COMMAND  
DIRECTOR FOR LOGISTICS, JOINT STAFF (J4)  
DIRECTORS OF THE DEFENSE AGENCIES AND FIELD  
ACTIVITIES

SUBJECT: Changes to the Defense Logistics Standard Systems (DLSS)

Defense Reform Initiative Directive #48 and Guidance and Policy Memorandum, *DoD Use of Electronic Data Interchange (EDI) Standards in Logistics Applications*, direct the migration from DoD-unique to commercial standards for logistics data interchange. This migration necessitates guidance governing continued DLSS operations.

Success of this migration requires commitment on your part. Stability in logistics systems is absolutely essential during the transition from DLSS to the Defense Logistics Management System (DLMS) implementation. Therefore, effective immediately, only critical changes deemed essential to the DLSS will be approved. Previously approved changes will be allowed to proceed to implementation. Future DLSS change requests deemed essential to correct operational deficiencies, or to implement process improvements, will be evaluated through the DLSS/DLMS change control process. Those deemed essential will be forwarded to DUSD(L)LSM for approval. A listing of applicable DLSS is provided at Attachment 1.

Your commitment to the implementation of commercial standards (American National Standards Institute Accredited Standards Committee X12, extensible mark-up language (XML), web-based solutions, data sharing, and other electronic commerce/

electronic business technologies) will ensure DoD logistics support of *Joint Vision 2010*. Point of contact for this action is Mr. James Carnes, who can be reached at (703) 697-2500 or by E-mail at: JCarnes@acq.osd.mil.
