

# Medicare Fee-for-Service Recovery Audit Program Appeals Update– June 2012

The Tax Relief and Health Care Act of 2006 instructed the Centers for Medicare & Medicaid Services (CMS) to adopt the Recovery Audit program nationwide. There are currently 4 Recovery Auditors tasked with detecting and correcting past improper payments. Recovery Auditors are paid on a contingency fee basis, and to ensure accuracy in determinations, the CMS retracts any contractor payment for denials later overturned on appeal. The CMS continues to strive for the upmost transparency in conducting the program, and will therefore begin posting appeals information for provider reference. The first update is listed below, and includes the aggregate data for Fiscal Year 2011.

## CLAIMS DENIALS OVERTURNED ON APPEAL FY 2011

Number of claims with overpayment determinations	903,372
Number of claims where the provider appealed (any level)	56,620
Number of claims with appeal decisions in provider's favor	24,548
Percentage of appealed claims with a decision in provider's favor*	43.4%
Number of claims where provider did not appeal	846,752
Percentage of claims overturned on appeal for all denials	2.7%

*The number of claims that have been appealed is limited to claims originating in FY 2011, with appeals initiated through 9/30/2011. Each level of the appeal process has statutory timeframes that provide due process to providers. Since these timeframes extend beyond the end of the fiscal year, each update will represent a snapshot in time to ensure accurate data.*
