

My name is Debbie Lunta, I once lived in a very small 2 bedroom house with my husband and 3 sons. My oldest son is 6 yrs older than the next son. It was very hard for the 3 of them to share 1 small room. This house had no central heat or air. The floors were all caving in, and in the bathroom, nothing worked right. My husband is an electrician and works very hard. We both felt we should live in a better house. The United Housing Program saved our lives. They offered us a way to a better living, & just to have room to move around in makes all the difference in the world in raising my sons. The United Housing Program taught us all about mortgages, taxes, insurance, our landscapes, including ~~settling~~ the settling problems Texas has. Our family would not have been able to raise the down payment it takes to get a house these days.

The United Housing Program helped us get a new house. This was truly a dream for us. We are hard working people who have lived in Irving all our lives and deserved a decent place to live.

I believe in the United Housing Program that I have told some of my friends who also work hard and deserve a good place to live. I also have volunteered more than 40 hours to help others in this program. We also help in the community. I have cooked and served ~~residents~~ residents living in the Bear Creek Area. I also help in holiday events. I am very glad to help. I hope more families can be a part of a program like the United Housing Program.

I Thank Them with all My Heart.

Thank You!
