

SMB Information Security Seminar (2012)

Exercise 2 – Estimated costs from bad things happening to your important information.

First, think about the information used in/by your organization.

Second, enter into the table below your top two highest priority information types.

Third, enter *estimated* costs for each of the categories on the left. If it isn't applicable, please enter N.A.

Table 2 The 2 Highest Priority Information Types In My Organization and an estimated cost associated with specified bad things happening to them.
