# 1999, 2000, 2001 and 2002 CRA EDITS

# Note: CRA Edits have not been modified for 2002 data collection.

# **EDIT TYPES**

CRA edits are divided into three edit types: Syntactical, Validity and Quality. Each type represents the severity of the error and should be thoroughly understood to ensure that the data are accurate and reported in their entirety.

◆ <u>Syntactical</u> (S)	Loan records that have errors that prevent these records from being uploaded to the database. These errors range from incorrect activity dates to duplicate records (which indicate that the property combination for those record identifiers was used more than once). Loan records containing syntactical errors will not be added to the database until the appropriate correction has been made.
◆ <u>Validity</u> (V)	Loan records that have factually or logically incorrect information reported. The most common validity error is incorrect census tract/BNA numbers.
◆ Quality (Q)	Loan information that, while it may pass all syntactical and validity edits, is nevertheless statistically unusual and is subject to further investigation or review to ascertain correctness.

#### Note:

V125 compares the number of records reported on the transmittal sheet to the number of records received in the submission. It does not have to be corrected in order for the data to be accepted as final and accurate. This edit is only performed to verify that all data have been received.

Any syntactical or validity edits that are not corrected will result in an erroneous disclosure statement because loan records with edits are NOT represented on the disclosure statements. Only an **error-free** CRA submission will result in an accurate disclosure statement.

## **EXPLANATION OF ASSESSMENT AREA EDITS**

The assessment area may be reported by census tract-BNA; however, it is permitted to report the assessment area property location information at a summary level. "NA" in the MSA field represents an area outside of any metropolitan statistical area. "NA" in the state, county, or census tract/BNA field(s) represents the defined area (state, county, or census tract/BNA) in its entirety. For example, an NA entry in the census tract/BNA field represents all census tracts/BNAs for the MSA/state/county combination represented.

Below are the six combinations of how the property location information can be reported on the assessment area record. Assume that each of these examples are individual assessment areas. The combinations reported in these examples represent MSA/State/County/Census Tract-BNA combinations.

◆ 8840/NA/NA/NA -	The assessment area encompasses all census tracts and BNA numbers in MSA 8840.
▶ 8840/51/NA/NA -	The assessment area encompasses only the census tracts and BNA numbers in MSA 8840 <i>AND</i> state 51.

✤ NA/51/059/NA -	The assessment area encompasses all census tracts and BNA numbers (if any) in state 51 <i>AND</i> county 059 that are outside of an MSA. <sup>1</sup>
▶ 8840/51/059/NA -	The assessment area encompasses all census tracts and BNA numbers (if any) in MSA 8840, state 51, <i>AND</i> county 059.
◆ 8840/51/059/0001.00 -	The assessment area encompasses only census tract 0001.00 in county 059, state 51, and MSA 8840.
▶ NA/51/059/0001.00 -	The assessment area encompasses only that part of census tract 0001.00 in county 059, state 51, and not in an MSA.

### +/-: INCLUDE/EXCLUDE PROPERTY LOCATIONS IN THE ASSESSMENT AREA

To include or exclude property locations in the assessment area, a "+" or "-" is required to be indicated in the field prior to the property location fields. The "+" indicates that the property location is to be included in the assessment area. The "-" represents an exclusion from the assessment area.

<sup>&</sup>lt;sup>1</sup>Most counties are encompassed in their entirety in one MSA or non-MSA area; however, there are 33 counties in New England that are split either between MSAs or between MSA and non-MSA areas. These counties are split into as many as four MSA/non-MSA areas. It may be necessary to report multiple combinations to include an entire county. For example, if NA/51/059/NA is being reported and the county is split, this combination will only represent the portion of the county that is in a non-MSA area.

## **EXPLANATION OF ASSESSMENT AREA EDITS (Continued)**

#### EXAMPLES: REPORTING ASSESSMENT AREAS USING INCLUDES AND EXCLUDES

The following examples illustrate how assessment areas should be reported. The geographic locations of the Atlanta (0520), Georgia (13), MSA and the St. Louis (7040), Missouri (29) - Illinois (17) MSA are used in the examples provided below.

٠

If your assessment area encompasses an entire MSA, the data should be reported as follows:

INCLUDE/ EXCLUDE (+/-)	MSA	<u>STATE</u>	COUNTY	CENSUS <u>TRACT/BNA</u>
+	0520	NA	NA	NA

This example includes the entire Atlanta (0520) MSA. The (+) symbol indicates "include" and NA indicates that all geographies located within MSA 0520 are included.

If your assessment area encompasses an entire MSA, less one county located in the MSA, the data should be reported as follows:

INCLUDE/ EXCLUDE (+/-)	MSA	<u>STATE</u>	COUNTY	CENSUS <u>TRACT/BNA</u>
+	0520	NA	NA	NA
-	0520	13	151	NA

The example includes the entire Atlanta (0520) MSA, less one county (Henry - 151) located in Georgia (13). The (-) symbol indicates "exclude".

A second example demonstrates an assessment area that encompasses an entire MSA, less three counties:

INCLUDE/ EXCLUDE (+/-)	MSA	STATE	<u>COUNTY</u>	CENSUS <u>TRACT/BNA</u>
+	0520	NA	NA	NA
-	0520	13	151	NA
-	0520	13	063	NA
-	0520	13	067	NA

This example excludes three counties (Henry - 151, Clayton - 063, and Cobb - 067) located in the Atlanta (0520) MSA.

## **EXPLANATION OF ASSESSMENT AREA EDITS (Continued)**

#### EXAMPLES: REPORTING ASSESSMENT AREAS USING INCLUDES AND EXCLUDES (continued)

•

If your assessment area encompasses all census tracts in one county (in one MSA), the data should be reported as follows:

INCLUDE/ EXCLUDE (+/-)	MSA	<u>STATE</u>	COUNTY	CENSUS <u>TRACT/BNA</u>
+	0520	13	089	NA

This example includes one county (De Kalb - 089) and all its census tracts (NA) located in the Atlanta (0520) MSA.

If your assessment area encompasses several census tracts located in one county of an MSA, the data should be reported as follows:

INCLUDE/ EXCLUDE (+/-)	MSA	STATE	<u>COUNTY</u>	CENSUS <u>TRACT/BNA</u>
+	0520	13	089	0213.01
+	0520	13	089	0213.02
+	0520	13	089	0213.03
+	0520	13	089	0213.04

This example includes four census tracts in one county (De Kalb - 089) located in the Atlanta (0520) MSA.

An MSA may be located in more than one state. For example, the St. Louis, MO-IL (7040) MSA is located in Missouri and Illinois. If your assessment area encompasses two counties within an MSA and each county is located in a different state, the data should be reported as follows:

INCLUDE/ EXCLUDE (+/-)	MSA	<u>STATE</u>	COUNTY	CENSUS <u>TRACT/BNA</u>
+	7040	29	099	NA
+	7040	17	119	NA

This example includes one county (Jefferson - 099) in Missouri (29) and one county (Madison -119) in Illinois. All other counties located in the St. Louis (7040) MSA (both Missouri and Illinois) are not included in this assessment area.

If your assessment area encompasses a whole county with the exception of one census tract/BNA in that county, the data should be reported as follows:

INCLUDE/ EXCLUDE (+/-)	MSA	<u>STATE</u>	COUNTY	CENSUS <u>TRACT/BNA</u>
+	0520	13	151	NA
-	0520	13	151	0112.01

This example includes the entire county (Henry - 151) less one census tract/BNA (0112.01) in that county.

The aforementioned examples of how to define your assessment area are not exhaustive. The six core property location combinations should be used in conjunction to properly define your assessment area.
