2007 Data

DOT HS 810 994

Pedestrians

"In 2007, 4,654
pedestrians died in
traffic crashes —
a 13-percent decrease
from the number
reported in 1997."

A pedestrian is defined as any person not in or upon a motor vehicle or other vehicle.

In 2007, 4,654 pedestrians were killed in traffic crashes in the United States — a decrease of 13 percent from the 5,321 pedestrians killed in 1997.

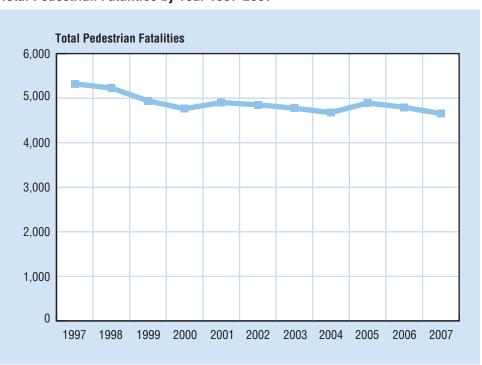

On average, a pedestrian is killed in a traffic crash every 113 minutes and injured in a traffic crash every 8 minutes.

There were 70,000 pedestrians injured in traffic crashes in 2007.

Most pedestrian fatalities in 2007 occurred in urban areas (73%), at non-intersection locations (77%), in normal weather conditions (90%), and at night (67%).

More than two-thirds (70%) of the pedestrians killed in 2007 were males. In 2007, the male pedestrian fatality rate per 100,000 population was 2.19 — more than double the rate for females (0.91 per 100,000 population). In 2007, the male pedestrian injury rate per 100,000 population was 26, compared with 20 for females (see Table 5).

Figure 1
Total Pedestrian Fatalities by Year 1997-2007

Age

Pedestrians (age 70+) accounted for 16 percent (721) of all pedestrian fatalities and an estimated 6 percent (4,000) of all pedestrians injured in 2007.

"In 2007, the fatality rate for pedestrians (age 70+) was 2.66 per 100,000 population – higher than for any other age group."

In 2007, one-fifth (20%) of all children between the ages of 5 and 9 who were killed in traffic crashes were pedestrians. Children age 15 and younger accounted for 8 percent of the pedestrian fatalities in 2007 and 23 percent of all pedestrians injured in traffic crashes.

Table 1
Pedestrians Killed and Injured by Age Group, 2007

"In 2007, nearly onefifth of the children between the ages of 5 and 9 killed in traffic crashes were pedestrians."

The above numbers are not actual counts, but estimates of the actual counts. The estimates are calculated from data obtained from a nationally representative sample of crashes collected through NHTSA's General Estimates System (GES). Estimates should be rounded to the nearest 1,000.

Estimates less than 500 indicate that the sample size was too small to produce a meaningful estimate and should be rounded to 0.

Table 2 **Nonoccupant Traffic Fatalities, 1997-2007**

Year	Pedestrian	Pedalcyclist	Other	Total
1997	5,321	814	153	6,288
1998	5,228	760	131	6,119
1999	4,939	754	149	5,842
2000	4,763	693	141	5,597
2001	4,901	732	123	5,756
2002	4,851	665	114	5,630
2003	4,774	629	140	5,543
2004	4,675	727	130	5,532
2005	4,892	786	186	5,864
2006	4,795	772	185	5,752
2007	4,654	698	152	5,504

Pedestrian fatalities accounted for 85 percent of all nonoccupant fatalities in 2007. The 698 pedalcyclist fatalities accounted for 13 percent, and the remaining 3 percent were skateboard riders, roller skaters, etc.

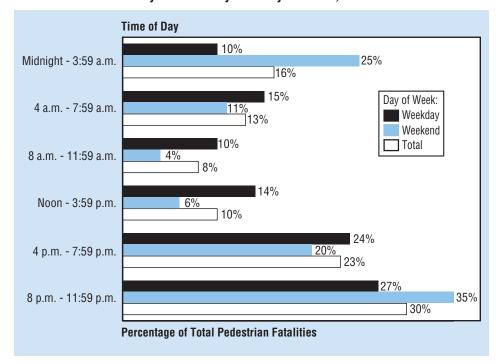

Time of Day and Day of Week

Thirty-six percent of the 354 young (under age 16) pedestrian fatalities occurred in crashes between 3 p.m. and 7 p.m.

