

## **Public Notice Submission**

**Provider Name:** Lonsdale Telephone Company

**Summary:** Lonsdale Telephone Company is headquartered in Lonsdale, MN. Lonsdale's entire service area is broadband capable. Broadband services are currently provided over DSL and FTTP technologies. The entire service area is built to provide service over FTTP and the DSL subscribers are being migrated to the FTTP technology as time permits. LTC has multiple transport networks in place (1 Gbps, 10 Gbps, OC-48, DWDM and dark fiber) to provide services to their subscribers. It is of the opinion that no other middle mile providers are necessary to stimulate broadband deployment in their area.
