GNP

THE rate of change of GNP in constant dollars (real GNP) is generally influenced by the choice of the valuation period. The estimates now prepared by BEA are in 1972 dollars; this means that the value of output in every other period is restated on the assumption that 1972 prices prevailed in that period. If the prices of another year were used, different rates of change over time would be obtained. The reason for such differences is that in effect these series are the weights attached to the quantities of the various goods and services, and these prices change relative to one another over time. (Selection of the valuation period has no effect on the rate of change of constant-dollar GNP over a given timespan if the rates of change of either the outputs or the prices of all the goods and services are identical over that span.)

Prior to the recently completed benchmark revision of GNP, the constant-dollar estimates were prepared in 1958 dollars. Table 1 gives annual estimates and rates of change for constant-dollar GNP as prepared by BEA prior to the benchmark revision and as now prepared, and two special calculations, in 1958 and 1975 dollars, based on the postbenchmark estimates. For comparability, the special calculations were done in the same component detail as the regular calculations. The differences in the rates of change among the postbenchmark series show the effects of the different valuation periods; differences between the two series in 1958 dollars show the effects of the statistical and definitional revisions in the benchmark.

Based on the postbenchmark estimates, GNP in 1958 dollars increased at an average annual rate of 3.5 percent over the 1958-75 period, compared with 3.4 and 3.2 percent for GNP in 1972 and 1975 dollars, respectively. For some year-to-year percent changes, the dif-

ferences among these three measures are somewhat larger. The largest differences occurred in 1959, 1962, 1968, 1971, and 1972, when the percentage change in GNP in 1958 dollars exceeded that in 1972 dollars by 0.7, 0.6, 0.4, 0.5, and 0.6 points, respectively, and the percentage change in GNP in 1972 dollars exceeded that in 1975 dollars by 0.2, 0.2, 0.4, 0.4, and 0.3 points, respectively.

The differences in the year-to-year percent changes for these 5 years and in the change over the entire 1958-75 period were primarily due to the effect of auto output on real GNP. Auto prices rose less rapidly than the average of other GNP prices for both the 1958-72 and 1972-75 periods. The weight of this item in real GNP is therefore larger when expressed in 1958 dollars than in 1972 dollars; similarly, it is larger when expressed in 1972 dollars than in 1975 dollars. Auto output increased more rapidly than the remainder of GNP for the 5 years cited above and for the entire 1958-75 period; hence, the increases had more effect on GNP calculated in 1958 dollars than on GNP in 1972 dollars and more effect on GNP calculated in 1972 dollars than on GNP in 1975 dollars.

Over the 1958-74 period, the two series for GNP in 1958 dollars—based on prebenchmark and postbenchmark estimates—both rose at an average annual rate of 3.9 percent. Thus, the statistical and definitional revisions in the benchmark (other than the change in the valuation period) had almost no effect on the trend of real GNP over this period, although several annual changes were affected, particularly 1959, 1960, 1961, 1966, and 1970.

The largest differences between quarterly movements of the series based on postbenchmark estimates expressed in 1958 dollars and in 1972 dollars occurred in the first quarters of 1965 and

1971, the third quarter of 1975, and the fourth quarter of 1974 (table 2). The largest differences between the series expressed in 1972 dollars and in 1975 dollars occurred in the first quarters of 1959, 1968, 1971, and 1972 and the second quarter of 1969.

CURRENT BUSINESS STATISTICS

THE STATISTICS here update series published in the 1975 edition of BUSINESS STATISTICS, biennial statistical supplement to the SURVEY OF CURRENT BUSINESS. That volume (available from the Superintendent of Documents for \$5.10) provides a description of each series, references to sources of earlier figures, and historical data as follows: For all series, monthly or quarterly, 1971 through 1974 (1964-74 for major quarterly series), annually, 1947-74; for selected series, monthly or quarterly, 1947-74 (where available). Series added or significantly revised after the 1975 BUSINESS STATISTICS went to press are indicated by an asterisk (*) and a dagger (†), respectively. Unless otherwise noted, revised monthly data for periods not shown herein corresponding to revised annual data are available upon request.

The sources of the data are given in the 1975 edition of BUSINESS STATISTICS; they appear in the main descriptive note for each series, and are also listed alphabetically on pages 187-88. Statistics originating in Government agencies are not copyrighted and may be reprinted freely. Data from private sources are provided through the courtesy of the compilers, and are subject to their copyrights.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1973	1974	1975	1973			1974				1975				1976

Table with columns for years 1974, 1975, 1975 (months), and 1976 (months). Includes a note: 'Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS'.