Nearly one-half (48%) of all pedestrian fatalities occurred on Friday, Saturday, and Sunday (16%, 17%, and 15%, respectively).

Figure 2

Pedestrian Fatalities by Time of Day and Day of Week, 2007

"Thirty-six percent of all young (under age 16) pedestrian fatalities occurred between 3 and 7 p.m."

Important Safety Reminders

- Drivers are required to yield the right-of-way to pedestrians crossing streets in marked or unmarked crosswalks in most situations. Pedestrian need to be especially careful at intersections where the failure to yield right-of-way often occurs when drivers are turning onto another street and a pedestrian is in their path.
- When possible, cross the street at a designated crosswalk. Always stop and look left, right, and left again before crossing. If a parked vehicle is blocking the view of the street, stop at the edge line of the vehicle and look around it before entering the street.
- Increase visibility at night by carrying a flashlight when walking and by wearing retro-reflective clothing that helps to highlight body movement.
- It is much safer to walk on a sidewalk, but if you must walk in the street, walk facing traffic.

"Alcohol involvement
— either for the driver
or the pedestrian
— was reported
in 49 percent of all
pedestrian fatalities."

Alcohol Involvement

Alcohol involvement — either for the driver or for the pedestrian — was reported in 49 percent of the traffic crashes that resulted in pedestrian fatalities. Of the pedestrians involved, 35 percent had a blood alcohol concentration (BAC) of .08 grams per deciliter (g/dL) or higher. Of the drivers involved in fatal crashes, only 14 percent had a BAC of .08 g/dL or higher, less than one-half the rate for the pedestrians. In 6 percent of the crashes, both the driver and the pedestrian had a BAC of .08 g/dL or higher.

Table 3
Alcohol Involvement in Fatal Pedestrian Crashes, 2007

	No Driver Alcohol Involvement		Involv	Alcohol ement, .0107	Driver / Involve BAC =	ement,	To	Total	
No Pedestrian Alcohol Involvement	519	%		3%	79	%	2,775	61%	
Pedestrian Alcohol Involvement, BAC .01 – .07 g/dL	3%		0%		1%		198	4%	
Pedestrian Alcohol Involvement, BAC ≥ .08 g/dL or Greater	279	%	2% 6%		%	1,605	35%		
Total	3,694	81%	240	5%	644	14%	4,578	100%	

Note: The alcohol levels in this table are determined using the alcohol levels of the involved pedestrian fatalities and all the involved drivers (fatality and other)

For more information:

Information on traffic fatalities is available from the National Center for Statistics and Analysis, NVS-424, 1200 New Jersey Avenue SE., Washington, DC 20590. NCSA can be contacted at 800-934-8517. Fax messages should be sent to 202-366-7078. General information on highway traffic safety can be accessed by Internet users at www.nhtsa.gov/portal/site/nhtsa/ncsa. To report a safety-related problem or to inquire about motor vehicle safety information, contact the Vehicle Safety Hotline at 888-327-4236.

Other fact sheets available from the National Center for Statistics and Analysis are *Overview, Alcohol, African American, Bicyclists and Other Cyclists (formerly titled Pedalcyclists), Children, Hispanic, Large Trucks, Motorcycles, Occupant Protection, Older Population, Race and Ethnicity, Rural/Urban Comparisons, School Transportation-Related Crashes, Speeding, State Alcohol Estimates, State Traffic Data, and Young Drivers.* Detailed data on motor vehicle traffic crashes are published annually in *Traffic Safety Facts: A Compilation of Motor Vehicle Crash Data from the Fatality Analysis Reporting System and the General Estimates System.* The fact sheets and annual Traffic Safety Facts report can be accessed online at www-nrd.nhtsa.dot.gov/CATS.

^{**} Includes 44 fatalities of unknown sex
