

NRC Communication with Dry Storage Users Groups

Randy Bunt

Holtec Users Group Chair

June 23-24, 2010 Spent Fuel Storage and
Transportation Licensing Process Conference

Dry Storage Users Groups

- Formed as Industry /Original Equipment Manufacturer (OEM) forum for Best Practices
- Initially and off-shoot of OEM to Industry Communication
- Matured over the last few year to an Industry Focused organization

Part 50 Users/Owners Groups

- NSSS Suppliers
 - BWROG & PWROG
- EPRI Sponsored
 - Terry Turbine, Pump, etc.
- Vendor Related
 - Emergency Diesel Generator

Part 50 Users/Owners Groups

- Focal Point on Industry Wide Communication
- BWROG, PWROG and EPRI have dedicated NRC PM
- Utility Chaired with Utility Executive Oversight
- Hold periodic meetings with NRC management

Part 71/72 Holtec Users Group

- Key Communication Conduit for NRC on Some Recent Issues
- Bridge gap between OEM Docket and Plant Docket
- Conduit for NEI on Particular OEM Topics
- Address Utility Function for Industry Generic Issues for Holtec Fleet

Part 71/72 Holtec Users Group

- Converting to Utility Driven versus OEM Driven Focus
- Working with NRC to improve formal communication and acknowledgement
- Establishing Utility Executive Oversight

NRC/HUG Future Relationship

- Establish a communication process where the NRC SFST issues formal correspondence to the HUG.
 - Consistent approach for NRR/NMSS
 - Enhance engagement to obtain quick and formal resolution of issues
- HUG is the focal point at a storage technology specific level for issues that cross the OEM and Utility boundary.
 - Helium Leak testing
 - Stack-up
 - Pad Design
