

## NTIS Technical Reports Newsletter

**Purpose:** To bring you a sampling of the latest documents added to the NTIS Database and to help you gain a greater understanding of the wealth of scitech information available from the National Technical Information Service.

Director: Ellen Herbst  
Deputy Director: Bruce Borzino  
Associate Director for Product & Program Management: Don Hagen  
Manager, Cataloging/Indexing Division: Sue Feindt  
Manager, Product & Program Management: Wayne Strickland  
Contributing Program Manager: Christie Langone  
Technical Information Specialist: Anne Harrison  
Editor and Design Direction: Linda Davis

## Coming Soon

U.S. Department of Commerce

**National Technical Reports Library**

In early Spring 2009, NTIS will be launching the National Technical Reports Library (NTRL) to further enhance accessibility to the NTIS technical reports collection.

The NTRL will provide access to:

- Bibliographic records of more than 2,000,000 technical reports
- Downloadable full text of 500,000 of these reports in PDF format

Subscription rates will be based on institutional FTE levels.

The NTRL operates on a system interface that allows users to do queries on the large NTIS bibliographic database. The intent is to broadly expand and improve access to over 2.5 million bibliographic records (pre-1960 to present) and 500k full-text documents in PDF Format that are directly linked to that bibliographic database.

**If interested, write us at [ntnews@ntis.gov](mailto:ntnews@ntis.gov), subject line NTRL Information; and we will send you more information.**

### The Nation's Source for Scientific Information

The National Technical Information Service (NTIS), is the nation's largest and most comprehensive source of government-funded scientific, technical, engineering and business-related information.

For more than 60 years, we have served as an innovative resource to Federal agencies, businesses and universities looking for high-caliber information. Our mission is straightforward: to support the nation's economic growth by providing access to information that stimulates innovation and discovery.

While you can find information on virtually any subject on the web, there's no guarantee that the information is accurate — or that it has been published by a legitimate source. NTIS undergoes a rigorous process to ensure that all the information we offer is authentic and credible. This integrity, along with the breadth and depth of our collection, is why NTIS is regarded as the nation's preeminent source of government information.

### Subject Category Codes/Classification

NTIS classifies citations into 39 subject categories. Each of these subject categories is divided into subcategories. This method provides sorting categories for both hard and soft sciences. All subject categories consist of three character codes: two numerics and one alpha character. The numeric codes represent entire categories, the alpha codes are used to designate subcategories within these broad categories. The number of NTIS subcategories posted to an information product average from one to five, although there are some reports with more.
