## Traffic Safety Facts 2002

U.S. Department of Transportation National Highway Traffic Safety Administration

## School Transportation-Related Crashes

> "An average of 24 schoolage children die in school transportation-related traffic crashes each year - 6 occupants of school transportation vehicles and 18 pedestrians."

## A Public Information Fact Sheet on Motor Vehicle and Traffic Safety Published by the National Highway Traffic Safety Administration's National Center for Statistics and Analysis

A school transportation-related crash is a crash which involves, either directly or indirectly, a school bus body vehicle, or a non-school bus functioning as a school bus, transporting children to or from school or school-related activities.

Since 1992 there have been about 407,000 fatal traffic crashes. Of those, 0.33 percent $(1,332)$ were classified as school transportation-related.

Since 1992, 1,472 people have died in school transportation-related crashes - an average of 134 fatalities per year. Most of the people who lost their lives in those crashes ( 69 percent) were occupants of other vehicles involved. Nonoccupants (pedestrians, bicyclists, etc.) accounted for 23 percent of the deaths, and occupants of school transportation vehicles accounted for 8 percent.
Since 1992, 202 school-age pedestrians (less than 19 years old) have died in school transportation-related crashes. Nearly two-thirds ( 63 percent) were killed by school buses, 5 percent by vehicles functioning as school buses, and 32 percent by other vehicles involved in the crashes. More than one-half ( 52 percent) of all school-age pedestrians killed in school transportation-related crashes were between the ages of 5 and 7.

Figure 1. Total Occupant and Pedestrian Fatalities in School Transportation-Related Crashes, by Age Group, 1992-2002

Note: Occupant fatalities shown are for occupants of school buses and non-school buses used as school buses.

## "From 1992 to 2002, more than half of the school-age pedestrians killed in school transportationrelated crashes were between 5 and 7 years old."

On average, 13 school-age pedestrians are killed by school transportation vehicles (school buses and non-school bus vehicles used as school buses) each year, and 6 are killed by other vehicles involved in school bus-related crashes.

More school-age pedestrians are killed in the afternoon than in the morning, with 38 percent of the fatalities occurring in crashes between 3:00 and 4:00 PM.

Table 1. Total Fatalities in School Transportation-Related Crashes by Time of Day, 1992-2002

| Time of Day | Occupant Fatalities* | Pedestrians (School Age) | Total Fatalities |
| :---: | :---: | :---: | :---: |
| 12:00-6:59 AM | 8 | 10 | 18 |
| 7:00-7:59 AM | 30 | 29 | 59 |
| 8:00-8:59 AM | 17 | 16 | 33 |
| 9:00-9:59 AM | 4 | 6 | 10 |
| 10:00-10:59 AM | 2 | 0 | 2 |
| 11:00-11:59 AM | 0 | 5 | 5 |
| 12:00-12:59 PM | 4 | 4 | 8 |
| 1:00-1:59 PM | 2 | 5 | 7 |
| 2:00-2:59 PM | 13 | 28 | 41 |
| 3:00-3:59 PM | 21 | 77 | 98 |
| 4:00-4:59 PM | 11 | 18 | 29 |
| 5:00-11:59 PM | 6 | 4 | 10 |
| 11-Year Total | 118 | 202 | 320 |

*Does not include occupants of other vehicles in school transportation-related crashes.

Between 1992 and 2002, 92 crashes occurred in which at least one occupant of a school transportation vehicle died. More than half of those crashes ( 53 percent) involved another vehicle. In the 43 single-vehicle crashes, 57 occupants - 9 drivers and 48 passengers - were killed. In the 49 multiple-vehicle crashes, 26 drivers and 35 passengers died. In the 43 single-vehicle crashes, the first harmful events were as follows: striking a fixed object ( 22 crashes), a person falling from the vehicle ( 9 crashes), the vehicle overturning ( 5 crashes), the vehicle colliding with a train ( 3 crashes), other non-collision (2 crashes), and collision with object not fixed (2 crashes).

In 43 percent of all crashes involving fatalities to occupants of a school transportation, the principal point of impact was the front of the vehicle.

Since 1992, 7 drivers and 15 passengers have died in school bus body vehicles providing transportation for purposes other than school or school-related activities (churches, civic organizations, etc.). In 1987, one such multi-vehicle crash resulted in the deaths of 27 occupants, including the driver.

## "Impacts to the front of the school transportation vehicle occur in 40 percent of fatal school transportationrelated crashes."

Table 2. Total Occupant Fatalities in School Transportation-Related Crashes by Principal Impact Point on School Transportation Vehicle, 1992-2002

| Principal <br> Impact Point <br> on School <br> Transportation <br> Vehicle | Type of Crash |  |  |  |  |  |  | Crashes | Fatalities | Crashes | Fatalities | Crashes | Fatalities |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 13 | 17 | 27 | 34 | $\mathbf{4 0}$ | $\mathbf{5 1}$ |  |  |  |  |  |  |  |

| Other/Unknown | 0 | 0 | 1 | 1 |
| 11-Year Total | 128 | 10 | 64 | 202 |

## For more information:

Information on school transportation-related traffic fatalities is available from the National Center for Statistics and Analysis, NPO-121, 400 Seventh Street, S.W., Washington, D.C. 20590. NCSA information can also be obtained by telephone or by fax-on-demand at 1-800-934-8517. FAX messages should be sent to (202) 366-7078. General information on highway traffic safety can be accessed by Internet users at http://www-nrd.nhtsa.dot.gov/people/ ncsa. To report a safety-related problem or to inquire about motor vehicle safety information, contact the Auto Safety Hotline at 1-800-424-9393.
Other fact sheets available from the National Center for Statistics and Analysis are Overview, Alcohol, Occupant Protection, Older Population, Speeding, Children, Young Drivers, Pedestrians, Pedalcyclists, Motorcycles, Large Trucks, State Traffic Data, and State Alcohol Estimates. Detailed data on motor vehicle traffic crashes are published annually in Traffic Safety Facts: A Compilation of Motor Vehicle Crash Data from the Fatality Analysis Reporting System and the General Estimates System.

Table 4. School Transportation-Related Crashes Involving Occupant Fatalities, 1992-2002

| Year | School Bus Body Type |  |  |  | Vehicle Used as School Bus |  |  |  | Total |  |  |  |