GENERAL BUSINESS INDICATORS—Continued

Main data table containing categories like MANUFACTURERS' SALES, INVENTORIES, AND ORDERS—Continued; Inventories, end of year or month—Continued; New orders, net (not seas. adj.), total; Unfilled orders, end of year or month (unadjusted); BUSINESS INCORPORATIONS; INDUSTRIAL AND COMMERCIAL FAILURES. Each row lists a category and its values for the specified years and months.

Footnote section containing symbols (r, p, a, q, s, t, u, v, w, x, y, z) and their corresponding definitions: Revised, Preliminary, Advance estimate, etc. Also includes a note for failures data: 'For these industries (food and kindred prod., tobacco mfg., apparel and other textile prod., petroleum and coal prod., chem. and allied prod., rubber and plastics prod.) sales are considered equal to new orders.' and a reference to page S-4.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1974	1975	1975					1976

ϕ Revised. ϕ As of July 1.

ϕ Includes data not shown separately. ϕ Except department stores mail order.

ϕ See corresponding note on p. S-12.

ϕ Revisions back to Oct. 1973 appear in "Population Estimates and Projections: Estimates of the Population of the United States and Components of Change—1930-75," P-25, No. 632 (July 1976), Bureau of the Census.

ϕ Beginning in the Feb. 1976 SURVEY, data (revised back to Jan. 1971) reflect new seasonal factors and a modification of the procedures previously used to seasonally adjust a few of the series (teenage unemployment and those few other unemployment series of which teenagers are the exclusive or major part). Comparable monthly data back to 1967 appear in EMPLOYMENT AND EARNINGS (Feb. 1976), USDL, BLS.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1974	1975	1975					1976

† Revised. ‡ Preliminary. § Average for year. ¶ Daily average. ⊙ Adjusted to exclude interbank loans. § For bond yields, see p. S-21. † Beginning Jan. 1959, monthly data have been revised to reflect new seasonal factors and adjustment to bench marks for the latest call date (Dec. 31, 1975). Revisions are available from the Federal Reserve Board, Washington, D.C. 20551. ‡ Includes data for items not shown separately. † Data have

been revised back to 1970, noninstallment credit will no longer be available on a monthly basis. "Personal loans" and "other consumer goods paper" have been combined to form an "all other" category (not shown separately here). Earlier monthly data are available from the Federal Reserve Board, Washington, D.C. 20551. † Beginning Jan. 1973, data have been revised; revisions for Jan. 1973-April 1975 will be shown later.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1974	1975	1976						1976

* Revised. † Preliminary. ‡ Before extraordinary and prior period items. § Annual total; quarterly revisions not available. ¶ Includes data not shown separately. † Applies to passengers, baggage, cargo, and mail carried. § Passenger-miles as a percent of available seat-miles in revenue service reflects proportion of seating capacity actually sold and utilized. ⊙ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service. * New series. Source: ICC (no comparable data prior to 1972).

⊕ Indexes are comparable for the identical quarter of each year (and from year to year). Δ Effective 1976, class I roads are defined as those having annual operating revenues of \$10 million or more. ⊕ Natl. Railroad Pass. Corp. (Amtrak) operations (not included in AAR data above), 1st 6 months 1974 and 1975 (mil. \$): Oper. revenues, 129; oper. expenses, 221; 248; net loss, 125; 166; (ICC). ⊕ Domestic trunk operations only (domestic trunks average about 90% of total domestic operations). ⊕ For 1st qtr. 1975. † For 2d qtr. 1975.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1974	1975	1975						1976

¹ Revised. ² Preliminary. ³ Annual data; monthly revisions are not available.
⁴ Totals include data for types of lumber not shown separately.
⁵ Effective Aug. 1976 SURVEY, scrap excludes imports of rerolling rails and pig iron excludes sponge iron imports previously included.
⁶ Effective with 1974 annual and Jan. 1975 figures, data reflect expanded sample and exclusion of direct-reduced (prereduced) iron, previously included in scrap series.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1974	1975	1975						1976

* Revised. † Preliminary. ‡ Annual data: monthly or quarterly revisions are not available. § For month shown. ¶ The rate for Jan-June 1975 is as follows: 90.4; 93.8; 93.4; 84.9; 75.9; 69.6.

