

Implementation Guidance for [Executive Order 13579](#)  
Docket Number AD12-6

Entering Notes to Corrected EQR Filings

Under Docket Number AD12-6, the Commission stated that it has implemented an informal policy that allows EQR filers to correct 12 quarters worth of data.

When making corrections to EQR filings that may occur beyond the 12 quarter threshold, the following information should be put into the Special Notes section that appears after you have selected “Submit Filing to FERC” for every quarter and year in which you make corrected filings:

- Date mistakes were discovered,
- Description of corrections made,
- Quarters and years in which corrections were made, and
- Quarters and years that may contain data that was not corrected.
