

## **Public Notice Submission**

**Provider Name:** Mid-Hudson Cablevision, Inc.

**Summary:** Mid-Hudson offers ubiquitous last mile and middle mile broadband services of up to 10 gbps throughout the service areas identified herein in Columbia and Greene Counties in New York. The federal government has already invested in subsidizing broadband in this area through the Rural Utilities Service's Broadband Loan award to Mid-Hudson. Mid-Hudson already provides extensive middle mile broadband services and interconnection to the area's community anchor institutions and to other service providers. Mid-Hudson's middle mile and interconnection customers include Tech Valley Communications, which has applied for overlapping BTOP funding, and the community colleges and other community anchor institutions that TVC seeks subsidy to build to in these already-served portions of the two counties.
