INTRODUCTION

This is a companion volume to the final report of the School Food Purchase Study -III: Hawaii, Alaska and Puerto Rico. It consists of tables containing estimates of the quantity, dollar value and unit price of food acquisitions by School Food Authorities (SFAs) in Alaska and Hawaii that participated in the National School Lunch Program (NSLP) and School Breakfast Program (SBP) during school year 2009/10, and compares the results with those for the 48 contiguous states and the District of Columbia. The Puerto Rico SFA was unable to provide usable food purchase record and is not included in the analyses of food purchases; it is only covered in the analyses of food procurement practices in the main report.

The tables provide information for all individual food items purchased by SFAs in Alaska and Hawaii. Each item is identified by food code and by name. School District food acquisitions are assigned to one of three categories: purchased foods, processed foods containing donated USDA Foods, or donated USDA Foods. Most of these tables provide values for each of these categories plus total acquisitions.

The following tables appear in the Appendix:

- **Table 1: Individual food code classification system** – This table describes the classification system used in developing the six-digit food codes that were assigned to individual food items.
- **Table 2: Assignment of individual food items to food groups and subgroups** – This table identifies the food group and subgroups to which each of the individual food items are assigned for purposes of data aggregation. There are 16 food groups and 67 subgroups.
- **Table 3: Total estimated value of individual food items acquired by public unified NSLP school district in Alaska and Hawaii, SY 2009/10** – This table provides the dollar value of individual food item acquisitions in Alaska and Hawaii. Donated USDA Foods and processed foods containing donated USDA Foods are valued at commercial values, not at USDA-assigned values.
- **Table 4: Total estimated weight in pounds of individual food items acquired by public unified NSLP school districts in Alaska and Hawaii, SY 2009/10** – This table provides the weight in pounds of individual food item acquisitions in Alaska and Hawaii. Weights are net product weight in the form described.
- **Table 5: Mean cost per pound of individual food items acquired by public unified NSLP school districts in Alaska, Hawaii, and the 48 contiguous states and the District of Columbia, SY 2009/10** – This table provides the mean per pound price paid for commercially purchased food items by school districts in Alaska, Hawaii and the 48 contiguous states and the District of Columbia that purchased the item. All values assigned to processed foods containing donated USDA Foods are based on commercial prices paid for comparable purchased foods. Differences between the two are due to locational differences rather than to differences between purchased foods and processed products containing donated USDA Foods.
- **Table 6: Mean cost and volume per 100,000 meal equivalents of individual food items acquired by public unified NSLP school districts in Alaska, Hawaii, and the**

48 contiguous states and the District of Columbia, SY 2009/10 – This table estimates the annual acquisition value of each individual food item for every 100,000 meal equivalents. (A meal equivalent is on lunch equals 1.5 breakfasts.).

Table I: Individual food code classification system

Each food item identified in the study was assigned a unique six – digit food code. The code numbers were developed using the following classification system:

<u>Digit</u>	<u>Item</u>
1	General category (e.g. fruit)
2 and 3	Subcategories (e.g. peaches)
4	Specific characteristics (e.g. peaches in heavy syrup)
5	Form (e.g. canned)
6	Check digit

Classification system by digit