*New series. Source: American Iron and Steel Institute. The production rate of ca-

pability utilization is based on tonnage capability to produce raw steel for a full order book based on the current availability of raw materials, fuels and supplies, and of the industry's coke, iron, steelmaking, rolling and finishing facilities. Data prior to 1975 are not available.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1974	1975	1975						1976

* Revised. 1 Annual data; monthly revisions are not available. 2 Less than 50 tons.

3 See "****" note. 4 For month shown.

5 Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap. 6 All data (except annual production figures) reflect GSA remelted zinc and zinc purchased for direct shipment. 7 Revised Dec. 31 stocks for 1970-73 (thous. tons): 124.2; 48.6; 30.1; 25.9. Producers' stocks elsewhere, end of Aug. 1976, 12,700 tons.

*New series effective with data for Jan. 1976. Source: Metals Week. MW Composite monthly price (Straits quality, delivered) is based on average of daily prices at two markets (Penang, Malaysia—settlement, and LME 3-month—High grade), and includes fixed charges plus dealer's and consumer's 70-day financing costs; no comparable earlier prices are available.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS	1974	1975	1975						1976

† Revised. † Less than 50 thousand barrels. ‡ Reflects revisions not available by months. § Not comparable with data for earlier periods because stocks cover 100 additional terminals beginning Dec. 1974.

¶ Includes data not shown separately. § Includes nonmarketable catalyst coke. ¶ Includes small amounts of "other hydrocarbons and hydrogen refinery input," not shown separately. † Monthly revisions back to 1973 are available upon request.

¹ Revised. ² Preliminary.

³ Reported annual total; revisions not allocated to the months. ⁴ Less than 50 thousand barrels. ⁵ Beginning with January 1975, data for soda combined with those for sulphate; not comparable with data for earlier periods.

⁶ Beginning March 1975, data for defibrated or exploded, screenings etc., not available; not comparable with those for earlier periods. ⁷ Data exclude small amounts of pulp because reporting would disclose the operations of individual firms. ⁸ Monthly revisions back to 1974 are available upon request.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the edition of 1975 BUSINESS STATISTICS	1974	1975	1975						1976

¹ Revised. ² Season average. ³ For 5 weeks; other months, 4 weeks. ⁴ Monthly average. ⁵ Less than 500 bales. ⁶ Effective Sept. 1976 SURVEY, data omit production and stocks of saran and spandex yarn; for 1974 and 1975, such production totaled 11.9 and 11.7 mil. lbs. ⁷ For 11 months. ⁸ Season average to Apr. 1, 1976. ⁹ Effective 1976, production of blanketing is included in 100% spun yarn fabric; prior to 1976 production of such fabric (totaling 15.5 mil. yd., 4th qtr. 1975) is included in "all other group," not shown separately. ¹⁰ Includes data not shown separately. ¹¹ Net-weight (430-lb.) bales. ¹² Effective Jan. 1976, specifications for the price formerly designated fine good French combing and staple have been changed as shown above. Effective with the May 1976 SURVEY the foreign wool price is quoted including duty.

Unless otherwise stated in footnotes below, data through 1974 and descriptive notes are as shown in the 1975 edition of BUSINESS STATISTICS

ATTENTION INCOME DATA USERS!

Here, for the first time, is a comprehensive and detailed source of personal income data for 3,618 areas. Prepared by the Bureau of Economic Analysis and published through the National Technical Information Service, a 4-volume set titled

LOCAL AREA PERSONAL INCOME, 1969-74

shows total and per capita personal income by place of residence, personal income by type of payment, and labor and proprietors' income by major industry and place of work.

SPECIAL FEATURE: DETAIL AVAILABLE FOR NON-SMSA COUNTIES

Volume I includes methodology and classification of SMSA's and BEA economic areas. Shows data for all States, BEA economic areas, and SMSA's. Accession No. PB 254055. Price \$10 paper, \$2.25 microfiche.

A summary methodology is included in each of the following volumes.

Volume II shows data for counties and SMSA's in the following States: Connecticut, Delaware, District of Columbia, Illinois, Indiana, Iowa, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, and Wisconsin. Accession No. PB 254056. Price \$13.75 paper, \$2.25 microfiche.

Volume III covers Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia. Accession No. PB 254057. Price \$16.25 paper, \$2.25 microfiche.

Volume IV covers Alaska, Arizona, California, Colorado, Hawaii, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, Utah, Washington, and Wyoming. Accession No. PB 254058. Price \$16.25 paper, \$2.25 microfiche.

The volumes can be ordered from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Be sure to mention the accession numbers of the volumes desired.
