

Public Notice Submission

Provider Name: Table Top Telephone Company, Inc.

Summary: Table Top Telephone Company provides internet and telecommunications services in rural and sparsely populated areas of Arizona. The company is currently in the process of completing multiple middle mile fiber optic transport projects with RUS funding to connect its serving areas and to provide high bandwidth connections with ethernet transport providers. Table Top Telephone Company is also an RUS Broadband Initiatives Program applicant in the second round of funding. In addition, there were numerous NTIA and RUS awards in rural Arizona for middle mile infrastructure. Any award of middle mile projects in the census tracts overlapping Table Top's service area is unnecessary, redundant, and duplicative.
