NOTE 1.—The annual-interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

NOTE 2.—The statement of population for 1860, 1870, and 1880, is by enumeration, and for other years from estimates prepared by Mr. E. B. Elliott, of this department.

NOTE 3.—The figures for July 1, 1870, were made by assuming pending funding operations to have been completed.

NOTE 4.—The Treasury loan per act of July 11, 1862, is included in the 4 per cent., from 1862 to 1868, inclusive, with the exception of the amount outstanding for August 31, 1863, the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., redeemable on ten-days' notice after thirty days, but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average for the year.

No. 6.—AMOUNT of the PUBLIC DEBT, including ACCRUED INTEREST thereon, less cash in the Treasury on the 1st day of July of each year, from July 1, 1869, to July 1, 1880, compiled from the published monthly debt-statements of those dates.

*It will be noticed that there is a difference between this statement and the one published herewith as No. 4, as to the amounts of the principal of the debt July 1, 1869, and July 1, 1870. This difference is explained thus: In the principal of the debt, as shown by the monthly debt-statements of those dates, the bonds purchased for the sinking-fund and paid for from money in the Treasury, were included as a part of the outstanding debt and were also treated in the cash as a cash item, or asset, for the reason that at that time there was no authority of law for deducting them from the outstanding debt. Congress, by the sixth section of the act of July 14, 1870, directed that these bonds should be canceled and destroyed, and deducted from the amount of each class of the outstanding debt to which they respectively belonged, and such deductions were accordingly made on the books of the department and in the table of the debt in the annual report.

NOTE.—For the outstanding principal of the public debt prior to 1869, see foregoing Table No. 4.

NOTE 1.—The amount of State and national bank circulation is compiled from the reports of the Comptroller of the Currency at the nearest dates obtainable to the end of each fiscal year; the other amounts are taken from the official printed reports of the Secretary of the Treasury.
 * NOTE 2.—Exclusive of \$8,375,984 amount estimated as lost or destroyed, act June 21, 1879.
 NOTE 3.—The one and two year notes of 1863 and the compound-interest notes, though having a legal-tender quality for their face-values, were in fact interest-bearing securities, payable at certain times, as stated on the notes. They entered into circulation for but a few days, if at all, and, since maturity, those presented have been converted into other interest-bearing bonds, or paid for in cash, interest included.
 NOTE 4.—The amount of fractional silver in circulation in 1860, 1861, and 1862 cannot be stated. The amounts stated for 1876, 1877, 1878, and 1879 are the amounts coined and issued since January, 1876. To these amounts should be added the amount of silver previously coined which has come into circulation.

^a In the column of "Production," the amount placed opposite the fiscal year is the production of the preceding calendar year. For example: The quantity stated in the column of "Production" opposite the year 1880 is the production of the calendar year 1879, since the exports of wheat and corn during the year 1880, were principally of the respective crops of the calendar year 1879. The production of both wheat and corn during the year 1869 is taken from the census report of the succeeding year. The production for the other years is taken from the annual reports of the Department of Agriculture.

NOTE.—The production of sugar and molasses in Louisiana is stated upon the authority of M. Champoiner for the period prior to 1861, and for the later years upon the authority of M. Louis Bouchereau. These authorities give both the number of hogsheads and the number of pounds for each year, with the exception of the year 1861-'62, for which year only the number of hogsheads is given. The number of pounds of sugar produced during that year has, however, been computed by estimating the weight of the hogshead at 1,150 pounds.

a Prior to the year 1864 the tonnage of British Columbia is combined with that of the British Possessions on the Atlantic; subsequent to that period they are shown in a separate column.

b A small portion of the tonnage from the United Kingdom during these years entered at lake ports, and has been deducted from the total tonnage entered from that country, which will account for the apparent discrepancy between these figures and those of the regular annual statements of navigation.

c No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

a This statement is the result of original estimates, made by Mr. J. R. Dodge, from annual returns to the Department of Agriculture, of the comparative condition and area of the crop and price of product; and as to quantity of production, mainly from the official records of manufacture and exportation. It has been demonstrated that returns of production of tobacco, which bears a heavy tax, are uniformly under-estimates, whether census returns or those of the Department of Agriculture; a fact in accord with the experience of all governments with respect to voluntary statistical returns of taxed products. The prices are the average home or farm value of leaf-tobacco.
