SUBJECT: SUMMARY OF OCTOBER 19-20, 2010, NRC PUBLIC
WORKSHOP ON DEVELOPMENT OF A REGULATORY
FRAMEWORK FOR SPENT NUCLEAR FUEL REPROCESSING
FACILITIES

On October 19-20, 2010, the U.S. Nuclear Regulatory Commission (NRC) hosted a public workshop to discuss issues associated with the development of a regulatory framework for spent nuclear fuel reprocessing facilities. The purpose of the workshop was to solicit the views and perspectives of stakeholders regarding the technical and regulatory issues that the NRC staff is addressing in the development of a reprocessing regulatory framework.

To elicit a diverse set of views from stakeholders, the NRC invited a diverse panel of stakeholders; which included NRC staff, citizen and environmental groups, nuclear industry representatives, and other Federal agencies. The workshop discussions followed a roundtable discussion format, moderated by a professional facilitator, to promote dialogue and discussion among panelists. All discussions began with a brief NRC staff presentation of the issues, followed by a roundtable discussion among panelists; and concluded by an opportunity for questions and comments from members of the public. A transcript for both days of the workshop may be found in NRC's Agencywide Documents Access and Management System (ADAMS) through Accession Numbers ML103020121 (October 19, 2010) and ML103020184 (October 20, 2010).

The workshop was a Category 3 public meeting. Lists of workshop attendees and panelists are enclosed. Handouts of NRC staff's presentations may be found in ADAMS, through Package Accession Number ML102980236. In addition, NRC staff distributed brief, two-page fact sheets, providing an overview and short summary of the issues discussed during the workshop sessions. These fact sheets may be found in ADAMS through Package Accession Number ML102720143.

Enclosures: List of meeting attendees and panelists
