7/26/04

MARKETING AND REGULATORY PROGRAMS (MRP) ISSUANCE SYSTEM

1. PURPOSE

This Directive establishes the MRP Issuance System.

2. REPLACEMENT HIGHLIGHTS

This Directive replaces MRP Directive 3010.2, dated 5/31/96.

3. COVERAGE

The October 20, 1994, United States Department of Agriculture (USDA) reorganization created the MRP consisting of the Animal and Plant Health Inspection Service (APHIS), Agricultural Marketing Service (AMS), and Grain Inspection, Packers and Stockyards Administration (GIPSA). GIPSA consists of two formerly independent agencies B the Federal Grain Inspection Service and the Packers and Stockyards Administration. Only those functions that were consolidated by the reorganization will be covered by MRP issuances:

- a. Administrative Services;
- b. Finance;
- c. Personnel; and
- d. Travel.

All functions retained within the agencies will continue to be covered by each agency=s issuance system.

4. AUTHORITY

Departmental Regulation 0100-001, Departmental Directives System, dated July 25, 1996.

5. DEFINITIONS

- a. MRP Issuances. Documents that communicate MRP policies and procedures to employees. They initiate or govern actions, conduct, and procedures or explain benefits and how to obtain them.
- b. Directives. Permanent issuances that are in force until canceled. Directives are used to issue delegations of authority, basic policies, and operating instructions. Directives can be changed without reissuing or reprinting the entire issuance if the change does not affect the current policy.
- c. Notices. Temporary (not to exceed 1 year), one-time issuances that normally address a single subject or action, establish short-term programs or interim procedures, or make announcements. If information contained in a notice is of a permanent nature, it must later be reissued as a directive or manual/handbook. Notices cannot be changed.
- d. Manuals/Handbooks. Permanent issuances that provide technical guidance and detailed procedures on a particular subject or function, generally of the type that must be referred to on a daily or frequent basis. Manuals/handbooks can be changed without reissuing or reprinting the entire issuance if the change does not affect the current policy.
- e. Issuance Changes. Replacement pages for less than 40 percent of a directive or manual/handbook. An entire directive or manual/handbook must be reissued when more than 40 percent is changed or when the directive is shorter than 4 pages.

6. POLICY

It is MRP policy to publish shared MRP issuances through a unified system with a focus on consolidating and reducing the number of issuances, while ensuring that agency-unique issuance requirements also are met. Employees will be provided with clear, concise, and timely issuances to effectively implement MRP responsibilities. All formal statements of MRP policy and procedures will be included in the MRP Issuance System. Any changes to the MRP Issuance System will be agreed upon and approved by the three MRP agencies.

7. CLASSIFICATION NUMBERING SYSTEM

- a. MRP uses a modification of the USDA directives classification numbering system. Numbering consists of four digits in conformance with the Department's numbering pattern and aligns with other Government regulations as much as possible. The system groups together all administrative issuances on a specific subject so that the information is easy to locate, use, and store. The classification codes are:

- (1) 1000 Series - Organization, authorities, and administration.
 - (2) 2000 Series - Finance and travel.
 - (3) 4000 Series - Personnel.
 - (4) 5000 Series - Property, acquisition, and other administrative services.
- b. The index of current issuances is located at: <http://www.aphis.usda.gov/library> and also at: <http://www.ams.usda.gov/issuances>.
