

Public Notice Submission

Provider Name: Clearwire Corporation

Summary: Clearwire has invested millions of dollars within the San Francisco Bay area census blocks listed herein to provide a full range of broadband services, including wireless high speed internet services, to the area's residents. Clearwire's wholesale relationships with Sprint, Comcast and Time Warner Cable will also greatly enhance broadband competition throughout the area. Clearwire's 4G network currently is available in areas of the United States in which 41 million people reside. Clearwire plans to continue to expand its 4G coverage to 120 million people across the United States, including the San Francisco Bay Area, which currently is under construction and planned for commercial launch in fourth quarter 2010. The information provided in this response includes: (1) a comprehensive list of the census tracts covered by Clearwire's San Francisco Bay area network; (2) the number of households served by the San Francisco Bay area network; and (3) the services offered by Clearwire.
