

Public Notice Submission

Provider Name: Swisher Telephone Company

Summary: Swisher Telephone Company provides FTTH network broadband services to 100% of our authorized exchange area's businesses and households and has two points of presence within our service area without the use of stimulus grants. BTOP funded middle mile stimulus projects build infrastructure to provide internet connectivity, and special access. Funded companies may expand their services to end users leaving smaller users and households limited services and/or increased rates due to insufficient revenues for current providers. Swisher Telephone Company respectfully requests that those applying for BTOP funding within our authorized exchange service areas be denied. FTTH network broadband services enables Swisher Telephone Company to offer 100Mbps plus broadband services to our customers providing leading edge technology required to grow our communities and enhance the lives of those living in rural areas.
