PHIS: Import/Export	PHIS: Import/Export	Standard Blue Background
The Public Health Information System (PHIS) will improve how FSIS operates here at home and across the world. This automated and efficient system will help to ensure the safety of imported and exported products.	The Public Health Information System (PHIS) will improve how FSIS operates here at home and across the world. This automated and efficient system will help to ensure the safety of imported and exported products.	Standard Blue Background
Import Inspection	Import Inspection	Standard Blue Background
From the Navigation Panel, import inspection personnel can view, read or add new import applications.		
PHIS allows for a web-based creation and update of import application, data collection of applicant/broker, consignee and importer of record.		
This screen shows the reason for refusal of a type of inspection (TOI) and the application, which can be sent to the applicant for comments or further action.		
Export	Export	Standard Blue Background
The application for export certificate will be viewable on the homepage.		
PHIS will allow for approval or denial of an export certificate and a history check of previous submittals.		
Here, the electronic generated pledge number that is recognized as the "electronic signature" is illustrated. The pledge allows FSIS employees to release an electronic export certificate.		

<p>For more information on PHIS, go to <a href="http://www.fsis.usda.gov/PHIS">www.fsis.usda.gov/PHIS</a>. Thank you for watching PHIS: Import/Export.</p>	<p>FOR MORE INFORMATION VISIT: <a href="http://www.fsis.usda.gov/PHIS">www.fsis.usda.gov/PHIS</a>.</p>	<p>Standard Blue Background</p>
