

Public Notice Submission

Provider Name: Cunningham Communications

Summary: Cunningham Telephone Company (a current RUS borrower), with its affiliate Cunningham Communications has been providing high-quality communications services to the residents of the rural communities of northcentral Kansas for more than 65 years. It was one of the first providers in this remote area to offer broadband services eleven years ago, covering 15 census tracts in NTIA's list all of which have access to broadband at speeds of at least 3Mbps. Today Cunningham provides broadband to nearly 3,800 customers reaching speeds up to 10 Mbps. In addition to these last mile facilities, Cunningham also provides a middle mile fiber ring throughout its communities to support the high speed internet access its customers enjoy. Therefore, Cunningham's entire service area is neither unserved nor underserved as defined in the Round 2 NOFA for BTOP. .
