

# American Community Survey

## Population: Questions on Income

### COMMUNITY BENEFITS

#### **Social Services**

Under the Older Americans Act, funds for food, health care, and legal services are distributed to local agencies based on data about elderly people with low incomes.

Data about income at the state and county levels are used to allocate funds for food, health care, and classes in meal planning to low-income women with children.

#### **Employment**

Income data are used to identify local areas eligible for grants to stimulate economic recovery, run job-training programs, and define areas such as empowerment or enterprise zones.

#### **Housing**

Under the Low-Income Home Energy Assistance Program, income data are used to allocate funds to areas for home energy aid.

Under the Community Development Block Grant Program, funding for housing assistance and other community development is based on income and other decennial census data.

#### **Education**

Data about poor children are used to allocate funds to counties and school districts. These funds provide resources and services to improve the education of economically disadvantaged children.
