— Represents zero. ¹ Source: U.S. National Weather Service, <<http://www.spc.noaa.gov/climo/torn/monthlytornstats.html>>.

A violent, rotating column of air descending from a cumulonimbus cloud in the form of a tubular- or funnel-shaped cloud, usually characterized by movements along a narrow path and wind speeds from 100 to over 300 miles per hour. Also known as a "twister" or "waterspout." ² Source: National Hurricane Center (NHC), Coral Gables, FL, unpublished data. For data on individual hurricanes, see <<http://www.nhc.noaa.gov/>>.

0.1 to 0.9.....	—	—	—	—	—	—	1	—	—	1	UT	139
No magnitude	415	434	507	333	540	73	13	22	20	16	OR	73

— Represents zero. ¹ Data are as of July 20, 2010. ² The total number represents earthquakes of a magnitude range of 3.5 and greater. ³ The number of earthquakes is underreported. Events in the magnitude range of 3.5 to 4.0 in the Aleutian Islands are not recorded on enough seismograph stations to be located.
