

## **Public Notice Submission**

**Provider Name:** West Wisconsin Telcom Cooperative, Inc.

**Summary:** West Wisconsin Telcom Cooperative, Inc. ("WWTC") is significantly concerned with any BTOP Round #2 Applications that would attempt to duplicate the existing Highspeed Broadband Services network provided by WWTC. WWTC currently provides a Fiber-To-The-Home network to 100% of the resident and business end user customers in its service territory. The network also provides fiber connectivity to all Anchor Institutions in the served area. Any BTOP Application awards would diminish the value of this existing private sector investment. The service territories targeted in these applications are neither unserved or underserved.
