### **Overview**

These instructions describe how to look up US Preventive Service Task Force (USPSTF) recommendations using a BlackBerry Storm/Torch device equipped with a touchscreen. The user can view all of the recommendations or search the database using specific information: age, sex, pregnancy status, tobacco use and sexual activity. Information is entered into the application using the search screen. The user can filter recommendations based on the grade of the recommendation (e.g., show only grade "A" recommendations).

# **Search for Recommendations**

#### **Search Screen**

Click the search button at the bottom of the screen to perform a targeted search for recommendations (Figure 1). All fields are optional. If no fields are selected, all recommendations in the program will appear after clicking "**Search**". Use the following steps for a targeted search based on age, sex and other factors:

- Select age between 0-99 (infants under the ages of 1 year old, enter 0).
- Select "Male" or "Female" from the drop-down list for patient sex. The recommendations for both sexes are displayed if "Both" is selected.
- Select "Yes" from the Pregnant drop-down list if a patient is pregnant.
- Select "Yes" from the "Tobacco User" drop-down list if patient is a Tobacco User.
- Select "Yes" from the "Sexually Active" drop-down list if patient is Sexually Active.
- Click "Search" button at the bottom of the screen to production search results.
- Click "Refresh" button to clear search criteria and start a new search.

AHRQ ePSS Search			
retrieve recommendations from the USPSTF PreventiveServices Database. All fields are optional.

Figure 1: Search Screen

#### Search Results

The screen displays the search criteria and the list of related the recommendations grouped into five tabs: Grade A, B, C, D, and I. Recommendations with the asterisk "\*" indicates a new grade definition. Click a recommendation to view the detailed information. (Figure 2)

Figure 2: Search Results Screen

#### **Recommendation Details**

Selecting a recommendation opens a screen to choose between the Recommendation Details screen and the Rick Factor Information screen if available (Figure 3). Not all recommendations contain Risk Factor information. Selecting the "**View Recommendation**" opens the

Recommendation Details Screen (Figure 4). The details screen displays the following tabs, General, Clinical Considerations (shown as Clinical), Rationale, and Tools. The title of the recommendation appears at the top of each tab. The information corresponding to the selected tab is displayed following the title. The Recommendation Detail tabs provide the following information:

- General: This tab contains the Grade Code, Specific Recommendation, Frequency of Service (if available) and Risk Information (if available) for the selected recommendation.
- Clinical Considerations (shown as Clinical): This tab contains the Specific Recommendation and Clinical Consideration information for the selected recommendation.
- Rationale: This tab contains the Specific Recommendation and Rationale information for the selected recommendation.
- Tools: This tab contains the Specific Recommendation and qualified Screening Tools for the selected recommendation.
