cyber-based attacks and high-
technology crimes

Presenter:

Richard L. Kissel

CISSP, CISM, IAM

Information Technology Lab,
Computer Security Division,
National Institute of
Standards and Technology

Richard Kissel is a Senior
Information Security Analyst for the
National Institute of Standards and
Technology (NIST) in Gaithersburg,
MD. His primary functions at NIST are:
1. Review Federal agency information
security programs, and 2. Plan for and
conduct information security workshops
for small organization managers/staff.

Prior to joining NIST in 2001, he
worked as an Information Security
Analyst in the Computer Security Office
at the U.S. Small Business
Administration. He has worked in the
information security profession for over
15 years. He has earned a B.S. and
M.A. (Mathematics Major) from Austin
Peay State University. His Information
Security certifications include: Certified
Information Systems Security
Professional (CISSP), Certified
Information Security Manager (CISM),
and the National Security Agency
certification in Infosec Assessment
Methodology (IAM).

Computer Security

A Basics Workshop for Small Businesses

Thursday, February 5, 2009

8:30 am - 12:30 pm

Aupuni Center Conference Room

101 Pauahi Street

Hilo, Hawaii

The NIST Computer Security Division has developed a workshop
to **help the small business owner** increase information system
security.

- ◆ Learn how to define information security (IS) for your organization.
- ◆ Hear examples of common types of threats and understand how to determine the extent to which your organization should proactively address threats.
- ◆ Learn common Best Practices and procedures to operate more securely.
- ◆ Hear a basic explanation of current technologies used in reducing IS vulnerabilities and learn of resources SBA freely available to your organization.
